CIT	Corporate Income Tax
CIABOC	Commission to Investigate Allegations of Bribery and Corruption
CKDU	Chronic Kidney Disease of Unknown
CMO	Commodity Market Outlook
COPA	Committee on Public Accounts
CPA	Child Protection Authority
CPC	Ceylon Petroleum Corporation
CPI	Consumer Price Index
CPL	Chilaw Plantations Limited
CRA	Colombo Rubber Auction

LIST OF ACRONYMS

CSE	Colombo Stock Exchange
CTA	Colombo Tea Auction
CUB	Committed Undisbursed Balance
DFCC	Development Finance Corporation of Ceylon
DLB	Development Lotteries Board
DRL	Debt Repayment Levy
DRP	Debt Relief Package
DTET	Department of Technical Education and Training
ECT	East Container Terminal
EDSL	Excise Department of Sri Lanka
EDR	Extended Disaster Relief
e-GP	electronic Government Procurement
EMDEs	Emerging Markets and Developing Economies
EMEs	Emerging Market Economies
EPF	Employees' Provident Fund
EPL	Elkaduwa Plantations Limited
ESC	Economic Service Charge
ETF	Employees, Trust Fund
ETFB	Employees Trust Fund Board
FCBUs	Foreign Currency Banking Units
FCTFF	Foreign Currency Term Financing Facility
FDI	Foreign Direct Investment
FGPCs	Farmer's Grain Preservation Centers
FOB	Free on Board
FPSF	Fuel Price Stability Fund
FSRU	Floating Storage Regasification Unit
FRS	Fiscal Risk Statement
FSS	Fiscal Strategy Statement
G to G	Government to Government
GDP	Gross Domestic Products
GIZ	German International Cooperation
GOR	Gross Official Reserves
GOSL	Government of Sri Lanka
GVA	Gross Value Added
GWh	Giga Watt hours
GWP	Gross Written Premium
HDFC	Housing Development Finance Corporation Bank
HDL	Hotel Developers Lanka Limited
ICT	Information and Communication Technology
ILO	International Labbour Organisation
IMF	International Monetary Fund

LIST OF ACRONYMS

IOM	International Organization for Migration
IPP	Independent Power Producer
IRCSL	Insurance Regulatory Commission of Sri Lanka
IRD	Inland Revenue Department
ISBs	International Sovereign Bonds
IT/BPO	Information Technology and Business Processing Outsourcing
ITMIS	Integrated Treasury Management Information System
ITN	Independent Television Network
JEDB	Janatha Estates Development Board
JICA	Japan International Corporation Agency
KGLL	Kahatagaha Graphite Lanka Limited
KOICA	Korean International Cooperation Agency
KPL	Kurunegala Plantations Limited
KTFL	Kalubiwitiyana Tea Factory Ltd
kWh	Kilo Watt hours
LBT	Loss Before Tax
LC	Letter of Credit
LCBs	Licensed Commercial Banks
LFPR	Labour Force Participation Rate
LIBOR	London Inter Bank Offered Rate
LMSL	Lanka Mineral Sands Limited
LNG	Liquefied Natural Gas
LSL	Lanka Sathosa Limited
M_{2b}	Board Money
MCU	Medium Corporate Unit
MEs	Micro Enterprises
MFA	Micro Finance Act, No.6 of 2016
MILCO	Milco (pvt) Ltd
MRPs	Maximum Retail Prices
MSC	Management Service Circular
MSD	Medical Supply Division
MSMEs	Micro, Small and Medium Enterprises
MTDS	Medium-Term Debt Management Strategy
MTFF	Medium-Term Fiscal Framework
NBT	Nation Building Tax
NCGI	National Credit Guarantee Institute
NCPI	National Consumer Price Index
NCRCS	New Comprehensive Rural Credit Scheme
NCRE	Non – Conventional Renewable Energy
NITF	National Insurance Trust Fund
NLB	National Lotteries Board

LIST OF ACRONYMS

NLDB	National Livestock Development Board
NPL	Non-Performing Loans
NRFC	Non-Resident Foreign Currency
NSB	National Savings Bank
NVQ_	National Vocational Qualifications
NWS&DB	National Water Supply and Drainage Board
OD	Overdrafts
OGA	Other Government Agencies
OPEC	Organization of Petroleum Export Countries
PAL	Ports and Airport Development Levy
PAYE	Pay – As – You – Earn
PB	Peoples Bank
PBT	Profit Before Tax
PDMA	Public Debt Management Act
PDMO	Public Debt Management Office
PDNA	Post-Disaster Needs Assessment
PFIs	Participatory Financial Institutions
PFM	Public Finance Management
PFMA	Public Finance Management Act
PIT	Personal Income Tax
PLC	Public Limited Company
PMB	Paddy Marketing Board
PMCUs	Primary Medical Care Units
PMU	Project Management Unit
PRC	Project Review Committee
PSB	Pradeshiya Sanwardana Bank
RAMIS	Revenue Administration Management Information System
RDB	Regional Development Bank
RFC	Resident Foreign Currency
RFI	Rapid Financing Instrument
RFP	Request for Proposals
RII Act	Regulation of Insurance Industry Act, No. 43 of 2000
ROA	Return on Assets
ROE	Return on Equity
RPCs	Regional Plantation Companies
RSS1	Rubber Smoked Sheet 1
S & P	Standard and Poor's
SEPI	Self-Employment Promotion Initiative
SAGT	South Asia Gateway Terminals
SCL	Special Commodity Levy
SD&CC	State Development and Construction Corporation

LIST OF ACRONYMS

SDA	Special Deposit Account
SDFR	Standing Deposit Facility Rate
SDR	Special Drawing Rights
SEC	Securities and Exchange Commission
SEC	State Engineering Corporation
SJGH	Sri Jayawardanapura General Hospital
SLA	Sri Lanka Airlines
SLADC	Sri Lanka Ayurvedic Drugs Corporation
SLC	Sri Lanka Customs
SLDBs	Sri Lanka Development Bonds
SLECIC	Sri Lanka Export Credit Insurance Corporation
SLFR	Standing Lending Facility Rate
SLHB	Sri Lanka Handicraft Board
SLIBTEC	Sri Lanka Biotechnology Institute
SLIC	Sri Lanka Insurance Corporation
SLPA	Sri Lanka Ports Authority
SLRC	Sri Lanka Rupavahini Corporation
SLREIT	Sri Lanka Real Estate Investment Trust
SLSPC	Sri Lanka State Plantations Corporation
SLTB	Sri Lanka Transport Board
SLTDA	Sri Lanka Tourism Development Authority
SMELoC	Small and Medium Enterprise Line of Credit
SMEs	Small and Medium Enterprises
SMIB	State Mortgage and Investment Bank
SOBs	State Owned Banks
SOBEs	State Owned Business Enterprises
SOEs	State Owned Enterprises
SPC	State Pharmaceutical Corporation
SPMC	State Pharmaceutical Manufacturing Corporation
SRCC & T	Strike, Riot, Civil Commotion and Terrorism Fund
SRR	Statutory Reserve Ratio
SSCL	Social Security Contribution Levy
STC	State Timber Corporation
TEU	Twenty-Foot Equivalent Units
TIN	Tax Identification Number
TL	Telecommunication Levy
SVAT	Simplified Value Added Tax
TVET	Technical and Vocational Education and Training
UK	United Kingdom
UN	United Nations
UNCTAD	United Nations Conference on Trade and Development

LIST OF ACRONYMS

UNICEF	United Nations International Children's Emergency Fund
UNODC	United Nations Office on Drugs and Crime
UNIVOTEC	University of Vocational Technology
US	United States
USD	United States Dollar
USP	United States Pharmacopoeia
VAT	Value Added Tax
WB	World Bank
WEO	World Economic Outlook
WHO	World Health Organization
WHT	Withholding Tax
WTO	World Trade Organization
Y-O-Y	Year on Year

PART I

Macro-Fiscal Perspectives

01

Fiscal Policy, Strategy and Challenges

1.1 Overview

Sri Lanka demonstrated resilience in responding to the internal and external shocks arising from Cyclone Ditwah and the Middle East conflict. The conflict poses macroeconomic and fiscal risks, most immediately through the sharp depreciation of exchange rate, underscoring the need for continuous structural reforms over the medium term to long term. The fuel prices were the first to be affected, with knock-on risks to other macroeconomic variables, particularly tourist arrivals. To address the urgent needs of the people, the Government introduced a multifaceted relief programme in April 2026 to cushion the cost of living for households and vulnerable groups, while providing relief to the Ceylon Petroleum Corporation (CPC) and other fuel suppliers to maintain retail prices below the cost-reflective levels, and the National System Operator (NSO) for the provision of an electricity subsidy for consumers.

The relief programme included:

- A fuel subsidy of Rs. 15 billion provided to the CPC corresponding to quantities of 92 Octane Petrol and Lanka Auto Diesel sold during April 2026;
- An electricity subsidy of Rs. 15 billion to the NSO for consumers with monthly consumption below 180 units, as well as hotels, industries and businesses in the relevant consumer categories;
- An enhanced fertilizer subsidy for the Yala season, increasing the allowance per hectare for paddy farmers from Rs. 25,000 to Rs. 30,000 and for field crop cultivators from Rs. 15,000 to Rs. 18,000, up to a maximum of two hectares per farmer per season;
- Targeted cash transfers to Aswesuma beneficiaries, raising the Rs. 17,500 payments to Rs. 25,000 and the Rs. 10,000 payments to Rs. 15,000; and
- Relief measures to support the fisheries sector.

The ongoing Middle East conflict and the effective closure of Strait of Hormuz pose risks to Sri Lanka's economic stabilisation across several channels and at varying magnitudes. The trade deficit is expected to widen, given Sri Lanka's position as a net importer of oil, which accounts for approximately 25 percent of the total import bill. Remittance inflows face downside risk, as the Middle East accounts for approximately 50 percent of total remittances, notwithstanding the surge in remittances during the first four months of 2026. Tourist arrivals declined by 2.3 percent to 876,277 persons in the first four months of 2026, compared to 896,884 persons in the same period of 2025, with earnings falling by 19.4 percent to USD 1,111.0 million. Pressure on the exchange rate has added to the import burden, while headline inflation rose to 5.5 percent in May 2026 from 1.6 percent in February 2026. Gross official reserves of USD 6.8 billion as at end April 2026 provide a near-term buffer to manage these pressures. However, a prolonged conflict carries significant ramifications for macroeconomic stabilization and the protection of vulnerable segments of society.

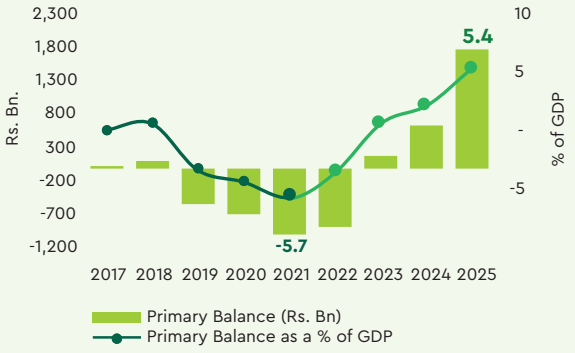

The Government is pursuing a forward-looking reform agenda to sustain the growth momentum, encompassing public financial management (PFM) reforms, energy sector reforms, strengthening social protection through the targeted Aswesuma programme, digitalization initiatives, export sector diversification, and improvements to the investment climate. The Middle East conflict has, however, introduced headwinds to the agenda, as reflected in key economic indicators.

2025 marked a significant milestone in Sri Lanka's post-crisis economic trajectory. The gains achieved through successive years of difficult but necessary reforms were reflected in broad-based economic expansion, strengthened fiscal balances, and improved external resilience. Sri Lanka entered 2025 with a renewed policy direction, underpinned by a clear mandate, an unwavering commitment to structural reform, and a firm resolve to sustain macroeconomic stabilisation in the long-term interests of the country.

The Government's engagement with the IMF commenced, following the approval of approximately USD 3 billion under the Extended Fund Facility (EFF), on March 20, 2023 for a 48-month arrangement with comprehensive reform package addressing deep-rooted challenges across fiscal, monetary, governance, and institutional areas. The technical assistance provided under the EFF has played a pivotal role in formulating and implementing a comprehensive reform programme to address the severe economic challenges, including those arising from Cyclone Ditwah and the Middle East conflict. To support efforts to address urgent balance-of-payments and fiscal pressures stemming from Cyclone Ditwah, the IMF Executive Board approved a disbursement of SDR 150.5 million (approximately USD 206 million) under the Rapid Financing Instrument (RFI).

Performance under the IMF-EFF programme in 2025 remained strong, and all quantitative performance criteria and indicative targets met at end-2025, except for the new external arrears arising from a cybercrime event. Most structural benchmarks due by end-December 2025 were either met or implemented with delay. All indicative targets for end-March 2026 were successfully achieved. Reflecting this notable performance, the IMF Executive Board completed the combined Fifth and Sixth Reviews under the EFF arrangement on May 27, 2026 providing the country with immediate access to SDR 508 million (approximately USD 695 million) to support economic policies and reforms. These constitute the sixth and seventh tranches received by Sri Lanka under the IMF-EFF programme, bringing total IMF financial support disbursed to date to SDR 1.778 billion (approximately USD 2.4 billion).

Box 1.2 I Reform, Recovery and Resilience: Sri Lanka's Progress Under the IMF Extended Fund Facility

Sri Lanka introduced a series of structural reforms through a four-year Extended Fund Facility arrangement with the International Monetary Fund (IMF-EFF), entered into in March 2023.

Three years into the programme, it has delivered substantial gains, moving the country from crisis to recovery and now towards stabilisation. However, the economy continues to face both external and domestic shocks that test its resilience. In November 2025, Cyclone Ditwah struck just as recovery momentum was building, inflicting severe humanitarian and economic damage. Subsequently, in late February 2026, the Middle East conflict triggered a renewed surge in global energy prices, adding fresh external pressures on an economy still in recovery. Sri Lanka's ability to navigate these sequential and compounding shocks—without abandoning fiscal discipline or reversing core reforms—reflects the institutional resilience that sustained reform had begun to create.

From Crisis to Recovery to Stabilization: Gains in 2025

By end-2025, Sri Lanka had achieved substantial and broad-based macroeconomic gains, driven by reforms implemented under the IMF-EFF programme.

All end-December 2025 Quantitative Performance Criteria (QPCs) and Indicative Targets (ITs) were met, with revenue and primary balance targets significantly exceeded. The central government primary balance (floor) target of Rs. 730 billion was surpassed, recording an over performance surplus of Rs. 1,756 billion. Central government tax revenue surpassed the QPC target of Rs. 4,350 billion by 16.1 percent, reaching Rs. 5,049 billion.

Box 1.2 I Reform, Recovery and Resilience: Sri Lanka's Progress Under the IMF Extended Fund Facility contd..

Structural reforms advanced across multiple fronts during 2025:

- The Fiscal Strategy Statement and Fiscal Risk Statement were published in June 2025 under the Public Financial Management Act, No. 44 of 2024 (PFMA).
- The Integrated Treasury Management Information System (ITMIS) was fully rolled out across all spending heads, strengthening expenditure commitment controls.
- The Medium-Term Debt Management Strategy 2025–2029 was published by the newly operationalized Public Debt Management Office, enhancing transparency in government borrowing.
- The Simplified Value Added Tax (SVAT) system was repealed with effect from October 1, 2025, and replaced with a risk-based refund scheme.
- Cost-recovery pricing for fuel was maintained throughout 2025 under the formula-based adjustment framework, while electricity tariffs were restored to cost-recovery levels in June 2025 through a 15 percent average tariff increase.
- The Companies Act was amended in August 2025 to introduce beneficial ownership requirements in line with Financial Action Task Force (FATF) standards, and the Beneficial Ownership Registry was operationalized.
- Amendments to the Strategic Development Projects Act and Port City Act introduced transparent, rules-based eligibility criteria for tax incentives.
- The Aswesuma social protection programme was expanded in 2025, with social spending targets met for the first time in the programme's history.

Cyclone Ditwah: Crisis Response and the Rapid Financing Instrument

On November 28, 2025, Cyclone Ditwah struck Sri Lanka, causing over 800 fatalities, affecting approximately 2 million people, and displacing more than 100,000 persons while disrupting the infrastructure, agricultural lands, and irrigation systems. In response, emergency relief measures were financed through expenditure reprioritization within the existing budget, rather than through monetary expansion or unplanned borrowing. The PFMA played a critical role: by invoking the escape clause under Section 16, the Government has accommodated additional relief and reconstruction expenditure through a transparent, rules-based mechanism. A supplementary budget was approved by Parliament, accompanied by a commitment to publish a fiscal recovery plan outlining the path back to the programme's established fiscal targets.

The Fifth Review under the IMF-EFF was nearing completion when the cyclone struck; a Staff-Level Agreement had been reached on October 9, 2025. Given the scale of the disaster and the time needed to assess its economic impact, comprehensively, Sri Lanka requested emergency financing under the Rapid Financing Instrument (RFI). On December 19, 2025, the IMF Executive Board approved SDR 150.5 million (approximately USD 206 million). The RFI served as a complementary emergency instrument, not a replacement for the IMF-EFF.

Combined Fifth and Sixth Review: Maintaining Momentum into 2026

On May 27, 2026, the IMF Executive Board approved the combined Fifth and Sixth Review under the EFF, authorizing SDR 508 million (approximately USD 695 million) in disbursements, representing the sixth and seventh tranches under the programme.

Box 1.2 I Reform, Recovery and Resilience: Sri Lanka's Progress Under the IMF Extended Fund Facility contd..

Key elements of the programme framework for 2026 include:

- **Temporary fiscal accommodation:** Fiscal policy was eased in 2026 to accommodate post-cyclone reconstruction permitting primary expenditure to exceed the 13 percent of GDP ceiling. The Government is committed to returning to the primary expenditure ceiling from 2027 onwards, with a fiscal recovery plan to be published outlining the path of adjustment.
- **Energy sector response:** Escalating geopolitical tensions in the Middle East in early 2026 drove a sharp rise in global energy prices. Fuel prices were adjusted twice in March 2026 to partially pass through higher import costs. In response, a targeted and time-bound package of fuel, electricity, and fertilizer subsidies was introduced, with a combined cap of Rs. 100 billion. Separately, the Ceylon Electricity Board was formally unbundled in March 2026, following Electricity Act amendments adopted in 2025— a landmark structural reform aimed at improving operational efficiency and transparency in the electricity sector.
- **Structural reform continuity:** Most structural benchmarks due by end-June 2026 are on track. Key reform priorities for the remainder of 2026 include the adoption of PFMA implementing regulations; the development of a Medium-Term Revenue Strategy (MTRS) informed by planned tax diagnostic assessments; the approval by Cabinet of a property taxation design and implementation plan; and the finalisation of the debt restructuring process by mid-2026.

Box 1.2 I Reform, Recovery and Resilience: Sri Lanka's Progress Under the IMF Extended Fund Facility contd..

The Broader Lesson: Reforms Build Resilience and Lay the Foundation for Sustained Growth

The year 2025 illustrates that the value of Sri Lanka's reform programme lies not only in the macroeconomic indicators it improved, but in the institutional resilience it built—the capacity to absorb severe shocks without abandoning fiscal discipline or reversing core reforms. Fiscal consolidation created emergency response capacity. Stronger reserve buffers enhanced external resilience. Debt restructuring reduced near-term financing pressures. Governance reforms strengthened policy credibility. The PFM framework ensured that even extraordinary emergency spending was managed with transparency and accountability.

Significant challenges remain. Public debt, while declining, remains elevated and will require sustained primary surpluses over the medium term. Global trade policy uncertainty and the Middle East conflict continue to pose risks to energy costs, trade flows, foreign inflows and external financing conditions. Climate-related vulnerabilities remain a major concern, as Cyclone Ditwah starkly demonstrated. As the IMF-EFF programme moves towards its conclusion in 2027, sustaining reform momentum beyond the programme— through domestic ownership of reforms, institutional discipline, and a continued commitment to fiscal sustainability—will be crucial for durable economic stability and long-term sustainability.

Series of much-needed structural reforms implemented by the Government are bearing fruit. Real GDP expanded by 5.0 percent for the second consecutive year in 2025. The current account of the balance-of-payments recorded a surplus for the third consecutive year, reflecting a structural improvement in Sri Lanka's external position relative to decades of persistent current account deficits. Headline inflation, which had transitioned into negative territory in late 2024 primarily due to reductions in energy prices, returned gradually to a low and stable positive level during 2025, consistent with the price stability objectives of the Central Bank of Sri Lanka.

These outcomes collectively reflect the combined impact of sustained policy reforms, strengthened institutional frameworks, and improved macroeconomic management, marking a decisive step forward in Sri Lanka's transition from crisis toward a more resilient and sustainable growth path.

Economic growth in 2025 was broad-based, with all three major sectors of the economy recording positive performance, reflecting a strengthening of underlying economic fundamentals, while per capita GDP surpassed the USD 5,000 level for the first time.

The industry sector expanded by 7.8 percent, supported by growth across construction, manufacturing, and mining and quarrying activities. Improved availability of inputs, easing cost pressures, and the gradual restoration of investor confidence contributed to the sustained expansion of industrial activity during the year.

The services sector, which remained the largest contributor to economic output at 54.6 percent of GDP, grew by 3.3 percent, driven by improvements in food and accommodation, financial services, information technology and related activities, and transportation. Tourist arrivals reached to 2,362,521 in 2025, with earnings from tourism amounting to USD 3.2 billion, reflecting a continued recovery in global travel and improvements in Sri Lanka's tourism offering.

The agriculture sector recorded moderate growth of 1.4 percent, supported by expansions in livestock, plant propagation, and key crop categories—including tea, coconut, and rice— despite weather-related disruptions that affected certain sub-sectors during the year.

On the demand side, investment expenditure grew by 22.4 percent at current market prices, supported by improved credit conditions, an easing monetary policy stance, and a recovery in business confidence. Private consumption expenditure, which accounted for 67.5 percent of GDP, increased by 6.0 percent, reflecting improvements in household incomes and the gradual normalisation of domestic economic activity.

The national savings-to-GDP ratio improved to 31.2 percent in 2025 from 27.6 percent in 2024, reflecting strengthened financial conditions and improved income levels across the economy. The broad-based nature of this expansion—encompassing all major sectors and both the consumption and investment components of demand—suggests that the recovery is grounded in improved economic fundamentals rather than temporary or sector-specific factors.

Monetary policy in 2025 remained accommodative, aimed at supporting the ongoing economic recovery while preserving the price stability achieved in earlier tightening cycles. The Central Bank of Sri Lanka (CBSL) reduced the Overnight Policy Rate (OPR) by 25 basis points to 7.75 percent in May 2025, maintaining it at that level through the remainder of the year, continuing the accommodative cycle initiated in June 2023 amid declining inflation and improving macroeconomic conditions. However, monetary policy was tightened on May 26, 2026, with the OPR raised by 100 basis points to 8.75 percent, reflecting the heightened uncertainties on both domestic and global fronts.

Headline inflation, as measured by the year-on-year change in the Colombo Consumer Price Index (CCPI), remained in negative territory for eleven consecutive months from September 2024 to July 2025, largely due to downward revisions in energy prices and favourable base effects. Inflation returned to positive territory in August 2025 and increased gradually to 2.1 percent by end-2025.

Inflation rose to 5.5 percent in May 2026, primarily due to elevated global fuel prices that necessitated a sharp upward adjustment in domestic fuel prices. This uptick is largely supply-driven, though demand-side pressures have strengthened, as reflected in the expansion of private sector credit and credit-driven imports, among others. Meanwhile, effective from May 25, 2026, a maximum loan-to-value (LTV) ratio of 70 percent for credit facilities secured by gold was introduced, while the maximum LTV ratios for motor vehicles were tightened to 60 percent for commercial vehicles and 40 percent for personal vehicles, to promote prudent lending practices and safeguard the resilience of financial institutions.

The performance of the Colombo Stock Exchange (CSE) reflected improved market confidence and investor sentiment, with the All-Share Price Index (ASPI) recording a significant increase of 41.9 percent to 22,624.3 points at end-2025, and market capitalization rising by 41.7 percent to Rs. 8,068.6 billion. The financial sector maintained overall stability during the year, with capital buffers remaining adequate and the impaired loan ratio declining from 12.3 percent at end-2024 to 9.7 percent at end-2025, although continued vigilance is warranted given the still-elevated level of non-performing assets. The ASPI reached a historic peak of 23,992.1 points in early 2026 before declining to a trough of 20,247.1 points by late March 2026, following the onset of the Middle East conflict, subsequently recovering to 22,199.2 points by May 27, 2026, reflecting the underlying resilience of domestic economic fundamentals.

Labour market conditions improved, with the unemployment rate declining to 3.9 percent in 2025 from 4.4 percent in 2024 and the labour force participation rate rising to 49.4 percent, reflecting the gradual absorption of workers into a recovering economy across all major sectors.

Fiscal performance was particularly noteworthy: the primary budget surplus reached 5.4 percent of GDP—the highest level recorded in Sri Lanka's fiscal history—and total tax revenue rose to 15.4 percent of GDP —the highest level recorded since 1997— driven by tax policy reforms, improvements in tax administration, and the broader recovery in domestic economic activity. Total government revenue including grants increased by 34.1 percent to Rs. 5,485.6 billion in 2025, raising the revenue-to-GDP ratio to 16.7 percent from 13.6 percent in 2024.

The current account of the budget recorded a surplus of 0.7 percent of GDP in 2025—the first such surplus recorded in the fiscal history of Sri Lanka—driven by strong revenue performance and contained growth in recurrent expenditure, signifying that government revenue was sufficient to meet its day-to-day expenses. The overall fiscal deficit narrowed to 2.3 percent of GDP in 2025, a substantial improvement from the double-digit deficit levels recorded during the crisis period.

The strong revenue performance in 2025 was supported by improvements across all major tax categories. The removal of temporary import restrictions on motor vehicles—in place since 2020—resulted in a significant increase in revenue from Excise Duty, Value Added Tax (VAT), and Customs Import Duty (CID). Excise Duty revenue from motor vehicles increased from Rs. 58.6 billion in 2024 to Rs. 471.8 billion in 2025. Revenue from VAT and CID on motor vehicles rose to Rs. 231.2 billion and Rs. 146.1 billion, respectively. Total revenue from CID including motor vehicles increased by 148.2 percent to Rs. 275.9 billion. Revenue from VAT including motor vehicles increased by 33.4 percent to Rs. 1,746.9 billion, supported by both the increase in import-related VAT collections and improved domestic VAT compliance, with the number of registered VAT taxpayers increasing by 56.3 percent to 33,187 by end-2025 from 21,227 by end December 2024. Income tax revenue increased by 11.0 percent to Rs. 1,139.4 billion, driven by higher salary levels, and the upward revision of corporate income tax rates on selected industries.

Notwithstanding the pressures emanating from the Middle East conflict and trade policy uncertainties, fiscal performance in the first four months of 2026 remained strong: tax revenue increased significantly by 31.7 percent to Rs. 1,776.9 billion; expenditure rose modestly by 8.0 percent to Rs. 1,853.3 billion; the primary balance recorded a surplus of Rs. 862.7 billion; and fiscal balance recorded a surplus of Rs. 105.0 billion.

With the debt restructuring process largely concluded, 2025 saw the benefits of these arrangements more clearly reflected in Sri Lanka's debt dynamics and fiscal position. The notable reduction in near-term debt service obligations—resulting from the restructuring agreements with official bilateral creditors and commercial bondholders—contributed to an easing of external financing pressures, creating additional fiscal space for essential public expenditure, social protection, and development activities.

Central government debt declined to 94.9 percent of GDP in 2025—as per PDMO—reflecting the combined effect of the debt restructuring, the strong primary surplus and the improvement in nominal GDP growth. The debt-to-GDP ratio is projected to continue declining over the medium term, in line with the debt sustainability objectives of the reform programme, with the remaining elements of the debt restructuring process expected to be completed by 2026. These developments indicate a meaningful improvement in Sri Lanka's debt position and support ongoing efforts to restore and maintain debt sustainability over the medium term.

The external sector recorded a strong performance in 2025, supported by improvements across key external inflow categories and the continued strengthening of the balance-of-payments position.

Earnings from exports increased by 6.3 percent to USD 13,581.4 million in 2025, reflecting improved performance across both industrial and agricultural exports. Industrial exports, led by textiles and garments, accounted for 77.0 percent of total export earnings, while

agricultural exports grew by 10.7 percent, with tea export earnings rising by 5.0 percent to USD 1,507.2 million. Expenditure on imports rose by 14.0 percent to USD 21,479.9 million in 2025. The widening of the trade deficit—greater expansion in import expenditure than the increase in export earnings—largely reflects economic normalization and the easing of import restrictions, rather than a deterioration in underlying external sector conditions.

Workers' remittances recorded a significant increase of 22.8 percent to USD 8,076.2 million in 2025, driven by higher departures for foreign employment and a continued shift toward formal remittance channels, supported by improved exchange rate stability and renewed confidence in the domestic banking system.

The current account of the balance-of-payments recorded a surplus of 1.6 percent of GDP in 2025, compared to a surplus of 1.2 percent of GDP in 2024, marking the third consecutive year of current account surplus and reflecting structural improvement in Sri Lanka's external position.

Gross official reserves increased to USD 6,838 million at end-2025 from USD 6,122 million at end-2024, while total external assets rose to USD 16.1 billion, reflecting a substantially stronger external buffer relative to the critically depleted reserve position experienced during the crisis period.

The Sri Lankan rupee depreciated by 5.6 percent against the US dollar during 2025 under the flexible exchange rate framework, reflecting increased import demand and external debt servicing obligations.

Box 1.3 | Reforms Implemented in 2025 towards Economic Stability

Sri Lanka has implemented wide-ranging and necessary reforms under the IMF-EFF programme to restore macroeconomic stability, strengthen revenue-based fiscal consolidation, reduce corruption vulnerabilities, enhance governance, and support sustainable development. These reforms cover key areas including economic and fiscal policy, legal and institutional frameworks, and digital transformation. The reform agenda has yielded positive outcomes, as reflected in the recovery of economic activity in 2025, the easing of inflationary pressures, stronger tax revenue mobilization, improved foreign exchange reserves, and the stabilizing effects of debt relief on the public. In this context, it is critical to sustain the reform momentum to address past policy weaknesses, secure long-term stability, and further improve the living standards of the people.

Key Reforms in 2025:

1. A New Legal Architecture for Fiscal Discipline

- Gambling Regulatory Authority Act, No. 17 of 2025 to establish a single independent authority to regulate all gambling activities.
- Sri Lanka Electricity (Amendment) Act, No. 14 of 2025 to provide a legal framework for unbundling the Ceylon Electricity Board.
- Strategic Development Projects (Amendment) Act, No. 26 of 2025 to introduce transparent, rule-based eligibility criteria for granting tax incentives.
- Publication of Tax Expenditure Statement to publicly disclose the revenue foregone through tax exemptions and concessions.
- Publication of Fiscal Strategy Statement, accompanying Fiscal Risks Statement to present a medium-term fiscal roadmap and a disclosure of fiscal risks.

Box 1.3 I Reforms Implemented in 2025 towards Economic Stability Contd...

2. Major Tax Policy Reforms: Broadening the Base, Indexing the Rates

With effect from January 11, 2025;

- Increase Excise duty for all excisable articles including liquor by 5.9 percent based on an annual inflation-adjusted indexation.

With effect from February 01, 2025;

- Imposition of Customs Import Duty at the rate of 20 percent and a surcharge of 50 percent on the importation of motor vehicles
- Increase Excise Duty on electric motor vehicles by 100 percent.
- Revision of the Luxury Tax on Motor Vehicles threshold by Rs. 1.5 million for each fuel category, except electric vehicles.

With effect from April 01, 2025;

- Increase Corporate Income Tax rate on liquor, tobacco, betting and gaming activities from 40 percent to 45 percent.
- Increase Withholding Tax rate on interest from 5 percent to 10 percent.
- Increase tobacco tax on beedi from Rs. 2 per stick to Rs. 3 per sticks effective from April 02, 2026.
- Increase personal income tax relief of an individual from Rs. 1,200,000/- per annum to Rs. 1,800,000/- per annum and revise the tax rates applicable on the taxable income of an individual.

Amendments to the Personal Income Tax (PIT) structure

Marginal Tax rate (%)	Annual Taxable Income (Rs. Mn.)	
	Previous Regime	current Regime
0	Up to 1.2	Up to 1.8
6	1.2 – 1.7	1.8 – 2.8
12	1.7 – 2.2	-
18	2.2 – 2.7	2.8 – 3.3
24	2.7 – 3.2	3.3 – 3.8
30	3.2 – 3.7	3.8 – 4.3
36	Over 3.7	Over 4.3

- Repeal of the Simplified VAT (SVAT) system with effect from October 01, 2025, and introduction of a risk-based VAT refund mechanism to expedite the refund process.
- Introduction of a Four-Band Customs Import Duty Structure of 0 percent, 10 percent, 20 percent, and 30 percent effective from April 01, 2026.
- Reduction of the registration threshold applicable for the Social Security Contribution Levy (SSCL) to Rs. 36 million per annum from Rs. 60 million per annum with effect from July 01, 2026
- Complete phasing out of the Para-Tariff CESS by 2029, with an initial 50 percent reduction of CESS applicable to intermediate inputs, effective from April 01, 2026.

Box 1.3 I Reforms Implemented in 2025 towards Economic Stability Contd...

3. Tax Administration and Institutional Re-tooling

Inland Revenue Department

- Criminal Investigation Unit pursued legal action against non-compliant individuals in 2025
- Introduction of a Simplified Individual Income Tax Return form for 2023/2024, including pre-populated data to reduce manual entry, simplify filing, and minimize tax evasion risks.
- Expansion of the Risk Management Unit and extension of risk-based audit mechanisms to individual taxpayers and small corporate entities to improve compliance monitoring.
- Strengthening of the Exporter Refund Unit following the abolition of SVAT, including its reorganization into verification and processing units, enabling risk-based VAT refunds within 45 days supported by RAMIS enhancements.
- Initiation of the National Electronic Invoicing System, with successful completion of Phase I pilot implementation for selected taxpayers with API-ready ERP systems.
- Establishment and operationalization of the Internal Affairs Unit to handle complaints and disciplinary matters.

Sri Lanka Customs

- Establishment of an Internal Affairs Unit and formalization of a Code of Conduct
- Implementation of the Automated Risk Management System (Phase One)
- Introduction of the Cargo Flow Consignment Release System
- Implementation of the e-Vessel System to facilitate the collection and recovery of vessel-related charges.
- Development of a system to monitor foreign exchange remittances.
- Signing of an MOU with Inland Revenue Department for combined audit and investigation activities Signing of an MOU between BOI and Sri Lanka Customs for facilitation of BOI special zones

Excise Department

- Established a risk management unit to identify, assess, and mitigate risks associated with excise revenue collection.
- Strengthening of Special Operations Bureau.
- Established a Financial Intelligence Unit (FIU).
- Initiation of the digitalization of the Revenue Administration System of the Excise Department (RASED).
- Signing of an MOU with the Sri Lanka Navy and the Inland Revenue Department to strengthen operational coordination and enhance revenue enforcement activities.

In addition to the improvements in macroeconomic indicators, 2025 saw significant progress in structural and institutional reforms, strengthening the foundations for sustainable and disciplined economic governance. The operationalization of the Public Debt Management Office (PDMO) in December 2024, followed by the publication of the Medium-Term Debt Management Strategy (MTDMS) 2025–2029 and the Annual Borrowing Plan 2025 in early 2025, gave effect to the new debt management framework and enhanced transparency in the Government's borrowing and debt risk management.

In addition, the PDMO continued to strengthen its institutional capacity and has been conducting domestic bond auctions since December 2025. The new debt management information system (Meridian) is expected to be operationalized, with payment procedures to be improved and the technical capacity of staff further strengthened.

The Fiscal Strategy Statement (FSS) and the accompanying Fiscal Risk Statement (FRS), published in June 2025 in accordance with the Public Financial Management Act (PFMA), further strengthened the fiscal discipline, transparency, and the predictability of fiscal policymaking by providing Parliament and the public with a structured account of the Government's medium-term fiscal objectives and the risks to their achievement.

On the tax administration front, the repeal of the Simplified Value Added Tax (SVAT) system on September 30, 2025 marked a significant structural reform. The SVAT system had contributed to administrative complexity over time. Its replacement with a risk-based VAT refund scheme for eligible exporters and projects has improved VAT compliance and exporters' cash flow, with refunds being processed within the legally mandated time-frame.

Meanwhile, the Inland Revenue Department (IRD) initiated a VAT compliance improvement programme in mid-2025, encompassing field visits, minimization of the use of temporary VAT numbers in collaboration with Sri Lanka Customs (SLC), and completion of Phase I of the taxpayer registry cleaning and updating exercise. In addition, an IRD modernization strategy and implementation plan was prepared to strengthen the compliance risk management. The High Wealth Individuals Unit (HWIU) conducted risk-based audits to improve tax compliance among high-risk individuals and companies.

Sri Lanka Customs (SLC) also implemented several tax administration improvement measures during 2025. The SLC commenced the development of an Automated Risk Management System in early 2025, comprising a Data Analytics Platform to integrate key Customs databases and a Customs Document Notification System launched in August 2025 to enhance real-time communication with importers, exporters, and licensed declarants. Meanwhile, the Excise Department of Sri Lanka (EDSL) progressed the Revenue Administration System for Excise Department (RASED)—a comprehensive digital platform to automate core excise operations—and initiated its integration with the SLC's ASYCUDA system to enable real-time verification of import data.

In 2025, the Government maintained cost-reflective pricing mechanisms for fuel and electricity, in line with the formula-based monthly adjustment framework for fuel and the semi-annual adjustment framework for electricity. However, these pricing mechanisms were temporarily disrupted by the sharp rise in fuel prices arising from the Middle East conflict escalated in early 2026, notwithstanding two fuel price increases in March 2026. The Government provided Rs. 15 billion to CPC to compensate for accumulated losses, while extending temporary support to the population through fuel, electricity, and fertilizer subsidies, as well as a one-off cash top-up to Aswesuma households, with the total relief package amounting to Rs. 100 billion.

The CPC restored the cost-recovery fuel pricing effective from May 1, 2026, with forward-looking cost-recovery electricity pricing will be restored in June 2026. The continued restoration of the pricing mechanism is expected to improve the financial sustainability of the CPC and reducing quasi-fiscal losses in the energy sector. The

unbundling of the Ceylon Electricity Board (CEB) is expected to improve operational efficiency, enhance transparency in electricity sector finances, and support the development of a more competitive and commercially viable electricity market.

Overall, these structural and institutional reforms reflect a sustained effort to address the underlying governance and institutional weaknesses that contributed to fiscal vulnerabilities and to improve the financial viability of State-Owned Enterprises (SOEs).

The Government is committed to enhancing governance and transparency in SOEs through Statements of Corporate Intent (SCI) underpinned by informed KPIs, and ensuring that all 51 major SOEs publish their audited financial statements by end-June of the following year. An SOE Bill is expected to be submitted to Parliament to assure the independence of boards of directors, reinforce the Ministry of Finance's oversight, and strengthen transparency, accountability, and governance.

Governance and anti-corruption reforms continued to advance in 2025, underpinned by the Government's commitment to strengthening institutional integrity as an integral component of the broader economic reform programme. The Commission to Investigate Allegations of Bribery and Corruption (CIABOC) was further strengthened during the year, with measures taken to safeguard its budgetary and staffing independence, accelerate recruitment, and enhance the effectiveness of the asset declaration system for public officials.

The implementation of the Government Action Plan (GAP) 2025 on governance reforms together with GAP 2026 was published in March 2026, as part of implementation of the Governance Diagnostic Assessment report published on September 30, 2023. Specific improvements to the asset declaration framework included the expansion of public access to published declarations, the revision of declaration forms to incorporate beneficial ownership information, and the operationalisation of an electronic declaration system, improving the transparency and integrity of the public sector disclosure regime. The Companies Act was amended in August 2025 to introduce beneficial ownership requirements in line with Financial Action Task Force standards, and the Beneficial Ownership Registry was operationalized, representing a significant step toward improving the transparency of corporate ownership structures and reducing associated corruption vulnerabilities.

The Strategic Development Projects Act and the Port City Act were amended, introducing transparent and rules-based eligibility criteria for the provision of tax incentives, limiting the types and duration of incentives, and improving disclosure requirements, thereby addressing a long-standing source of opacity in investment-related tax policy. The Investment and Trade Commission Act is expected to provide rules-based eligibility criteria for the granting of incentives.

In the area of Customs governance and trade facilitation, efforts continued to reduce discretionary intervention through improvements in risk-based assessment, and reduction in reliance on face-to-face document review of Customs declarations. From August 2025, the Government commenced the publication of quarterly reports on the implementation progress of anti-corruption measures by each revenue department, enhancing public accountability and transparency in revenue administration.

The Government also published the Tax Expenditure Statement 2023/2024 in February 2025, followed by an enhanced and more comprehensive version in November 2025, providing a detailed disclosure of the fiscal cost of existing tax exemptions, deductions, and concessions, and enabling Parliament and the public to better assess the revenue implications of tax policy decisions. Overall, these measures reflect continued progress in addressing the governance and institutional weaknesses.

Social protection remained a central pillar of the Government's policy priority agenda, with measures to strengthen the coverage, targeting, and delivery of welfare programmes, while extending support to public sector employees

and pensioners. The Government incurred 3.4 percent of GDP for household subsidies and transfers in 2025, of which 0.7 percent was spent on Aswesuma programme. Efforts have been made to improve beneficiary targeting through the onboarding of approximately 450,000 new applicants from the second application round launched in 2024 to address exclusion errors, and to accelerate disbursements under the Empowerment Programme, which provides skills training and livelihood grants to Aswesuma beneficiaries.

In 2025, stationery allowances were provided to children in underprivileged schools, reflecting the Government's commitment to supporting educational access for vulnerable households. Steps were also taken toward the introduction of the Integrated Welfare Management System, which will support the recertification of first-round Aswesuma applicants and improve the integrity and accuracy of the social registry.

In the area of public sector remuneration, a revision of public sector salaries was implemented with effect from April 2025, with the minimum monthly basic salary increased to Rs. 40,000 from Rs. 24,250, integrating interim and special allowances into the basic salary structure. Under the Budget 2025 proposals, a phased revision of the pensions of all public servants who had retired before January 2020 was announced, addressing long-standing pension anomalies and improving the financial well-being of retirees. These measures were made possible by the fiscal space generated through the strong revenue performance of 2025 and reflect the Government's approach of pursuing fiscal consolidation and social protection as complementary rather than competing objectives, ensuring that the gains of economic recovery translate into improved living standards across society.

The Government provided a swift response to Cyclone Ditwah, which made landfall in late November 2025, by providing emergency relief, restoring essential services, and supporting affected communities, while benefiting from the fiscal space built through strong revenue performance without undermining overall macroeconomic stability. In accordance with Section 16 of the Public Financial Management Act, No. 44 of 2024 (PFMA), the Government activated the escape clause provisions to accommodate the additional expenditure requirements for relief and reconstruction, providing a transparent and rules-based mechanism for a temporary deviation from the primary expenditure ceiling.

Box 1.4 | Governance Reforms in Sri Lanka: 2025 -2026 and Way Forward

Empirical research highlights that improvement in governance and political stability—including enforcement of the rule of law, strengthening of institutions, and reduction of corruption—positively impact on economic growth, particularly in developing countries. In this context, the Government recognized the importance of improving governance and establishing good governance practices from late 2024. The government is commitment to introducing and implementing governance reforms, with significant early achievements, including the enactment of the Proceeds of Crime Act, No. 5 of 2025; the strengthening of the Commission to Investigate Allegations of Bribery or Corruption (CIABOC) mandate; the restoration of elected local government following a seven-year suspension, and sustained investment in digitalization of public administration. Assessments by the International Crisis Group (April 2026) and Human Rights Watch (World Report 2026) recognized the government's anti-corruption efforts and economic management, while noting that these merit continued attention and progress. With a strong legislative mandate and a clearly articulated reform agenda, the Government is well positioned to build upon its foundational achievements and deliver meaningful, time-bound outcomes that advance governance and inclusive development in the years ahead.

Box 1.4 | Governance Reforms in Sri Lanka: 2025 -2026 and Way Forward contd...

Anti-Corruption Reform

Anti-corruption has emerged as a key governance pillar of the government, advanced under the 'Clean Sri Lanka' initiative across legislative, institutional, and enforcement dimensions. The Proceeds of Crime Act, No. 5 of 2025 marks a landmark step in Sri Lanka's anti-corruption framework, enabling authorities to seize, freeze, and dispose of illegally acquired assets without requiring a prior criminal prosecution. This represents a significant shift in the country's approach to combating corruption, strengthening its capacity to recover unlawfully acquired wealth and promote greater accountability. Complementing this, the National Anti-Corruption Action Plan 2025–2029 (NACAP) was formally launched on 9 April 2025 by the CIABOC with United Nations Development Programme (UNDP) support, structured around four strategic pillars encompassing prevention, institutional strengthening and enforcement, public education, and law and policy reform. The expanded CIABOC mandate under the Anti-Corruption Act, No. 9 of 2023 further broadened the Commission's jurisdiction to include money laundering, private sector bribery, and trading in influence, and resulted in over a dozen major investigations involving senior political figures and public officials. At the enforcement level, the Government has pursued high profile accountability measures.

Rule of Law and Civil Liberties

Progress in the area of rule of law and civil liberties has been measured, with several legislative and accountability commitments at an early stage of implementation. Notably, the Government has prioritized strengthening the Anti-Money Laundering and Countering the Financing of Terrorism (AML/CFT) framework, with amendments to the Convention on the Suppression of Terrorist Financing Act, No. 25 of 2005, the Prevention of Money Laundering Act, No. 5 of 2006, and the Financial Reporting Act, No. 6 of 2006 being progressed to strengthen compliance with international standards. The Online Safety Act, No. 9 of 2024 is in effect, and amendments are under consideration by the Government following public consultation. Sustained institutional follow-through across these areas will be essential to fulfilling the Government's reform commitments.

Public Administration and Digital Governance

The Government has demonstrated a sustained commitment to modernizing public administration, advancing a comprehensive digital transformation agenda across multiple tiers of government. Key initiatives include the establishment of the GovPay system to facilitate digital payments for government institutions, the introduction of online platform payments in place of cash-based transactions, and the rollout of the Sri Lanka Unique Digital Identity Project to support streamlined access to public services.

Further structural developments include the establishment of a Digital Economy Authority, the implementation of e-invoicing across relevant institutions, the creation of Virtual Special Economic Zones to attract digital investment, and continued investment in broader digital infrastructure projects. At the grassroots level, the e-Grama Niladhari Platform has been deployed to digitalise village-level administration, while the Digital Economy Advancement Programme supports inter-agency communication modernization and capacity-building across provincial and local government institutions.

Collectively, these initiatives are expected to yield measurable gains in government revenue through reduced leakages, improved tax compliance, and greater transactional transparency, while strengthening the efficiency, accessibility, and accountability of public service delivery. These developments reflect a coherent and forward-looking agenda to position Sri Lanka's public sector within a modern digital governance framework.

A supplementary budget of Rs. 500 billion was approved by Parliament to support relief and reconstruction efforts, with spending prioritized in line with the recovery needs identified in the Post-Disaster Needs Assessment. Consistent with the requirements of the PFMA, the Government committed to publishing a fiscal recovery plan outlining the measures and timeline to return to the established fiscal rules following the activation of the escape clause. The ability to respond to a major natural disaster through established institutional mechanisms, while maintaining overall macroeconomic stability and other commitments, reflects the strengthening of Sri Lanka's fiscal and institutional frameworks over the reform period.

Despite the substantial progress achieved in 2025, significant challenges and risks remain, requiring continued reform efforts and careful policy management in the period ahead.

The announcement of reciprocal tariff measures by the United States in 2025 demonstrated Sri Lanka's vulnerability to external trade shocks, which necessitates diversification of exports and penetration of new markets, improving export competitiveness, and accelerating the conclusion of free trade agreements with strategic partners. The Government is committed to advancing a National Export Strategy and trade facilitation reforms, including the phasing out of para-tariffs and engagement with regional trading arrangements, to strengthen the resilience of the external sector.

In the period ahead, geopolitical developments, particularly stemming from the Middle East conflict are expected to introduce renewed uncertainty in global energy markets, with implications for fuel import costs, domestic energy pricing, and the sustainability of cost-reflective fuel pricing mechanisms. Managing these pressures while protecting vulnerable households and maintaining fiscal sustainability will require careful and coordinated policy responses.

The progress achieved in 2025 provides a strong foundation for the period ahead; however, sustaining and building on the gains will require continued commitment to the reform programme. The continued deepening of structural reforms that underpin long-term competitiveness and inclusive growth will be essential to translating macroeconomic stability into sustained improvements in living standards and economic sustainability.

1.2 Economic Conditions in 2025

Sri Lanka's economy sustained its growth momentum in 2024 and 2025, recording a real GDP growth rate of 5 percent in both years despite challenges arising from adverse weather events, global uncertainties, and geopolitical tensions. The broad-based growth was sustained throughout the year, with each quarter recording positive growth across in all three major sectors—agriculture, industry, and services. This robust economic performance was supported by improved macroeconomic conditions, policy reforms, stronger external sector performance, and renewed confidence.

Figure 1.1 | Quarterly GDP Growth Rate
(Percent)

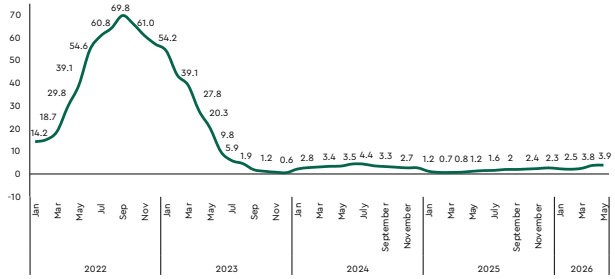

Source : Department of Census and Statistics

Deflation persisted through the first seven months of 2025, after which inflation turned positive in August 2025 and continued to rise gradually thereafter. Deflationary trend in early 2025 was driven by downward revision to electricity tariffs in January 2025 and partly offset by price increases stemming from VAT adjustments. This deflationary trend began to ease from March 2025 due to the increase in food inflation and upward revisions to electricity tariffs in June 2025. Food prices increased notably in December 2025 due to supply disruptions stemming from adverse weather conditions and elevated festive demand. Headline Inflation, as measured by the year-on-year change in the Colombo Consumer Price Index (CCPI, 2021=100), increased to 2.1 percent

at end 2025 from deflation of 1.7 percent at end 2024. The National Consumer Price Index (NCPI, 2021=100) based Y-o-Y headline inflation also followed a similar trend, accelerating to 2.9 percent by end 2025 from -2.0 percent by end 2024. Inflation thus returned to positive territory by end 2025, reflecting a gradual move toward the Central Bank's medium-term inflation target of 5 percent, supported by a more accommodative monetary policy stance.

Inflation escalated further in May 2026, driven mainly by supply-side shocks arising from the impact of the Middle East conflict.

Figure 1.2 | Monthly Movements of Y-o-Y Headline Inflation - Colombo Consumer Price Index (CCPI)

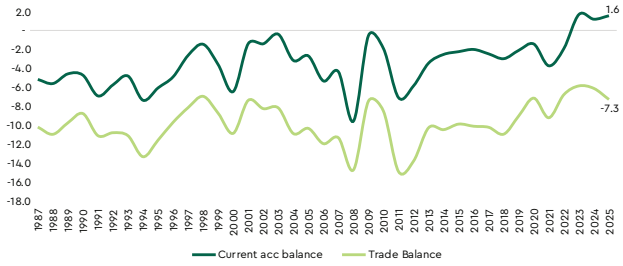

Source : Department of Census and Statistics
Note: January 2022 – January 2023 based on CCPI (2013=100) and February 2023 – May 2025 based on CCPI (2021=100)

The unemployment rate declined to 3.9 percent in 2025 from 4.4 percent in 2024, indicating a gradual integration of workers into economic activities. The labour force participation rate increased to 49.4 percent in 2025, from 47.4 percent in 2024. Departures for foreign employment decreased by 1.1 percent to 311,223 persons in 2025, while skilled labour migration dropped by 3 percent, indicating a contraction in the outflow of skilled workers.

According to the World Bank's Sri Lanka Development Update, Sri Lanka's poverty rate is projected to decline to 22.7 percent in 2025 from 24.5 percent in 2024. Despite this gradual improvement, poverty levels remain significantly higher than the pre-pandemic rate of 11.3 percent recorded in 2019, underscoring the persistent socioeconomic impacts of recent economic shocks and the uneven pace of recovery. Sustained and well-coordinated policy efforts are therefore essential to address persistently high poverty levels and ensure an inclusive recovery, stable livelihoods, and resilient income sources.

Figure 1.3 | Trade Balance and Current Account Balance
(As a percentage of GDP)

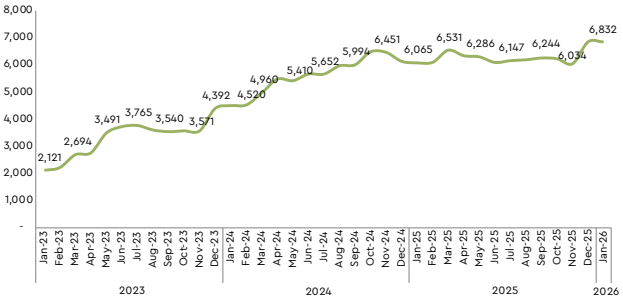

Source : Central Bank of Sri Lanka

The external sector strengthened in 2025, recording a current account surplus for the third consecutive year amidst heightened global volatility. The current account recorded a surplus of USD 1.7 billion in 2025, compared to a USD 1.2 billion surplus in 2024, supported by a services account surplus, strong performances in workers' remittances and tourism earnings.

Tourism earnings increased to USD 3.2 billion in 2025, recording marginal growth of 1.6 percent compared to 2024, while workers' remittances increased to USD 8.1 billion in 2025 from USD 6.6 billion in 2024. The trade deficit widened to USD 7.9 billion in 2025 from USD 6.1 billion in 2024, driven by a notable increase in vehicle imports following the removal of import restrictions, together with higher imports of investment goods.

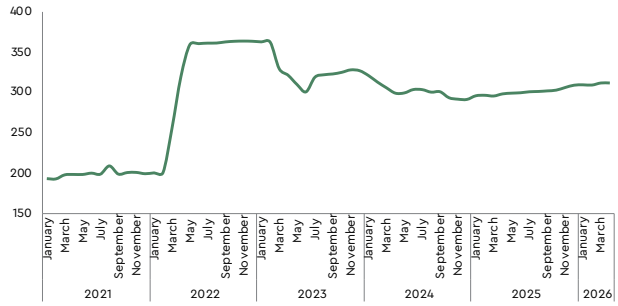

Figure 1.4 | Gross Official Reserves
(USD Million)

Source : Central Bank of Sri Lanka

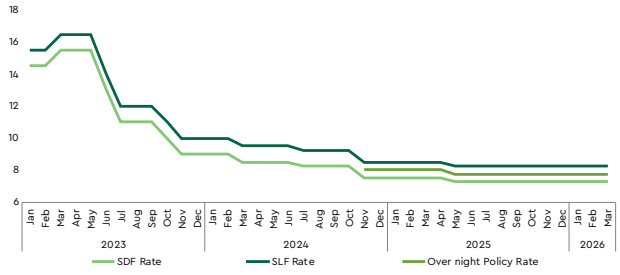

Gross official reserves (GOR) increased to USD 6.8 billion at the end of 2025 from USD 6.1 billion at the end of 2024. Substantial net foreign exchange purchases by the Central Bank from the domestic foreign exchange market, together with inflows from the International Monetary Fund, World Bank, and the Asian Development Bank, were the main drivers of the increase in GOR. The Sri Lankan rupee depreciated modestly by 5.6 percent against the US dollar in 2025, mainly due to increased imports, particularly higher vehicle imports following the removal of import restrictions.

Figure 1.5 | Exchange Rate Movements
(LKR/USD)

1.3 Fiscal Performance

Total revenue and grants increased by 3.2 percentage points to 16.7 percent of GDP in 2025 from 13.6 percent of GDP in 2024, mainly driven by the relaxation of import restrictions on motor vehicles and tax revenue measures, including administrative improvements. The expenditure-to-GDP ratio declined to 19.0 percent in 2025 from 20.4 percent in 2024, due to the containment of recurrent expenditure, particularly the reduction in interest payments and expenditure on goods and services.

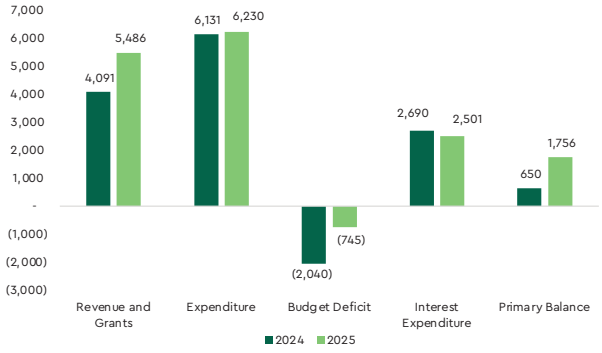

Figure 1.7 | Major Fiscal Balances
(As a percentage of GDP)

Source : Department of Fiscal Policy

Accordingly, the primary surplus in 2025 increased to 5.4 percent of GDP, representing the highest level recorded in history. In parallel, the overall budget deficit narrowed to 2.3 percent of GDP. Meanwhile, the current account balance registered a surplus of 0.7 percent of GDP in 2025.

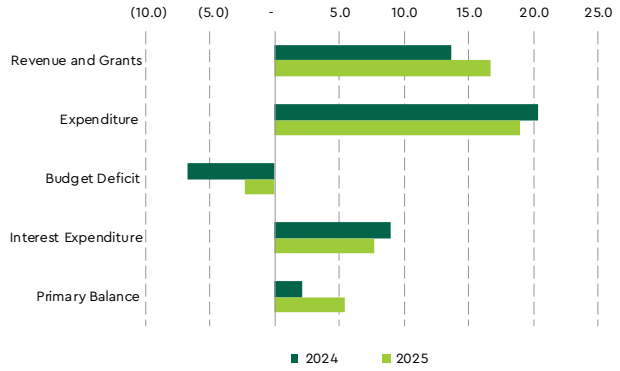

Figure 1.8 | Government Fiscal Operations 2024/2025
(Rs. Billion)

Source : Department of Fiscal Policy

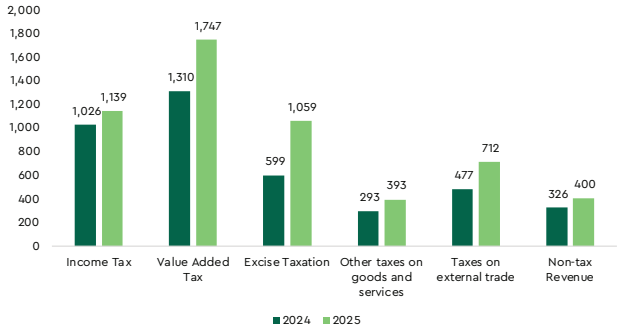

In nominal terms, total revenue and grants increased by 34.1 percent to Rs. 5,485.6 billion in 2025 from Rs. 4,090.8 billion in the previous year. Total expenditure marginally increased by 1.6 percent to Rs. 6,230.4 billion in 2025 from Rs. 6,130.7 billion in 2024. Accordingly, the primary surplus increased to Rs. 1,755.8 billion, while the overall budget deficit narrowed to Rs. 744.9 billion in 2025.

Figure 1.9 | Government Fiscal Operations 2024/2025
(As a percentage of GDP)

Source : Department of Fiscal Policy

Figure 1.10 | Revenue Performance 2024/2025
(Rs. Billion)

Source : Department of Fiscal Policy

Government Revenue

Total government revenue, including grants, increased significantly by 34.1 percent to Rs. 5,485.6 billion in 2025. This growth was primarily driven by a substantial increase in tax revenue, which rose by 36.3 percent to Rs. 5,049.2 billion from Rs. 3,704.6 billion in the previous year.

Consequently, the tax-to-GDP ratio improved by 3.1 percentage points to 15.4 percent in 2025 from 12.3 percent in 2024. This strong tax revenue performance was mainly driven by an increase in revenue from goods and services taxes of 45.3 percent to Rs. 3,198.1 billion, and an increase in income tax revenue of 11.0 percent to Rs. 1,139.4 billion, and an increase in tax revenue from external trade of 49.1 percent to Rs. 711.7 billion. The increase in tax revenue is largely supported by higher revenues from motor vehicle imports following the relaxation of import restrictions, increased domestic VAT collections, the implementation of revenue policy measures introduced in 2025 Budget, and strengthened tax administration efforts.

Revenue from Excise Duty increased by Rs. 460.2 billion, or 76.9 percent, to Rs. 1,058.7 billion in 2025 from Rs. 598.5 billion in 2024, driven by revenues from motor vehicle imports together with the upward revision of unit tax rates on excisable articles—including liquor, motor vehicles, cigarettes, and sugar-based beverages—by 5.9 percent, following the implementation of inflation-adjusted indexation in January 2025.

Revenue from Value Added Tax (VAT) increased by Rs. 437.2 billion, or 33.4 percent, to Rs. 1,746.9 billion in 2025 from Rs. 1,309.7 billion in 2024. This increase was primarily driven by higher revenue collections following the removal of import restrictions on motor vehicles, as well as the expansion of domestic economic activities, including in the financial services sector.

Revenue from import duty increased significantly by Rs. 164.7 billion, or 148.2 percent, to Rs. 275.9 billion in 2025, primarily driven by the increase in imports, particularly motor vehicle imports, emerging as the largest contributor to external sector revenue. Meanwhile, revenue generated from the Special Commodity Levy (SCL), CESS, and Ports and Airports Development Levy (PAL) increased by 42.9 percent to Rs. 164.6 billion, 11.4 percent to Rs. 90.4 billion, and 6.4 percent to Rs. 180.9 billion, respectively, thereby contributing positively to external trade revenue in 2025 compared to the previous year.

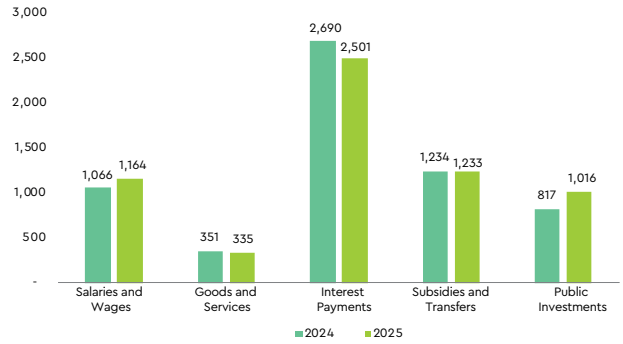

Revenue from income tax also increased due to the implementation of revenue policy measures announced in the 2025 Budget, including the imposition of a 15 percent Corporate Income Tax (CIT) on the export of services, the increase in CIT on liquor, tobacco, betting, and gaming industries to 45 percent from 40 percent, and the increase in Withholding Tax (WHT) on interest income to 10 percent from 5 percent, along with strengthened tax administration measures, particularly within key revenue collecting institutions.

Non-tax revenue, including fees and charges, profits and dividends, rent income, and interest income, increased by 22.7 percent to Rs. 400.2 billion in 2025 from Rs. 326.3 billion in 2024, reflecting the acceleration of economic activities.

Government Expenditure

Total government expenditure increased marginally by 1.6 percent to Rs. 6,230.4 billion in 2025 from Rs. 6,130.7 billion in 2024. Recurrent expenditure declined slightly by 2.0 percent to Rs. 5,232.4 billion in 2025 from Rs. 5,339.9 billion in 2024. Recurrent expenditure represented approximately 84 percent of total government expenditure in 2025, highlighting the continued prevalence of recurrent spending relative to capital expenditure.

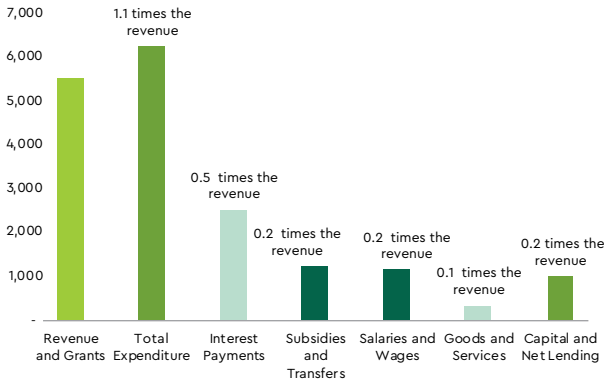

Figure 1.11 | Government Expenditure
(Rs. Billion)

Source : Department of Fiscal Policy

This decline in recurrent expenditure is largely attributed to the contraction in interest payments by Rs. 188.8 billion, or 7.0 percent, to Rs. 2,500.7 billion in 2025 from Rs. 2,689.5 billion in 2024, reflecting lower payments on both domestic and external debt. As a percentage of GDP, interest payments declined by 1.3 percentage points to 7.6 percent in 2025 from 8.9 percent in 2024. In addition, expenditure on goods and services declined by 4.6 percent to Rs. 334.7 billion in 2025 from Rs. 350.9 billion in 2024.

Figure 1.12 | Government Revenue and Expenditure - 2025
(Rs. Billion)

Source : Department of Fiscal Policy

Expenditure on subsidies and transfers stood at Rs. 1,233.1 billion in 2025, remaining approximately unchanged compared to the previous year. However, expenditure on priority social welfare programmes increased in 2025, with spending on Aswesuma increasing by 27.7 percent to Rs. 238.0 billion from Rs. 186.0 billion in 2024, while expenditure on free medicine, including the nutrition programme, rose by 25.4 percent to Rs. 187.1 billion.

Expenditure on salaries and wages increased by 9.2 percent to Rs. 1,163.9 billion in 2025 from Rs. 1,066.0 billion in 2024. As a percentage of GDP, salaries and wages rose by 0.1 percentage points to 3.6 percent in 2025 from 3.5 percent in 2024. This expansion in expenditure on salaries and wages was primarily driven by the upward revision of the salary structure of public servants, as announced in Budget 2025, together with the recruitment of new public servants.

[a] Based on the economic classification of government fiscal operations.

[b] Provisional

Expenditure on capital and net lending increased by 26.2 percent to Rs. 998.0 billion in 2025 from Rs. 790.8 billion in 2024. As a percent of GDP, capital and net lending increased by 0.4 percentage points to 3.0 percent in 2025 from 2.6 percent in 2024. Public investments increased by 24.3 percent to Rs. 1,015.8 billion in 2025 from Rs. 817.1 billion in 2024. As a percent of GDP, public investments increased to 3.1 percent in 2025 from 2.7 percent in 2024. The execution rate of public investment stood at 77.2 percent of the annual budget estimate in 2025.

Figure 1.13 | Major Components of Recurrent Expenditure
(As a percentage of GDP)

Source : Department of Fiscal Policy

The persistent rigidity of recurrent expenditure makes it difficult for the Government to reduce such expenditure in the near term. Notwithstanding this, the total government expenditure-to-GDP ratio of 19–20 percent remains broadly comparable to that of peer countries. In 2025, interest payments absorbed 45.9 percent of total revenue, a significant improvement from nearly 80.5 percent in 2023.

Expenditure on salaries and wages accounted for 21.4 percent of total revenue, while subsidies and transfers represented 22.6 percent of total revenue, reflecting the Government's continued efforts to cushion vulnerable segments of society.

Financing the Budget

The budget deficit of Rs. 744.9 billion was largely financed through domestic sources, which accounted for 80.9 percent of total financing, amounting to Rs. 602.5 billion. Net non-bank domestic financing stood at Rs. 496.1 billion, reflecting the Government's continued reliance on market-based domestic borrowings.

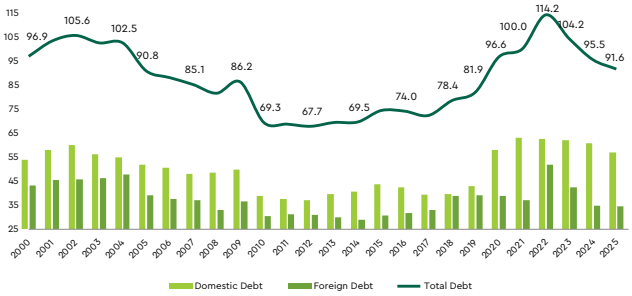

Net external financing accounted for 19.1 percent of total financing, amounting to Rs. 142.4 billion, comprising gross borrowings of Rs. 566.9 billion against repayments of Rs. 424.5 billion in 2025.

Central Government Debt (Gross)

Outstanding central government debt rose by 5.0 percent to Rs. 31,109 billion in 2025 from Rs. 29,624 billion in 2024, according to the Public Debt Management Office. Domestic debt increased by 2.9 percent to Rs. 19,434 billion in 2025 from Rs. 18,892 billion in 2024.

Outstanding foreign debt also increased by 8.8 percent to Rs. 11,675 billion in 2025 from Rs. 10,732 billion in 2024. As a percentage of GDP, central government debt fell to 94.9 percent in 2025 from 98.4 percent in 2024. Outstanding domestic debt declined to 59.3 percent of GDP in 2025 from 62.8 percent in 2024, whereas outstanding foreign debt remained broadly unchanged at 35.6 percent of GDP in both 2024 and 2025.

1.4 The Role of Fiscal Policy in Macroeconomic Stabilization

Fiscal policy continued to play a pivotal role in safeguarding macroeconomic stability and sustaining the momentum of economic recovery. Fiscal discipline strengthened, with overperformance reflected across key fiscal aggregates, recording a historically high primary balance of 5.4 percent of GDP, which helped reduce borrowing needs. The primary surplus overperformance has reinforced the credibility of the ongoing fiscal consolidation path. Enhanced expenditure prioritization, continued rationalization of recurrent spending, and sustained progress in tax policy and revenue administration reforms collectively expanded fiscal space.

These outcomes strengthened investor confidence, supported a favorable sovereign risk perception, and contributed to a more stable and resilient macroeconomic environment. The improved fiscal position also created greater headroom for growth-enhancing public investments while maintaining the primary surplus trajectory consistent with medium-term debt sustainability objectives.

In line with the structural reform agenda for SOEs, the 50 major SOEs excluding the CEB recorded a profit of Rs. 483.2 billion in 2025, compared to Rs. 397.5 billion in 2024. The overall profits of all 51 SOEs declined by 17.6 percent to Rs. 444.4 billion in 2025, owing to a net loss of Rs. 38.7 billion incurred by the CEB. Collections from SOEs in the form of levies and dividends increased to Rs. 56.5 billion in 2025 from Rs. 41.1 billion in 2024. This improvement was supported by the consolidation of key reforms introduced in 2025, encompassing the approval by the Cabinet of Ministers for the closure, restructuring, or merger of several non-commercial SOEs, approval for the liquidation of 33 non-functional SOEs, the drafting of the Public Commercial Enterprises Management Bill to manage them on a commercial footing, and the implementation of a State-Owned Banks (SOBs) reform policy to appoint independent directors to the boards, among others. Meanwhile, the Sri Lanka Electricity (Amendment) Act, No. 14 of 2025 was enacted in August 2025, introducing a national energy policy and national tariff policy and establishing six Government-owned companies to unbundle the functions of the CEB. The General Treasury infused Rs. 25.28 billion as equity capital into SriLankan Airlines (SLA) in 2025 to ease liquidity pressures while supporting the debt restructuring process, including the restructuring of USD 175 million in international bonds. Furthermore, comprehensive guidelines for the preparation of annual reports have been introduced to enhance transparency and accountability.

Fiscal policy not only played a critical role in macroeconomic stabilization but also demonstrated remarkable resilience in the aftermath of Cyclone Ditwah, the most devastating natural disaster in the country's history. This event stands as a testament to the strength of the fiscal policy framework established through the reform agenda. The cyclone resulted in widespread destruction across multiple sectors, placing exceptional and unanticipated demands on public resources. However, the fiscal buffers built through disciplined consolidation, improved expenditure management, and expanded fiscal space enabled the Government to deliver a swift and effective response without compromising macroeconomic stability or derailing the fiscal adjustment path. The ability to absorb and respond to a shock of this magnitude, while sustaining the broader reform agenda, underscores the critical importance of sound fiscal policy — not only as a tool for economic management under normal conditions, but also as the first line of defense in safeguarding economic stability and protecting the welfare of citizens in the face of extraordinary adversity.

1.5 Fiscal Strategy in the Medium Term

The Medium-Term Fiscal Framework (MTFF) is anchored on achieving sustainable real GDP growth of 5 percent, maintaining inflation around 5 percent, ensuring a resilient external sector, preserving exchange rate stability, and safeguarding hard-earned macroeconomic stability over the medium term.

The Medium-term Fiscal Outlook is anchored around: –

- Maintaining government revenue above 15 percent of GDP in 2026 and increasing it over the medium term.
- Maintaining primary expenditure under 13 percent of GDP and maintaining public investments over 4 percent of GDP, from 2027 onwards.
- Achieving a primary surplus of at least 2.6 percent of GDP by 2027 and maintaining at least the same level over time.
- Achieving the budget deficit of less than 5 percent of GDP by 2027 and maintaining it over the medium-term.
- Reducing central government debt gradually to bring down the debt to a sustainable level.

The MTFF prepared based on the macroeconomic and fiscal parameters will be published in the Fiscal Strategy Statement accompanying Fiscal Risk Statement to be announced by end June 2026. It demonstrates the government's dedication to long-term fiscal stability through collective efforts to enhance revenue, rationalize expenditure, and implement structural reforms. The MTFF captures the anticipated outcomes of both current and upcoming reforms in areas of tax policy and administration, public financial management, the restructuring of SOEs, and debt management. The MTFF plays a vital role in shaping fiscal policy decisions in alignment with the debt sustainability targets and reform milestones of the Government.

Although the 2025 fiscal aggregates surpassed annual estimates, the primary balance is projected to moderate to 1.0 percent of GDP in 2026, while primary expenditure is expected to increase to 14.3 percent of GDP, exceeding the 13.0 percent ceiling. This deviation is primarily due to the allocation of Rs. 500 billion as a supplementary estimate in response to Cyclone Ditwah. To finance these disaster relief measures, the Government utilize the over-performance of the primary surplus.

The Government is committed to maintaining primary expenditure at 13.0 percent of GDP, with the primary surplus sustained at least 2.6 percent of GDP, reaffirming its medium-term fiscal consolidation trajectory in line with the IMF-EFF programme targets.

Box 1.5 | Fiscal Rules and Governance

Sri Lanka enacted the Public Financial Management Act, No. 44 of 2024 (PFMA) in 2024, repealing the Fiscal Management (Responsibility) Act, No. 03 of 2003 (FMRA), which had established a set of numerical fiscal rules. The PFMA introduced a comprehensive legal framework for fiscal responsibility, transparency, and accountability, anchored by a set of binding fiscal rules. Beyond a mere reporting instrument, the PFMA establishes for transparency, accountability, discipline, effectiveness, efficiency in managing public finances, while clarifying institutional responsibilities at all levels government.

Key fiscal rules requirements under the PFMA:

- Prepare and publish an annual Fiscal Strategy Statement (FSS) on or before 30 June each year, providing Parliament and the public with a formal statement of fiscal strategy prior to budget preparation;
- Maintain a rolling five-year Medium-Term Fiscal Framework (MTFF) that includes a primary balance target, a primary expenditure ceiling, and fiscal aggregate projections; and
- Publish in-year fiscal position reports, a mid-year fiscal review, and a final budget position report to ensure sustained public accountability.

The Four Fiscal Rules outlined in the PFMA

Under the PFMA's fiscal responsibility framework, our interlocking fiscal rules are designed to anchor debt sustainability and prevent the recurrence of fiscal crises.

Amendments to the Personal Income Tax (PIT) structure

Fiscal Rule	Statutory Requirement
Debt Reduction Objective	The Government shall ensure that public debt is reduced to and maintained at a sustainable level, as specified in the Fiscal Strategy Statement and the Medium-Term Fiscal Framework.
Primary Balance Target	An annual primary balance target shall be set for the upcoming financial year and the four succeeding financial years, consistent with the debt reduction objective, expressed as a percentage of forecast nominal GDP.
Primary Expenditure Ceiling	Primary expenditure of the Government shall not exceed 13 percent of the estimated nominal gross domestic product for the relevant financial year.
Government Guarantee Ceiling	The aggregate stock of outstanding government guarantees at the end of each financial year shall not exceed 7.5 percent of the average GDP of the relevant financial year and the preceding two financial years.

Rule 1: Debt Reduction Objective

The debt reduction objective is particularly significant in Sri Lanka's context. Following the 2022 debt default and the successful restructuring of external and domestic debt, restoring debt sustainability is the cornerstone of the country's macroeconomic recovery programme. The PFMA enshrines this debt reduction objective in law, providing it with the statutory force necessary to anchor medium-term fiscal framework.

Box 1.5 I Fiscal Rules and Governance Contd...

Section 10(a) of the PFMA establishes the overarching fiscal objective to ensure that public debt is reduced to and maintained at a sustainable level. This is not a numerical cap but a qualitative anchor, all other fiscal targets and policies must be consistent with this objective. The proposed timeframe for achieving a sustainable debt level shall be included in the annual FSS, ensuring that the debt trajectory is transparently reported and subject to Parliamentary scrutiny.

Rule 2: Primary Balance Target

Section 14 of the PFMA requires that the MTFF include an annual primary balance target, defined as the difference between government revenue and primary expenditure (i.e., expenditure excluding interest payments), expressed as a percentage of forecast nominal GDP and set for the upcoming financial year and each of the four succeeding years. This target is required to be consistent with the debt reduction objective, linking the fiscal flow target to the stock-of-debt anchor.

This rule functions as the central medium-term fiscal anchor. Unlike a simple deficit rule, a primary balance rule focuses on the part of the fiscal position directly under government control (i.e., excluding the inherited cost of existing debt). A sustained primary surplus signals the Government's capacity to service debt over time. The IMF-EFF programme has established an overall primary balance target of +2.3 percent of GDP, and the PFMA institutionalises the practice of setting and publishing such targets in a rolling medium-term framework through the annual FSS.

Rule 3: Primary Expenditure Ceiling of 13% of GDP

Section 15 of the PFMA introduces an annual ceiling on primary expenditure—government spending excluding interest payments on public debt— which shall not exceed 13 percent of estimated nominal GDP in each financial year. This ceiling is operationalised as an absolute rupee figure in the annual budget, derived from the GDP percentage limit.

The rule includes an escape clause that allows temporary deviation from the expenditure ceiling in the event of a natural disaster, epidemic, national security emergency, or a severe economic downturn, subject to Parliamentary notification and the publication of a plan for returning to compliance. This provides necessary flexibility while maintaining the rule's credibility as an anchor under normal conditions.

Rule 4: Government Guarantee Ceiling of 7.5% of GDP

Section 17 of the PFMA caps the aggregate stock of outstanding government guarantees at 7.5 percent of the average GDP of the relevant financial year and the two preceding financial years. This three-year average base reduces the ceiling's sensitivity to year-to-year GDP volatility, providing a more stable benchmark. The limit is subject to review every five years to ensure alignment with the prevailing debt reduction objective.

This rule directly addresses one of the key drivers of Sri Lanka's debt crisis: the accumulation of large contingent liabilities through guarantees extended to loss-making SOEs, particularly CEB and CPC. By placing a statutory cap on the total guarantee stock, the PFMA limits the potential crystallization of off-balance-sheet liabilities into direct government debt.

Box 1.5 I Fiscal Rules and Governance Contd...

Governance beyond the numbers

Well designed and credibly enforced fiscal rules are among the most powerful instruments of fiscal governance. The empirical literature finds a robust positive relationship between the presence of binding fiscal rules and lower public debt, smaller deficits, and stronger fiscal discipline, particularly in countries emerging from episodes of fiscal stress. The four rules introduced under the PFMA address governance not merely by imposing numerical limits, but by fundamentally changing how fiscal decisions are made, disclosed, and held to account. Each rule works through distinct governance channels.

Transparency: Making the Fiscal Position Visible and Verifiable

A fundamental weakness of Sri Lanka's pre-crisis fiscal governance was opacity. Public debt had been systematically understated, SOE liabilities were kept off-balance sheet, and medium-term fiscal plans were treated as non-binding. The PFMA's fiscal rules directly reverse this.

The debt reduction objective requires the Government to publicly disclose, in the annual FSS, a concrete timeframe and trajectory for reducing public debt to a sustainable level. The primary balance target reinforces this by requiring the Government to publish its projected fiscal path, expressed in standardized, comparable GDP terms, for five years forward. Citizens, market participants, and development partners are thereby enabled to assess not just the current fiscal position, but the Government's stated commitment and trajectory.

Most significantly for governance perspective, the government guarantee ceiling brings contingent liabilities—historically the least transparent segment of Sri Lanka's public finances—within a statutory disclosure and reporting framework. The PFMA requires the outstanding stock of guarantees to be calculated, reported, and monitored against a binding limit at the end of every financial year. This converts what was previously an off-balance-sheet fiscal risk into a visible, auditable, and constrained liability. Fiscal transparency of this kind has been shown to be positively correlated with lower sovereign borrowing costs and stronger credit ratings, as it reduces the information asymmetry between the government and its creditors.

Accountability: Creating Enforceable Commitments

Fiscal targets that exist only in budget speeches are easily abandoned. The FMRA's targets were amended multiple times without consequence, undermining any credibility the framework may have had. The PFMA's rules are structurally different; they are embedded in statute, and the Act requires a formal assessment of compliance or non-compliance with each target to be published in the FSS and in the final budget position report (Annual Report). Any deviation from the primary expenditure ceiling must be explained, and a plan for returning to compliance presented to Parliament.

The primary balance target creates an explicitly measurable, annually assessed benchmark. Because the target is defined as a percentage of GDP and published five years ahead, it is both observable and comparable.

Box 1.5 I Fiscal Rules and Governance Contd...

The primary expenditure ceiling is particularly strong in its accountability effect. Because it applies to every supplementary budget and appropriation bill—not just the original annual budget—it prevents the common practice of circumventing fiscal targets through in-year supplementary spending. The Minister of Finance seeking to authorize expenditure above the statutory ceiling must present a formal escape clause declaration to Parliament, creating a clear, visible accountability event. In Sri Lanka's history, unconstrained supplementary budgets were a major vehicle for fiscal slippage; the ceiling directly closes this governance gap.

Constraint on Executive Discretion: Limiting the Deficit Bias

The 13 percent primary expenditure ceiling is the most direct constraint on executive discretion. By placing a hard statutory limit on aggregate primary spending—regardless of what individual ministries demand or what political pressures arise—the rule forces fiscal trade-offs to be made explicitly and transparently within the budget process, rather than resolved by deficit financing. This shifts the fiscal decision making, from executive convenience toward a rules-based framework with explicit Parliamentary oversight.

The government guarantee ceiling addresses an indirect but equally important dimension of executive discretion. The use of guarantees as a quasi-fiscal instrument to extend politically motivated support to SOEs while keeping the expenditure off the budget. The 7.5 percent cap transforms what was previously an unconstrained executive privilege into a legislatively bounded decision. When the guarantee stock approaches the ceiling, the Government must make an explicit, public choice—which guarantee to extend, which to withdraw, and how to manage the associated fiscal risk.

Intergenerational Equity: Distributing Fiscal Burdens Fairly

The PFMA's overarching fiscal responsibility objective, as outlined under Section 9, explicitly includes intergenerational equity as a governing principle—the obligation of the current generation of decision-makers not to impose unsustainable fiscal burdens on future citizens. This principle is operationalised through the fiscal rules.

The debt reduction objective, by requiring a credible and publicly disclosed debt reduction trajectory, prevents governments from borrowing today to finance current consumption at the expense of future taxpayers who inherit the debt service burden. The primary balance target, by requiring a surplus sufficient to reduce the debt to GDP ratio, ensures that each year's budget makes a positive contribution to restoring intergenerational fiscal balance. Together, these two rules embed a long-horizon discipline.

Fiscal Credibility: Anchoring Market and Investor Confidence

Fiscal governance operates not only through domestic accountability mechanisms but also through its effect on the expectations of creditors, investors, and international partners. In Sri Lanka's post-restructuring context, restoring market confidence is both economically imperative and essential for re-establishing governance credibility.

Box 1.5 I Fiscal Rules and Governance Contd...

Numerical fiscal rules with statutory force provide a stronger credibility signal precisely because they are harder to revise silently. Any amendment to the PFMA's fiscal targets requires Parliamentary approval, which is observable and politically costly. This is further reinforced by publishing a fiscal path five years ahead and providing creditors and investors with a basis for assessing the sustainability of the Government's fiscal stance.

Conclusion

The four fiscal rules introduced under the PFMA represent a meaningful advance in Sri Lanka's fiscal governance architecture. Rather than merely setting numerical limits, they provide Parliament and the public with a structured basis for scrutinizing how fiscal decisions are made, disclosed, and held account. The debt reduction objective and primary balance target impose transparency obligations and long-horizon discipline on a political process that previously privileged short-term spending. The primary expenditure ceiling constrains executive discretion and closes the supplementary budget loophole that historically accommodated fiscal slippage. The government guarantee ceiling brings the opaque dimension of public liability— SOE contingent risk—within a statutory accountability framework for the first time.

1.6 Mitigation of Macro-fiscal Risks and Way Forward

The Middle East conflict presents a high likelihood of generating both downside and upside macro-fiscal risks adversely affecting economic growth and the external sector while elevating inflationary pressures. To mitigate these impacts, the Government announced a targeted and time-bound fiscal relief programme, as a temporary measure to support individuals and energy suppliers, thereby reducing potential fiscal risks. In the same vein, maintaining cost-reflective energy prices remains a cornerstone policy to minimize the future burden on the public. The recent monetary policy tightening— achieved by raising OPR by 100 basis points to 8.75 percent—is expected to support domestic price stability by curbing the escalation of energy prices and easing pressure on the external sector, containing import demand and anchoring inflation expectations.

It is important to steer the reserve building exercise, given the usable reserve—accounting for People's Bank of China (PBOC) Swap conditions—stand at USD 5.4 billion as at end-April 2026, which is sufficient to cover 2.4 months of imports.

Despite the impressive performance of fiscal sector, marked by record primary and budget surpluses in the first four months of 2026, debt to GDP ratio remains under pressure owing to ongoing external vulnerabilities across the globe. In this context, it is important to further strengthen the fiscal consolidation efforts to withstand recurring domestic and external vulnerabilities.

In addition, the formulation of a Medium-Term Revenue Strategy (MTRS) and budgetary framework aligned with Government's policy priorities would help ensure fiscal sustainability. Furthermore, to address the persistent under-execution of capital expenditure, a medium-term public investment programme should be implemented decisively, with bottlenecks across the project cycle— from inception through to implementation— systematically resolved in line with the Government's broader policy objectives, thereby spurring economic growth over the medium to long-term.

Meanwhile, continued growth-enhancing structural reforms—encompassing trade liberalization, export diversification, foreign direct investment attraction, digitalisation drive, and labour market and energy sector reforms—alongside efforts to address recurring climate-related vulnerabilities and protect vulnerable segments of society, are expected to preserve hard-won gains and support inclusive growth for sustained macroeconomic stability. The key to the successful and smooth implementation of the reform agenda lies in building the capacity of staff and institutions while continually improving underlying processes.

02

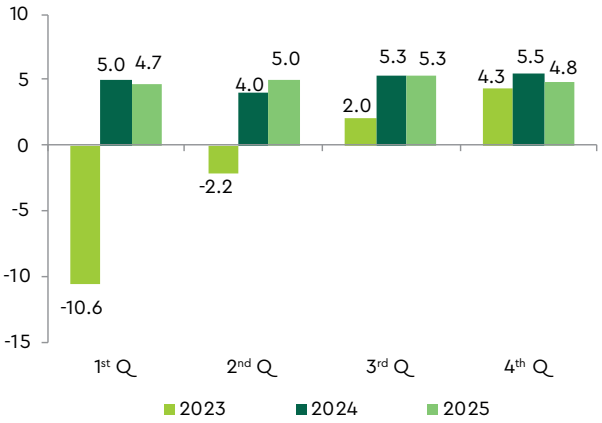

Economic Developments in 2025

2.1 Overview

In 2025, Sri Lanka registered robust economic growth of 5.0 percent for the second consecutive year, reflecting resilience to both domestic and external headwinds. This was underpinned by hard-won gains from structural economic reforms, including the removal of restrictions on motor vehicles. This growth was achieved amidst global uncertainties emanating from US tariffs and geopolitical tensions, together with the severe weather conditions that prevailed in the latter part of the year. More importantly, this performance is all the more remarkable given the catastrophic impact of Cyclone "Ditwah" in late November, which inflicted an estimated USD 4.1 billion in direct losses. Inflation returned to positive territory, after remaining negative for eleven consecutive months, while core inflation stayed positive throughout 2025. The unemployment rate dropped to 3.9 percent in 2025. The Central Bank adopted a more accommodative monetary policy stance, which helped reduce interest rates, thereby increasing private sector credit growth in 2025. Benefiting from increased remittances and the record surplus in the services account, among others, a surplus in the current account was recorded in 2025. Gross official reserves increased to USD 6.8 billion at end-December 2025, supported by increased purchases of foreign exchange. The financial sector remained stable. The Government remains committed to implementing growth-enhancing reforms to sustain economic momentum.

Sri Lanka's economic growth is broad-based, underpinned by expansion across all three major sectors. The industrial sector recorded significant growth of 7.8 percent in 2025, with substantial contributions from the manufacturing, construction and mining and quarrying sub-sectors. Making the highest contribution of 54.6 percent to GDP, the services sector expanded by 3.3 percent in 2025 compared to 2.4 percent growth in 2024, mainly due to the expansion in financial service activities, transportation activities, accommodation, food and beverage service activities and IT programming consultancy and related activities. The agriculture sector demonstrated modest growth of 1.4 percent, driven by the expansion of animal production, growing of oleaginous fruits and growing of rice. Domestic demand grew by 10.2 percent in current prices in 2025, driven by increases in consumption and investment expenditure of 5.9 percent and 22.4 percent, respectively. National savings grew by 23.2 percent in current prices in 2025, mainly attributable to an 18.1 percent growth in domestic savings.

Figure 2.1 | Quarterly Growth Rates of GDP
(Percent)

Source: Department of Census and Statistics

Table 2.1 | Sectoral GDP Growth Rates in 2025 (%)

Sector	Q1	Q2	Q3	Q4	Annual
GDP (Nominal)	**3.7**	**10.0**	**11.9**	**10.0**	**8.8**
Agriculture	5.1	16.0	6.0	7.5	8.7
Industry	4.4	7.6	11.4	11.5	8.6
Services	1.3	4.6	5.5	2.6	3.4
GDP (Real)	**4.7**	**5.0**	**5.3**	**4.8**	**5.0**
Agriculture	-1.3	2.5	2.2	2.1	1.4
Industry	9.8	5.7	7.9	7.3	7.8
Services	2.7	4.0	3.6	3.1	3.3

Source: Department of Census and Statistics

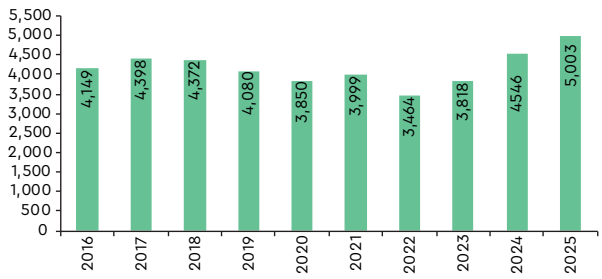

The external sector sustained its growth momentum, resulting in a notable surplus in the external current account for the third consecutive year. However, the trade deficit widened amid the recovery in merchandise imports. The sharp increase in tourism earnings and the steady rise in workers' remittances contributed significantly to accumulating foreign exchange reserves, easing external financing pressures, and strengthening overall external sector stability. The current account balance as a percentage of GDP recorded a surplus of 1.6 percent in 2025 compared to a surplus of 1.2 percent in 2024. The merchandise trade deficit widened to 7.3 percent of GDP in 2025 compared to 6.1 percent in 2024, due to a larger expansion in import expenditure relative to export earnings. Tourism earnings remained at USD 3.2 billion in 2025, while workers' remittances rose significantly by 22.8 percent to USD 8.1 billion in 2025.

Gross Official Reserves (GOR) increased to USD 6.8 billion at end-2025 from USD 6.1 billion at end-2024, mainly due to the receipts from multilateral institutions and net foreign exchange (forex) purchases by the Central Bank. The exchange rate depreciated by 5.6 percent at end-2025, compared to an annual appreciation of 10.7 percent at the end of 2024, mainly due to the widening trade deficit and external debt servicing obligations.

The Central Bank adopted a more accommodative monetary policy stance to anchor inflation around the 5 percent medium-term target and facilitate credit flows to productive sectors in support of economic recovery. The Overnight Policy Rate (OPR) was reduced by 25 basis points to 7.75 percent at end May-2025 and maintained at that level throughout the year. Meanwhile, the unemployment rate dropped to 3.9 percent in 2025 from 4.4 percent in 2024, reflecting increased economic activity.

Year-on-year headline inflation, as measured by the Colombo Consumer Price Index (CCPI, 2021=100), increased to 5.5 percent by end-May 2026 from -0.7 percent a year earlier, while that measured by the National Consumer Price Index (NCPI, 2021=100) rose to 4.7 percent by end-April from -0.8 percent a year earlier. Inflation is gradually converging toward the Central Bank's medium term target, supported by its flexible inflation targeting framework.

Figure 2.2 | Per Capita GDP
(USD)

Source: Department of Census and Statistics

The stock market demonstrated robust growth in 2025, driven by rising investor confidence amid an ongoing series of economic and anti-corruption measures. The All-Share Price Index (ASPI) gained 41.9 percent to 22,624.3 points at end-2025 from 15,944.6 points at end-2024, while the Standard & Poor's Sri Lanka 20 (S&P SL20) index rose 26.6 percent to 6,157.4 points from 4,862.1 points over the same period. Market capitalisation increased by 41.7 percent to Rs. 8,068.6 billion at end-2025, from Rs. 5,695.6 billion at end-2024.

2.2 Sri Lankan Economy

The Sri Lankan economy grew at a faster pace in both 2025 and 2024, compared to a contraction of 2.0 percent in 2023. The Agriculture sector recorded moderate growth of 1.4 percent in 2025, up from 0.6 percent in 2024, supported by broad-based expansions across sub-sectors. The Industry sector expanded by 7.8 percent in 2025, sustaining the strong momentum observed in 2024. Meanwhile, the Services sector grew by 3.3 percent in 2025, compared to 2.4 percent in the previous year.

GDP at current market prices increased to Rs. 32,750.8 billion in 2025 from Rs. 30,095.8 billion in 2024, reflecting a nominal growth of 8.8 percent. In USD terms, GDP rose to USD 108.8 billion in 2025 from USD 99.6 billion in 2024. GDP per capita increased to USD 5,003 in 2025 from USD 4,546 in 2024.

In 2025, investment expenditure grew by 22.4 percent in current market prices, supported by a strong rebound in gross fixed capital formation, driven mainly by increased spending on construction and transport equipment. Consumption expenditure, comprising both private and government consumption, grew moderately by 5.9 percent in 2025, compared to 7.0 percent in 2024, reflecting a 6.0 percent expansion in private consumption and a 5.6 percent increase in government consumption, and remained the principal contributor to aggregate demand.

Meanwhile, net external demand declined significantly by 61.7 percent in current market prices, compared to a decline of 32.6 percent in 2024, as growth in import expenditure outpaced that of exports, exerting downward pressure on overall demand.

National savings expanded by 23.2 percent in current prices in 2025, compared to 15.9 percent growth in 2024, driven mainly by an 18.1 percent increase in domestic savings alongside improved net income inflows from the rest of the world. Reflecting this improvement, the national

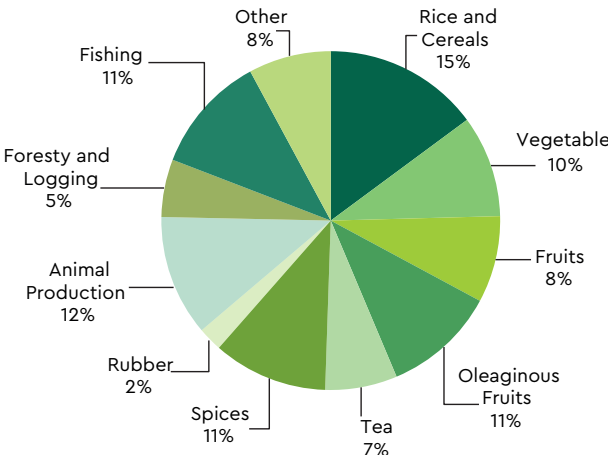

savings-to-GDP ratio increased to 31.2 percent in 2025 from 27.6 percent in 2024. The national savings–investment gap remained in surplus, widening to Rs. 517.0 billion from Rs. 373.1 billion in the previous year, indicating a continued easing of external imbalances.

Agriculture Sector

The Agriculture sector expanded in 2025, driven mainly by growth in animal production, oleaginous fruits cultivation, and growing of rice. Additionally, the forest and logging, agricultural supported activities, growing of fruits, tea, sugarcane, tobacco and other non-perennial crops, spices, aromatic drug and, pharmaceutical crops, cereals (except rice), plant propagation, sub-sectors contributed positively to this performance. However, a contraction was witnessed in several sub-sectors, including freshwater fishing and fresh water aquaculture, growing of vegetables, other perennial crops, rubber, other beverage crops, and marine fishing and marine aquaculture.

At current prices, the Agriculture sector accounted for 8.4 percent of GDP in 2025. The sector continues to play a critical role in the economy, particularly in terms of employment and rural livelihoods. This underscores the importance of implementing targeted policy measures to enhance productivity, and address persistent structural challenges, including climate variability, inefficient resource utilization, post-harvest losses, limited access to quality inputs, and market constraints, to ensure sustainable growth in the sector.

Figure 2.3 | Agriculture Sector Composition – 2025

Source: Department of Census and Statistics

Paddy

In value-added terms, the rice sub-sector recorded a moderate growth of 5.3 percent in 2025, up from 4.0 percent in 2024. Both the gross extent of sown and net extent harvested increased in 2025: the former rose by 4.2 percent to 1,341,885 hectares in 2025 from 1,287,989 hectares in 2024, while the latter increased by 4.8 percent to 1,186,455 hectares in 2025 from 1,131,859 hectares in 2024. Total paddy production increased by 7.6 percent to 5,053,698 metric tons in 2025, comprising 2,745,298 metric tons from the 2024/25 Maha season and 2,308,400 metric tons from the Yala season, compared to 4,698,454 metric tons in 2024. The yield per hectare increased by 2.6 percent to 4,259.5 kilograms per hectare in 2025 compared to 4,151.1 kilograms per hectare in 2024, attributable primarily to the high-yielding paddy varieties and the adoption of modern farming techniques. In line with higher production, rice prices declined in 2025 relative to 2024. The average retail price of Samba rice at the Pettah market fell by 0.9 percent to Rs. 253.81 per kilogram in December 2025 from Rs. 256.00 per kilogram December 2024. The average retail price of Nadu rice declined by 10.2 percent to Rs. 230.00 per kilogram in December 2025 from Rs. 256.00 per kilogram in December 2024. Similarly, the average retail price of Kekulu (Red) rice decreased by 12.7 percent to Rs. 216.90 per kilogram in December 2025 from Rs. 248.47 per kilogram in December 2024.

The total rice imports increased sharply by 40.7 percent to 184,750 metric tons in 2025 from 131,338 metric tons in 2024. The government continued the fertilizer subsidy scheme with a spending of Rs. 37 billion in 2025. The Government Paddy Purchasing Program also continued in 2025, incurring approximately Rs. 19,633 million to purchase 162,257 MT paddy through the Paddy Marketing Board (PMB).

[a] Revised

[b] Provisional

Tea

In value-added terms, the tea sub-sector recorded a marginal growth of 1.4 percent in 2025, compared to 1.9 percent in 2024. Total tea production edged up by 0.5 percent to 264.1 million kilograms in 2025 from 262.7 million kilograms in 2024.

Tea prices at the Colombo Tea Auction (CTA) declined by 4.7 percent to Rs. 1,186.50 per kilogram in 2025 from Rs. 1,245.10 per kilogram in 2024. The average export price (FOB) of tea decreased marginally by 0.2 percent to Rs. 1,760.70 per kilogram in 2025 from Rs. 1,763.61 per kilogram in 2024 while, in USD terms, it edged up by 0.2 percent to USD 5.85 per kilogram in 2025 from USD 5.84 per kilogram in 2024.

Rubber

In value-added terms, the rubber sub-sector contracted by 6.0 percent in 2025, compared to a positive growth of 4.0 percent in 2024, mainly due to a reduction in rubber production. Total rubber production decreased by 3.9 percent to 66.5 million kilograms in 2025 from 69.2 million kilograms in 2024.

Prices of RSS1 rubber at the Colombo Rubber Auction (CRA) decreased by 0.3 percent to Rs. 712.14 per kilogram in 2025 from Rs. 714.03 per kilogram in 2024. Despite these negative trends, the total export value of rubber and rubber products increased significantly by 19.8 percent to Rs. 9,381 million in 2025, compared to a contraction of 15.7 percent to Rs. 7,832 million in 2024, while the total export volume grew by 4.3 percent to 9.0 million kilograms, compared to a contraction of 31.9 percent to 8.6 million kilograms in 2024. The average FOB price of rubber rose by 14.8 percent to Rs. 1,041.58 per kilogram in 2025 from Rs. 907.28 per kilogram in 2024, while in USD terms it increased by 15.3 percent to USD 3.47 per kilogram from USD 3.01 per kilogram over the same period. The performance of the rubber sub-sector in 2025 was constrained by weather-related disruptions; therefore, improving plantation management practices and enhancing productivity remain important for the sustainable development of the industry.

Coconut

Coconut subsector expanded by 8.2 percent in 2025 compared to a contraction of 11.5 percent in 2024. Coconut production increased by 9.0 percent to 3,042 million nuts from 2,792 million nuts in 2024, driven primarily by favorable weather conditions that prevailed throughout the year. Desiccated coconut production increased by 3.6 percent to 308.1 million nuts, from 297.3 million nuts in 2024. Production of coconut cream, coconut milk powder, and coconut milk increased significantly, recording a growth of 18.7 percent in 2025. In contrast, coconut oil production declined by 8.1 percent to 49.5 million nuts in 2025 from 53.9 million nuts in the previous year.

In terms of exports, the total export volume of copra increased significantly by 128.5 percent to 0.786 million kilograms, while export volume of coconut oil increased by 13.0 percent to 26.7 million kilograms in 2025 compared to 2024. The total export volume of desiccated coconut decreased by 9.0 percent to 52.1 million kilograms in 2025. The average FOB price of coconut increased significantly by 57.1 percent to Rs. 125.86 per nut in 2025 from Rs. 80.13 per nut in 2024.

Minor Export Crops

The export performance of minor export crops in 2025 exhibited mixed trends. Cinnamon exports, the largest contributor within this category, increased marginally by 0.8 percent to 19,965 metric tons from 19,809 metric tons in 2024. In contrast, pepper exports declined significantly by 49.2 percent to 13,404 metric tons from 26,388 metric tons in 2024, weighing on overall export performance. Cocoa exports also decreased by 23.2 percent to 76 metric tons from 99 metric tons in 2024.

Meanwhile, several crops recorded notable improvements. Cardamom exports increased substantially to 23 metric tons from 9 metric tons in 2024, while clove exports rose sharply by 161.5 percent to 2,798 metric tons, reflecting favourable market conditions. Exports of nutmeg and mace increased moderately by 2.4 percent to 3,042 metric tons from 2,971 metric tons in the previous year.

Overall, the performance of minor export crops in 2025 reflects divergent commodity-specific trends, with strong growth in certain high-value spices.

** Including Re-export*

Other Crops

In value-added terms, the fruit sub-sector recorded a growth of 1.9 percent in 2025, compared to 2.0 percent growth in 2024, while the cereals (excluding rice) sub-sector recorded a marginal growth of 0.2 percent, compared to 4.2 percent in 2024. The vegetables sub-sector contracted by 7.1 percent in 2025, compared to a marginal decline of 0.8 percent in 2024. In export terms, the total export volume of cereals increased by 38.0 percent to 25,794 metric tons in 2025 from 18,696 metric tons in 2024, while the total export volume of vegetables grew by 4.2 percent to 18,017 metric tons from 17,294 metric tons in the previous year.

Overall production of field crops (excluding rice) remained relatively stable at 467,164 metric tons in 2025, compared to 426,882 metric tons in 2024. Maize production increased significantly by 21.7 percent to 272,056 metric tons from 223,496 metric tons in 2024. Big onion production rose sharply by 141.8 percent to 21,344 metric tons in 2025 from 8,828 metric tons in 2024, largely driven by government initiatives to encourage cultivation, particularly in the Matale District. In contrast, potato production declined by 30.4 percent to 29,371 metric tons from 42,207 metric tons in the previous year.

Livestock

In value-added terms, the animal production sub-sector recorded a robust growth of 10.5 percent in 2025, driven by increased demand for livestock products. Total milk production edged up by 0.4 percent to 524 million liters in 2025 from 522 million liters in 2024. Egg production increased by 3.6 percent to 1,754 million eggs in 2025 from 1,693 million eggs in 2024, supported by the easing production costs and the implementation of supportive government policies to enhance poultry production. Meanwhile, chicken production grew by 12.8 percent to 291,650 metric tons in 2025 from 258,540 metric tons in 2024, largely attributable to targeted government initiatives to boost production and a recovery in domestic maize output, a key input in poultry feed.

Marine and Inland Fishing

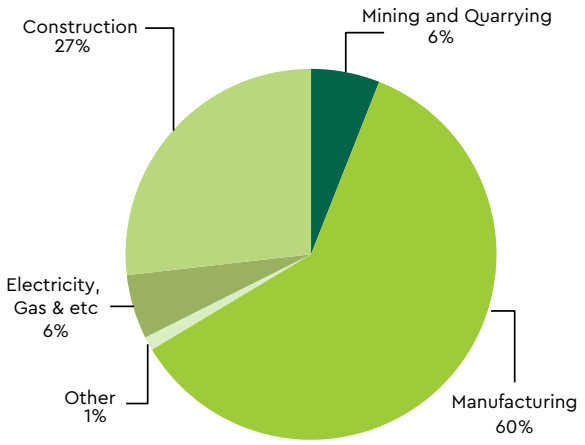

Total fish production declined by 11.3 percent in 2025 to 364,190 metric tons from 410,760 metric tons in 2024, driven primarily by unfavourable weather conditions. In value-added terms, the marine fishing and marine aquaculture sub-sector marginally declined by 0.1 percent in 2025, compared to a positive growth of 4.8 percent in 2024, while the freshwater fishing and freshwater aquaculture sub-sector contracted by 45.3 percent, compared to a contraction of 9.2 percent in the previous year. The fishing industry continues to face critical challenges, including overfishing, unsustainable fishing practices, pollution, and the adverse impacts of climate change. Addressing these through effective and targeted policy measures is essential to ensure the long-term sustainability of the sector.

Industry Sector

The Industry sector sustained its growth momentum in 2025, recording a positive expansion of 7.8 percent following the strong rebound of 11.1 percent in 2024, which marked a recovery from the contraction observed in 2023. This continued growth reflects the resilience of industrial activity, supported by broad-based improvements across key sub-sectors, particularly construction, mining and quarrying, and a range

of manufacturing industries. Overall, the sector's performance underscores its critical role in driving economic growth, underpinned by sustained activity across both traditional and emerging industrial segments.

Figure 2.4 | Industry Sector Composition – 2025

Source: Department of Census and Statistics

Mining and Quarrying

Mining and quarrying activities maintained strong growth in 2025, expanding by 16.9 percent and contributing 1.5 percent to GDP. This performance was largely driven by sustained demand for construction materials, with the mining of construction materials accounting for 88.6 percent of total value added and growing by 14.4 percent. Gem mining recorded a notable increase of 34.1 percent, supported mainly by sapphire production, while other mineral mining activities grew by 16.6 percent. The value of mineral exports declined marginally by 1.7 percent to Rs. 7,284 million in 2025, compared to a steeper decline of 41.5 percent to Rs. 7,412 million in 2024. Export earnings from key minerals, including natural graphite, natural sands, quartz, and other mineral products, all recorded declines compared to the previous year.

Manufacturing

The manufacturing sector, the largest contributor to GDP with a share of 17.0 percent, sustained its growth momentum in 2025, expanding by 6.2 percent following a 7.7 percent increase in 2024, driven by broad-based improvements across key industries. The manufacture of food, beverages, and tobacco products, the largest contributor within the sector, grew by 5.2 percent in 2025, compared to 6.1 percent in 2024. The manufacture of textiles, wearing apparel, and leather-related products, the second-largest contributor, recorded a positive growth for the second consecutive year, expanding by 8.0 percent in 2025 compared to 11.0 percent in 2024. Notably, the manufacture of coke and refined petroleum products rebounded significantly, growing by 16.9 percent, following a contraction in the previous year.

The manufacture of other non-metallic mineral products recorded a significant growth of 16.2 percent in 2025, compared 2.5 percent in 2024. The manufacture of paper products, printing, and reproduction of media products grew by 10.5 percent, while manufacture of wood and products of wood and cork products expanded by 5.0 percent in 2025. Rubber and plastic product manufacturing recorded an increase of 2.6 percent in 2025 compared to the previous year. The manufacture of machinery and equipment expanded marginally by 1.4 percent, and furniture manufacturing recorded a modest growth of 2.9 percent. The sub-sector comprising other manufacturing activities, including the repair and installation of machines was the only sub-sector within the industry sector to record a contraction of 5.8 percent in 2025 compared to the growth of 8.5 percent in 2024.

Construction

In value-added terms, the construction sector sustained its growth momentum in 2025, expanding by 9.2 percent, albeit at a more moderate pace than the 20.1 percent recorded in 2024. This strong performance was primarily driven by improved availability of construction materials and easing cost pressures. Large-scale infrastructure developments, particularly those financed through foreign funding, were key contributors to this growth, supported further by increased foreign investment in tourism-related construction, including hotel and resort developments. Notably, local cement production increased significantly by 22.0 percent, while imported cement declined by 18.6 percent, resulting in an overall expansion of 13.3 percent in total cement supply. Reductions in prices of key construction inputs—cement, iron and steel, and timber further facilitated sectoral growth. Overall, the continued expansion reflects sustained construction activity, underpinned by both supply-side improvements and favourable cost conditions.

Services Sector

In value-added items, Services sector continued its recovery momentum in 2025, recording a growth of 3.3 percent, following the moderate expansion observed in 2024 and the marginal contraction of 0.5 percent recorded in 2023. This performance was supported by broad-based improvements across key service sub-sectors, including accommodation, food and beverage service activities; IT programming, consultancy and related services; programming, and broadcasting activities and audio video production; telecommunication; financial service activities and auxiliary financial services; real estate activities including ownership of dwellings; wholesale and retail trade; transportation of goods and passengers; postal and courier activities; professional services; education; and other personal service activities.

The Public administration and defence, compulsory social security sub-sector was the only sub-sector within the service sector to record a contraction, declining marginally by 1.3 percent in 2025 compared to a contraction of 2.9 percent in 2024. Overall, the sustained growth of the services sector underscores its central role in driving economic activity and supporting broader economic stability.

Wholesale and Retail Trade

In value-added terms, wholesale and retail trade recorded modest growth of 1.4 percent in 2025, compared to 1.2 percent in 2024, maintaining a gradual recovery trajectory. Contributing approximately 12.4 percent to GDP in 2025, the sector remained a key driver of economic activity. Its performance was closely linked to developments in domestic production and external trade, with fluctuations in imports, as well as agricultural and industrial output, influencing overall value addition. The continued expansion reflects improving economic conditions and steady demand across the economy.

Transportation of Goods and Passengers

In value-added terms, the transport sub-sector expanded by 3.0 percent in 2025, compared to a growth of 2.3 percent in 2024, supported by improvements across all modes of transportation and related services. Land transport grew by 2.2 percent, driven by increased vehicle registration,

although passenger kilometers operated by the Sri Lanka Transport Board declined by 7.5 percent, while railway passenger kilometers recorded a notable increase of 3.3 percent. Air transport operations rebounded strongly, with passenger kilometers increasing by 15.2 percent, reflecting a recovery in aviation activity. Support activities for transportation, including port operations and warehousing, expanded by 5.2 percent, indicating continued growth in trade and logistics. Overall, the sector's performance was underpinned by both passenger and freight transportation, reflecting improved connectivity and economic activity during the year.

Accommodation, Food and Beverage Service Activities

In value-added terms, the accommodation, food, and beverage service sub-sector expanded by 12.4 percent in 2025, compared to stronger growth of 32.5 percent in 2024. The continued growth was primarily supported by the sustained recovery in tourism, with total foreign tourist arrivals increasing by 15.1 percent, to 2,362,521 in 2025 from 2,053,465 in 2024, according to the Sri Lanka Tourism Development Authority. The moderation in growth relative to the previous year reflects a normalization following the strong post-recovery expansion observed in 2024. Consistent with this trend, the annual turnover of listed hotel companies at the Colombo Stock Exchange (CSE) recorded a modest increase of 1.0 percent in 2025. Overall, the sub-sector maintained its growth momentum at a more moderate pace, underpinned by continued improvements in tourism demand.

Financial, Insurance and Real Estate Activities

In value-added terms, financial, insurance, and real estate activities, including ownership of dwellings, recorded a moderate growth in 2025, supported by a broad-based recovery across key sub-sectors. Insurance, reinsurance, and pension funding activities rebounded strongly, growing by 14.6 percent in 2025 following the contraction in 2024, driven by increases in inflation-adjusted earned premiums and claims incurred, with gross premiums and claims rising by 17.5 percent and 18.3 percent, respectively. Real estate activities, including ownership of dwellings, continued their upward trajectory, registering growth of 3.6 percent in 2025, underpinned by increased market activity as reflected in an 11.0 percent rise in the quarterly turnover of listed real estate sector companies at the Colombo Stock Exchange. The sub-sector contributed Rs. 562,911 million in real terms to total GDP, accounting for 3.8 percent of GDP at current prices, highlighting its sustained importance within the overall economic framework.

Other Service Activities

In value-added terms, telecommunication activities grew by 3.1 percent in 2025, moderating from 4.0 percent growth in 2024, reflecting continued expansion in revenue and data-driven services despite the decline in wireless landline connections. IT programming consultancy and related activities accelerated to 12.8 percent growth in 2025, supported by strong performance in IT and IT-enabled services and improved export earnings from related service categories. Professional services expanded by 2.4 percent in 2025, easing slightly from 2024 levels, while programming and broadcasting and audio-video production activities grew by 2.0 percent, maintaining the positive momentum from the previous year. Postal and courier activities recorded a notable growth of 8.9 percent in 2025, driven by expansions in both postal (10.0 percent) and courier (6.4 percent) services, alongside a significant increase in staff costs. Meanwhile, human health activities rebounded to 3.0 percent growth in 2025, compared to the marginal contraction in 2024, while other personal service activities grew modestly by 1.0 percent, supported by tourism related and seasonal demand.

Domestic Demand and Consumption

Domestic demand, which comprises consumption and investment expenditure, grew by 10.2 percent to Rs. 34,019.7 billion at current market prices in 2025 from Rs. 30,880.6 billion in 2024, driven by increases in both components. Total consumption increased by 5.9 percent to Rs. 24,310.6 billion in 2025 from Rs. 22,951.4 billion in 2024, reflecting continued growth in private consumption and government consumption.

Private consumption, accounting for 67.5 percent of GDP, increased by 6.0 percent at current prices in 2025, maintaining its dominant contribution to overall consumption expenditure. Government consumption increased by 5.6 percent in 2025, further supporting the expansion in aggregate consumption demand.

Net External Demand

Exports of goods and services increased by 4.5 percent to Rs. 6,212.0 billion in 2025 from Rs. 5,945.7 billion in 2024, supported by improved external sector performance. Imports of goods and services increased by 11.1 percent to Rs. 7,480.8 billion in 2025 compared to Rs. 6,730.5 billion in 2024, reflecting stronger import demand associated with expanding domestic economic activity. As a result, net external demand at current prices recorded a deficit of Rs. 1,268.8 billion in 2025, widening from a deficit of Rs. 784.8 billion in 2024.

Investment and Savings

Investment expenditure at current market prices grew by 22.4 percent to Rs. 9,709.1 billion in 2025 compared to Rs. 7,929.3 billion in 2024. Gross fixed capital formation, the key component of investment expenditure, increased by 18.5 percent in 2025, reflecting improved investment momentum during the year.

Domestic savings grew by 18.1 percent to Rs. 8,440.3 billion in 2025, compared to Rs. 7,144.5 billion in 2024, with domestic savings-to-GDP ratio rising to 25.8 percent in 2025 from 23.7 percent in 2024. In rupee terms, net primary income from the rest of the world improved to a lower deficit of Rs. 608.6 billion, while net secondary income from the rest of the world increased to Rs. 2,394.5 billion during the year.

National savings recorded a strong growth of 23.2 percent in 2025, increasing to 31.2 percent of GDP, compared to 27.6 percent in 2024. The national savings–investment gap remained positive at Rs. 517.0 billion in 2025, indicating continued improvement in the external financing position of the economy.

2.3 External Sector

Sri Lanka's external sector strengthened in 2025, recording a current account surplus, despite a higher trade deficit stemming from import expenditure significantly outpacing export earnings. Continued recovery in export earnings, strong inflows from workers' remittances and steady growth in tourism and service receipts supported this outcome. However, the near-term outlook for the external sector remains volatile, particularly due to heightened geopolitical tensions in the Middle East.

Earnings from exports increased by 6.3 percent to USD 13,581.4 million in 2025 compared to USD 12,772.0 million in 2024, driven mainly by higher earnings from industrial and agricultural exports. Meanwhile, import expenditure increased by 14.0 percent to USD 21,479.9 million in 2025 from USD 18,841.4 million in 2024, driven mainly by higher expenditure on consumer goods. As a result, the trade deficit widened to USD 7,898.6 million in 2025 from USD 6,069.4 million in 2024.

The current account recorded a surplus of USD 1.7 billion in 2025, compared to a USD 1.2 billion surplus in 2024, with the current account surplus as a percentage of GDP rising to 1.6 percent in 2025 from a surplus of 1.2 percent of GDP in 2024. The service account surplus increased to USD 3.7 billion in 2025 from USD 3.4 billion in 2024, supported by increased inflows from tourism and sea transport. The capital account recorded a deficit of USD 7.0 million in 2025, compared to a surplus of USD 12.0 million in 2024, due to limited capital transfers to both the Government and private sector. The financial account recorded a net balance of USD 904 million in 2025, compared to USD 965 million in 2024, reflecting inflows from the IMF-EFF programme and disbursements from the Asian Development Bank. Foreign Direct Investment inflows including foreign loans amounted to USD 1,154 million in 2025, compared to USD 845 million in 2024.

The tourism sector sustained its growth momentum, with tourist arrivals increasing by 15.1 percent to 2,362,521 persons in 2025 from 2,053,465 persons in 2024. Tourism earnings increased by 1.6 percent to USD 3,219.2 million in 2025 from USD 3,168.6 million in 2024.

Gross Official Reserves (GOR) increased to USD 6,838 million at end December-2025 from USD 6,122 million at end-2024, supported by inflows from multilateral institutions— including the fourth and fifth tranches under IMF-EFF programme, emergency RFI financing and the ADB financing— as well as net purchases of foreign exchange of USD 2.0 billion by the Central Bank from the domestic foreign exchange market. The reserve accumulation was achieved despite the foreign currency debt service payments of USD 5.1 billion in 2025. Total external assets increased to USD 16.1 billion at end-2025 from USD 14.5 billion at end-2024.

The overall balance of payments (BOP) recorded a surplus of USD 1,798 million in 2025, compared to a surplus of USD 2,890 million in 2024. Meanwhile, the Sri Lankan rupee depreciated by 5.6 percent against the US dollar in 2025, mainly due to the significant increase in merchandise imports following the lifting of import restriction of motor vehicles.

Exports

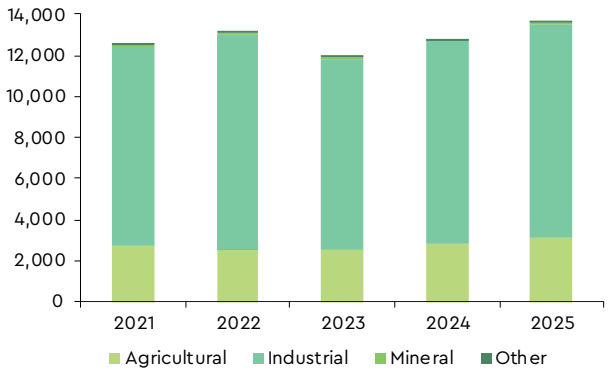

Earnings from exports increased significantly by 6.3 percent to USD 13,581.4 million in 2025 from USD 12,772.0 million in 2024, reflecting improved external demand and a revival of domestic economic activity. This was the highest export value recorded in the country's history. Industrial exports accounted for 77.0 percent of total export earnings, while agricultural and mineral exports contributed 22.6 percent and 0.2 percent, respectively. Accordingly, earnings from industrial exports grew by 5.2 percent to USD 10,460.8 million in 2025 from USD 9,946.9 million in 2024, earnings from agricultural exports increased by 10.7 percent to USD 3,072.0 million in 2025 from USD 2,774.5 million in 2024, while earnings from mineral exports dropped by 1.4 percent to USD 24.2 million in 2025 from USD 24.5 million in 2024. As a percentage of GDP, export earnings amounted to 12.5 percent in 2025.

Industrial export earnings increased by 5.2 percent to USD 10,460.8 million in 2025 from USD 9,946.9 million in 2024. This was mainly due to the increase in export earnings from textiles and garments by 5.0 percent to USD 5,313.7 million and food, beverages, and tobacco products by 37.4 percent to USD 895.5 million in 2025. However, export earnings from petroleum products, rubber products, and wood and paper products declined.

Earnings from agricultural exports increased by 10.7 percent to USD 3,072.0 million in 2025 from USD 2,774.5 million in 2024, supported by increased earnings from tea, coconut, and minor agricultural products, despite the drop in earnings from spices. Export earnings from tea increased by 5.0 percent to USD 1,507.2 million in 2025 from USD 1,435.9 million in 2024, driven by increased export prices and volumes of tea, contributing 49.1 percent to total agricultural export earnings. Earnings from coconut products grew significantly by 37.7 percent to USD 573.5 million in 2025 driven by increased earnings from kernel, non-kernel, and value-added coconut exports. Meanwhile, mineral export earnings decreased by 1.4 percent to USD 24.2 million in 2025 from USD 24.5 million in 2024. Unclassified export earnings also dropped by 6.7 percent to USD 24.4 million in 2025.

Imports

Expenditure on imports increased significantly by 14.0 percent to USD 21,479.9 million in 2025 from USD 18,841.4 million in 2024. This increase was driven by higher spending on consumer and investment goods imports, despite a slight decline in expenditure on intermediate goods, reflecting the recovery in domestic demand and the significant impact of the removal of import restrictions on vehicles. As a percentage of GDP, import expenditure increased to 19.7 percent in 2025 from 18.9 percent in 2024.

Import expenditure on consumer goods increased notably by 59.2 percent to USD 5,518.3 million in 2025 from USD 3,465.7 million in 2024, driven by increases in import expenditure on both food and beverages and non-food consumer goods categories. Import expenditure on food and beverages increased by 10.5 percent to USD 2,115.9 million in 2025 from USD 1,914.3 million in 2024, driven by higher import expenditure on dairy products, oils and fats and seafood categories. Expenditure on non-food consumer goods grew notably by 119.3 percent to USD 3,402.3 million in 2025, driven by increased spending on personal vehicle imports, accounting for USD 1,606.7 million in 2025 compared to USD 66.2 million in 2024. Further, increased import expenditure on medical and pharmaceutical products, clothing and accessories, telecommunication devices, home appliances, and household and furniture items also contributed to the rise in overall non-food consumer goods import expenditure.

Import expenditure on intermediate goods, which accounted for 55.2 percent of total import expenditure, recorded a slight decrease of 0.5 percent to USD 11,858.9 million in 2025 from USD 11,914.5 million in 2024. This decrease was primarily driven by a marginal reduction in expenditure on fuel and textiles and textile articles. Expenditure on fuel imports decreased by 7.2 percent to USD 4,042.5 million in 2025, reflecting a lower spending on refined petroleum and coal imports compared to the previous year despite an increase in expenditure on crude oil imports. Import expenditure on textiles and textile articles decreased by 3.4 percent to USD 2,749.1 million in 2025 from USD 2,847.1 million in 2024. However, higher spending on chemical products, plastics and related articles, base metals, wheat and maize, fertilizer and agricultural inputs partially offset these declines, contributing to an increase in import expenditure on those subcategories within intermediate goods in 2025.

Import expenditure on investment goods increased by 18.6 percent to USD 4,089.9 million in 2025 from USD 3,448.2 million in 2024, driven by higher import expenditure on machinery and equipment, building materials, and transport equipment, reflecting the macroeconomic development in the country and recovery in domestic demand.

Import expenditure on machinery and equipment increased by 6.4 percent to USD 2,513.4 million, building materials grew by 9.7 percent to USD 1,016.8 million and transport equipment increased by 258.8 percent to USD 555.5 million in 2025.

Earnings from Tourism

Earnings from tourism increased by 1.6 percent to USD 3,219.2 million in 2025 from USD 3,168.6 million in 2024, continuing the strong recovery observed in the previous year. Tourist arrivals increased by 15.1 percent to 2,362,521 persons in 2025 from 2,053,465 persons in 2024. In 2025, the highest number of tourist arrivals was recorded from India, the United Kingdom, Russia, Germany, and China. India remained the largest source market, accounting for 531,511 tourists in 2025, representing 22.5 percent of total tourist arrivals.

Workers' Remittances

Workers' remittances increased by 22.8 percent to USD 8,076.2 million in 2025 from USD 6,575.4 million in 2024, supported by higher departures for foreign employment and increased remittances through formal channels.

2.4 Monetary Sector

In 2025, the Central Bank of Sri Lanka (CBSL) continued an accommodative monetary policy stance, which helped to bring down market interest rates amidst a modest increase in interest rates in the latter part of 2025. Building on the improvements observed in macroeconomic conditions, including stabilising inflation and the gradual strengthening of the external sector,

the CBSL further consolidated its streamlined monetary policy framework, which introduced a single policy rate.

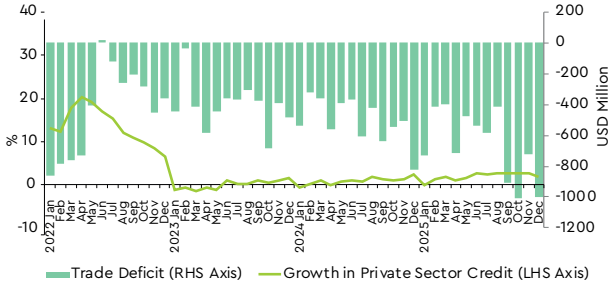

The replacement of the dual interest rate structure, namely the Standing Deposit Facility Rate (SDFR) and the Standing Lending Facility Rate (SLFR), with a unified Central Bank Policy Interest Rate has enhanced clarity, transparency, and the effectiveness of monetary policy operations. An accommodative monetary policy stance was adopted significantly from June 2023 through 2024, with a cumulative easing of around 7.75 percentage points, and was eased further through the reduction in the Overnight Policy Rate (OPR) by 0.25 percentage points in 2025. This framework continues to provide stronger forward guidance to market participants while supporting efforts to anchor inflation around the medium-term target of approximately 5 percent. In this context, monetary policy measures remained focused on facilitating credit flows to productive sectors and maintaining adequate liquidity in the domestic money market. The Statutory Reserve Ratio (SRR) continued to support liquidity conditions within the banking system.

[a] Based on the Monthly Survey of Commercial Banks' Loans and Advances to the Private Sector. This survey was commenced in April 2025, by replacing the Quarterly Survey of Commercial Banks' Loans and Advances to the Private Sector.
[b] Includes loans, overdrafts, and bills discounted and excludes cash items in the process of collection.
[c] Revised
[d] Provisional
[e] Excludes personal housing loans, which have been included under 'Construction' classified under 'Industry' and includes Safety Net Scheme related loans.
[f] Total credit to the private sector as per the Monthly Survey differ from that in the Monetary Survey due to differences in the compilation methodologies.

Amid relatively subdued inflationary pressures and improving financial market confidence, market interest rates remained on a declining and stable path. The Average Weighted Call Money Rate (AWCMR) continued to align with the prevailing policy framework, while the Average Weighted Lending Rate (AWLR) and the Average Weighted New Lending Rate (AWNLR) reflected improved borrowing conditions across economic sectors, including Small and Medium Enterprises (SMEs). Similarly, the Average Weighted SME Lending Rate (AWSR) and the Average Weighted New SME Lending Rate (AWNSR) supported continued access to finance for entrepreneurs and businesses, contributing to the gradual recovery of economic activity.

Broad money (M2b) growth remained moderate, reflecting prudent monetary management and ongoing fiscal consolidation efforts. Developments in private sector credit, credit to State-Owned Enterprises (SOEs), and the government's borrowing requirements continued to influence overall monetary conditions. Improvements in Net Credit to the Government (NCG) and Net Foreign Assets (NFA) of the banking sector also supported monetary stability. Overall, monetary sector developments during the period reflected a continued effort to maintain macroeconomic stability while fostering conditions conducive to sustainable economic growth.

2.5 Inflation

Headline inflation, measured by the year-on-year (Y-o-Y) change in the Colombo Consumer Price Index (CCPI, 2021=100), turned to positive territory in August 2025 following a prolonged deflationary period of 11 consecutive months from September 2024 to July 2025. Inflation gradually increased to 2.1 percent by end December 2025, remaining below the Central Bank's medium-term inflation target of approximately 5 percent.

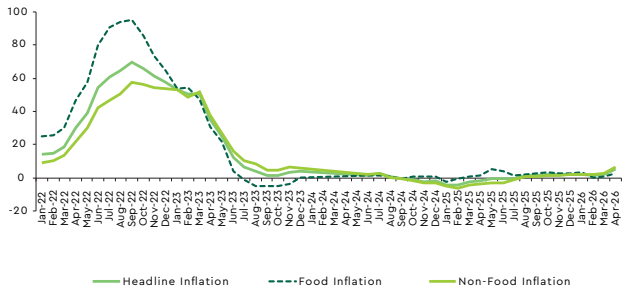

The temporary deflation was driven by base effects from previously high prices, tight monetary policy, supply-side factors-especially several rounds of downward revisions to electricity tariffs, fuel, and LP gas prices-as well as domestic supply-side improvements and the recovery of global supply chains. As economic activity recovered, inflation showed a moderate upward trend, reflecting improving demand conditions.

The CCPI index increased from 192.6 in January to 195.8 in December 2025, indicating a gradual rise in the general price level and cost of living. However, price movements were uneven: early 2025 saw slight declines, while mid-to-late 2025 recorded gradual increases. A notable spike occurred in December, mainly due to adverse weather-related supply disruptions, though year-on-year inflation remained subdued due to base effects.

Core inflation, which reflects the underlying inflation in the economy, showed a gradual and consistent upward trend throughout 2025, indicating strengthening underlying price pressures despite low headline inflation. At the beginning of the year, year-on-year core inflation, as measured by the CCPI, stood at 1.2 percent, reflecting weak demand conditions and the lagged effects of tight monetary policy. However, from mid-2025 onwards, it began to steadily increase alongside the economic recovery, rising to 2.0 percent by August–September and further accelerating in the final quarter. By December 2025, year-on-year core inflation, as measured by the CCPI, reached 2.7 percent, up from 2.4 percent in November, highlighting a continued build-up of demand-driven inflationary pressures. This upward movement suggests that, although headline inflation remained low due to base effects and temporary factors, underlying inflation was normalising, indicating a gradual transition toward the Central Bank's medium-term inflation target.

Headline inflation, as measured by the year-on-year (Y-o-Y) change in the National Consumer Price Index (NCPI, 2021=100), which also entered negative territory in September 2024, recorded its lowest point of -4.0 percent in January 2025. It returned to positive territory in May 2025, recording 0.6 percent, and gradually increased to 2.9 percent by December 2025. Similarly, core inflation, as measured by the NCPI, entered negative territory in January 2025, recording -0.2 percent, returned to positive territory in May 2025, recording 0.3 percent, and gradually increased to 2.6 percent by end 2025.

Figure 2.14 | Headline Inflation, Food Inflation & Non-food Inflation – CCPI
(Percent)

Source: Department of Census and Statistics
Note: 2022 January – 2023 January based on CCPI (2013=100), from February 2023 based on CCPI (2021=100)

Overall, 2025 marked a transition from deflation to a low-inflation environment, supported by effective macroeconomic policies. While headline inflation remained subdued, rising core inflation suggested emerging underlying price pressures and a gradual move toward the Central Bank's medium-term inflation target.

2.6 Employment and Unemployment

The unemployment rate decreased to 3.9 percent in 2025 from 4.4 percent in 2024, driven by an increase in the employed population, reflecting the gradual absorption of workers into economic activities. The unemployment rate for males decreased to 2.8 percent in 2025 from 3.0 percent in 2024, while the unemployment rate for females decreased to 6.1 percent in 2025 from 7.1 percent in 2024.

The labour market in 2025 reflected a gradual recovery following the severe economic crisis of 2022–2023. Improvements in macroeconomic stability, declining inflation, and renewed economic activity contributed to moderate gains in employment. However, structural challenges such as youth unemployment, skills mismatch, and low female labour force participation continued to pose challenges.

The total labour force at end-2025 was recorded at 8.554 million, marking a 2.9 percent increase from 8.316 million at end-2024. This growth was supported by increased economic activity in the construction, services, tourism, and trade sectors, which contributed significantly to the expansion of the labour force.

The distribution of the workforce across major sectors indicates that 23.9 percent were engaged in agriculture, 26.2 percent in industry, and 49.9 percent in services at end-2025. This trend reinforces the dominant role of the services sector as the principal provider of employment. Meanwhile, the share of the agriculture sector recorded a slight decline, while the industry sector experienced a marginal increase compared to the previous year.

The labour force participation rate increased to 49.4 percent in 2025 from 47.4 percent in 2024, indicating a gradual recovery from previous declines. Male and female labour force participation rates increased to 69.1 percent and 32.5 percent, respectively. This reflected increasing engagement in economic activities, particularly as economic conditions improved and more individuals entered the workforce.

2.7 Equity Market Development

The equity market in Sri Lanka recorded a strong performance in 2025, reflecting improved macroeconomic stability and renewed investor confidence following the economic crisis period. Market activity remained robust throughout the year, with notable improvements in turnover and trading volumes. Investor participation, particularly by domestic investors, played a key role in driving the market activity. Lower interest rates encouraged a shift from traditional savings instruments, such as fixed deposits, towards equities, thereby enhancing market liquidity.

The All-Share Price Index (ASPI, 1985 = 100), which measures the movement of share prices of all listed companies, increased significantly by 41.9 percent to 22,624.3 points at end-December 2025 from 15,944.6 points at end-December 2024. The Standard and Poor's Sri Lanka 20 (S&P SL20, 2004 = 1,000) index, which reflects the performance of 20 leading publicly traded companies listed on the Colombo Stock Exchange, also increased significantly by 26.6 percent to 6,157.4 points at end-December 2025, up from 4,862.1 points at end-December 2024.

This upward trend was mainly driven by increased participation from domestic investors, supported by government reforms aimed at improving the business environment and boosting investor

confidence, stronger corporate performance, a positive economic outlook, and eased monetary conditions.

Market capitalization, which represents the total value of all listed companies on the Colombo Stock Exchange, increased by 41.7 percent to Rs. 8,068.6 billion at end-December 2025 from Rs.5,695.6 billion recorded at end-December 2024. Market capitalization as a percentage of GDP increased to 24.6 percent at end-2025 from 18.9 percent at end-2024. This growth in market capitalization reflects the expanding value of listed companies and the increasing attractiveness of the Sri Lankan stock market to investors.

Moreover, the Colombo Stock Exchange recorded a remarkable increase in average daily turnover by 131.2 percent to Rs. 5,179.2 million at end-December 2025 from Rs. 2,240.2 million recorded at end-December 2024. This reflects an exceptional surge in trading activity, a substantial expansion of market liquidity, and enhanced investor confidence and participation. The total number of companies listed on the Colombo Stock Exchange increased to 288 at end-December 2025 from 284 companies recorded at end-December 2024.

Global Economic Developments

3.1 Overview[1]

The global economic outlook is once again surrounded by heightened uncertainty, stemming from the Middle East conflict that erupted at the end of February 2026, shortly after the trade barriers imposed in 2025. The conflict has affected countries to varying degrees, depending on their vulnerability to commodity price shocks, inflation expectations, and fiscal and monetary policy making. The Middle East conflict has disrupted energy markets and heightened volatility in global commodity prices, particularly crude oil and Liquified Natural Gas (LNG), thereby increasing primarily production and transportation costs worldwide. In addition, the continuation of protectionist trade measures and supply chain realignments is expected to dampen global investment flows. Against this backdrop, global economic growth is projected to moderate to 3.1 percent in 2026, a downward revision of 0.2 percentage points from the World Economic Outlook (WEO) January Projections and 3.2 percent in 2027, both slower than 3.4 percent recorded in 2025, according to the WEO report of April 2026. Meanwhile, global headline inflation is expected to be revised upward to 4.4 percent in 2026 before declining to 3.7 percent in 2027. These developments are expected to have adverse spillover effects on import-dependent developing economies such as Sri Lanka, through weaker export demand, a shrinking tourism sector, and lower remittances, volatile commodity prices, increased inflation, constrained capital flows, and tighter financial conditions.

In 2025, the global economy continues to face multiple headwinds, including renewed geopolitical disruptions, persistent inflationary pressures in certain sectors, and the lagged effects of past monetary tightening. Although inflation eased compared to peak levels, it remained above target in several economies, necessitating cautious monetary policy adjustments. Financial conditions have shown signs of gradual easing; however, uncertainty remained elevated. Regional growth disparities persisted, with Asia, particularly India and several ASEAN economies, continuing to demonstrate relative resilience, while growth in the Euro Area remains subdued amid energy market uncertainties and weak industrial activity. The escalation of geopolitical tensions in the Middle East, alongside ongoing conflicts in other regions, continued to weigh on global confidence, highlighting the limited scope for effective global policy coordination and the increasing tendency toward inward-looking economic policies.

[1] *Based on the World Economic Outlook 2026. International Monetary Fund, Global Financial Stability Report. International Monetary Fund, Fiscal Monitor 2026. International Monetary Fund, Commodity Markets Outlook. World Bank, Global Debt Report 2026, OECD*

3.2 World Output

The global economy grew by 3.4 percent in 2025, maintaining same growth rate recorded in 2024, reflecting moderating yet resilient economic activity. Growth in advanced economies remained subdued at 1.9 percent, largely constrained by high real interest rates, reduced fiscal support, and structural challenges such as ageing populations and weak productivity growth. In contrast, Emerging Market and Developing Economies (EMDEs) recorded stronger growth of 4.4 percent, supported by robust domestic demand, improved labour market conditions, and sustained investment flows, particularly in Asia. The United States maintained moderate growth of 2.1 percent, driven by resilient consumption and investment, while China's growth stood at 5.0 percent amid ongoing structural adjustments in the property sector and subdued external demand. Meanwhile, the Euro Area experienced sluggish growth of 1.4 percent, reflecting weak industrial output and continued energy-related uncertainties.

In the near term, global growth is projected to decline to 3.1 percent in 2026 from 3.4 percent in 2025, before recovering slightly to 3.2 percent in 2027, reflecting the combined effects of tighter financial conditions, trade fragmentation, and heightened geopolitical risks. The escalation of the Iran–Israel conflict and associated US involvement is expected to exert additional downward pressure on global growth through higher energy prices, increased uncertainty, and disruptions to key maritime corridors. Growth in advanced economies is projected to slow further to 1.8 percent in 2026 and 1.7 percent in 2027, reflecting the lagged effects of monetary tightening and weaker domestic demand. Growth in the United States

is expected to improve slightly to 2.3 percent in 2026 before moderating to 2.1 percent in 2027, while the Euro Area is projected to grow by 1.1 percent in 2026, with only a gradual recovery thereafter.

Growth in Emerging Market and Developing Economies (EMDEs) is projected to moderate to 3.9 percent in 2026 before strengthening to 4.2 percent in 2027, reflecting weaker external demand and tighter global financial conditions. Emerging and Developing Asia is expected to maintain relatively strong growth at 4.9 percent in 2026 and 4.8 percent in 2027, supported by robust domestic demand, although external headwinds and trade disruptions may weigh on export-oriented economies. China's growth is projected to slow from 5.0 percent in 2025 to 4.4 percent in 2026 and 4.0 percent in 2027, reflecting ongoing structural challenges, while India is expected to remain the fastest-growing major economy, with growth of 7.6 percent in 2025 moderating to 6.5 percent in both 2026 and 2027.

The Middle East and Central Asia region is expected to experience heightened volatility, with growth declining sharply to 1.9 percent in 2026 from 3.6 percent in 2025, before rebounding to 4.6 percent in 2027. While higher oil prices may benefit oil-exporting economies, escalating geopolitical tensions, supply disruptions, and increased uncertainty are expected to weigh on overall regional activity. Similarly, Sub-Saharan Africa is projected to grow steadily at 4.3 percent in 2026 and 4.4 percent in 2027. Latin America and the Caribbean are expected to experience moderate growth of 2.3 percent in 2026, improving to 2.7 percent in 2027.

3.3 Global Inflation

Global headline inflation declined to 4.1 percent in 2025 after peaking during 2022-2023, reflecting the combined effects of tight monetary policies, easing supply chain pressures, and softer global demand. In advanced economies, inflation declined more sharply to 2.5 percent, moving closer to central bank targets, supported by moderating energy prices and improved supply conditions. However, in EMDEs, inflation remained relatively elevated at around 5.2 percent, driven by exchange rate pressures, food price volatility, and structural supply constraints.

Despite the overall disinflation trend, inflationary pressures persisted in certain sectors, particularly services, due to still-tight labour markets and wage adjustments in many advanced economies. Furthermore, the escalation of geopolitical tensions in the Middle East, particularly the Iran–Israel conflict and associated US involvement, introduced renewed volatility in global energy markets, placing upward pressure on fuel and transportation costs. Food prices also remained susceptible to climate-related disruptions, increased transportation costs, and trade restrictions, particularly in vulnerable regions.

However, global headline inflation is projected to rise to 4.4 percent in 2026 before declining to 3.7 percent in 2027, reflecting expected increases in energy and food prices. In advanced economies, inflation is expected to broadly align with target levels by 2026, while EMDEs are likely to experience a slower convergence due to structural constraints and

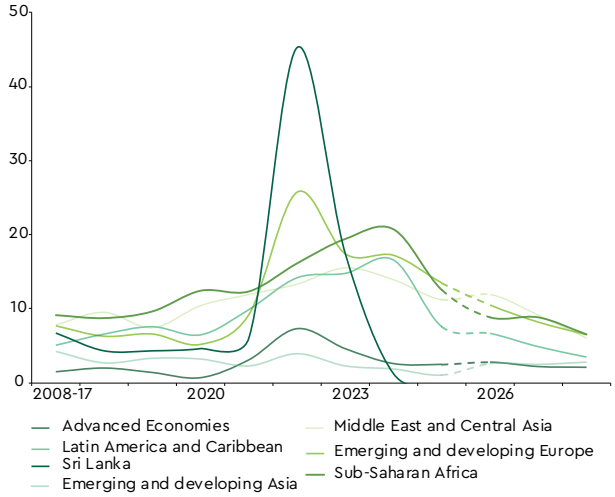

external vulnerabilities. Upside risks to inflation remain, particularly from potential energy price shocks and prolonged geopolitical tensions.

3.4 Interest Rates

The global monetary policy landscape in 2025 reflected a cautious transition from the tight policy stance adopted in previous years toward a more accommodative approach, as central banks balanced the need to support economic growth while ensuring price stability. With inflation gradually moderating, several major central banks, including the US Federal Reserve, the European Central Bank, and the Bank of England, initiated policy rate reductions during 2025. Nevertheless, policy rates remained relatively elevated in real terms, reflecting continued caution amid persistent inflation risks and heightened global uncertainty.

(Percent)

Source: World Economic Outlook, IMF, April 2026

Figure 3.2 | Secured Overnight Financing Rate (SOFR) (30 day average)

(Percent)

Source: Moneycafe.com

Global financial conditions began to ease moderately in 2025; however, long-term interest rates remained elevated due to higher term premiums, large sovereign borrowing requirements, and ongoing geopolitical risks. In particular, rising fiscal deficits and public debt levels, together with uncertainty stemming from geopolitical tensions, including the Iran–Israel conflict, contributed to continued volatility in global financial markets.

In the United States, long-term bond yields remained sensitive to inflation expectations, fiscal developments, and shifts in investor sentiment, while monetary policy easing proceeded cautiously in line with disinflation trends. In the Euro Area and the United Kingdom (UK), policy normalization also progressed gradually, reflecting weaker growth conditions and improving inflation dynamics. In contrast, many emerging market economies maintained relatively tight monetary policy settings in 2025 to manage exchange rate pressures, capital flow volatility, and inflation risks.

3.5 Fiscal Position

3.5.1 Fiscal Deficits

Fiscal deficits in 2025 remained elevated across most economies, reflecting persistent structural spending pressures and rising interest costs. The global fiscal deficit stood at 5.0 percent of GDP in 2025, highlighting limited progress in fiscal consolidation despite the recovery from pandemic-related shocks.

In advanced economies, fiscal deficits recorded 4.4 percent of GDP, while EMDEs averaged 5.9 percent of GDP, showing only modest improvement, with deficits remaining elevated due to sustained public spending, rising defence expenditures, and increasing interest payments. In the United States, the fiscal deficit narrowed to 6.8 percent of GDP in 2025 from 7.9 percent in 2024, supported in part by higher revenues, including tariff-related income, although underlying fiscal pressures remain significant.

In contrast, fiscal deficits in EMDEs' generally widened in 2025, reflecting both higher interest expenditures and weaker primary balances. For emerging markets excluding China, fiscal deficits widened to around 4.7 percent of GDP in 2025 from 4.3 percent of GDP in 2024,

driven mainly by rising borrowing costs and expansionary fiscal policies in some economies. Low-income developing countries continued to face significant fiscal challenges, including declining external financing, rising debt service obligations, and pressures from higher food and energy costs.

The fiscal deficit in Latin American countries widened to 5.2 percent of GDP in 2025 from 4.7 percent of GDP in 2024 and is expected to narrow to 4.7 percent of GDP in 2026. In contrast, the fiscal deficit in low-income developing countries declined to 2.8 percent of GDP in 2025 from 3.0 percent of GDP in 2024 and is expected to widen to 3.5 percent of GDP in 2026.

Source: Fiscal Monitor, IMF, April 2026
Department of Fiscal Policy

Restoring fiscal sustainability remains a key policy priority in the medium term. However, the global fiscal outlook has deteriorated compared to previous assessments, with structural fiscal weaknesses, rising geopolitical tensions, and increasing protectionist policies contributing to persistent fiscal deficits. The Fiscal Monitor highlights that the global fiscal gap, the adjustment needed to stabilize debt, remains significant, leaving limited room for policy complacency.

3.5.2 Government Debt

Global government debt continued to rise in 2025, reflecting sustained fiscal deficits and higher borrowing costs. Global public debt increased to 93.9 percent of GDP in 2025, around 2 percentage points higher than in 2024, and is projected to continue rising over the medium term, potentially reaching 100 percent of GDP by 2029.

Advanced economies continued to account for the largest share of global debt, with debt levels remaining above 108 percent of GDP in 2025, reflecting long-standing structural pressures, including ageing populations, high public spending, and rising interest burdens. In contrast, while debt levels in emerging markets were relatively lower, vulnerabilities remained elevated due to exchange rate pressures, higher financing costs, and limited fiscal buffers.

Governments and companies expected to borrow USD 29 trillion globally from markets in 2026, which is nearly USD 4 trillion expansion compared to 2024 according to the Global Debt Report 2026 (OECD). The global debt stock is expected to increase further to 95.3 percent in 2026 and 97.2 percent in 2027, respectively, from 93.9 percent in 2025. The public debt-to-GDP ratio in advanced economies increased marginally to 108.0 percent in 2025 from 107.6 percent in 2024 and is expected to rise further to 108.2 percent in 2026. The government debt-to-GDP ratio in EMDEs increased to 73.9 percent in 2025 from 69.9 percent in 2024 and the ratio is expected to widen to 77.2 percent in 2026 and 80.2 percent in 2027.

The government debt-to-GDP ratio in Latin American countries increased to 74.2 percent in 2025 from 70.5 percent in 2024 and is expected

to ease to 73.2 percent in 2026. In contrast, the government debt-to-GDP ratio in low-income developing countries declined to 48.2 percent in 2025 from 50.5 percent in 2024 and is expected to decline further to 47.2 percent and 46.6 percent in 2026 and 2027, respectively.

Source: Fiscal Monitor, IMF, April 2026
Department of Fiscal Policy

A key concern highlighted in the IMF Fiscal Monitor April 2026 is the rapid increase in interest payments, which have risen from around 2 percent of global GDP to nearly 3 percent in recent years, significantly constraining fiscal space. At the same time, the structure of sovereign debt markets is evolving as the central banks unwind their balance sheets, meaning that private and often more volatile sources of financing are becoming more important. This shift has heightened exposure to market sentiment and refinancing risks.

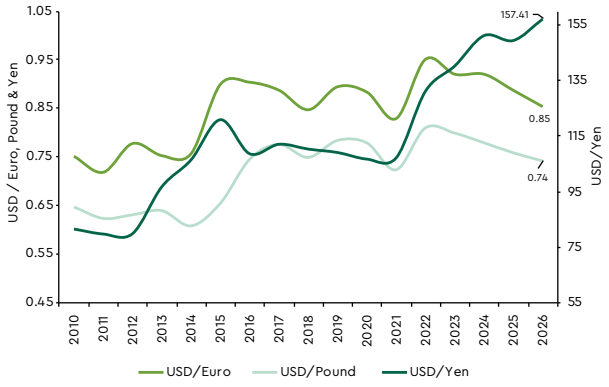

Global borrowing requirements remain substantial, and developments in major economies, particularly the United States and China, which together make up a large share of the rise in global debt, are having a significant bearing on debt dynamics. Debt levels are likely to continue rising given persistent primary deficits and rising interest costs, even with favourable growth-interest rate differentials prevail.

3.6 Currency Movements

Currency markets in 2025 were characterized by heightened volatility compared to the previous year, reflecting shifting monetary policy expectations and increased geopolitical uncertainty. The US dollar remained relatively strong during most of 2025, supported by still-elevated interest rates and safe-haven demand amid global uncertainty, although it showed signs of gradual moderation toward the latter part of the year as expectations of monetary easing strengthened.

Emerging market currencies experienced mixed performance. While some benefited from improved investor sentiment and resilient capital inflows, others remained under pressure due to external vulnerabilities, exchange rate depreciation pressures, and tighter global financial conditions. Commodity-exporting economies were partly supported by higher global commodity prices, particularly energy products, driven by geopolitical tensions which improved their terms of trade and supported foreign exchange inflows.

Figure 3.3 | Exchange Rates Against USD : 2010 – Jan – Apr 2026

Source : x-rates.com

3.7 World Trade

Global trade grew by 5.1 percent in 2025, up from 3.7 percent growth in 2024, reflecting front-loading of trade activity in anticipation of rising trade restrictions and tariffs. However, this strong performance is expected to be temporary; global trade volume growth projected to decline sharply to 2.8 percent in 2026 before recovering to 3.8 percent in 2027. Global trade continues to be shaped by structural shifts, including increasing trade fragmentation, reconfiguration of global supply chains, and rising protectionist measures.

In 2025, the volume of exports by advanced economies grew by 3.7 percent compared to 2.1 percent growth in 2024. The volume of exports by EMDEs grew by 7.4 percent compared to 6.6 percent in 2024. In 2025, the volume of imports by advanced economies grew by 4.7 percent compared to 2.2 percent growth in 2024, while the volume of imports by EMDEs grew by 5.7 percent compared to 6.0 percent in 2024.

The export volume growth in advanced economies is anticipated to decline to 2.5 percent in 2026 and 2.7 percent in 2027. Similarly, the export volume growth in EMDEs is anticipated to decline to 3.5 percent in 2026 before increasing to 5.4 percent in 2027. Further, the import volume growth in advanced economies is anticipated to decline to 2.6 percent in 2026 and 3.1 percent in 2027. In the same vein, the import volume growth in EMDEs is expected to decline to 2.7 percent in 2026 before increasing to 4.9 percent in 2027.

Table 3.6 | World Trade Volume

Annual Percentage Change

	Average 2008–2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027

Source: World Economic Outlook, April 2026

Over the near-term forecast, exports of both goods and services are projected to decline as a share of global GDP, with the decline in services trade being considerably less pronounced. In addition, the reorganization of supply chains toward more geopolitically aligned partners. A practice known as 'friend-shoring', is expected to alter trade patterns without necessarily reducing overall trade volumes in the long term. Over the medium term, global imbalances are expected to decline modestly. Expansionary fiscal policies in some surplus economies may contribute to this adjustment, although this effect could be partially offset by increased investment linked to technological transformation and supply chain restructuring. Overall, the global trade outlook remains subject to significant downside risks, particularly from further escalation of trade tensions, geopolitical fragmentation, and disruptions to key shipping routes.

3.8 World Commodity Market

3.8.1 Energy Prices

Energy prices followed a downward trend in 2025, reflecting easing global demand and expanded supply, although volatility remained elevated amid geopolitical developments. The energy price index fell to 90.0 points in 2025 from 101.5 points in 2024. Brent crude oil prices declined to an average of USD 69.0 per barrel in 2025 from USD 80.7 per barrel in 2024, driven by higher supply and subdued global demand. However, global energy markets experienced

significant disruptions amid escalating tensions in the Middle East. The Middle East conflict has disrupted oil supply chains and exerted upward pressure on global energy prices. This is mainly attributable by the near seizer of the shipping route across the Strait of Hormuz. According to the World Bank's Commodity Market Outlook (CMO), the reduction in global oil supply is estimated at around 10 million barrels per day, the highest on record. Accordingly, Brent crude oil price increased sharply to USD 118 per barrel at end-March 2026 from USD 72 per barrel at end-February 2026, marking the largest single-month increase on record. The World Bank projects average Brent crude oil price at USD 86 per barrel in 2026 under this scenario, significantly higher than earlier projections, reflecting continued supply uncertainties and disruptions to shipping through the Strait of Hormuz, through which nearly 35 percent of global seaborne crude oil trade passes. Under a worst-case scenario, average Brend crude oil prices are expected to range from USD 95 to 115 per barrel, according to the CMO April 2026 report.

Natural gas prices exhibited mixed trends across regions in 2025. In Europe, natural gas prices remained stable at USD 12.0 per million British thermal units (MMBtu) in 2025, compared to USD 11.0 per MMBtu in 2024. In Japan, natural gas prices declined to USD 12.0 per MMBtu in 2025, declining from USD 12.8 per MMBtu in 2024. In contrast, natural gas prices in the US increased to USD 3.5 per MMBtu in 2025 from USD 2.2 per MMBtu in 2024, supported by stronger domestic demand.

Table 3.7 | Price Indices (2010=100)

	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026

Precious Metals	90.6	97.5	97.8	97.2	105.4	133.5	140.2	136.8	147.3	180.2	258.6	368.3

Source: Commodity Markets Outlook, World Bank, April 2026

However, with the blockade of the Strait of Hormuz has intensified competition in global LNG markets, as about 20 percent of global LNG trade passes through the Strait of Hormuz. Buyers have competed intensely to secure LNG amid tightening supplies. Hence, European natural gas prices rose sharply in March 2026 to levels not observed since early 2023, while Asian LNG benchmark prices recorded a significant increase amid intense competition for limited supplies.

European natural gas prices are expected to surge by 25 percent in 2026, before easing to 20 percent in 2027, as supply disruptions gradually subside. In contrast, US natural gas prices remained relatively stable owing to the well-developed domestic pipeline networks, although prices are expected to increase moderately amid stronger demand and expanding LNG exports.

Figure 3.4 | Crude Oil Prices: 2017 – Apr 2026
(USD/bbl)

Source: Commodity Markets Outlook, World Bank, April 2026

3.8.2 Agricultural Prices

Agricultural commodity prices remained broadly stable in 2025, following the easing of supply-side pressures in 2024. Improved harvest conditions, declining fertilizer costs, and normalizing freight rates contributed to moderate price movements. However, prices remained vulnerable to climate risks, including heatwaves and El Niño-related disruptions, which continued to pose localized threats to agricultural production.

The agricultural price index increased marginally to 115.7 in 2025 from 115.0 in 2024, and is projected to decline to 109.3 in 2026. Agriculture raw materials price index increased by 2.0 percent in the first quarter of 2026, mainly attributable to gains in natural rubber prices. The index is expected to remain stable throughout 2026 before declining by almost 3 percent in 2027, reflecting improved supply conditions.

Wheat and maize productions are projected to edge down in 2026–2027 after improving supply conditions and a rise in stocks-to-use ratio in 2025–2026. Accordingly, both wheat and maize prices are projected to increase by 4 percent in 2026.

While agricultural prices are projected to moderate in 2026 under the baseline scenario, the increasing frequency and severity of extreme weather events continue to pose risks to agricultural supply conditions and may exert upward pressure on food prices over the medium term. In addition, geopolitical tensions and trade-related disruptions pose uncertainty for global agricultural markets.

3.8.3 Metal and Mineral Prices

Prices of metals and minerals increased in 2025, following the moderate increase observed in 2024, reflecting robust demand for industrial metals amid supply constraints in key producing economies. The metal and mineral price index increased by 5.5 percentage points to 112.2 points in 2025, from 106.7 points in 2024 and is projected to increase further to 130.8 points in 2026 before moderating in 2027.

The rise in metals and minerals prices was mainly attributable to increased demand for copper, aluminum, tin and zinc, driven by the global energy transition, expansion of renewable energy capacity, electric vehicle production, and increased investment in data centers and related infrastructure. Despite the overall increase, prices of some critical minerals, including iron ore, lead and nickel, recorded declines, reflecting slower growth in China's construction sector.

In contrast, precious metals experienced strong price increases in 2025, driven by elevated geopolitical uncertainty and increased safe-haven demand. Gold prices increased significantly by 44.1 percent to USD 3,442 per troy ounce (toz) in 2025, from USD 2,388 toz in 2024, and are projected to increase to USD 4,700 per toz in 2026 before easing in 2027. The increase was further supported by financial market uncertainty and continued central bank purchases, with prices remaining well above historical averages.

Similarly, silver prices increased due to both investment demand and expanding industrial use in renewable energy and electronics sectors. Platinum prices were underpinned by supply constraints in key producing economies and steady industrial demand. Looking ahead, the metals and minerals price index is projected to decline by 7 percent in 2027 relative to 2026 levels, reflecting easing the supply conditions, according to the World Bank CMO.

3.9 Look Forward: Implications for Sri Lanka

Global economic developments in 2025 presented a mixed outlook for Sri Lanka, with both emerging opportunities and heightened vulnerabilities arising from escalating geopolitical tensions, particularly the Middle East conflict. While earlier expectations anticipated easing global inflation and improving financial conditions, the intensification of the conflict has adversely affected Sri Lanka's external sector through several key channels. In particular, the decline in tourist arrivals and inward remittances from the Middle East, together with higher energy import costs, has placed renewed pressure on the balance of payments and domestic price stability.

Notwithstanding these pressures, evolving global demand conditions and trade disruptions have created an increasingly challenging environment for Sri Lanka's export sector. Key export industries, particularly apparel and tea, have experienced some moderation in growth, reflecting softer external demand and increased uncertainty in major markets. However, Sri Lanka's established position in global value chains, together with ongoing efforts to diversify export markets and enhance product competitiveness, is expected to provide a measure of resilience. In addition, continued demand for necessity goods and specialized products, along with gradual improvements in global trade conditions over the medium term, is likely to support a recovery in export performance.

A further external challenge arises from the tariff imposed by the US United States on selected Sri Lankan exports in 2025. Importantly, through diplomatic engagement by the Government of Sri Lanka, the initially proposed tariff of 44 percent was successfully reduced to around 20 percent, thereby substantially mitigating the adverse impact on the external sector. While the revised tariff level may still exert some pressure on price competitiveness, particularly in the apparel sector, it represents a considerable easing of external constraints relative to the originally proposed tariff rate.

Sri Lanka's export sector is expected to navigate these pressures through continued market diversification, enhanced productivity, and increased value addition. In addition, well-established trade relationships, adherence to international standards, and ongoing policy support are likely to mitigate the overall impact and underpin export sector recovery over the medium term.

In response to these challenges, the Government of Sri Lanka has intensified efforts to mitigate external vulnerabilities, including diplomatic engagement with key trading partners, diversification of export markets, and strengthening trade and investment linkages with emerging regions, particularly Asia. In addition, policy measures aimed at enhancing export competitiveness, promoting tourism recovery, and facilitating remittance inflows remain essential to sustaining external sector stability. However, given the scale and persistence of external shocks, these measures may yield results gradually, necessitating sustained and coordinated macroeconomic policy support.

Overall, the evolving global environment underscores the heightened vulnerability of small open economies such as Sri Lanka to external shocks. Heavy reliance on a concentrated set of export products, tourism markets, and remittance sources increases exposure to geopolitical disruptions and global demand fluctuations. These structural vulnerabilities highlight the urgent need for Sri Lanka to diversify its export base, expand into new markets, strengthen domestic value addition, and build external buffers. Enhancing economic resilience through prudent macroeconomic management, structural reforms, and improved competitiveness will be essential for sustaining stability and supporting long-term growth in an increasingly complex and interconnected global economy.

PART II

Final Budget Position

04

Government Revenue

4.1. Overview

In 2025, the Government continued its fiscal consolidation process while advancing critical fiscal structural reforms. The government revenue and fiscal balances exceeded the budgeted targets driven by higher revenue collections from motor vehicles, VAT on domestic activities, taxes on external trade and a slower pace of capital expenditure implementation.

The hard-earned gains from the fiscal reforms have further strengthened the fiscal consolidation process, as reflected in the following key outcomes:

(i) The tax revenue-to-GDP ratio rose to 15.4 percent in 2025, up from 7.3 percent in 2022—the highest level recorded since 1997;

(ii) A primary surplus of 5.4 percent was achieved in 2025, compared to the primary deficit of 3.7 percent in 2022;

(iii) A current account surplus of 0.7 percent of GDP was recorded in 2025, marking the first time in the country's history; and

(iv) The fiscal deficit narrowed to 2.3 percent of GDP in 2025, down from 10.2 percent in 2022.

In nominal terms, government revenue including grants increased significantly by 34.1 percent to Rs. 5,485.6 billion in 2025 from Rs. 4,090.8 billion in 2024. This significant expansion in total government revenue was primarily driven by growth in Value Added Tax (VAT) collections. The revenue from VAT rose by 33.4 percent to Rs. 1,746.9 billion in 2025, from Rs. 1,309.7 billion in 2024. This increase is mainly attributed to improved domestic consumption, enhanced taxpayer compliance, higher revenue from VAT on financial services, and the inclusion of motor vehicles in the VAT net.

Excise Duty was also a major contributor to overall revenue performance in 2025. With the exception of excise duty on cigarettes, revenue collection from Excise Duty, recorded a positive growth across all subcategories during the year. Notably, revenue from Excise Duty on motor vehicles more than doubled its annual target for 2025, reflecting the relaxation of the temporary import suspension that had been in place since 2020. Following the resumption of vehicle imports in February 2025, revenue from Excise Duty on motor vehicles rose significantly by Rs. 413.2 billion, from Rs. 58.6 billion in 2024 to Rs. 471.8 billion in 2025. Revenue from Excise Duty on petroleum increased by 20.2 percent to Rs. 240.6 billion in 2025 from Rs. 200.2 billion in 2024 while the revenue from Excise Duty on liquor grew by 8.5 percent to Rs. 231.5 billion in 2025, from Rs. 213.4 billion in 2024. In contrast, the revenue from Excise Duty on cigarettes declined by 13.2 percent to Rs. 102.7 billion in 2025 from Rs. 118.3 billion in 2024.

Revenue from income tax surpassed Rs.1 trillion for the second consecutive year in 2025, reaching Rs. 1,139.4 billion, up from Rs. 1,026.2 billion in 2024. This represents a year-on-year growth of 11.0 percent and a realization of 97.6 percent of the revenue estimate for 2025. This fiscal performance was attributable to targeted rate increases from 40 percent to 45 percent in liquor, tobacco and betting and gaming sectors, a broadening of the taxable base driven by rising nominal salaries in both the public and private sectors, and the introduction of a 15 percent income tax on service exports to capture revenue from the growing digital economy. The achievement of 97.6 percent of the revenue target reflects a significant improvement in tax administration and an overall strengthening of taxpayer compliance.

Similarly, revenue from the Social Security Contribution Levy (SSCL) increased by 17.4 percent to Rs. 294.5 billion in 2025, from Rs. 250.9 billion in 2024, achieving 111.6 percent of the estimate for the year. This growth was mainly driven by the full-year impact of the reduction in the registration threshold from Rs. 120 million per annum to Rs. 60 million per annum, effective from January 01, 2024.

Revenue from taxes on external trade increased by 49.1 percent to Rs. 711.7 billion in 2025 from Rs. 477.5 billion in 2024, driven by the growth in revenue from Ports and Airports Development Levy (PAL), Special Commodity Levy (SCL), Customs Import Duty (CID) and CESS. Revenue from CID significantly increased by 148.2 percent to Rs. 275.9 billion in 2025, from Rs. 111.1 billion in 2024, mainly due to the imposition of CID on motor vehicles during the year. The revenue from SCL exceeded its estimate for 2025 by

30.6 percentage points, recording a growth of 42.9 percent to Rs. 164.6 billion in 2025 from Rs. 115.2 billion in 2024. This was mainly attributable to the upward revision of duty rates on sugar, B' Onions and potatoes.

Revenue from non-tax sources increased by 22.7 percent to Rs. 400.2 billion in 2025, from Rs. 326.3 billion in 2024 driven primarily by higher receipts from sales and charges.

4.2 Tax Policy Reforms

In 2025, Sri Lanka maintained its fiscal consolidation path under the Extended Fund Facility of the International Monetary Fund (IMF-EFF), focusing on correcting structural imbalances while navigating unforeseen external shocks. The year was characterized by a delicate balancing act of providing targeted relief to the public while broadening the tax base through modernized tax administration.

Key tax policy measures undertaken in 2025 included the revision of personal income tax thresholds and rates with a view to providing relief to individual taxpayers. The annual tax-free threshold was increased from Rs. 1,200,000 per annum to Rs. 1,800,000 per annum, effective from April 01, 2025. In parallel, the Corporate Income Tax (CIT) rate applicable on the gains and profits from the manufacture and sale of liquor, tobacco, and betting and gaming was revised upwards from 40 percent to 45 percent. Additionally, a new CIT rate of 15 percent was introduced for income earned in foreign currency and repatriated to Sri Lanka through a licensed bank, covering both professional services rendered to overseas clients and other foreign income.

In addition to the income tax measures introduced, 2025 brought reforms to VAT, SSCL and Excise Duties. The Simplified Value Added Tax System (SVAT), was also repealed with effect from October 1, 2025. This reform, which is a key structural benchmark under the IMF-EFF programme, aims to minimise revenue leakage and administrative complexity. The SVAT system has been replaced by a modern, Risk-Based Refund Scheme (RBRS).

Table 4.2 | AIT/WHT rates

Category	Rate (%)	Final/Non-Final
Dividend	15	Final
Interest or discount paid	10	Non-Final

Non residents	14	Non-Final

Source: Department of Fiscal Policy

In line with the registration threshold reductions introduced in 2024, the SSCL registration threshold will be further reduced from Rs. 60 million per annum to Rs. 36 million per annum effective from July 01, 2026. The measure is expected to broaden the base of liable entities and enhance revenue potential.

In 2025, Excise tax duty rates on all excisable articles with unit rates were revised upward by 5.9 percent, based on the annual inflation-adjusted indexation mechanism first introduced in 2024. Additionally, Excise duty on electric vehicles was increased by 100 percent, effective from February 01, 2025.

Although the late-November landfall of cyclone Ditwah necessitated a swift reallocation of resources toward emergency recovery, including a Rs. 500 billion supplementary budget allocation for 2026, the foundational strength of the revenue performance in 2025 ensured that these fiscal measures remained sustainable without compromising Sri Lanka's long-term fiscal consolidation targets.

4.3 Government Revenue Performance

Total government revenue including grants increased significantly by 34.1 percent to Rs. 5,485.6 billion in 2025 compared to Rs. 4,090.8 billion in 2024, surpassing the Budget Estimate by 9.9 percentage points. As a percentage of GDP, revenue including grants rose by 3.2 percentage points to 16.7 percent in 2025 compared to 13.6 percent in 2024. This was mainly driven by a substantial increase in tax revenue, which grew by 36.3 percent to Rs. 5,049.2 billion in 2025, from Rs. 3,704.6 billion in 2024, largely attributable to higher tax revenue collections from motor vehicles following the removal of import restrictions, and from VAT on domestic activities.

In 2025, tax revenue rose to 15.4 percent of GDP, a notable increase of 3.1 percentage points compared to the 12.3 percent recorded in the previous year, marking the highest tax-to-GDP ratio since 1997. Revenue collections from VAT, the largest contributor to total tax revenue, grew by 33.4 percent to Rs. 1,746.9 billion in 2025 compared to Rs. 1,309.7 billion in 2024. As a percentage of GDP, VAT revenue increased by 1.0 percentage point to 5.3 percent in 2025. This strong performance was primarily driven by higher revenue from imports, particularly from motor vehicles, alongside the recovery of domestic economic activity. VAT revenue from imports increased by 49.2 percent to Rs. 891.4 billion, while VAT revenue from domestic activities increased by 20.1 percent to Rs. 855.5 billion in 2025. Revenue from motor vehicle related taxes including Excise Duty, VAT, CID, Luxury Motor Vehicle Tax rose to 2.8 percent of GDP.

Revenue collected from Income Tax increased by 11.0 percent to Rs. 1,139.4 billion in 2025 compared to Rs. 1,026.2 billion in 2024. In 2025, a series of revenue measures were introduced and implemented, contributing positively to the growth in income tax collections: (i) the revision of the corporate income tax rate on liquor, tobacco, and betting and gaming industries from 40 percent to 45 percent; (ii) the introduction of 15 percent of income tax on export of services;(iii) the increase of the Withholding Tax (WHT) rate on interest income from 5 percent to 10 percent; and (iv) 19.2 percent increased in the number of registered income taxpayers to 1,302,596 files in 2025, from 2024, reflecting improvements in tax administration.

Revenue form Excise Duty rose by 1.2 percentage points to 3.2 percent of GDP in 2025, from 2.0 percent of GDP in 2024, reflecting higher revenue from motor vehicles imports coupled with upward revisions to Excise Duty rates on excisable articles following the implementation of inflation-adjusted indexation. Despite a decline in Excise Duty revenue from cigarettes, revenue collection from liquor, petroleum and

other excisable articles contributed positively to overall revenue.

Revenue from CID increased by 0.5 percentage points to 0.8 percent of GDP in 2025, mainly due to the higher revenue collection from the import of motor vehicles. In nominal terms, CID revenue grew by 148.2 percent to Rs. 275.9 billion in 2025 compared to Rs. 111.1 billion in 2024. Furthermore, increases in revenue from SSCL (by 17.4 percent to Rs. 294.5 billion), SCL (by 42.9 percent to Rs. 164.6 billion), PAL (by 6.4 percent to Rs. 180.9 billion) and CESS (by 11.4 percent to Rs. 90.4 billion) positively contributed to overall tax revenue performance.

Revenue collected by Sri Lanka Customs rose significantly to Rs. 2,504.0 billion in 2025 from Rs. 1,523.8 billion in 2024, surpassing the annual estimate by Rs. 389.0 billion. In the same vein, revenue collected by the Department of Inland Revenue increased to Rs. 2,234.6 billion in 2025, from Rs. 1,937.8 billion in 2024, exceeding the annual estimate by Rs. 39.4 billion. In contrast, the Excise Department recorded revenue of Rs. 233.1 billion in 2025, falling short of its annual estimate by Rs. 8.9 billion.

Reflecting the implementation of tax policy reforms, administrative improvements, and the expansion of domestic economic activity, revenue from domestic consumption-based taxes grew by 15.0 percent to Rs. 1,423.9 billion in 2025, from Rs. 1,238.6 billion in 2024. Similarly, import-based tax revenue recorded a notable increase of 70.8 percent, rising to Rs. 2,388.5 billion in 2025 from Rs. 1,398.1 billion in 2024, driven mainly by revenue from motor vehicle imports alongside a 14.0 percent increase in the total import bill to USD 21,480 million in 2025.

Non-tax revenue increased by 22.7 percent to Rs. 400.2 billion in 2025, from Rs. 326.3 billion in 2024. This growth was mainly driven by notable increases across several subcategories: profits and dividends rose by 37.6 percent to Rs. 56.5 billion; interest income increased by 24.7 percent to Rs. 72.0 billion; social security contributions grew by36.4 percent to Rs. 58.8 billion; and fines, fees, and charges increased by 16.9 percent to Rs. 180.9 billion. These gains collectively reflect improved economic conditions and strengthened administrative collections during the year.

Income Tax

Revenue from Income Tax increased by 11.0 percent to Rs. 1,139.4 billion in 2025, from Rs. 1,026.2 billion in 2024, achieving 97.6 percent of the annual estimate for the year. As a percentage of GDP, Income Tax revenue increased marginally by 0.1 percentage points to 3.5 percent in 2025, from 3.4 percent in 2024.

Revenue from personal and corporate taxes increased by 11.8 percent to Rs. 963.6 billion in 2025, from Rs. 862.2 billion in 2024. This was mainly attributable to an increase in corporate income receipts by 16.0 percent to Rs. 677.7 billion in 2025, reflecting the upward revision of the Corporate Income Tax (CIT) rate from 40 percent to 45 percent for the liquor, tobacco, betting, and gaming industries, effective from April 1, 2025, alongside the introduction of a 15 percent tax on income earned from the export of services. Personal Income Tax also increased by 5.4 percent to Rs. 84.8 billion, largely supported by rising wage levels, including the upward adjustment of minimum wages in the private sector effective from April 2025 and the salary revision in the public sector effective from January 2025. Revenue from Advance Personal Income Tax (APIT)/Pay-As-You-Earn (PAYE) receipts increased modestly by 1.8 percent to Rs. 201.1 billion, reflecting the combined effect of the increase in the tax-free threshold for personal income tax from Rs. 1.2 million per annum to Rs. 1.8 million per annum and the broadening of the 18 percent tax bracket both effective from April 1, 2025.

Revenue from WHT increased by 7.3 percent to Rs. 175.8 billion in 2025, from Rs. 163.8 billion in 2024, achieving 76.4 percent of the annual estimate for the year. This growth was mainly driven by the increase in the WHT rate on interest income from 5 percent to 10 percent, effective from April 2025, notwithstanding the introduction of a self-declaration mechanism to exempt WHT deductions on interest income from bank accounts for individuals whose income falls below the personal income tax threshold.

Administrative improvements, underpinned by enhanced compliance efforts and digitalisation initiatives, also supported the expansion of the taxpayer base, with new registrations for Corporate Income Tax (CIT) increasing by 24.9 percent and new registrations for Personal Income Tax (PIT) rising by 18.7 percent in 2025.

Box 4.1 | Phasing out CESS: Transforming Sri Lanka's Trade Landscape

Sri Lanka is undertaking a major reform of its tariff structure through the phased removal of the CESS levy under the Export Development Act, No. 40 of 1979. This reform marks a decisive shift from a complex, protection-oriented regime toward a simpler, more transparent, and globally competitive trade framework.

For years, CESS functioned as both a revenue source and a protective tool for domestic industries. However, its expansion—alongside other para-tariffs—has led to a fragmented tariff structure, increasing the cost of imported inputs and weakening export competitiveness. It has also reduced transparency and predictability in trade policy.

Recognizing these challenges, the Government has initiated a phased reform to rationalize tariffs, reduce production costs, and promote export-led growth.

Policy Framework and Implementation

The reform was introduced under Budget Proposal No. 34.6 of 2023 and implemented through Gazette No. 2325/06. It was further strengthened under Budget Proposal No. 35.3 of 2026, which removed CESS on fabrics while introducing VAT to maintain competitive neutrality.

With Cabinet approval on 03 March 2026, Gazette No. 2479/38 formalized the phased removal of CESS on 2,634 HS codes over four years, aligned with commitments under the World Bank's Development Policy Operation (DPO).

The classification follows the UN Broad Economic Categories (BEC), ensuring consistency across capital, intermediate, and consumption goods.

CESS Phase – Out Schedule						
S/N	**Type Of Goods**	**HS Lines**	**2026**	**2027**	**2028**	**2029**
1	Marginal Rates (<5%)	46	100%	–	–	–
2	Intermediate And Capital Goods	693	50%	25%	25%	–
3	Sensitive Intermediate And Capital Goods	107	–	25%	25%	50%
4	Fabrics	265	100%	–	–	–
5	Consumption Goods	1,523	–	–	–	100%
	Total	**2,634**				

Data Source: Department of Trade and Investment Policy

Economic Impact of the Reform

1. Local Manufacturers
Removal of CESS on inputs and machinery reduces production costs, enabling improved efficiency, technology adoption, and product quality. However, increased competition from imports may pressure less competitive firms.

2. Importers
Lower duties reduce import costs and expand business opportunities. However, increased market entry may intensify competition and compress margins.

3. Exporters
Exporters benefit significantly from reduced input costs, improving price competitiveness in global markets and supporting export growth and diversification.

4. Consumers
Consumers gain from lower prices, improved quality, and a wider variety of goods due to increased competition

Box 4.1 | Phasing out CESS: Transforming Sri Lanka's Trade Landscape contd....

Safeguarding Domestic Industries

As Sri Lanka liberalizes trade, it has strengthened WTO-consistent safeguards to protect domestic industries from unfair practices.

1. Trade Remedies

Under the Anti-Dumping and Countervailing Duties Act, No. 2 of 2018: and regulations have already been published by Gazette Extraordinary Notification No.2429/32 dated 27.03.2025.

- Anti-dumping measures address imports sold below fair value
- Countervailing duties offset foreign subsidies

These measures ensure fair competition without restricting legitimate trade.

2. Standards and Technical Regulations

Strengthened product standards and certification—implemented by the Sri Lanka Standards Institution—ensure quality and safety of imports.

- Mandatory certification for key products
- Testing and inspection at borders
- Rejection of substandard goods

These measures protect consumers while maintaining fair competition.

3. Institutional Coordination

Key institutions—including the Ministry of Finance, Planning and Economic Development, Ministry of Industry and Entrepreneurship Development, Department of Trade and Investment Policy, and Department of Import and Export Control, Sri Lanka Standard Institution and Sri Lanka Customs are working together to strengthen enforcement and align regulations with international standards.

A Strategic Policy Shift

The phased removal of CESS reflects a transition from broad tariff protection to targeted, rules-based trade policy instruments. It enhances:

- Transparency and predictability
- Ease of doing business
- Export competitiveness
- Integration into global value chains

At the same time, strengthened safeguards ensure domestic industries remain protected from unfair trade practices.

Conclusion

The CESS phase-out is a critical step in modernizing Sri Lanka's trade regime. By lowering costs, improving efficiency, and aligning with global best practices, the reform supports sustainable, export-led growth. Its success will depend on effective implementation, institutional coordination, and the ability of domestic industries to adapt to a more competitive environment and the government is committed to safeguard local industries and consumers.

Value Added Tax (VAT)

In nominal terms, revenue from Value Added Tax (VAT) recorded a strong year-on-year increase of 33.4 percent, rising to Rs. 1,746.9 billion in 2025 from Rs. 1,309.7 billion in 2024. This expansion was primarily driven by substantial increases in VAT collections from both domestic economic activities and imports, as well as the full-year impact of the reduction in the VAT registration threshold from Rs. 120 million per annum to Rs. 60 million per annum, effective from January 1, 2024. Revenue from VAT on domestic activities rose by 20.1 percent to Rs. 855.5 billion in 2025, from Rs. 712.2 billion in 2024, of which VAT on financial services accounted for Rs. 198.2 billion, reflecting a significant increase of 64.7 percent, rising from Rs. 120.4 billion in 2024. VAT revenue from imports increased significantly by 49.2 percent to Rs. 891.4 billion in 2025, from Rs. 597.5 billion in 2024, driven largely by the resumption of motor vehicle imports following the removal of the import suspension.

The contribution of VAT to total tax revenue was 34.6 percent in 2025. VAT revenue as a percentage of GDP increased significantly by 1.0 percentage points to 5.3 percent in 2025 compared to 4.4 percent in 2024, underscoring the growing importance of VAT as a key instrument in fiscal consolidation and domestic revenue mobilization efforts.

Notwithstanding this substantial improvement, the full revenue potential of VAT on imports is yet to be realised, reflecting the lagged effects of import restrictions that remained in place during 2024, although such restrictions have been progressively relaxed since late 2024. The overall increase in VAT revenue also reflects improvements in tax administration and enhanced compliance, supported by strengthened enforcement measures and ongoing administrative reforms, which have continued to support revenue mobilisation efforts. The number of VAT-registered entities, including those in the financial services sector, increased significantly by 56.3 percent to 33,187 at end December 2025, from 21,227 at end-December 2024. This upward trend extended into 2026, with the number of registered VAT payers rising further to 34,769 by end-February 2026, reflecting sustained efforts to broaden the tax base and strengthen compliance.

[a] Provisional

Social Security Contribution Levy (SSCL)

Revenue from Social Security Contribution Levy (SSCL) increased by 17.4 percent to Rs. 294.5 billion in 2025 from Rs. 250.9 billion in 2024. This growth was driven by the expansion of both domestic and import activities, with revenue from domestic activities rising by 19.0 percent to Rs. 221.9 billion and revenue from imports rising by 12.8 percent to Rs. 72.6 billion. The number of entities registered for SSCL rose by 34.0 percent to 16,206 in 2025 from 12,097 in 2024, reflecting the full-year effect of the reduction of annual turnover threshold for registation from Rs. 120.0 million per annum to Rs. 60.0 million per annum effective from January 1, 2024. The revenue realization from SSCL stood at 111.6 percent of the annual estimate.

Excise Duty

Total revenue from Excise Duty, third largest contributor to the tax revenue, increased significantly by 76.9 percent in 2025 to Rs. 1,058.7 billion from Rs. 598.5 billion in 2024, reflecting stronger performance across several key excisable categories. This growth was largely driven by higher collections from motor vehicles, petroleum products, and liquor, supported by the full-year impact of excise duty rate revisions implemented effective from January 11, 2025, based on inflation-adjusted indexation of excisable articles.

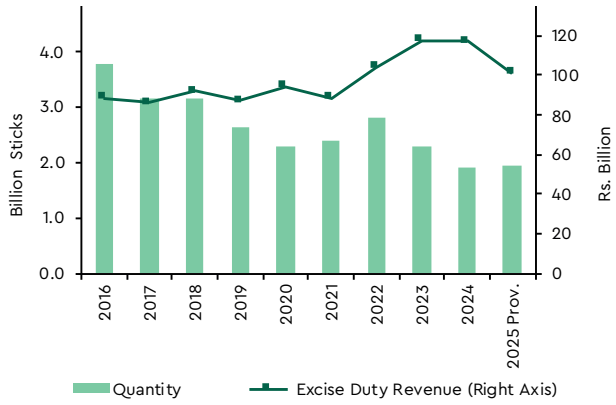

Table 4.7 | Excise Duty Revenue

Figure 4.3 |Cigarette Production and Excise Duty Revenue

Sources: Department of Fiscal Policy and Sri Lanka Customs

Revenue from Excise Duty on motor vehicles rose significantly to Rs. 471.8 billion in 2025 from Rs. 58.6 billion in 2024 primarily driven by the relaxation of temporary import restrictions on motor vehicles effective from February 1, 2025.Revenue from Excise Duty on petroleum products increased by 20.2 percent to Rs. 240.6 billion in 2025 from Rs. 200.2 billion in 2024, mainly due to a slight increase in import quantities. Revenue from cigarettes including tobacco, however, declined by 13.2 percent to Rs. 102.7 billion in 2025 from Rs. 118.3 billion in 2024.

Table 4.8 | Production and Excise Tax Collection from Liquor and Cigarettes

[a] After the 2017 Hard Liquor & Malt Liquor Production is Absolute liters

Figure 4.4 | Liquor Production and Excise Tax Revenue

Sources : Department of Fiscal Policy and Department of Excise

Revenue from Excise Duty on other excisable items, including sweetened beverages, refrigerators, palm oil, and fatty acids, increased by 50.8 percent, to Rs. 12.1 billion in 2025 from Rs. 8.0 billion in 2024, largely attributable to the 5.9 percent rate revision implemented effective from January 11, 2025, based on inflation-adjusted indexation of excisable articles.

Revenue from Excise Duty on liquor increased by 8.5 percent to Rs. 231.5 billion in 2025 from Rs. 213.4 billion in 2024, contributing 21.9 percent to the total Excise Duty revenue. This growth was supported by 5.9 percent duty rate revision implemented effective from January 11, 2025, in line with the policy of inflation-adjusted indexation of excise taxes, with revenue realization reaching 96.5 percent of the estimate. However, the production of both hard liquor and malt liquor increased by 11.7 percent to 37.3 million absolute liters in 2025 from 33.4 million absolute liters in 2024.

Table 4.9 | Structure of the Amendment of the Excise Duty on Liquor

Liquor Category	Previous Duty per Absolute Liter (Rs.) (From 01.01.2024)	New Duty per Absolute Liter (Rs.) (From 11.01.2025)
Special Arrack	6,840	7,244
Molasses/ Palmyra/ Coconut Arrack	7,320	7,752
Country made Foreign Liquor	7,525	7,969
Beer (Strength – Less than 5%)	5,415	5,735
Strong Beer (Strength – more than or equal to 5%)	5,680	6,015
Wine	5,415	5,735
Sake	1,480	1,567
Milk Punch	3,760	3,982
Cider	4,105	4,347

Source: Department of Fiscal Policy

Customs Import Duty (CID)

Revenue from Customs Import Duty (CID) increased significantly by 148.2 percent to Rs. 275.9 billion in 2025 from Rs. 111.1 billion in 2024. This growth was mainly driven by the resumption of motor vehicle imports, which alone contributed 53.0 percent of CID revenue at Rs 146 billion, as well as the gradual recovery in import demand and the normalisation of trade activities. Other major contributors to CID revenue included milk powder, lubricant oils, and wheat grain.

Special Commodity Levy (SCL)

Revenue from the Special Commodity Levy (SCL) increased significantly by 42.9 percent to Rs. 164.6 billion in 2025 from Rs. 115.2 billion in 2024, driven by upward rate revisions on selected commodities, including sugar, B' Onions, and potatoes, as well as increased import volumes of essential goods. The highest SCL revenue was generated from potatoes, B' Onions, sugar, and coconut oil. SCL revenue exceeded the annual estimate of Rs. 126.0 billion, by Rs. 38.6 billion.

Ports and Airports Development Levy (PAL)

Revenue from the Ports and Airports Development Levy (PAL) increased by 6.4 percent to Rs. 180.9 billion in 2025 from Rs. 170.0 billion in 2024, supported by the continued application of the levy on a broad range of imported goods and improved Customs enforcement mechanisms. Major revenue-generating items under PAL included crude petroleum oil, milk powder, steel, and cement clinkers.

Commodity Exports Subsidy Scheme (CESS)

Revenue from the Commodity Export Subsidy Scheme (CESS) levy on imports and exports increased by 11.4 percent to Rs. 90.4 billion in 2025 from Rs. 81.1 billion in 2024, primarily driven by the increased import volumes following the relaxation of restrictions on non-essential imports. Revenue from CESS on imports rose by 12.1 percent to Rs. 88.7 billion in 2025 from Rs. 79.1 billion in 2024, while revenue from CESS on exports declined to Rs. 1.6 billion in 2025 from Rs. 2.0 billion, with tea and coconut-based products remaining the primary contributors to export CESS revenue.

Box 4.2 | The 4 – Band Customs Import Duty Reform

1. Overview

The introduction of the 4-Band Customs Import Duty (CID) framework, published on 03 March 2026 under Gazette Notification No. 2478/03, with effect from 1 April 2026, marks a significant structural reform under Sri Lanka's National Tariff Policy (NTP). The reform rationalizes the existing tariff regime, enhances transparency, and aligns with international best practices.

The reform supports the national development agenda of "*Thriving Nation, A Beautiful Country*" and contributes towards achieving the medium-term export target.

2. Key Features of the Reform

The reform introduces a streamlined and standardized tariff structure with the following features:

- Adoption of a four-band tariff system
- Alignment with United Nations Broad Economic Categories (BEC) Rev.5
- Reduction of tariffs on inputs to support domestic production
- Rationalization of tariffs on consumption goods
- Maintenance of stability across the majority of tariff lines

3. Tariff Structure

The revised tariff system, as published in Extraordinary Gazette Notification No. 2478/03 dated 03 March 2026, comprises a four-band Customs Import Duty (CID) structure consisting of 0 percent, 10 percent, 20 percent and 30 percent tariff bands, classified into two groups based on the economic categories of goods under the United Nations Broad Economic Categories (BEC) Rev.5, as follows:

Methodology

CID Rate	Category	Objective
0%	Intermediate and Capital Goods	Ensure supply continuity & promote production
10%	Intermediate and Capital Goods	Ensure supply continuity & promote production
20%	Consumption Goods	Revenue mobilization & demand management
30%	Consumption Goods	Revenue mobilization & demand management

4. Coverage and Distribution

The reform covers a total of 8,225 HS lines, of which 85.2 percent remain unchanged, ensuring policy continuity.

In addition, 76 new HS sub-divisions were introduced, 27 sub-divisions were removed, and selected descriptions have been amended to improve classification accuracy and regulatory oversight.

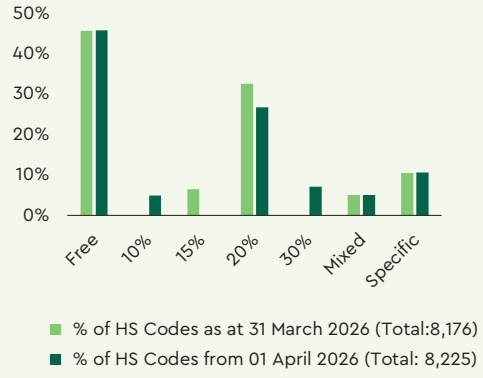

Distribution of Customs Import Duty Rates by HS Codes

CID Rate Category	As at 31 March 2026		Effective from 01 April 2026	
	No. of HS Codes	%	No. of HS Codes	%
0% (Free)	3,725	45.6%	3,756	45.7%
10%	–	–	406	4.9%
15%	526	6.4%	–	–
20%	2,660	32.5%	2,195	26.7%
30%	–	–	582	7.1%
Mixed Rates	413	5.1%	411	5.0%
Specific Rates	852	10.4%	875	10.6%
Total	**8,176**	**100.0%**	**8,225**	**100.0%**

Data Source: Department of Trade and Investment Policy

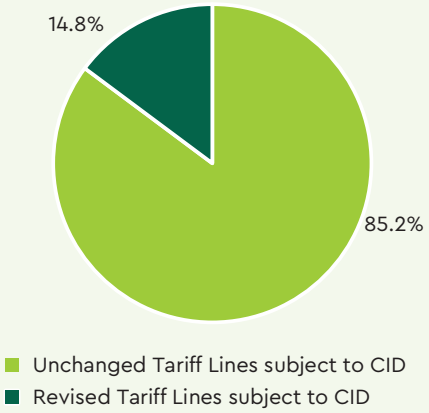

Box 4.2 | The 4 – Band Customs Import Duty Reform contd...

Distribution of CID Rates across Total HS Codes

Data Source: Department of Trade and Investment Policy

Distribution of Tariff Lines subject to CID – Stability & Adjustment

Key Sectoral Coverage under the 4-Band CID Structure

CID Band in line with BEC Rev.5	CID Rate	Sectoral Coverage	Key Product Categories
Capital Goods & Intermediate	0%	Agriculture, Manufacturing, Construction, Services, etc.	Agricultural inputs, food and agro-industrial inputs, essential oils, chemicals, minerals, plastics and rubber, leather, wood, metals, glass, machinery, electrical equipment, precision instruments, etc.
	10%		
Consumption Goods	20%	Processed Foods, Household Appliances, Musical Instruments, etc.	Dairy products, processed foods, household appliances, textiles, media equipment, musical instruments, works of art, collectors' pieces and antiques, selected regulated goods, etc.
Consumption Goods- including Luxury Items	30%	Lifestyle, Toys, Transport, etc.	Personal care items, motor vehicles, watches, toys, sunglasses, etc.

5. Safeguard Arrangements

To ensure a smooth implementation, the following measures have been adopted:

- Selected intermediate goods are temporarily retained at 20 percent to safeguard Government revenue
- Specific rates remain unchanged
- Goods subject to the free rate of CID remain unchanged
- Tobacco and liquor excluded from the methodology
- Targeted adjustments based on sectoral requirements

Box 4.2 | The 4 – Band Customs Import Duty Reform contd...

Key Tariff Adjustments under the 4-Band Structure

The following key adjustments have been introduced under the 4-Band CID Reform:

(a) Reduction of tariffs on intermediate goods
Intermediate goods previously subject to 15 percent tariffs are reduced to 10 percent to lower input costs and enhance industrial competitiveness.

(b) Rationalization of tariffs on consumption goods
Consumption goods are restructured at 20 percent or 30 percent based on essentiality and domestic production considerations.

(c) Retention of selected goods at 20 percent
Certain intermediate goods are temporarily retained at 20 percent, taking into account revenue implications and sector-specific considerations.

(d) Streamlining of mixed-rate structures
Mixed-rate tariffs are rationalized and adjusted in line with the revised tariff bands.

(e) Maintenance of stability across tariff lines
A majority of tariff lines remain unchanged to ensure continuity and investor confidence.

(f) Sector-specific adjustments
Targeted adjustments are made in selected sectors to balance production support, revenue mobilization, and consumer considerations.

(g) Exclusions from the 4-band structure
Goods subject to Specific rates, as well as tobacco and liquor products, remain outside the framework to maintain revenue certainty and policy objectives.

6. Fiscal Impact

The estimated impact on Government revenue is less than 0.1 percent of Gross Domestic Product (GDP), based on calculations derived from import statistics for the years 2024 and 2025 based on data from Sri Lanka Customs and GDP data from the Central Bank of Sri Lanka.

7. Expected Outcomes

The reform is expected to:

- Improve industrial competitiveness by lowering the cost of production
- Enhance investment attractiveness
- Increase transparency in tariff administration
- Support export growth
- Strengthen the production base of the economy

8. Conclusion

The 4-Band Tariff Reform establishes a streamlined, transparent, and rules-based tariff framework aligned with international best practices in goods classification and national economic objectives. Lower tariffs on intermediate and capital goods, together with the application of 20 percent or 30 percent bands on consumption goods, support industrial competitiveness, export growth, and efficient resource allocation. Stability across most tariff lines, supported by targeted safeguards, ensures a smooth transition with minimal disruption, thereby strengthening the foundation for a competitive and resilient economy.

Other Taxes

Telecommunication Levy (TL)

Revenue from the Telecommunication Levy fell by 5.0 percent to Rs. 15.1 billion in 2025 from Rs.15.9 billion in 2024, reflecting reduced consumer spending on traditional telecommunication services as users shifted towards more affordable packages.

In terms of sector performance, fixed access service connections declined from 3.4 million to 2.6 million in 2025, reflecting the sustained reduction in reliance on traditional landline services while fixed internet and email subscribers decreased from 2.5 million in 2024 to 1.9 million over the same period. In contrast, cellular phone subscribers increased approximately 29.5 million in 2025 from 28.8 million in 2024, and mobile broadband subscribers rose to around 21.9 million from 20.6 million in 2024, indicating continued expansion in mobile connectivity.

Embarkation Levy (EL)

Revenue from the embarkation levy increased by 39.6 percent to Rs. 53.5 billion in 2025 from Rs. 38.3 billion in 2024, driven by strong growth in tourist arrivals, which rose by 15.1 percent to 2,362,521 persons in 2025 from 2,053,465 persons in 2024.

Betting and Gaming Levy (BG)

The revenue from Betting and Gaming Levy increased by 4.4 percent to Rs.10.2 billion in 2025 from Rs. 9.8 billion in 2024, reflecting the expansion of entertainment activities with several international casinos entering the market during the year. Within this, the annual levy on persons carrying out the business of a bookmaker or the business of gaming declined by 11.5 percent to Rs. 3.3 billion in 2025 from Rs. 3.7 billion in 2024, while the levy on the gross collection of the business of a bookmaker or the business of gaming increased by 14.6 percent to Rs. 6.0 billion in 2025 from Rs. 5.2 billion.

Non-tax Revenue

Non-tax revenue increased by 22.7 percent to Rs. 400.2 billion in 2025 from Rs. 326.3 billion in 2024, reflecting growth across all non-tax revenue categories, with a share of GDP rising by 0.14 percentage points to 1.22 percent in 2025 from 1.08 percent in 2024.

Interest income rose by 24.7 percent to Rs. 72.0 billion in 2025 from Rs. 57.8 billion in 2024. Profits and dividends increased by 37.6 percent to Rs. 56.5 billion in 2025 from Rs. 41.1 billion in 2024, mainly due to the improved performance of State-Owned Enterprises (SOEs) supported by the SOE reforms and broader economic growth. Revenue from fines, fees, and charges increased by 16.9 percent to Rs. 180.9 billion in 2025 from Rs. 154.7 billion in 2024, driven by the upward revision of fees and charges that had remained unchanged over the preceding three years. Social security contributions increased by 36.4 percent to Rs. 58.8 billion in 2025 from Rs. 43.1 billion in 2024, mainly due to salary increases of government officers and the upward revision of the social security contribution rate.

Table 4.12| Variance Analysis of Government Revenue

Rs. Billion

Item	2024	2025 Estimate	2025[a]	Major Reasons for Variance
Income Taxes	1,026.2	1,167.0	1,139.4	Revenue from income tax increased by 11.0 percent to Rs 1,139.4 billion in 2025 from Rs. 1,026.2 billion in 2024, realizing 97.6 percent of the estimate. This performance was mainly driven by: – Increased wages of the public and private sectors; – Expansion of domestic economic activities; – Increased CIT rate from 40 percent to 45 percent on the liquor, tobacco and betting and gaming industries with effect from 01.04.2025; – Imposition of 15 percent income tax on export of services with effect from 01.04.2025; – Increased WHT rate on interest from 5 percent to 10 percent with effect from 01.04.2025; – Strengthened tax administration measures to broaden the tax base contributed to a 19.2 percent rise in registered taxpayers to 1,302,596 in 2025 from 1,093,134 in 2024 ; and – Increased Capital Gains tax revenue to Rs. 8.0 billion in 2025 from Rs. 1.9 billion in 2024. However, the upward revision of the tax-free threshold for PAYE tax from Rs. 1.2 million to Rs. 1.8 million per annum together with broadened 18 percent tax slab effective from 01.04.2025, had a negative impact on income tax revenue.
Value Added Tax (VAT)	1,309.7	1,615.0	1,746.9	VAT Revenue increased by 33.4 percent to Rs. 1,746.9 billion in 2025 from Rs. 1,309.7 billion in 2024, achieving 108.2 percent of the annual estimate. This significant performance was mainly driven by: – the lifting of import restrictions on motor vehicles; – a 14.0 percent increase in total imports to USD 21,480 million in 2025; – Increased VAT on financial services rose by 64.7 percent to Rs. 198 billion in 2025, reflecting the improved financial sector performance and one-off payment of approximately Rs. 38 billion related to ISB impairment and CPC loan repayment; – Expanded domestic economic activities; and – Increased number of registered taxpayers by 56.3 percent to 33,187 at end 2025 from 21,227 at end 2024, reflecting improved VAT compliance.

Table 4.12| Variance Analysis of Government Revenue (Contd)

Rs. Billion

Item	2024	2025 Estimate	2025[a]	Major Reasons for Variance
Excise Duty	598.5	841.0	1,058.7	Revenue from Excise Duty increased by 76.9 percent, to Rs. 1,058.7 billion in 2025, from Rs. 598.5 billion in 2024, surpassing the annual estimate by 25.9 percent. This strong performance was primarily driven by: – Increased revenue from Excise Duty on motor vehicles, following relaxation of import restrictions on all types of motor vehicle imports with effect from February 2025; – Increased Excise Duty rate on excisable articles including motor vehicles, cigarettes, sugar-based beverages etc. under Excise (Special Provisions) Act, No. 13 of 1989 by 5.9 percent based on an annual inflation indexation; – Increased petrol and diesel import volumes to 1.3 Mt Mn and 1.2 Mt Mn, respectively in 2025 from 1.2 Mt Mn and 1.17 Mt Mn, respectively in 2024; – Increased Excise Duty rate on liquor by 5.9 percent based on an annual inflation indexation and increased production of both hard liquor and malt liquor by 11.7 percent to 37.3 Mn liters in 2025 from 33.4 Mn liters in 2024.; and – Increased revenue from other excisable articles such as sugar-based beverages, refrigerators, palm oil and fatty acids by 50.8 percent to Rs. 12.1 billion. However, a decline in revenue from cigarettes by 13.2 percent negatively contributed to the excise duty revenue.
Customs Import Duties	111.1	240.0	275.9	Revenue collection from Customs Import Duty (CID) increased by 148.2 percent to Rs. 275.9 billion in 2025 from Rs. 111.1 billion in 2024, achieving 115.0 percent of the annual budget estimate. This strong performance was primarily driven by the following reasons; – the imposition of a 20 percent CID on motor vehicles with effect from 28.01.2025; – a 50 percent surcharge on import duties for motor vehicles with effect from 01.02.2025; and – a 14.0 percent increase in total imports to USD 21,480 Mn in 2025.
Port and Airport Development Levy (PAL)	170.0	185.0	180.9	Revenue from PAL increased by 6.4 percent to Rs. 180.9 billion in 2025, realising 97.8 percent of the annual budget estimate. This performance was mainly driven by; – a 14.0 percent increase in total imports to USD 21,480 Mn in 2025.

Table 4.12| Variance Analysis of Government Revenue (Contd)

Rs. Billion

Item	2024	2025 Estimate	2025[a]	Major Reasons for Variance
Special Commodity Levy (SCL)	115.2	126.0	164.6	The revenue from SCL increased by 42.9 percent to Rs. 164.6 billion, realising 130.6 percent of the annual estimate. This strong performance was largely supported by following reasons: – The upward revision of duty rates on potatoes, rice, salt and B'onions; and – a 10.5 percent increase in value of imports of major commodity items, including dairy products, oils and fats
Social Security Contribution Levy (SSCL)	250.9	264.0	294.5	Revenue from SSCL increase by 17.4 percent to Rs. 294.5 billion in 2025, realizing 111.6 percent of the annual estimate, driven by a 14 percent increase in total imports to USD 21,480 Mn in 2025 and the expansion of domestic economic activities.
Other Taxes	122.9	152.0	188.4	The revenue from other taxes increased by 53.2 percent to Rs. 188.4 billion in 2025 from Rs. 122.9 billion in 2024. The realization of other tax revenue was 123.9 percent of the annual estimate for 2025. This was primarily driven by: – Revenue from CESS Levy increased by 11.4 percent owing to the increase in imports; and – Increased revenue from Luxury tax on motor vehicles to Rs. 52.1 billion in 2025 compared to Rs. 3.0 billion in the same period of 2024 with the relaxation of restrictions on motor vehicle imports. – Increased Share Transaction Levy to Rs. 7.5 billion in 2025 from Rs. 3.1 billion in 2024 reflecting the improvements in share market movements. However, revenue from Telecommunication Levy dropped by 5.0 percent reflecting lower usage of fixed line telecommunication services and reduction of voice communication both foreign and local.
Non-Tax Revenue	326.3	370.0	400.2	Revenue from non-tax sources increased by 22.7 percent to Rs 400.2 billion in 2025, realizing 108.2 percent of the annual estimate. This growth was mainly driven by increased revenue from profits and dividends from SOEs, interest income, rent, fines, fees, and charges and receipts from the Social Security Contribution.
Total	**4,030.8**	**4,960.0**	**5,449.4**

05
Government Expenditure

5.1 Overview

Sri Lanka's 2025 public expenditure focused strongly on navigating post-crisis economic recovery and adhering to the fiscal rules set by the Public Financial Management Act, while structurally continuing the ongoing stabilization policies of 2024.

The total government expenditure in 2025 in level figures and as a percentage of GDP increased compared to 2024. Primary expenditure and its components i.e., recurrent expenditure and capital expenditure and net lending increased in year 2025 compared to year 2024, while expenditure on interest payments recorded a decrease during the compared time period. The fiscal deficit, in terms of overall balance and primary balance improved significantly in year 2025, compared to the previous year.

Meantime, budgetary support was promptly extended for the provision of immediate relief to the people affected by the Cyclone "Ditwah", in the month of December 2025, through re-allocation of savings of provisions under 2025 Budget, with the approval of Parliament.

5.2. Government Expenditure in 2025

In 2025, Government expenditure in total increased by 1.6 percent to Rs. 6,230.4 billion from Rs. 6,130.7 billion in 2024. This was due to the increase in expenditure on personal emoluments, transfers including welfare programmes, retirements benefits and grants to provincial councils as well as overall increase in Capital Expenditure. However, the total recurrent expenditure decreased by 2.0 percent to Rs. 5,232.4 billion in 2025 from Rs. 5,339.9 billion in 2024, whereas capital expenditure and net lending increased by 26.2 percent to Rs. 998.0 billion in 2025 from Rs. 790.8 billion in 2024.

Interest payments decreased by 7.0 percent to Rs. 2,500.7 billion in 2025, from Rs. 2,689.5 billion in 2024. This was due to a net impact of the decrease of foreign interest payments by 14.5 percent and decrease of domestic interest payments by 5.7 percent. Non-interest recurrent expenditure increased by 3.1 percent to Rs. 2,731.7 billion in 2025 from Rs. 2,650.4 billion in 2024. This was mainly driven by an increase in spending on salaries and wages by 9.2 percent to Rs. 1,163.9 billion, largely stemming from the increase in salaries.

Expenditure on subsidies and transfers was Rs. 1,233.1 billion in 2025, remained almost same as previous year. This was mainly driven by spending on Social Security Programs including Aswasuma Household Cash Transfers and Pension and Retirement Benefits, Social Welfare programmes including Medical Supplies for Government Hospitals, Welfare Programmes on Health and Nutrition including School Nutritional Food Program and Development Subsidies including Fertilizer Subsidy.

Public investment increased by 24.3 percent to Rs. 1,015.8 billion in 2025 from Rs. 817.1 billion in 2024.

As a percentage of GDP, government expenditure slightly decreased by 1.3 percentage points to 19.0 percent in 2025 from 20.4 percent in 2024. This reduction was primarily driven by a decrease in recurrent expenditure by 1.8 percentage points to 16.0 percent of GDP in 2025 from 17.7 percent in 2024. As a percent of GDP, interest payments decreased by 1.3 percentage points to 7.6 percent in 2025 from 8.9 percent in 2024. Public investment as a percent of GDP increased to 3.1 percent in 2025 from 2.7 percent in 2024.

5.3 Appropriation Act for 2025

The Appropriation Bill 2025 was tabled in Parliament on January 09, 2025 and approved on March 21, 2025. The Bill was subsequently passed as the Appropriation Act, No. 03 of 2025. When the Appropriation Act was passed, the provisions that had been previously allocated through the Vote on Account by the Parliament on 06-12-2024 to budgetary provisions required for the first 04 months of 2025, was incorporated in the Appropriation Act. According to the Appropriation Act, the total government expenditure was estimated as Rs. 8,842 billion which included Rs. 5,920 billion for recurrent expenditure, Rs. 1,315 billion for capital expenditure, Rs. 1,600 billion for debt repayment and Rs. 7 billion for Advance Account activities.

Those provisions were allocated among 179 Expenditure Heads. The summary of three schedules included in the Appropriation Act, No. 03 of 2025 is detailed in Table 5.1. As per Section 2 (1) (b) of the Act, the Government borrowing limit for 2025 was Rs. 4,000 billion compared to Rs. 7,350 billion in 2024.

Table 5.1 | Schedules of the Appropriation Act for 2025

Rs. Billion

Schedule	Description	Amount
First Schedule	Expenditure of General Services of the Government by Programme	4,218
Second Schedule	Expenditure of the Government, authorized by law and to be charged on the Consolidated Fund	4,617
Third Schedule	Expenditure related to Advance Account Activities	7
Total Government Expenditure		8,842

5.4 Supplementary Estimates

In 2025, Parliament has approved 06 Supplementary Estimates on 03 occasions (on September 11, 2025, October 08, 2025 and December 05, 2025) totaling to Rs. 151.3 billion. However, the total expenditure estimate remained unaffected following these supplementary allocations, as an equivalent amount of provisions were simultaneously withdrawn in terms of the section 07 of the Appropriation Act No. 03 of 2025. A summary of the allocations made under Supplementary Estimates is provided in Table 5.5.

5.5 Revised Budget for 2025

The budgetary allocations approved by Parliament were revised with the issuance of five Special Law Warrants and Special Warrants by the Minister of Finance, Planning and Economic Development. As such, Table 5.3 indicates the total budgetary allocation in 2025, after revising the budget estimates to account the above mentioned five Special Law Warrants.

Table 5.3 | Total budgetary allocations applicable for 2025

Rs.

Authority Source	Recurrent	Capital/Debt Amortization	Total
1st Schedule of Appropriation Act, No.03 of 2025	2,898,098,018,000	1,320,150,000,000	4,218,248,018,000
2nd Schedule of Appropriation Act , No.03 of 2025	3,021,901,982,000	1,594,850,000,000	4,616,751,982,000

Source : Department of National Budget

5.6 Advance Account Activities

The Advance Account activities include the provision of loans to Public officers and commercial activities conducted by government ministries and departments. The estimated maximum expenditure allocated on Advance Account activities in 2025 was Rs. 44.2 billion and the actual expenditure has been reported as Rs. 33.4 billion. Accordingly, the Advance Account activities have been carried out within the total expenditure limits approved in the Appropriation Act No. 03 of 2025.

The minimum receipt target for 2025 has been estimated at Rs. 36.2 billion, and the actual receipts were Rs. 28.1 billion, thereby the minimum receipt targets was not achieved. This is mainly due to the inability to achieve the minimum receipt targets in the Advance Account under Subject No. 21302, which operates under the Department of Education Publications.

5.7 Public Expenditure Management

5.7.1 Transfer of Funds

The Section 5 of the Appropriation Act, No. 03 of 2025, empowered Secretary to the Treasury and Deputy Secretary to the Treasury/Director General of the Department of National Budget under the delegated authority of the Secretary to the Treasury to grant approval to reallocate or transfer unutilized provisions under the Virement procedure specified in Financial Regulation No. 66 to 69 (FR 66 to FR 69) from the original object code to another object code for which allocation is required, within the expenditure limit approved by Parliament to each Expenditure Head. In 2025, National Budget Department granted approval for 1,864 of such transfer applications amounting to Rs. 336 billion. Reports related to these FR transfers were tabled in parliament, in terms of the Section 24 (4) of the Public Financial Management Act, No. 44 of 2024.

Box 5.1 | Cyclone Ditwah 2025: Post-Disaster Needs Assessment and Recovery Outlook

Cyclone Ditwah, which made landfall in Sri Lanka on 28 November 2025, caused extensive damage across 22 districts, severely affecting lives, livelihoods, and critical infrastructure. The disaster led to widespread displacement, disruption of essential services, and significant impacts on economic activity. Notwithstanding these challenges, the resilience demonstrated by affected communities, local authorities, and emergency responders has been commendable.

In response, the Government of Sri Lanka, under the mandate of the "Rebuilding Sri Lanka" Presidential Task Force, initiated a comprehensive Post-Disaster Needs Assessment (PDNA). The assessment was led by the Disaster Management Centre and the Ministry of Defense, in collaboration with the Department of National Planning of the Ministry of Finance, with the support of all relevant government agencies and key development partners. The PDNA provides a rigorous, evidence-based evaluation of damages, economic losses, and recovery needs, forming the basis for coordinated recovery planning and resource mobilization.

The findings highlight the urgent need to restore housing, re-establish essential services including health, education, water, energy, and transport and revitalize livelihoods and local economies. Particular attention is given to vulnerable groups, including female-headed households, older persons, persons with disabilities, and low-income communities. The assessment further emphasizes the importance of adopting "Build Back Better" principles to ensure that recovery efforts strengthen resilience to future climate and disaster risks.

Key Highlights of the PDNA

The PDNA, initiated in January 2026, covers 22 districts and serves as the analytical foundation for the Government's recovery strategy under the "Rebuilding Sri Lanka" initiative. The total estimated impact amounts to LKR 618.1 billion in damages approximately and LKR 416 billion approximately in economic losses. Overall recovery and reconstruction needs are estimated at approximately LKR 1.0225 trillion approximately over a three-year period.

Cyclone Ditwah triggered severe flooding, landslides, and storm surges, inundating over 1.1 million hectares at its peak and displacing more than 232,000 people. As of January 2026, the disaster resulted in 646 fatalities, with 173 persons reported missing, while over 169,000 individuals remained displaced.

The disaster caused extensive infrastructure damage, including over 1,200 km of roads, numerous bridges, irrigation systems, and utility networks. More than 113,000 houses were damaged, with a significant number of households requiring relocation.

Economic disruptions affected over 45,000 enterprises and approximately 149,000 workers, with disproportionate impacts on informal sector workers and women. Agricultural losses were also substantial, with serious implications for rural livelihoods and food security.

Box 5.1 | Cyclone Ditwah 2025: Post-Disaster Needs Assessment and Recovery Outlook contd...

Recovery needs are geographically concentrated, with the highest requirements identified in Kandy, Nuwara Eliya, Badulla, Puttalam, and Kegalle districts, alongside notable impacts in Colombo. The Sectoral priorities are primarily concentrated in transport, housing, commerce and industry, and agriculture.

The event further exposed structural gaps in disaster risk management systems, including deficiencies in early warning mechanisms, land-use planning, and climate resilience. Environmental degradation has compounded these challenges by weakening natural protective systems.

Going forward, recovery efforts will priorities risk-informed and climate-resilient reconstruction, strengthened governance and disaster risk reduction systems, and inclusive approaches to ensure equitable outcomes. The PDNA findings will be operationalized through the development of a Disaster Recovery Plan (PDRP), to guide the prioritization, sequencing, and financing of recovery interventions.

Table 5.4 Ministry-wise summary of Additional Allocations granted from 01.01.2025 to 31.12.2025

Rs.

Head	Ministry/ Department/ Spending Unit	Purpose	Recurrent	Capital

5.7.2 Reallocation of Provisions as per section 6 of the Appropriation Act, No 03 of 2025

The "Development Activities Programme" under the Expenditure Head 240 – Department of National Budget, continued to facilitate unforeseen, unexpected or urgent additional allocations requirements of spending agencies in 2025. Accordingly, in line with the guidelines specified in printed Annual Budget Estimates 2025, Rs. 136 billion was reallocated (transferred) to other spending agencies as supplementary allocations for 2025. A summary of such allocation is detailed in Table 5.4. Reports related to these additional allocations were tabled in Parliament, in terms of the Section 6 of the Appropriation Act, No 03 of 2025, and section 25 (4) of the Public Financial Management Act, No. 44 of 2024.

5.7.3 Directives issued through Circulars on Expenditure Management, Budget Preparation and Execution

Guidelines for the management of Budget 2025 were issued through the National Budget Circular No. 01/2025. Meantime, facilitating the smooth functions of the Ministries, in compliance with the division of the subjects and functions of the Ministries as amended by the Extraordinary Gazette No. 2458/65 dated 18–10–2025, necessary instructions for the utilization of provisions specified in the Budget was issued through the National Budget Circular No. 04/2025. Further, in the wake of the disaster situation caused by the Cyclone Ditwah, guidelines required for the provision of immediate relief, restoration of disrupted lives of the people and implementation of the empowering program for the people effected were provided through National Budget Circulars No. 05/2025, 06/2025, 07/2025, 08/2025 and 08/2025(i). List of National Budget Circulars issued during year 2025 is given in Table 5.6.

5.8 Composition of Government Expenditure

In 2025, expenditure for interest payments of Rs. 2,500.7 billion constituted 47.8 percent of the total recurrent expenditure. The expenditure on transfers to households including Pensions, social safety net payments, free medical supplies, fertilizer subsidies, and nutritional programmes was Rs. 1,121.2 billion, constituting 21.4 percent of recurrent expenditure. The expenditure on salaries and wages amounted to Rs. 1,163.9 billion which is equivalent to 22.2 percent of recurrent expenditure.

5.8.1 Salaries, Wages and Allowances

The expenditure on salaries, wages, and allowances (Personal Emoluments) for public servants, including those in the Provincial Councils, Armed Forces, and Police, was Rs. 1,163.9 billion in 2025, an increase of 9.2 percent compared to Rs. 1,066.0 billion in 2024.

The expenditure on transfers pertaining to Personal Emoluments of the Provincial Councils increased by 10.3 percent, from Rs. 372.8 billion in 2024 to Rs. 411.3 billion in 2025. This increase was mainly due to the government's policy decision to increase the basic salaries of all public servants, in three phases, starting from April 2025.

Total pension payments increased by 12.3 percent, from Rs. 395.7 billion in 2024 to Rs. 444.5 billion in 2025. This increase was mainly due to the policy decision taken by the Government to rectify the pension anomalies, in relation to those who retired before 01.01.2020.

5.8.2 Fiscal Decentralization

As per the 13th amendment to the Constitution of the Democratic Socialist Republic of Sri Lanka, the Government on the recommendation of and in consultation with the Finance Commission, transfers funds to the Provincial Councils for recurrent and capital expenditure from the Annual Budget. Accordingly, the Government granted Rs. 534.9 billion directly to the Provincial Councils of which Rs. 470.3 billion was for the recurrent expenditure and Rs. 64.6 billion was for the capital expenditure. In addition, Rs. 3.0 billion was channeled through the Ministry of Public Administration, Provincial Councils and Local Government for capital expenditure.

Accordingly, a sum of Rs. 67.6 billion was transferred to Provincial Councils for capital expenditure in 2025. The transfer for recurrent expenditure increased by 14.9 percent in 2025 from Rs. 409 billion in 2024. This increase in recurrent expenditure was due to increased salaries and wages in terms of the Public Administration Circular No. 10/2025 dated 25.03.2025. The transfer for capital expenditure has also been increased by 76.9 percent in 2025 from Rs. 38.2 billion in 2024.

5.9 Sectoral Classification of Government Expenditure

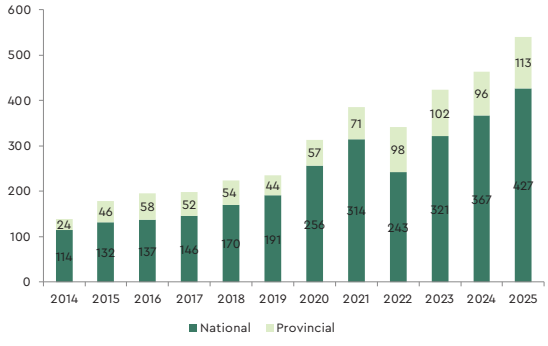

5.9.1 Human Resource Management

Health

Investments in Healthcare

In 2025, the Government and Provincial Councils collectively allocated Rs. 513.4 billion to sustain free healthcare services across the country, marking an increase of 10.7 percent compared to the allocation of Rs. 463.6 billion in 2024.

Figure 5.1 | Government Expenditure on Healthcare
(Rs. Billion)

Curative Healthcare Services

With the increasing prevalence of non-communicable diseases such as cardiovascular diseases, cancers, diabetes and kidney diseases, the government committed to strengthening curative healthcare services. Rs. 154.1 billion was spent in 2025 for the procurement of essential medicines and biomedical equipment. Of that Rs.147.3 billion was spent on medical supplies while Rs. 6.8 billion was spent on bio medical equipment.

The year 2025 witnessed the successful completion of several key hospital infrastructure projects. These included the completion of the Specialized Maternity Care Unit at De Soysa Maternity Hospital for Women, the construction of a building for the office of Medical Officer of Health (MoH) at Wadugoda, Payagala, the development of the proposed Nephrology, Dialysis, and Transplant Unit at Teaching Hospital Karapitiya, the construction of a Specialized Pediatric Wards Complex at General Hospital, Ampara, and the establishment of an MRI Scan Unit at Provincial General Hospital, Badulla.

In addition, several projects for enhance administrative and support facilities including the construction of intern doctors' quarters at General Hospital Kalutara, as well as a three-story ambulance garage and minor staff rest facility at the same hospital were completed.

2025 marked the near completion of several projects, including a six-story accommodation building at the National Training School of Nursing in Sri Jayawardenapura and the construction of a linear accelerator room and radiotherapy department at Teaching Hospital Rathnapura.

The year 2025 witnessed the successful installation of essential machinery across several hospitals. Notably, a CT scan facility was installed at Teaching Hospital, Kalutara. In addition, a CT scanner was supplied to Teaching Hospital, Kurunegala, and a cath lab machine was provided to Teaching Hospital, Karapitiya.

Preventive Health care

In the area of preventive healthcare, government efforts continued to focus on communicable diseases such as dengue, rabies, and tuberculosis and non-communicable diseases including hypertension, diabetes, and kidney-related ailments. The total public investment for preventive healthcare in 2025 rose to Rs. 4,505.6 million. The National Thriposha Programme continued to be a cornerstone initiative, with an expenditure of Rs. 2,188 million, serving 614,955 registered beneficiaries including pregnant and lactating mothers and children aged three to five years. The programme remains pivotal in enhancing nutritional outcomes for vulnerable segments of population.

Promotion of Indigenous Medicine

The recognition and integration of traditional healing practices into the national health system remained a priority. The total investment in the promotion of indigenous medicine was Rs. 3,010.4 million in 2025. Efforts were made to strengthen research on medicinal plants, along with conservation and awareness programmes aimed at enhancing the global standing of Sri Lanka's indigenous medical system.

General Education

The total Government expenditure on school education amounted to Rs. 422.8 billion in 2025, reflecting an increase of 12 percent in 2025 compared to Rs. 377.3 billion in 2024. The recorded expenditure of the Ministry of Education was Rs. 111.9 billion while the Central Government transfers to the nine Provincial Councils for school education amounted to Rs. 310.8 billion. The recurrent expenditure increased by 10.7 percent to Rs. 397.7 billion in 2025 and capital expenditure increased by 38.9 percent to Rs. 25 billion in 2025.

University Education

The total government expenditure on university education was Rs. 110.2 billion, in 2025 reflecting an increase of 13.1 percent compared to 2024. Out of the recurrent expenditure of Rs. 79.2 billion, Rs. 62.0 billion was spent on the payment of salaries and wages of 24,347 academic and non-academic staff in the higher education sector.

The total capital investment in 2025 amounted to Rs. 30.9 billion, compared to Rs. 28.7 billion in 2024. This funding was primarily allocated for the construction, rehabilitation, and improvement of capital assets, acquisition of fixed assets, human capital development, and strengthening of research activities. Out of a total 67 construction projects, 4 were successfully completed in 2025, 30 projects were pending final bill settlements and 33 projects were in progress at various Universities.

The Key accomplishments in 2025 include the construction of stage ii of Faculty of Technology, Wayamba University constructed at a cost of Rs. 2,308 million and the new student service center for the Faculty of Sciences at University of Colombo costing Rs. 487 million.

With the aim of expanding inclusion access to higher education, the University Grants Commission introduced policies on the admission of Students with Disabilities to Undergraduate degree programmes. In addition, university Business Linkage initiatives were further strengthened to enhance collaboration between university research and innovation activities and external business stakeholders, resulting in the receipt of 29 patents during the year.

In 2025, the University Grants Commission introduced and approved several new academic programs, including five new undergraduate programs, one undergraduate specialization degree program, twelve postgraduate degree programs, and three external degree programs.

Non state Higher Education

Given the limited opportunities available in the state university system, Rs. 1.95 billion was invested in 2025 to continue the interest free loan scheme aimed at enhancing higher education opportunities for G.C.E. A/L qualified students in Non State Universities. Accordingly, 2,927 students were granted the opportunity to follow 125-degree programmes offered by 18 Non State Higher Education Institutes during the year under this loan scheme. Furthermore, presently, 23,162 students are continuing their studies in 18 Non State Higher Education Institutes, while, 7,123 students have already graduated under the loan facilitation.

Skills Development

The total expenditure on Skills Development and Vocational Education amounted to Rs. 12.8 billion in 2025, of which, Rs. 9.7 billion was incurred as recurrent expenditure, while Rs.3.0 billion was spent on capital investment. The total increase of 15.3 percent in 2025 compared to Rs.11.1 billion in 2024.

Nipunatha Sisu Saviya

This scholarship program was introduced in 2021 to support children from economically disadvantaged families to complete their vocational education. Under the 2025 budget proposals, the monthly scholarship allowance was increased from Rs. 4,000 to Rs. 5,000. Accordingly, a total allocation of Rs. 0.9 billion was provided for 27,350 beneficiaries under this scholarship program in 2025.

Science and Technology

The total expenditure of the Research and Innovation sub sector was Rs. 4.4 billion in 2025. While the capital investment was Rs. 1.8 billion, the recurrent expenditure in institutions under the research and innovation sub sector was Rs. 2.6 billion.

Major projects implemented under this sector included Implementation of R & D Investment Framework, Improving Degraded Soil and Science and Technology Collaboration under Bilateral and Multilateral Cooperation School Science Society Programme. The expenditure details are illustrated in Table 5.20.

5.9.2 Transport

The transportation sector was identified as a high-priority area by the Government in 2025. The total expenditure in this sector amounted to Rs. 85.1 billion encompassing initiatives in bus transportation, railway development, transport terminal infrastructure, and the implementation of the Motor Traffic Act.

Bus Transportation

The government has spent Rs. 26.6 billion for the bus transport sector in 2025, of which Rs. 18.5 billion and Rs. 8.0 billion was spent as recurrent and capital expenditure, respectively. A total of Rs. 13.1 billion was spent on providing season tickets for the school and higher education students. Additionally, Rs. 3.7 billion was utilized for other relief measures, including the operation of Sri Lanka Transport Board (SLTB) buses on non-profitable rural routes and contributions to maintaining socially obligatory bus services. Capital expenditure amounted to Rs. 4.5 billion, covering improvements to the SLTB bus fleet and the printing of driving licenses.

Transport Terminal Development

The Government has spent Rs. 5.8 billion on the construction, operation and maintenance of Multimodal Transport Centers and the main construction includes the Kandy Multimodal Transport Terminal which facilitates public transportation within the Kandy city and surrounding areas.

Railways

In 2025, the Government spent Rs. 53.1 billion to the railway sector, of which Rs. 28.2 billion was incurred as recurrent expenditure and Rs. 24.8 billion as capital expenditure. The capital expenditure included investments in the Colombo Suburban Railway Efficiency Improvement Project and the Rehabilitation of Railway Track and Installation of Signaling from Maho to Omanthai. These projects were implemented with the objective of providing the public with a comfortable and uninterrupted railway service.

Table 5.21 | Major Projects Launched in 2025 on Public Transport

Road Development

The road sector expenditure in 2025 represents one of the largest components of public sector expenditure in the country. In 2025, total actual expenditure for road sector development amounted to Rs. 365.1 billion, reflecting 36 percent of the capital expenditure, covering expressways construction, highways development, roads maintenance, and bridges and flyovers projects. These investments aim to improve national connectivity, reduce traffic congestion, support regional development, and facilitate economic growth.

A significant portion of the expenditure was spent on expressway development, which was recorded as Rs. 96.1 billion in 2025. In this category, the Central Expressway accounted for the largest share with Rs. 88.1 billion, mainly due to the recommencement of construction of the Kadawatha–Meerigama section in 2025. Other major project includes the Port Access Elevated Highway with Rs. 3.9 billion expenditure, designed to enhance access to the Colombo Port and reduce urban traffic congestion.

The largest portion of allocation was for highways development, amounting to Rs. 212.0 billion. Major initiatives include the Integrated Road Investment Programme, Inclusive Connectivity and Development Project, and several road rehabilitation projects such as the A-17 Road Corridor (Rakwana–Suriyakanda) and the Peradeniya–Badulla–Chenkalady Road rehabilitation. These projects focus on improving road quality, regional accessibility, and reducing traffic congestion, while rural connectivity was supported through the Rural Road Reawakening Programme (Maga Neguma). A significant part of this expenditure was used to early settlement of loans taken by the Road Development Authority, in order to free up the fiscal space for future development projects.

In addition, Rs. 49.1 billion was spent on road maintenance, including widening, improvement, and maintenance of national and provincial roads to ensure safety and extend the lifespan of the road network.

Finally, Rs. 7.8 billion was allocated for bridges and flyovers, including reconstruction of weak bridges, and construction of flyovers at key traffic locations such as Kohuwala, Gatambe, and railway crossings in Colombo.

Box 5.2 | Sri Lanka in the Digital Age: Opportunity, Readiness, and the Road Ahead

The global economy is undergoing an unprecedented structural transformation. The digital economy now accounts for approximately 15 percent of global GDP—roughly $16 trillion—and is fundamentally reshaping how nations produce, trade, and grow. Forecasts indicate it will expand at a compound annual growth rate of 7 percent, reaching $16.5 trillion by 2028 and representing 17 percent of global GDP[1]. For a small island nation like Sri Lanka—still in the process of rebuilding from its most severe post-independence crisis—this is not merely a global trend to observe, but a critical opportunity to seize.

The digital economy extends far beyond smartphones and social media. It encompasses e-commerce, digital finance, cloud computing, IT-enabled services, artificial intelligence, and the data infrastructure that underpins modern governance and industry. Research shows that every dollar invested in digital transformation generates $8.30 in returns within a country's broader digital economy—a multiplier effect few other investment categories can match[2]. Countries that lead in digital infrastructure advance decisively, while those that fall behind risk permanent exclusion from the fastest-growing segment of global trade.

Sri Lanka's economic recovery, which rebounded with approximately 5 percent growth in 2024 following a sharp contraction, has demonstrated resilience. However, the country must now shift from stabilization to transformation. The digital economy offers a clear pathway to achieve this.

Box 5.2 I Sri Lanka in the Digital Age: Opportunity, Readiness, and the Road Ahead Contd...

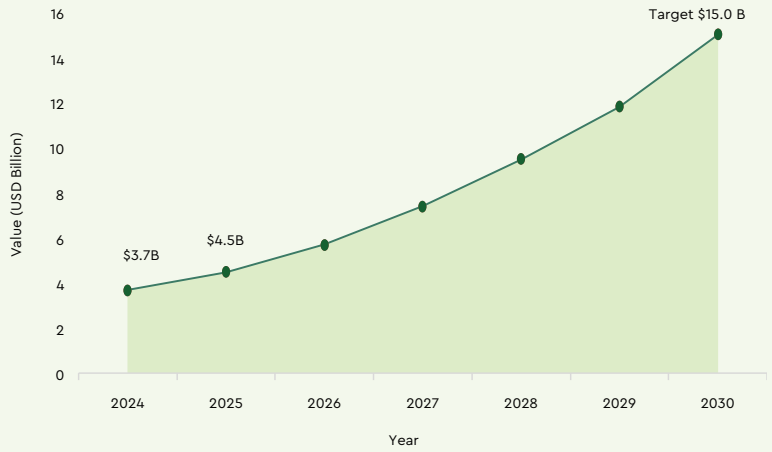

Current Landscape: Small Base, Significant Momentum

Sri Lanka's digital economy is estimated at Rs. 1,342 billion, representing approximately 4.5 percent of national GDP. While modest relative to regional peers, its growth trajectory is notably strong.

The sector is currently driven by two core pillars:

- **E-commerce:** Valued at Rs. 735.2 billion (2.47 percent of GDP). Notably, while card-based transactions totaled Rs. 367.8 billion in 2024, the overall market is nearly double that when accounting for the persistent prevalence of cash-on-delivery transactions.
- **ICT-BPM Services:** Contributing Rs. 606.7 billion (2.03 percent of GDP), this sector has become the country's third-largest export earner. Projections for 2025/2026 indicate a workforce of 200,000 professionals generating $3 billion in annual export revenue[3].

Projected Growth of Sri Lanka's Digital Economy (2024–2030)

[4]Sri Lanka's Digital Readiness: High Connectivity, Uneven Capability

Sri Lanka's digital readiness is characterized by strong connectivity infrastructure paired with uneven capability across sectors and regions.

Connectivity

Mobile internet penetration now exceeds 60 percent, while 4G coverage spans over 85 percent of the island. The ongoing rollout of 5G in urban hubs such as Colombo and Kandy is further narrowing the technological gap.

Payments

The LankaPay network has proven transformative. In 2025, digital payment volumes through the platform surpassed LKR 2 trillion, reflecting a significant shift in consumer trust toward digital transactions[5] .

The Divide

Despite 80 percent smartphone ownership, a digital divide persists. While 52 percent of internet users make monthly online purchases—led by clothing (43 percent) and electronics (22 percent)—this activity remains heavily concentrated in the Western Province.

Box 5.2 | Sri Lanka in the Digital Age: Opportunity, Readiness, and the Road Ahead Contd...

Strategic Direction: DIGIECON 2030

The government's DIGIECON 2030 strategy sets an ambitious goal: a $15 billion digital economy by the end of the decade[6]. To achieve this, policy focus has shifted from expanding connectivity to developing Digital Public Infrastructure (DPI)[7].

Key Milestones from 2026 Onward

- **SL-UDI (Unique Digital Identity)**
  Scheduled for rollout in late 2026, this initiative aims to serve as Sri Lanka's foundational digital identity system, integrating banking, taxation, and social welfare into a unified, secure ecosystem.
- **Digital Tax Reform**
  New frameworks are being introduced to formalize the digital marketplace, including value-added tax registration requirements for foreign digital service providers earning over Rs. 60 million in local revenue.
- **AI and Startup Ecosystems**
  With more than 1,000 active tech startups, the focus is shifting toward high-value sectors such as agrotech, fintech, and AI-driven logistics. These efforts are designed to reduce transaction friction within the traditional economy and unlock new avenues for growth.

5.9.3 Social Welfare and Social Security

Government expenditure on social welfare and social security amounted to Rs. 1,082 billion in 2025, an increase of 14 percent compared to Rs. 949 billion in 2024. This increase was mainly driven by the rise in the monthly payments under the "Aswesuma" household cash grant programme for elderly persons, kidney patients, and persons with disabilities, as well as higher allocations for pensions and retirement benefits. Accordingly, the government has incurred an expenditure of Rs. 159.8 billion for household cash grants under the Aswesuma programme, Rs. 47.7 billion for the allowance for elders over 70 years of age, Rs. 5.2 billion for the allowances for Kidney patients and Rs. 15.6 billion for the allowance for differently-abled persons. Government spending on pensions and retirement benefits increased to Rs. 444.5 billion, compared to Rs. 395.7 billion in 2024, in parallel with the salary increase for government officers. Furthermore, Rs. 8.1 billion was allocated to continue the payment of monthly allowance of the Rs. 4,500 per "Poshana Malla" for further 10 months, under the Nutrition Food Package Programme, which aims to improve the nutritional level of expectant mothers.

Box 5.3 I Social Safety Nets

Sri Lanka has a long history of social protection systems, which began with traditional community support mechanisms and gradually evolved into formal, government-sponsored welfare programs. During the British colonial period, limited forms of government assistance such as poor relief and pensions were introduced; however, these were not implemented on a large scale. Following independence in 1948, Sri Lanka developed into a strong welfare state, introducing policies such as free education, free healthcare, and food subsidies etc. However, with the introduction of the open economic policy in 1977, there was a gradual shift from universal welfare benefits toward targeted assistance programs. Accordingly, programs such as *Janasaviya* and *Samurdhi*, which included financial assistance and community development initiatives aimed at poverty alleviation, were introduced.

In particular, during the period from 2020 to 2022, in response to the COVID-19 global pandemic and the most severe economic crisis faced by Sri Lanka, efforts were made to strengthen and improve the efficiency of the social protection system to ensure better support for vulnerable populations without exclusion. By 2023, the Government restructured its welfare system and introduced the *Aswesuma* program to expand coverage, improve efficiency, and enhance targeting accuracy. Beneficiaries are selected based on a multidimensional poverty index. To address shortcomings in previous programs and improve beneficiary coverage while minimizing inclusion and exclusion errors, a Social Registry Information System (SRIS) containing information on social protection beneficiaries has been established. Through the *Aswesuma* program, monthly financial assistance is provided to low-income households categorized as extremely poor, poor, and vulnerable.

In addition, the annual budget allocation for this program has been increased, along with the number of beneficiaries. Accordingly, effective from January 2025, the allowance for the extremely poor category has been increased from Rs. 15,000 to Rs. 17,500, while the allowance for the poor category has been increased from Rs. 8,500 to Rs. 10,000. The allowance of Rs. 5,000 for the vulnerable category continues to be provided without interruption.

Furthermore, the program has been expanded to include support for elderly individuals, persons with disabilities, and individuals suffering from chronic kidney disease within low-income families. From April 2025, the monthly allowance for kidney patients and persons with disabilities has been increased from Rs. 7,500 to Rs. 10,000, while the allowance for elderly individuals has been increased from Rs. 3,000 to Rs. 5,000.

Box 5.3 I Social Safety Nets contd...

In addition, for the year 2025, a sum of Rs. 6,000 per student has been allocated for the purchase of school stationeries for children from Aswesuma beneficiary families and those attending identified disadvantaged schools. The Government has spent Rs. 9.5 billion for this purpose[1].

Further, Government has allocated Rs. 250 million to provide a monthly allowance of Rs. 10000, each to low-income thalassemia patients.

Accordingly, in 2025, the Government has spent Rs. 237.9 billion on the above social protection programs, while Rs. 240 billion has been allocated for 2026.

At present, the Government is shifting its focus beyond welfare toward strengthening household economies. Efforts are being made to transition a significant number of Aswesuma beneficiaries into employment and income-generating activities. This aims to reduce long-term dependency on government assistance and promote self-reliance. For a pilot program, approximately 25,000 families have been selected with support from projects funded by the Asian Development Bank and the World Bank. Other eligible families are planned to be empowered gradually through domestic funding. For this empowerment program, Rs. 4.4 billion was allocated for 2025, of which Rs. 2.1 billion has been spent[2].

Furthermore, as Sri Lanka's first comprehensive social protection framework, the National Social Protection Policy has been officially approved by the Government. To operationalize this, a National Social Protection Strategy was also developed in 2025, providing a clear roadmap to strengthen program coordination, improve targeting accuracy, and enhance service delivery.

In 2025, Sri Lanka's social protection system has played a crucial role in protecting vulnerable groups and supporting economic recovery. With the introduction of the Aswesuma program, the social protection process has become more efficient through improved targeting and digitalization. However, further improvements are ongoing to ensure that the system remains more accurate, efficient, and sustainable in the long term.

Agriculture – Food Crops

In 2025, the government spent Rs. 111.1 billion for food crop sector which mainly includes the expenditure on production and productivity improvement of paddy and other food crops, pre-harvest and post-harvest losses management, seed certification and plant protection, farmer empowerment and entrepreneurial development, risk mitigation and preparedness. Fertilizer subsidy for paddy was increased from Rs. 15,000 to Rs. 25,000 per hectare and therefore expenditure for fertilizer subsidy has been increased up to Rs. 36.8 billion in 2025. Rs. 6.2 billion was utilized for purchasing paddy through the Paddy Marketing Board, and it was able to maintain around 49,612 Mt of buffer stock of paddy during the year 2025.

In 2025, several projects and programmes continued to improve agricultural production through strengthening agriculture extension, production of seeds and planting materials as well as research and development. Rs. 6.6 billion was spent for the implementation of the Agriculture Sector Modernization Project, Smallholder Agribusiness Partnership Programme and Smallholder Agribusiness Resilience Project to improve the productivity, commercialization, value addition and market access for selected crops. Expenditure for the implementation of Farmer's Pensions Scheme was Rs. 5.3 billion.

High priority was given for the rebuilding of livelihood, affected by the cyclone Ditwah in November 2025. Aiming at speedy recovery of agriculture sector, Rs.7.49 billion and Rs. 0.8 billion were paid as compensation for affected paddy sector and selected other crops respectively.

In 2025, Rs. 2.0 billion was incurred through the Department of Export Agriculture to facilitate the production and quality improvements of perennial export crops such as Pepper, Cardamom and Cloves.

Plantation

In 2025, the government invested Rs. 8.7 billion on the cultivation of tea, rubber, coconut and cinnamon through the provision of extension services and planting materials at a subsidized rate. In addition, the Government continued the promotion of the value addition of the plantation crops and provision of financial assistance for replanting and new planting activities.

Fisheries

The government expenditure for the fisheries industry in 2025 amounted to Rs. 2.8 billion, of which Rs. 1.8 billion was spent for the rehabilitation and improvement of fishery harbours and anchorages to improve infrastructure facilities in the marine fisheries sector. Further Rs. 200 million was utilized in 2025 for the stocking of fish seed under the government investments to facilitate the inland fishery in the country.

Livestock

In 2025, Rs. 3.9 billion was incurred in the livestock sector including breeding farms, animal breeding through artificial insemination, disease control, and production of vaccines, livestock research and training programmes.

Compensation of Rs. 2.2 billion was paid for the losses of cattle, swine, goats, sheep, and poultry that were in registered livestock farms, due to the impact of Cyclone Ditwah.

5.9.5 Irrigation

The total government expenditure for the irrigation sector in 2025 amounted to Rs. 57.4 billion. During the year, priority was placed on the smooth implementation of ongoing projects, rehabilitation of minor tanks and canals, and improvement of existing medium and major irrigation schemes. Rehabilitation of major, medium and minor irrigation schemes also continued in 2025, especially focusing on the protection of the upper catchment area to ensure the water sources to down streams and desilting of reservoirs. In 2025, several ongoing mega scale development projects such as Mahaweli Water Security Investment Programme, Integrated Watershed and Water Resources Management Project, Uma Oya Downstream Development project, and Lower Malwathuoya Multisector Development Project were continued.

5.9.6. Housing and Common Amenities

Housing Development

Facilitation of housing is one of the key priority sectors of government expenditure. Total government expenditure for housing construction and related infrastructure development was Rs. 27.2 billion in 2025. Total capital investment for facilitation of housing needs increased by 52 percent in year 2025 to Rs. 26.2 billion from the amount of Rs. 17.2 billion in 2024. Accordingly, construction of 10,726 housing units were completed at the end of year 2025. out of which 10,304 housing units were completed by the Ministry of Housing, Construction and Water Supply and 422 housing units were completed by the Ministry of Plantation and Community Infrastructure. Urban Regeneration Program for the resettlement of underprivileged settlements in Colombo city and suburban area, providing permanent housing to underprivileged families in the Plantation Sector, Northern and Eastern provinces and housing programs operating in island wide targeting on low-income earners were main housing projects continued in 2025.

Urban Development

The Government expenditure on urban development sector focused on achieving sustainable urban development through creating well designed, green, clean and smart, urban settlements in strategic locations of the country. Total expenditure for urban development and waste management related activities was Rs. 7.0 billion in 2025. Out of the total expenditure, Rs. 3.7 billion was spent on urban development sector and Rs. 3.3 billion was incurred on waste management and environment protection related activities.

Table 5.25 | Major projects launched in 2025 on Housing & Urban development

Drinking water and Sanitation

Total expenditure on water supply and sanitation increased by 15 percent to Rs. 36.4 billion in 2025 from Rs. 31.4 billion in 2024 owing to already implemented mega scale projects all over the country with a view to providing access to safe drinking water and quality sanitation facilities for its citizens. Out of the total expenditure of 2025, Rs. 640 million was spent as recurrent expenditure and Rs. 35.76 billion was spent as capital expenditure.

The Government invested Rs. 45 billion on water supply and sanitation through the National Water Supply and Drainage Board, using the proceeds of loans taken from both domestic and foreign banks, in year 2025.

Table 5.26| Major projects launched in 2025 on water Supply and Sanitation

5.9.7 Environment

The Government has placed significant importance on environmental protection and sustainable resource management. In 2025, it continued its strong commitment by spending Rs. 0.4 billion to address critical environmental issues and conduct various environmental programs. In addition, Rs. 0.2 billion was spent on major activities under Coast Conservation and Coastal Resource Management, while Rs. 0.1 billion was expended on the development of Botanical Gardens in Sri Lanka.

Further, The Government's environmental activities in 2025 also focused on forest conservation, wildlife conservation, and the development of zoological gardens.

Forest Conservation

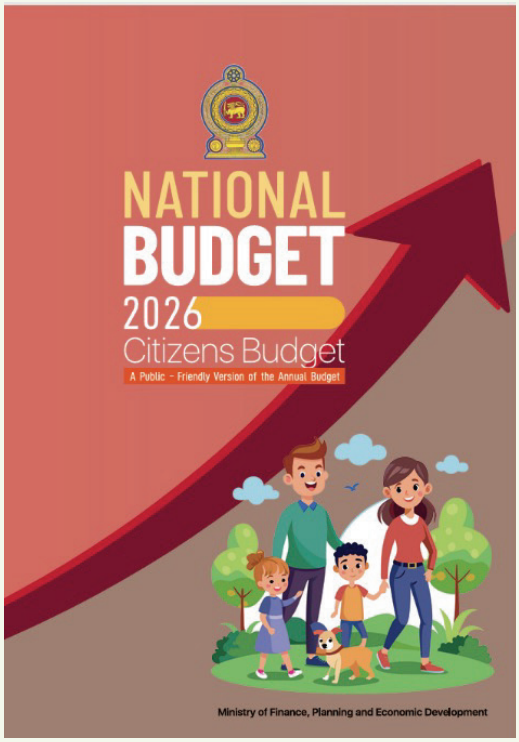

In line with enhancing sustainable forest management, the Government spent Rs. 1.0 billion on the expansion of forest coverage, which included key activities such as the establishment and maintenance of restored forests to promote natural regeneration, the promotion of commercial forestry and agroforestry, the development of horticulture, the conservation of mangroves, and the promotion of eco-tourism. In addition, Rs. 0.1 billion was spent for forest protection as well as research and development activities.

Wildlife Conservation

Under wildlife conservation, priority was given to mitigating the human-elephant conflict, with an expenditure of Rs. 0.3 billion in 2025. In addition, Rs. 0.2 billion was spent on the construction of electric fences, while Rs. 0.1 billion was utilized for habitat enrichment initiatives. Further, Rs. 0.1 billion was spent on improving road networks within national parks, and on the development and modernization of zoological gardens.

Box 5.4 I Citizens Budget

Section 20 of the Public Financial Management Act, No. 44 of 2024 introduces an important reform aimed at strengthening fiscal transparency and public accountability. It requires the preparation and publication of a public-friendly version of the annual budget, designed to communicate the key elements of government fiscal policy in a clear, concise, and easily understandable manner. This initiative recognizes that traditional budget documents—often structured around Ministries, Departments, and expenditure Heads—can be highly technical and difficult for the general public to interpret. As a result, many citizens and taxpayers may not fully understand how public funds are raised and utilized.

The public-friendly budget seeks to bridge this gap by presenting information in a simplified and accessible format. It highlights the government's main revenue sources, expenditure priorities, and policy objectives, enabling citizens to better understand how their tax contributions are allocated. By focusing on key sectors, programmes, and development projects, the document provides a more meaningful picture of how public resources are directed towards areas such as education, health, infrastructure, and social protection.

In 2026, the sector-wise allocations in Citizens Budget are as follows

- Healthier Life Towards a Healthier Society – Rs.657 billion
- Achieving Quality, Equity, and Excellence in Education – Rs. 708 billion
- Safe, Efficient, Eco-friendly and, Sustainable Transport Services – Rs.477 billion
- Support the Aspiration of Decent and Comfortable Living – Rs. 198 billion
- Productive, Modernized and Sustainable Agriculture – Rs. 284 billion
- Towards an Evergreen Life – Rs. 58 billion
- Commitment towards a Peaceful and Fair Society – Rs. 311 billion
- National Security – Rs. 407 billion
- Economic Services and Entrepreneurship – Rs. 124 billion
- Sustainable and Secure Energy Supply – Rs. 23 billion
- People Friendly Public Service – Rs.400 billion
- A Universal Social Protection System – Rs. 838 billion

06

Cash Flow Management, Deficit Financing and Debt

6.1 Overview

The government's continuous revenue-enhancing strategies have shifted the financial operations of 2025 from crisis management to a period of robust revenue mobilization and fiscal stabilization. Driven by the successful implementation of revenue-based fiscal consolidation measures and the structural reforms guided by the IMF-EFF program, total cash inflows through revenue reached an unprecedented level of Rs. 5,247.7 billion in 2025, surpassing the original estimate of Rs. 4,981.1 billion. This surge was primarily fueled by a historic performance in Tax Revenue collection, which totaled Rs. 4,999.4 billion, reflecting the impact of the upward revisions of tax rates, broadened tax base, and improved collection efficiency.

By significantly outperforming initial projections during the year, the Treasury strengthened its cash flow performances notably and moved toward more sustainable budget execution. Sri Lanka's government financial position reflected a notably improved liquidity status, supported by stronger revenue collection, prudent expenditure management, and enhanced access to both domestic and external financing, which helped maintain steady cash inflows. In addition, successful debt restructuring efforts and support from international financial institutions contributed to easing short-term repayment pressures, allowing the government to meet its obligations more comfortably. This positive liquidity position strengthened investor confidence, stabilized domestic money and capital markets, and provided a more resilient foundation for managing market interest rates at the desired level.

During 2025, government expenditure behavior reflected a continued shift toward fiscal consolidation and disciplined spending following earlier economic challenges. The Government prioritized essential and high-impact areas such as social welfare, public sector salaries, and debt service payments, while exercising tighter control over non-essential expenditures. The composition of spending showed a significant share allocated to debt servicing, highlighting the ongoing burden of public debt, even as restructuring efforts helped ease immediate pressures. At the same time, targeted subsidy reforms and better expenditure tracking improved efficiency and increased capital expenditure during latter part of the year reflected in the improved public investments. Overall, the government's spending approach in 2025 demonstrated a careful balancing act between maintaining fiscal discipline and supporting vulnerable groups and economic recovery alongside efforts to provide relief to populations affected by natural disasters, including Ditwah.

6.2 Treasury Cash Flow Management

Total cash inflows from revenue and other receipts excluding borrowing reached Rs. 5,247.7 billion in 2025, from which the majority or 95.3 percent contributed from tax revenue of Rs. 4,999.4 billion. Accordingly, tax revenue reflects a year-on-year increase of 37 percent over 2024 of Rs. 3,645.2 billion. This performance was primarily anchored by improved tax revenue collection which reached, significantly outperforming the initial estimate of Rs. 4,590.0 billion. In addition, non-tax revenue collection during the year was recorded as Rs. 247.9 billion which accounted for 4.7 percent of the total with an increase of Rs 43.8 billion or 21.5 percent over the previous year. These outcomes reflect the successful implementation of revenue-based fiscal consolidation measures, which have effectively transformed the government cash flow status through enhanced mobilization and disciplined fiscal policy.

Aligning with strict fiscal discipline, the Treasury maintained a rigorous expenditure management strategy throughout 2025 to ensure that outflows remained confined to approved budget to facilitate operational requirements and public investments. Accordingly, total funds released for recurrent payments for the period were recorded at Rs. 5,039.3 billion, against the estimate of Rs. 5,693.0 billion including interest cost of the government. The actual interest expenses incurred during the year 2025 was amounted to Rs. 2,431.6 billion reflecting 48 percent of the total recurrent expenditure complying with the government expenditure commitments. The second majority of the recurrent expenditure category of Rs. 1,324.6 billion was represented by Personal Emoluments, which was remained below the respective estimated thresholds.

Building upon the fiscal space created by the successful completion of the debt restructuring process at the end of 2024, the 2025 budget prioritized the delivery of essential public goods and the preservation of social safety nets. Accordingly, the government disbursed Rs. 426.3 billion in pension payments and allocated Rs. 197.5 billion toward Aswasuma and related social welfare initiatives. Furthermore, a dedicated investment of Rs. 38.1 billion was made toward fertilizer subsidies to support agricultural productivity, slightly exceeding the estimated Rs. 35.0 billion. Capital payments for infrastructure and development reached Rs. 851.8 billion, underscoring a commitment to broader economic stability while addressing the immediate needs of vulnerable populations. Paramountly, the government was able to settle all the arrears including dues brought forward from 2024 as well as committed during the year, while maintaining a reasonable cash buffer throughout the year.

A defining feature of the 2025 fiscal performance was the ability to maintain a positive cash balance throughout the year alongside the outperforming revenue collection during the year. As a result, Rs. 1,403.0 billion was provided from the Treasury cash flow to finance debt service payments including, down-sizing the outstanding Treasury Bill stock by Rs. 932.5 billion during the period under review, while maintaining a positive cash balance of Rs. 915.8 billion at the end of 2025 including the USD proceeds maintained in the Central Bank of Sri Lanka. This consolidation effort has not only strengthened the government's liquidity position but also contributed to a significant positive cash balance with state banks.

Financing the Treasury cash flow was mainly based on the government's borrowing strategy which, evolved towards the debt sustainability and the optimization of the government debt portfolio. Gross borrowing for the year totaled Rs. 3,092.0 billion, which was significantly lower than the estimated requirement of Rs. 3,322.4 billion. Simultaneously, the Treasury intensified its deleveraging efforts, dedicating Rs. 2,294.5 billion to debt repayments a substantial increase over the original estimate of Rs. 1,594.8 billion. This layered approach to fiscal management, characterized by a reliance on market-based financing and reduced dependence on monetary accommodation, has established a sustainable foundation for the country's future economic growth.

6.3 Government Borrowing Programme – 2025

In line with the provisions of the Public Debt Management Act No. 33 of 2024, the Government formulated the Annual Borrowing Plan for 2025 in accordance with the Medium-Term Debt Management Strategy (MTDS) 2025–2029. Accordingly, it was projected to raise Rs. 700 billion from external sources and Rs. 3,100 billion from domestic sources (excluding the rollover of Treasury bills) to finance the Gross Financing Requirement of the Government for the year, within the borrowing ceiling of Rs. 4,000 as stipulated in the Appropriation Act No. 3 of 2025.

Within this framework, the Government's actual borrowing during the year was less than 50% of the borrowing ceiling amounted to Rs. 1,956 billion, thereby supporting the country's debt reduction objectives, supported by existing cash buffer.

Figure 6.1 | Utilization of Borrowing Limit

(Rs. Billion)

Source: Public Debt Management Office
**Provisional*

The majority of the financing was sourced domestically, with Rs. 2,398 billion raised through the issuance of Treasury bonds in the domestic market. In addition, the Government raised USD 50 million (equivalent to approximately Rs. 15 billion) through the issuance of Domestic Dollar Bonds in 2025.

The remaining Rs. 475 billion was secured through external financing sources, including bilateral and multilateral loans. The Government's financing strategy focused on increasing reliance on domestic financing while reducing refinancing risk, interest rate risk, and currency risk within the debt portfolio.

6.4 Financing of the Budget

6.4.1. Foreign Financing

6.4.1.1 Foreign Financing Commitments

In 2025, the Government secured USD 1,228.1 million for foreign financing by entering into 14 agreements with foreign development partners as depicted in Table 6.2. Out of the total amounts USD 790.0 million and USD 206.1 million were committed with Asian Development Bank (ADB) and the International Monetary Fund (IMF), respectively.

The highest amount of commitment was made for the Budget Support which amounted to USD 706.1 million reflecting 58 percent of the total commitments in 2025.

6.4.1.2. Foreign Loan Disbursements and Utilization

Total foreign loan disbursements during the period from 1st January to 31st December 2025 has been recorded as USD 1,780.3 million.

The majority of the disbursements recorded in corresponding year were from IMF, accounting around 50 percent of the total disbursements, followed by ADB (29 percent) and WB (11 percent).

6.4.1.3. Committed Undisbursed Balance (CUB)

As at 31st December in 2025, the total undisbursed balance of foreign financing available from the loans committed, was USD 4,639 million. Major portion of the balance is to be disbursed from the projects committed with China and followed by the Japan, ADB and WB respectively.

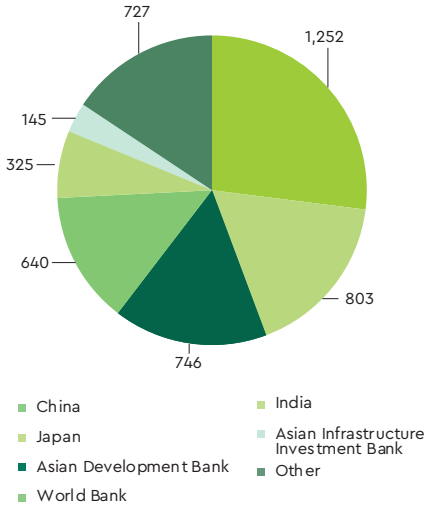

Almost 27 percent of the CUB is to be utilized in Roads and Bridges sector whereas 16 percent is for Water Supply and Sanitation and 11 percent in Ground Transport sector.

6.4.2. Domestic Financing

In 2025, the Government planned to raise Rs. 3,100 billion from domestic sources. Of this, Rs. 2,398 billion was mobilized through the issuance of LKR-denominated Treasury bonds, alongside USD 50 million (equivalent to Rs. 15.5 billion) raised through dollar-denominated Treasury bonds in the domestic market. In line with the Medium-Term Debt Management Strategy to reduce reliance on Treasury bills, the Government successfully reduced the outstanding stock of Treasury bills by Rs. 933 billion.

6.5 Debt of the Government (Gross)

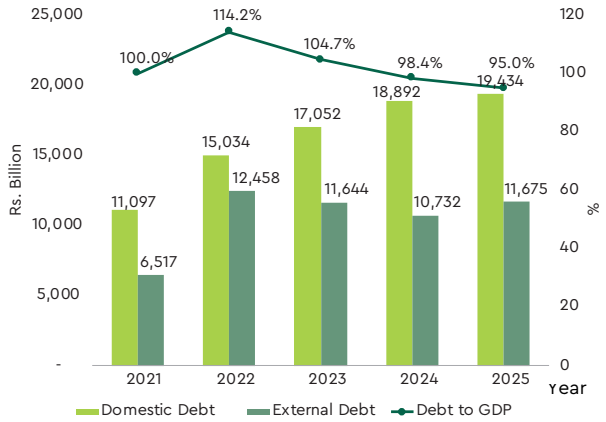

The total outstanding central government debt, in nominal terms, increased by 5.0 percent to Rs. 31,109 billion by the end of 2025 compared to Rs. 29,624 billion by the end of 2024. This was mainly due to the increase in both domestic and foreign debt components during 2025.

Of the total debt, domestic debt increased by 2.9 percent to Rs. 19,434 billion at the end of 2025 from Rs. 18,892 billion at the end of 2024 while foreign debt increased by 8.8 percent to Rs. 11,675 billion at the end 2025 from Rs. 10,732 billion at the end 2024. The share of domestic debt in the total debt stock declined slightly to 62.5 percent at the end of 2025 from 63.8 percent recorded at the end of 2024. In contrast, of the total debt stock, the share of foreign debt increased marginally to 37.5 percent at the end of 2025 from 36.2 percent at the end of 2024, mainly due to depreciation of rupee value.

6.5.1. Government Debt to GDP

The Government debt-to-GDP ratio has continuously declined over the past three years from the peak level recorded in 2022. This improvement is mainly attributable to the implementation of fiscal reforms and the gradual recovery in the country's macroeconomic conditions.

Figure 6.7 | Central Government Debt

** Provisional*

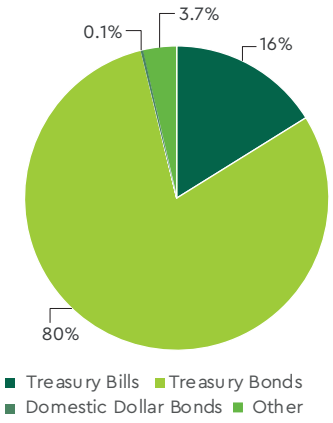

6.5.1 Domestic Debt

6.5.1.1 Composition by Type

As at end 2025, Treasury Bonds and Treasury Bills stood at 80 percent and 16 percent, respectively of the outstanding domestic debt. The stock of Treasury Bonds increased by 10 percent to Rs. 15,567 billion in 2025 compared to Rs. 14,139 billion recorded in 2024. Treasury Bills stock decreased by 22.9 percent to Rs. 3,138 billion in 2025 compared to Rs. 4,070 billion in 2024. The Government issued Domestic Doller Bond to the local market amounting to Rs. 15.5 billion. Other domestic debt instruments, including Term Loans payable to Bank of Ceylon and People's Bank, Suhurupaya Loan, Gratuity Loan, Development Project Loans, amounted to Rs. 714 billion at end 2025.

There were no outstanding stocks under Sri Lanka Development Bonds and Provisional Advance obtained from the Central bank of Sri Lanka.

6.5.1.2 Domestic Debt Securities Composition by Maturity

The share of domestic debt maturing within a year from the total outstanding stock of Treasury Bills and Treasury Bonds represented 24.1 percent while the balance 75.9 percent represented maturities beyond 2026.

Figure 6.9 | Domestic Debt Maturity Profile
(Rs. Billion)

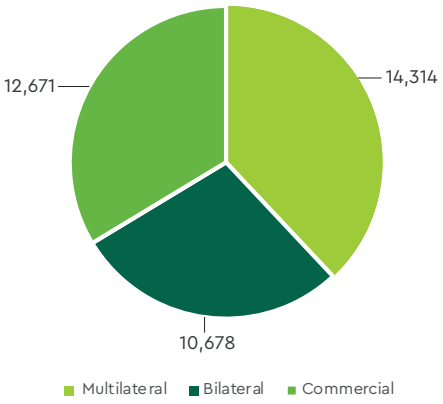

Source: Public Debt Management Office
**includes only the maturities of T-bills and T- bonds*

6.5.2. External Debt Stock

Total Central Government external debt as at the end of December 2025, amounted to USD 37,663 million . Composition of external debt as per lender category is depicted in the Figure 6.10.

Figure 6.10 | Composition of Central Government External Debt – as of 31st December 2025 (USD Million)

Source: Public debt Management Office
Provisional, Only the Central Government outstanding Foreign Debt are depicted including unpaid Principal accumulated after debt standstill policy was adopted.

Multilateral debt represented the majority of the total Central Government external debt (38 percent) followed by the Commercial debt (34 percent) and Bilateral debt (28 percent).

6.5.2.1 External Debt Restructuring Process

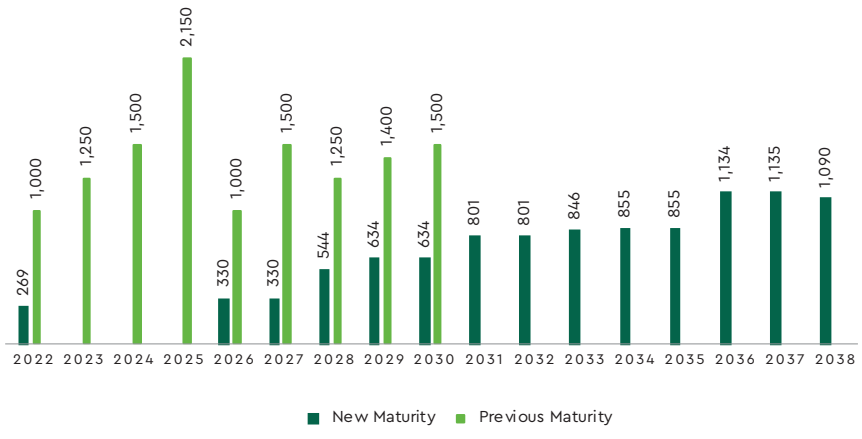

In line with the interim policy adopted by the Government, debt servicing payments to affected bilateral and commercial external creditors have been temporarily suspended for an interim period commencing from 12 April 2022. Sri Lanka had almost completed its external debt restructuring process by concluding debt treatment agreements with the Official Creditor Committee (OCC), signing the debt restructuring agreement with the Export-Import Bank of China in June 2024, and reaching an agreement in principle with International Sovereign Bond (ISB) holders in September 2024. Thereafter, Sri Lanka successfully completed the restructuring of ISBs in December 2024, exchanging approximately 98% of the outstanding ISBs into new instruments. Moreover, by end-2025, Sri Lanka had concluded approximately 95% of its bilateral debt restructuring agreements with lenders.

Accordingly, by end-2025, unpaid debt service obligations had recorded to a principal amount of USD 897.4 million and interest amounting to USD 285.7 million. This amount includes the 2022 ISB holdout obligations amounting to approximately USD 268 million, as well as the remaining 5% of bilateral debt restructuring agreements yet to be finalised.

6.5.2.2. Maturity Structure of ISBs (Pre and Post Restructuring)

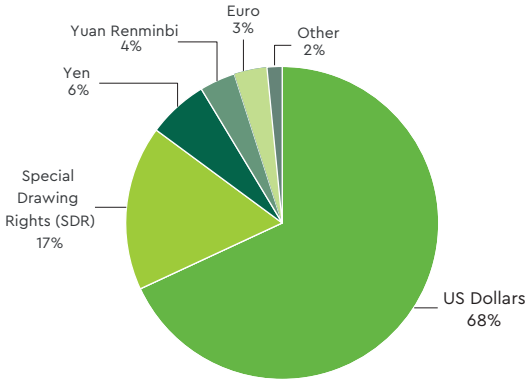

Prior to restructuring, Sri Lanka faced a highly concentrated repayment profile, with large ISB maturities falling due between 2023 and 2029, creating significant refinancing and liquidity pressures. Following the restructuring, the maturity profile has been considerably smoothed and extended over a longer period from 2022 to 2038. The new maturity structure reduces the bunching of repayments in the short to medium term and distributes debt service obligations more evenly across future years.

Figure 6.11 | Maturity Structure of ISBs
(Payments (USD Million))

Source: Public Debt Management Office
Notes: 2022 includes the balance of USD 269 million to be restructured.
ISBs have not been classified on the current resident/non-resident basis of its holdings

Figure 6.12 | Composition of External Debt By Currency

Source: Public Debt Management Office

The majority of the outstanding debt was in US dollars which amounted for almost 68 percent of the total outstanding debt, followed by the Special Drawing Rights (SDR) at 17 percent, Japanese Yen at 6 percent and Chinese Yuan Renminbi at 4 percent.

6.6 Debt Service payments

The total debt service obligation reflects payments made toward interest and principal on debt incurred from both domestic and external sources. In 2025, foreign interest payments amounted to Rs. 342.5 billion and which was recorded as Rs. 400 billion at the end of 2024. Meanwhile, the domestic interest payment decreased to Rs. 2,158.2 billion in 2025 compared to Rs. 2,289 billion in 2024, reflecting the lower interest rates that prevailed in the government securities market. Accordingly, the total interest payment amounted to Rs. 2,500.7 billion in 2025 compared to Rs. 2,689.5 billion recorded in the previous year.

Total domestic repayments (excluding the rolling over of T-bills) was recorded to Rs. 994.6 billion in 2025 compared to Rs. 984.8 billion in 2024. This slight increment was mainly due to discharging unpaid treasury guarantees amounting to Rs. 18.1 billion. Foreign repayments amounted to Rs. 424.5 billion in 2025. Accordingly, the total debt service payment amounted to Rs. 3,919.8 billion, comprising Rs. 3,152.8 billion for domestic debt service and Rs. 767.0 billion for foreign debt service.

6.6.1. Domestic Debt Service Payments

Domestic debt service payments as a percentage of GDP decreased to 9.6 percent in 2025, compared to 11.0 percent in 2024, mainly due to the reduction in domestic interest payments. Similarly, domestic debt service payments as a percentage of government revenue declined significantly to 57.6 percent in 2025 from 81.2 percent in 2024, reflecting a considerable improvement.

Table 6.7 | Domestic Debt Service Payment

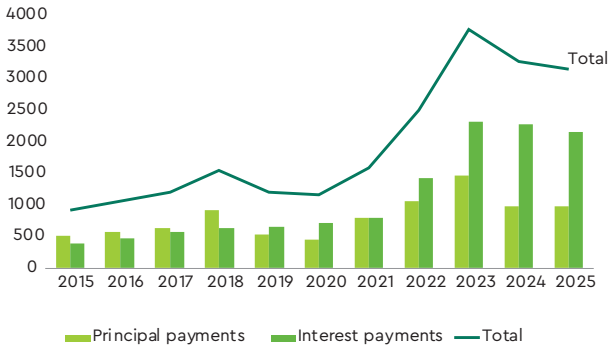

(Rs.Million)

Year	Principal payments	Interest payments	Total
2015	523,824	394,289	918,113
2016	572,442	484,182	1,056,624

6.6.2. External Debt Service Payments

Total debt service payments[1] from 1st January to 31st December in 2025 was amounted to USD 2,436.8 million, of which, USD 1,401.5 million was in lieu of principal repayments and the balance USD 1,035.2 million for the payment of interest.

External debt service payments as a percentage of GDP decreased to 2.3 percent in 2025, compared to 2.8 percent in 2024. Similarly, external debt service payments as a percentage of government revenue declined significantly to 14.1 percent in 2025 from 20.5 percent in 2024.

[1] *Debt Service = Principal Payments + Interest Payments*

Box 6.1 | Strengthening Sri Lanka's Public Debt Management Framework: Paving the Way for a New Era in Debt Management

Following the economic crisis in 2022, Sri Lanka embarked on a comprehensive reform agenda to strengthen the country's public debt management framework with the objective of restoring debt sustainability, improving fiscal resilience, and enhancing macroeconomic stability. A major milestone in this reform journey was the enactment of the Public Debt Management Act, No. 33 of 2024 (PDMA), which established a unified legal and institutional framework for public debt management through the establishment of the Public Debt Management Office (PDMO). By consolidating debt management functions that were previously dispersed across multiple institutions, the new framework significantly strengthened coordination, governance, accountability, and operational efficiency in public debt management.

During 2025, several important measures were introduced to further strengthen the legal and institutional framework governing public debt management. The issuance of Public Debt Management Regulations No. 01/2025 and No. 02/2025, together with operational guidelines and institutional procedures, significantly enhanced governance arrangements, risk management practices, and internal controls within the debt management process. These reforms paved the way for a more rules-based, transparent, and disciplined approach to debt management. In order to further strengthen institutional coordination and governance, the Public Debt Coordination Committee (PDCC) was appointed in January 2025 to facilitate effective coordination between debt management, fiscal policy, and monetary policy operations.

A key reform achievement was the introduction and publication of Sri Lanka's first Medium-Term Debt Management Strategy (MTDS) for the period 2025–2029 and Annual Borrowing Plan (ABP) for the year 2025 under the PDMA. This marked a paradigm shift from ad-hoc borrowing practices towards a more strategic and cost-risk based approach to government financing, ensuring greater consistency with the Government's medium-term fiscal and macroeconomic objectives.

Box 6.1 | Strengthening Sri Lanka's Public Debt Management Framework: Paving the Way for a New Era in Debt Management

Another landmark reform was the transfer of responsibility for conducting domestic government securities auctions from the Central Bank of Sri Lanka to the PDMO in December 2025. This transition strengthened the institutional separation between debt management and monetary policy functions in line with international best practices, while enhancing the operational independence and governance of government borrowing activities.

To support this transition, the Debt and Cash Management Committee (DCMC) and the Auction Steering Committee (ASC) were established within the Ministry of Finance to oversee strategic borrowing decisions and government securities auction operations. These institutional arrangements further strengthened governance, transparency, and decision-making within the domestic borrowing process.

The reform framework also introduced stronger mechanisms for managing fiscal risks associated with government guarantees and on-lending operations through the adoption of risk-based measures such as guarantee fees and on-lending premiums, thereby improving the management of contingent liabilities and safeguarding public finances.

Enhancing transparency and investor engagement has been another important pillar of Sri Lanka's public debt management reforms. Measures have been introduced to improve the availability, quality, and timeliness of debt-related information, while strengthening communication and engagement with investors and other stakeholders. These initiatives have contributed to improving investor confidence and reinforcing Sri Lanka's commitment to transparent and accountable public financial management practices.

Overall, Sri Lanka's public debt management reforms signify a major transformation in the country's debt management architecture, laying a strong foundation for prudent borrowing, improved fiscal risk management, and long-term debt sustainability.

PART III

Development Finance for Balanced and Inclusive Growth

07

Development Finance

7.1 Overview

Similar to other emerging economies, the SME sector remains a cornerstone of Sri Lanka's economy, contributing around 52% to GDP, 45% to employment, and 20% to exports. In 2025, the Government prioritized economic stability, MSME development, and food security through a combination of financial support, policy interventions, and institutional reforms.

Access to finance remained central, with banks providing substantial credit to MSMEs, complemented by targeted government initiatives. The MSME Re-energizing Programme (Rs. 15 billion) achieved significant progress, refinancing Rs. 14.6 billion, including 1,720 performing loans to Rs. 14,522.72 million and additional assistance for non-performing enterprises. The Extended Disaster Relief (EDR) Scheme (Rs. 5 billion) supported 315 businesses with Rs. 241 million following natural disasters.

Development partner support further strengthened financing. Under SMELoC, Rs. 4,115 million was disbursed to 394 SMEs, while SMELOC2 provided a total of Rs. 6,550 million by the end of the December 2025, benefiting nearly 1,100 MSMEs. Of these, 309 loans were granted to women entrepreneurs, while 258 loans supported climate financing initiatives of MSMEs. The SMELOC2 Revolving Facility contributed Rs. 511 million for investments.

Institutional Support such as the establishment of the National Credit Guarantee Institution Limited (NCGIL), established as a public–private partnership, improved access to finance, supporting 1,234 MSMEs with guarantees worth Rs. 5,099 million, including 20% for women-led businesses while Rs. 1,296 million (25%) was directed towards priority sectors such as agriculture, IT, exports, and tourism. These initiatives significantly improved access to finance, particularly for enterprises lacking collateral.

In agriculture, productivity and farmer support were enhanced through fertilizer subsidies was implemented through a direct cash transfer mechanism, concessional credit schemes such as "Sarusara," provided affordable financing at an effective interest rate of 6% per annum, and compulsory crop insurance backed by around Rs. 5,324 million in Treasury support.

Food security remained critical national priority and a 6% increment in total annual paddy production has been recorded when compared to the 2024. Under the Government Paddy Purchasing Program 162,257 mt of paddy was purchased at a cost of Rs. 19,633 million, while the pledge loan scheme enabled 112,894 mt of purchases through Rs. 13,596 million in disbursed loans while Rs. 132 million was paid as interest subsidies.

Investments in storage infrastructure improved value chains, with grain inflow increasing by 28.5% and warehouse financing by 36.1%. Policy measures such as MRPs, SCL adjustments, and MGPs helped manage the cost of living.

Overall, these integrated efforts strengthened MSME resilience, enhanced agricultural productivity, and supported national food security, contributing to a more stable, inclusive and sustainable economic growth.

7.2 Financial Assistance for Micro, Small and Medium-sized Enterprises

7.2.1 Financial Support Provided for SMEs by the Licensed Banks Utilizing their Funds

In addition to the support extended to implement the Government's financial and non-financial schemes, the significant portion of funding requirements of the SMEs were financed through the loan schemes implemented by the commercial and specialized banks utilizing their funds. In 2025 approximately Rs. 1,680,295.55 million worth of loans were granted through the loan schemes to fulfill the financial needs of the SME sector.

In 2025, fifteen (15) state and private banks provided 610,645 loans to the SME sector. Out of the total loan amount granted, around 37 percent was disbursed to the Industries and around 11 percent to Agriculture and 18 percent Services sectors respectively.

In addition, out of total loans disbursed for SMEs in 2025 by the banks, 51 percent has been disbursed as term loans, 16 percent as trade loans for exports, 8 percent as overdrafts and 7 percent as revolving facilities. (Table 7.2)

7.2.2 Financial Schemes for SMEs funded by the Government of Sri Lanka

7.2.2.1 Re-energizing the Micro, Small, and Medium-sized Enterprises (MSME) Sector in Sri Lanka

The Government, supported by various development partners, continues to provide financial and non-financial assistance to the MSME sector, which has faced significant challenges due to the recent economic downturn across industries such as manufacturing, imports, exports, tourism, and apparel. Many MSMEs that survived the crisis require external support in the form of loans or capital investments.

In response, the Department of Development Finance developed an MSME Re-energizing Package in 2024, which continued through 2025. The package provides, Investment support for Performing Loans (PL) and Working capital support for Non-Performing Loans (NPL).

The programme aims to revitalize MSMEs, enhance their resilience to business environment changes including climate-related challenges and prioritize sectors such as agriculture, tourism, manufacturing, technology, and export-oriented businesses, with special focus on women-led enterprises. In 2025, additional support was provided to swine farmers affected by the swine fever outbreak, including relaxed guidelines to access concessional loans.

Loans are disbursed through 15 Participatory Financial Institutions (PFIs) at affordable interest rates. The Ministry of Industries issued recommendation letters to eligible MSMEs which need financial support and demonstrating potential for business improvement. In 2025, the total allocated funds for the programme were Rs. 15 billion, of which approximately Rs. 14.6 billion was refinanced across both PL and NPL categories.

Table 7.3 | Features of the Re - Energizing Loan Scheme

Criteria	Component I (PL)	Component II (NPL)
Maximum Loan Amount	Rs. 25 Million	Rs. 15 Million

7.2.2.2 Extended Disaster Relief Loan Scheme (EDR)

During the latter part of 2025, the country experienced one of the most severe natural disasters in recent history, which caused significant disruptions to economic activities and the livelihoods of communities in affected areas. A large number of enterprises, particularly MSMEs, were adversely affected, and nearly 30,000 MSMEs have been registered with the Ministry of Industry and Entrepreneurship Development requesting assistance due to confronted operational and financial difficulties. Considering the magnitude of the impact and the critical role of MSMEs in supporting employment and economic activity, timely government intervention became essential.

Accordingly, the Government introduced the Extended Disaster Relief Loan Scheme (EDR) to provide concessional working capital facilities to disaster-affected enterprises at an affordable interest rate. The scheme aims to assist businesses in overcoming short-term liquidity constraints, restoring operations, and facilitating the gradual recovery of economic activities in affected regions.

The loan scheme was initially implemented through three state banks, Bank of Ceylon, People's Bank, and Regional Development Bank with effect from December16, 2025 to support MSMEs affected by Cyclone Ditwah. Subsequently, with effect from January 01, 2026, the scheme was extended to large-scale enterprises, and the number of participating financial institutions was expanded to twelve (12), including several private sector banks, to enhance outreach and accessibility. The features of the loan scheme are as follows.

Table 7.6 | Features of the EDR

#	Feature	Details
1	Total Fund Allocation	Rs. 10,000 million
2	Loan Limit	Maximum Rs. 250,000 for Micro Enterprises, Maximum Rs. 1,000,000 for Small Enterprises Maximum Rs. 25,000,000 for Medium and Large Enterprises per entity (Subject to maximum two (02) months working capital requirement of the affected business)
3	Loan Type	Working Capital
4	Effective Rate to PFIs	NIL
5	Maximum Rate to End-borrower	3 percent per annum
6	Grace Period	Maximum of 06 months commencing from the date of disbursement of the first installment
7	Repayment Period	Maximum of 03 years including the grace period
8	Eligible Economic Activities	Any economic activity affected by the disaster including Agriculture, Plantation, Livestock, Fisheries, Tourism, Manufacturing and Other Services
9	Security Requirements	Based on the viability of the estimated future cash flow of the business plan rather than collateral

Source: Department of Development Finance

To support the implementation of the scheme, the Government allocated Rs. 10,000 million (Two tranches; first on December 16, 2025 and second on January 22, 2026), recognizing the importance of reviving business activities for the broader recovery of the national economy. As of December 31, 2025, banks have issued 315 loans worth approximately Rs. 241 million under this scheme.

Box 7.1 | Digital Transformation for Inclusive Economic Growth: Strengthening MSME Development through Innovation

As an Implementing Agency the Department of Development Finance (DFD) continued its transformative journey in 2025 by deepening digitalization across its core operations, reinforcing its role as a catalyst for inclusive economic growth. Anchored in the Government's broader digitalization agenda, these initiatives have significantly enhanced the efficiency, transparency, and accessibility of financial support mechanisms particularly for Micro, Small, and Medium Enterprises (MSMEs), a critical pillar of Sri Lanka's economic development.

A key milestone in this journey has been the full operationalization of the Loan Management System (LMS), which was introduced in 4th Quarter of 2024 to replace the previously manual and paper-based processes associated with administering subsidized loan schemes. The LMS has revolutionized the way Participating Financial Institutions (PFIs) interact with the DFD by enabling end-to-end electronic submission, processing, and approval of loan applications. This transition has substantially reduced processing times, minimized administrative burdens, lowered operational costs, and enhanced transparency and accountability in public financial management.

The LMS has been successfully deployed across several flagship MSME financing programmes, including the Re-Energizing MSME Sector Loan Scheme, SMELoC, SMELoC–Revolving Loan Scheme, and the Pledge Loan Scheme. Furthermore, in response to Cyclone Ditwah, this Department demonstrated agility and responsiveness by digitally administering the Disaster Relief Loan Scheme with 3 percent interest, ensuring timely financial assistance to affected enterprises and supporting business continuity during a period of crisis.

Expanding the scope of digital service delivery, also implemented as a nationwide digital mechanism under Budget 2025 to operationalize the additional 3 percent interest incentive for senior citizens' over 300,000 nos. of fixed deposits. This system has connected around 3000 branches of participating banks through a centralized web portal, enabling real-time data sharing, automated calculations, and the prevention of duplicate claims. As a result, the efficiency, accuracy, and integrity of the subsidy programme have been significantly improved.

The integration of financial institutions into the LMS marks another significant achievement. To date, the head offices of nineteen (19) government and private banks have been successfully linked to the system, allowing seamless submission of loan applications and digital processing by departmental officials. This connectivity has strengthened coordination between the public and financial sectors, creating a more responsive and streamlined financing ecosystem for MSMEs.

Building on this progress, the DFD is actively working to expand its digital infrastructure. Systems for additional programmes, including the NCRCS Loan Scheme and the Farming System Sustainability Programme (FSSP), are currently under development, with the latter nearing completion. Moreover, with the support of the Asian Development Bank, two new loan schemes are being introduced alongside the development of an advanced loan management platform. This presents a strategic opportunity to integrate all existing loan systems into a unified, interoperable framework capable of interfacing directly with the internal systems of participating banks.

Looking ahead, we have planned to introduce a dynamic dashboard interface that will provide real-time insights into programme performance and fund utilization. This dashboard will be accessible to key stakeholders, including the decision making authorities in the Ministry of Finance, banks, and other relevant authorities, thereby facilitating informed decision-making and strengthening oversight. Additionally, it will enhance the ability to effectively monitor and supervise the implementation of development finance initiatives.

The digital transformation of the Department of Development Finance represents a significant step forward in modernizing public service delivery. By leveraging technology to improve efficiency, transparency, and accessibility, the Department is not only enhancing its operational effectiveness but also empowering MSMEs—the backbone of the national economy—to thrive in an increasingly competitive and dynamic environment.

7.2.2.3 Pledge Loan Scheme for SME Paddy Millers

Recognizing that SME paddy millers produce a majority of the country's rice and often face limited access to finance at high market interest rates, the Government introduced a pledge loan scheme at a concessional interest rate through state and private banks to facilitate the purchase of paddy from farmers. Initially implemented during the Yala Season 2023, the scheme was approved by the Cabinet as an annual programme commencing from the 2024/2025 Maha (Cabinet Decision dated 30.12.2024; Cabinet Memorandum No. 24/2284/804/033 dated 22.12.2024).

Paddy stocks were purchased at the Minimum Purchase Price (MPP) declared by the Department of Agriculture, under a scheme with an effective interest rate of 11% per annum, of which 7% was borne by SME paddy millers while the remaining 4% was provided as an interest subsidy by the Government to participating banks. This arrangement applied to both the Maha Season 2024/25 and the Yala Season 2025.

In 2025, the scheme recorded strong performance, with pledge loans amounting to Rs. 16,688 million registered for 672 SME paddy millers, of which Rs. 13,596 million was disbursed. Under the scheme, a total of 112,894 mt of paddy was purchased, while an interest subsidy of Rs. 132 million was provided.

This scheme significantly strengthened the financial capacity of SME paddy millers by improving access to affordable finance, supporting price stability for farmers, and ensuring an adequate supply of rice to the market.

Table 7.7 | Progress of the Pledge Loan Scheme, 2025

Description	Maha 2024/25	Yala 2025	Total
No of Loans Registered	375	297	672

7.2.3 Financial Schemes for SMEs Funded by the Development Partners

Under the financial assistance of the Asian Development Bank, the Department of Development Finance is implementing three major loan components i.e. (I) SME Credit Line to provide investment loans for SMEs, (II) Enhancing Small and Medium-sized Enterprises Finance Project (SMELOC2) to provide working capital loans to MSMEs affected by the economic downturn and (III) SMELOC2 – Revolving to provide investment loans for SMEs.

7.2.3.1 Small and Medium-sized Enterprises Line of Credit (SMELoC) Project

Under the SMELoC Project, funded by the ADB, investment loans are provided to SMEs through 13 PFIs: Bank of Ceylon, People's Bank, Regional Development Bank, Hatton National Bank, Commercial Bank, Sampath Bank, Seylan Bank, National Development Bank, DFCC Bank, Nations Trust Bank, Pan Asia Bank, Union Bank, and Sanasa Development Bank.

In 2025, approximately Rs. 4,115 million was disbursed as investment loans to 394 SMEs. Of these, loans were provided for start-ups, and 394 loans were extended to women-led SMEs, reflecting targeted support to promote entrepreneurship and inclusive growth. The progress is detailed in the Table 7.8.

7.2.3.2 Enhancing Small and Medium-sized Enterprises Finance Project (SMELOC2)

Under the Enhancing Small and Medium-sized Enterprises Finance Project (SMELOC2), the Asian Development Bank (ADB) provided USD 100 million, of which USD 50 million was allocated to support MSMEs affected by recent economic shocks, while the remaining USD 50 million served as the initial investment for the National Credit Guarantee Institution Limited (NCGIL).

Under the SMELOC2 Project, the first advance of approximately Rs. 6,825 million was distributed among 13 PFIs in May 2024, utilizing these funds, working capital loans were extended to around 900 MSMEs.

Subsequently, the second advance of approximately Rs. 8,000 million (USD 27 million) was allocated among 10 eligible PFIs in November 2024. By the end of the December 2025 a total of Rs. 6,550 million had been disbursed, benefiting nearly 1,100 MSMEs. Of these, 309 loans were granted to women entrepreneurs, while 258 loans supported climate financing initiatives of MSMEs.

7.2.3.3 Enhancing Small and Medium-Sized Enterprises Finance Project (SMELOC2 – Revolving)

To meet the growing demand for investment loans from micro, small, and medium-sized enterprises (MSMEs), the Steering Committee of the SMELOC2 Project approved the utilization of the reflow of USD 50 million from the SMELOC2 loan component under the "SMELOC2 – Revolving" programme. The funds are being released through five semi-annual allocations, commencing July 2025 and continuing through December 2027.

Under the first tranche, approximately Rs. 1,365 million was allocated among eight Participating Financial Institutions (PFIs), and disbursed to MSMEs engaged in agriculture, tourism, manufacturing, technology, and export-oriented sectors. Of this amount, around Rs. 511 million was disbursed to 40 MSMEs as at December 31, 2025, providing critical support for business investment and growth.

7.2.3.4 Agriculture Value Chain Financing and Commercialization Sector Development Program

The Agriculture Value Chain Financing and Commercialization Sector Development Program, funded by the Asian Development Bank (ADB), aims to strengthen the agricultural and agribusiness sectors by providing concessional financing through participating financial institutions.

The program supports activities across the entire agricultural value chain, including primary production, agro-processing, storage, value addition, and marketing. Under this facility, eligible small and medium-scale enterprises (SMEs) engaged in agriculture and related industries are able to access financing to expand operations, improve productivity, and enhance market access. The scheme also promotes inclusive economic growth by supporting rural enterprises, export-oriented agribusinesses, and women-led SMEs.

The Several ADB fact finding missions were facilitated and it has been planned to commence this Project during the last quarter of the year 2026.

7.2.3.5 Small and Medium-sized Enterprises Sector Development Programme

The SME Sector Development Programme is a strategic initiative aimed at strengthening the Small and Medium Enterprise (SME) sector by enhancing business capacity, improving access to finance, promoting technology adoption, and expanding market opportunities. The Programme has been proposed to address the limited availability of venture capital and private equity financing within Sri Lanka's SME financing ecosystem.

Accordingly, the Programme primarily focuses on to provide a sustainable solution to existing gaps in access to finance for Micro, Small, and Medium Enterprises (MSMEs), while enhancing their financial and digital literacy to support business growth and scalability.

The Programme is proposed to be implemented through the following key components:

1. Policy-Based Loan (PBL) – USD 100 million
2. Financial Intermediation Loan (FIL) – USD 120 million including USD 20 million initial investment for Venture Capital Fund

7.2.3.6 Women Entrepreneurs Finance Code (WE Finance Code)

WE Finance Code is important for collecting and reporting of sex-disaggregated MSME data with the objective of taking policy based decision to enhance women's economic participation to the country and this is one of the key commitments that Sri Lanka has pledged as a policy action under the Finance Sector Stability and Reform Programme. In order to ensure the quality of data being collected and reported under WE Finance Code, it is imperative that a consistent basis be applied in disaggregation. Accordingly, the "National Definition" for classification of 'women-led business' was developed in consultation of

the stakeholders with the technical support of the Asian Development Bank and the same was circulated by the Central Bank of Sri Lanka (CBSL) to all banks, non-banks and micro finance institutions as revised operating instructions in August, 2024 to ensure the systematic sex-disaggregated data collection across the banking sector under the WE Finance Code.

Moreover, the Department of Development Finance (DFD) has been assigned the task of implementation of the WE Finance Code in collaboration with the CBSL. Accordingly, the WE Finance Code was officially launched in Sri Lanka on 18 March 2025 by the Ministry of Finance, in collaboration with thirteen (13) licensed banks, as Code signatories, and the CBSL. Under this Code, sex-disaggregated data are collected on number of MSME business customers, MSME business loan applications and approvals, MSME business outstanding loans, MSME business non-performing loans and MSME business deposits, with the objective of promoting evidence-based policies and initiatives that support women-led businesses' in accessing to finance.

7.2.4 Institutional Support for SMEs

7.2.4.1 National Credit Guarantee Institution Limited (NCGIL)

With the approval of the Cabinet of Ministers, the National Credit Guarantee Institution Limited (NCGIL) was established as a public–private partnership between the Government of Sri Lanka and thirteen (13) shareholder financial institutions (SFIs) and incorporated as a public limited company (No. P B 00271461). The objective of NCGIL is to support the development of the Micro, Small and Medium Enterprise (MSME) sector by providing credit guarantees for term loans granted by participating financial institutions.

Under the approved capital structure, the Government has invested USD 50 million with financial support from the Asian Development Bank, while the SFIs have contributed proportionately, maintaining an approximate 90:10 ratio between the Government and SFIs.

NCGIL commenced their operations on January 20, 2025. As at 31 December 2025, a total of 1,234 loans amounting to Rs. 7,435 million have been covered by issuing guarantees valued at Rs. 5,099 million. Of this, Rs. 939 million (approximately 20%) has been extended to 244 women-owned MSMEs, while Rs. 1,296 million (25%) has been directed towards priority sectors including agriculture, IT, exports, and tourism. The trading sector accounts for the largest share, with guarantees amounting to Rs. 1,914 million (approximately 40%).

Within its first year of operations, NCGIL has demonstrated significant progress in facilitating access to finance for MSMEs, particularly those lacking collateral, by promoting cash flow-based lending.

For 2026, NCGIL aims to further expand operations by supporting at least 2,500 MSMEs with guarantees exceeding Rs. 10,000 million, with a focus on women-led enterprises, exports, IT, tourism, agriculture, and environmentally sustainable businesses.

7.2.4.2 Establishing a Comprehensive Regulatory Framework for the Micro Finance Industry

To address the gaps in the Microfinance Act No. 06 of 2016 and introduce a comprehensive regulatory mechanism for money lenders and microfinance providers, a new regulatory framework was proposed to establish a dedicated authority for the sector. Accordingly, the Microfinance and Credit Regulatory Authority Bill was tabled in Parliament on 09 January 2024.

During the public consultation period, certain stakeholders challenged the draft Bill through special determination petitions. After considering these petitions, the Supreme Court issued its determination, specifying the amendments required and provisions to be repealed.

To incorporate these determinations and address stakeholder concerns, a Working Committee and a Steering Committee were appointed to review and refine the Bill.

The Working Committee submitted its report on 09 January 2025, followed by the Steering Committee's report on 04 April 2025, recommending amendments including those required by the Supreme Court.

Subsequently, Cabinet approval was obtained for the proposed revisions on 11 August 2025 and for the revised Bill on 20 September 2025. The revised Bill was later gazette on 14 November 2025 and tabled in Parliament on 27 November 2025, in accordance with the legislative procedure for enactment.

7.2.5 Agriculture supported schemes to enhance the productivity

7.2.5.1 Fertilizer Subsidy Program

In response to fiscal constraints while ensuring continued support to the agriculture sector, the Government of Sri Lanka continued the fertilizer subsidy programme by adopting a direct financial assistance (cash grant) mechanism to farmers. Under this approach, funds are credited directly to farmers' bank accounts, enhancing transparency, targeting, and administrative efficiency.

During the Maha Season 2024/25 and Yala Season 2025, farmers received Rs. 25,000 per hectare for paddy cultivation and Rs. 15,000 per hectare for Other Field Crops (OFCs) cultivated in paddy lands, applicable up to a maximum of two hectares per farmer.

In order to encourage the effective utilization of paddy lands and strengthen domestic agricultural production, the subsidy mechanism was continued for the Maha Season 2025/26, maintaining the same payment structure.

Overall, the programme aims to support farmer livelihoods, promote the efficient use of agricultural inputs, enhance agricultural productivity, and contribute to the stability and resilience of the country's agricultural sector.

7.2.5.2 Assistance to smallholder planters

In order to increase the production of the main export crops by empowering the smallholder planters, the Government offered subsidies for new planting, re-planting, preparation for land, plant protection and other activities in relation to tea, rubber and coconut smallholders. Accordingly, Rs. 1,958 million was distributed among 110,156 such planters of which, Rs. 745 million was provided for 21,159 tea planters, while Rs. 495 million was provided 13,406 rubber planters in the year 2025. In addition, Rs. 718 million was provided to 75,591 coconut growers under this subsidy program.

Table 7.11 | Performance of Smallholder Plantation Sector during the period 2023-2025

7.2.5.3 New Comprehensive Rural Credit Scheme (NCRCS) – "Sarusara"

"Sarusara" is an interest subsidy scheme designed to provide concessional credit facilities to micro and small-scale farmers for their working capital needs. Previously administered by the Department of Regional Development of the Central Bank of Sri Lanka, the scheme has been implemented under the supervision of the Department of Development Finance (DFD), Ministry of Finance, Planning and Economic Development, with effect from 01 January 2025.

Under the NCRCS, loans are available for the cultivation of short-term crops, home gardening activities, and warehouse receipt

financing against agricultural produce stored in government-owned warehouses. The maximum loan amount for short-term crops is up to Rs. 3 million, based on the approved scale of finance and land cultivated. Loans of up to Rs. 500,000 are provided for nurseries, while home gardening activities may obtain up to Rs. 100,000. Warehouse receipt financing is available for up to 70% of the current market value of commodities stored in government warehouses.

The loans carry an effective interest rate of 11% per annum, of which 5% is subsidized by the Government, resulting in a concessionary rate of 6% per annum for the borrower. Repayment periods range from 270 to 365 days, facilitating timely access to affordable finance and supporting rural agricultural development.

7.2.5.4 Compulsory Crop Insurance

The compulsory Crop Insurance Scheme was introduced with the objective of providing extensive insurance coverage for crop damage of paddy and other commercial crops i.e. maize, soya, big onions, potatoes and chilies. The scheme covers the losses caused due to droughts, floods and wild elephant attacks up to the maximum land extent of 5 acres for paddy and 2.5 acres for other commercial crops and the insurance coverage per acre is Rs. 40,000. This scheme is free for farmers and operated with a premium contribution which is made by the Government. Additional coverage can be obtained for damages caused by pests and diseases, other animal attacks and fire paying a premium by the farmers. Insurance coverage can also be obtained for additional cultivation extents and a higher sum insured up to the cost of cultivation by paying an additional premium. During the 2024/25 Maha season around Rs. 1,559 million was paid to 75,197 farmers as compensation for crop damages in cultivated land areas of 88,882 acres.

In addition, for the 2025 Yala season, around Rs. 57 million was paid for 3,007 number of farmers for crop damages in cultivated land areas of 2,430 acres. The General Treasury has provided Rs. 5,323.87 million to Agriculture and Agrarian Insurance Board (AAIB) for these endeavors (progress) in the year 2025.

7.2.5.5 Pension Scheme for Farmers

The Agriculture and Agrarian Insurance Board (AAIB) has established the farmers' pension scheme to safeguard the elderly farmers, who have contributed to agricultural development of the country. Approximately, 178,998 farmers were registered under the farmers' pension scheme. In the year 2025, Rs. 5,083 million was distributed among 178,998 farmers as monthly pension under this scheme. Since the farmers' contribution to the scheme is not adequate for the scheme to operate as self-financing scheme, the gap is provided by the General Treasury to the AAIB annually. Accordingly, the General Treasury has provided Rs. 5,324 million to pay pensions for farmers for the year 2025.

As per the instructions issued by the Extra Ordinary Gazette Notification No. 1853/49 dated March 14, 2014, the existing Farmers' Pension and Social Welfare Scheme was re-designed and re-launched the same on October 31, 2022 with the objective of operating the new

farmers' pension scheme as a self-financed scheme. Accordingly, 14,252 number of new farmers were registered under this new farmers' pension scheme during the year 2025.

Figure 7.2 | Progress of Farmers' Pension Scheme – 2025

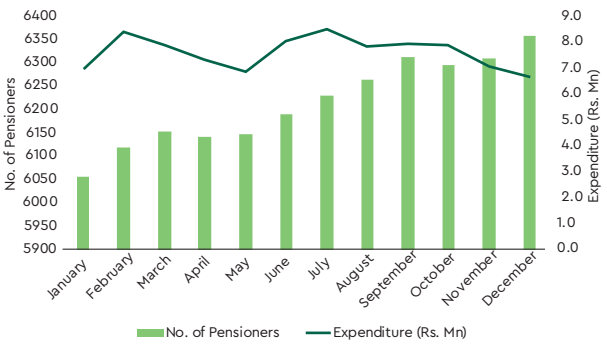

Source: Agriculture and Agrarian Insurance Board

7.2.5.6 Pension Scheme for Fishermen

The fishermen's contributory pension scheme was implemented as a self-sustained scheme by the AAIB and nearly 6,359 numbers of fishermen were registered under this scheme at the end of year 2025. Rs. 91 million was distributed among nearly 6,359 fishermen as their monthly pension during the year 2025.

Figure 7.3 | Progress of Fishermen's Pension Scheme – 2025

Source: Agriculture and Agrarian Insurance Board

Under the existing scheme, the fishermen receive a monthly pension ranging from Rs. 1,000 to Rs. 4,000. Since this amount is not sufficient when compared with the current cost of living, the new pension scheme for fishermen i.e. 'Fishermen's Pension and Social Security Benefits Scheme' was officially announced in the Gazette No 2428/13 dated 19.03.2025 by the Ministry of Fisheries, Aquatic and Ocean Resources. This new scheme will be implemented from 2025 onwards in cooperation with the AAIB, as a more beneficial and self-financing scheme.

7.2.6 Special Interest Subsidy Schemes

7.2.6.1 The Special Fixed Deposit Scheme for Senior Citizens – 2025

The Senior Citizen Special Interest Fixed Deposit Scheme was introduced as a targeted social protection measure to support elderly citizens affected by rising living costs and declining real returns on savings. The scheme aims to provide enhanced interest income for senior citizens who largely depend on fixed deposit earnings for their financial stability during retirement.

The General Treasury, through the Department of Development Finance, implemented the scheme in collaboration with 18 licensed banks. Under this arrangement, participating banks offer an enhanced interest rate on fixed deposits for eligible senior citizens, while the Government compensates the differential component through a budgeted interest subsidy allocation.

The implementation process is integrated with the Loan Management System (LMS), enabling transparent reporting, real-time monitoring of accounts, accurate calculation of subsidies, and proper reconciliation while maintaining a clear audit trail.

As at 31 December 2025, a total of 330,676 fixed deposit accounts had been opened under the scheme with a cumulative deposit value of Rs. 257 billion. In addition, an interest subsidy amounting to Rs. 786 million has been reimbursed to participating banks. The remaining subsidy payable up to 31 December 2026 will be settled in accordance with the budgetary allocation approved under the 2026 fiscal framework.

7.2.6.2 Reimbursing the Additional Interest paid by the Authorized Dealers for the Special Deposit Account (SDA)

As per the sections 29 and 7 of the Foreign Exchange Act, No. 12 of 2017, the regulations were published in the Gazette Notification No.2170/4 dated 08.04.2020, No.2202/7 dated 17.11.2020, No. 2234/19 dated 30.06.2021 and No. 2273/06 dated 28.03.2022, permitting to open SDAs for a period of 06 months, 12 months, 24 months and 36 months, respectively. Accordingly,

Authorized Dealers are permitted to open and maintain SDAs at the Domestic Banking Units (DBUs) for Sri Lankan individual resident in or outside Sri Lanka, dual citizens, citizens of other States with Sri Lankan origin, non-national residents in or outside Sri Lanka including funds, corporate bodies, associations incorporated / registered outside Sri Lanka and any other well-wisher. Consequently, Authorized Dealers are paid additional 2 percent annual interest rate for the aforesaid SDAs at the maturity of those deposits.

Accordingly, Rs. 7,232.38 million has been reimbursed to the Central Bank (CBSL) of Sri Lanka with respect to settling the additional interest paid by the Authorized dealers for SDAs from 2023 to 2025.

7.2.6.3 "Enterprise Sri Lanka" interest subsidy loan scheme

The "Enterprise Sri Lanka" Interest Subsidy Loan Scheme, implemented between 2017 and 2020, was established to promote entrepreneurship and improve access to affordable finance for businesses across various sectors. Although the lending phase has concluded, the General Treasury continues to honor the interest subsidy obligations for loans disbursed under the programme until the completion of their respective tenures.

In 2025, a total of Rs. 1,725.65 million was paid to participating financial institutions as interest subsidies, demonstrating the Government's continued commitment to supporting entrepreneurs and fostering sustainable business development.

7.2.6.4 Providing Relief for Individuals with Pawned Jewelry in Licensed Banks

Pawning has become an important source of credit, particularly for low-income families who do not qualify for conventional bank loans. These advances are often used to finance consumption, agricultural activities, and micro-enterprises. In response to repayment difficulties during recent economic challenges, the Government introduced a targeted relief programme, effective 01 August 2024, providing an interest subsidy on pawning advances obtained from licensed banks by beneficiaries of the Aswasuma Programme.

Under the scheme, an interest subsidy of up to ten percent (10%) per annum is available for pawning advances not exceeding Rs. 100,000. In 2025, approximately Rs. 93,917.39 was disbursed to participating banks under this initiative, reflecting the Government's commitment to supporting vulnerable households and strengthening micro-level economic resilience.

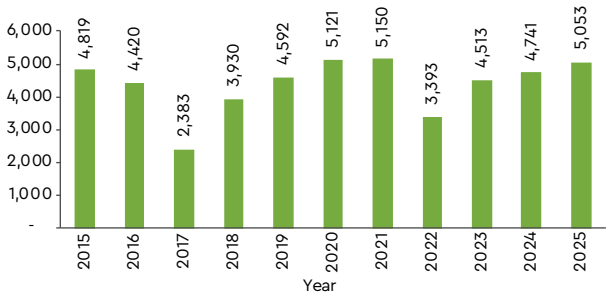

7.3 Food Security

7.3.1 Government Paddy Purchasing Programme

Rice is the staple food of Sri Lanka, making paddy production critical for national food security, reducing dependence on imports, and ensuring self-sufficiency. Recognizing its strategic importance, the Government has implemented several supportive measures, including fertilizer subsidies, the provision of quality seed paddy at concessionary prices, agricultural extension services, and a guaranteed price scheme for paddy. These interventions have contributed to a steady increase in paddy production in recent years.

Under these circumstances, the total annual paddy production was increased to 5,053,000 mt in 2025 recording 6% increment compared to the 2024. The figure 7.4 below illustrates total paddy production in Sri Lanka from 2015 to 2025.

Figure 7.4 | Total Paddy Production 2015 - 2025
(Paddy Production (000'mt))

Source: Department of Census and Statistics

The Government Paddy Purchasing Programme was implemented to ensure fair prices for paddy farmers, maintain the availability of rice for consumers at affordable prices, and strengthen SME paddy millers. The programme is administered through the Paddy Marketing Board (PMB), while the pledge loan scheme implemented by DFD supports SME paddy millers and Cooperative Societies via state and private banks.

In 2025, the PMB purchased 49,612 mt of paddy using funds provided by the General Treasury, while an additional 112,894 mt were purchased under the pledge loan scheme through state and private banks, ensuring continued support to farmers and small-scale millers.

7.3.2 Paddy Purchasing by the Private Sector

Both state and private sector banks supported private sector paddy purchasing by providing the necessary financing, with bank credit remaining the primary source of funds for these programmes.

According to the data (Table 7.16), the total number of loans granted increased from 2,369 in 2024 to 3,335 in 2025, reflecting a 41% growth compared to the previous year. However, the total value of loans granted declined from Rs. 86,812 million in 2024 to Rs. 74,369 million in 2025, representing a 14% decrease.

7.3.3 Government Storage Facilities for Agricultural Products

The Government, with financial support from the World Bank, has established five modern Farmers' Grain Preservation Centers (FGPCs) in key agricultural districts: Anuradhapura, Monaragala, Mannar, Kilinochchi, and Polonnaruwa. Equipped with advanced preservation technology and managed under an incentive-based model, these centers provide high-quality storage services for grains i.e. paddy, maize, soybean, and black gram. With a combined storage capacity of 17,200 mt, the centers help farmers reduce exposure to seasonal price volatility by securely storing produce until market conditions are favorable.

In addition to storage, the centers offer value-added services such as professional drying, cleaning, and grain quality certification. A key feature is the Warehouse Receipt Financing (WRF) mechanism, which allows farmers to use stored produce as collateral to access concessional credit, thereby integrating rural producers into the formal financial system.

Performance Highlights (2024–2025):

- Total Grain Inflow: Increased by 28.5%, from 4,537 mt in 2024 to 5,828 mt in 2025, reflecting growing farmer confidence.
- Registered Farmer Participation: Rose by 7.4%, from 3,897 to 4,187 farmers, with particularly strong growth in Mannar district.
- Warehouse Receipt Financing: Total credit disbursement increased by 36.1%, from Rs. 257.92 million to Rs. 351.00 million, improving access to formal agricultural credit.

Despite progress in service expansion, operational income declined slightly from Rs. 20.60 million in 2024 to Rs. 19.57 million in 2025, while operational costs increased from Rs. 23.41 million to Rs. 24.93 million, widening the operational deficit. Nevertheless, the growth in storage volumes and financial integration indicates stronger value-chain linkages and enhanced rural economic participation.

Moving forward, strategic priorities include optimizing capacity utilization, improving cost recovery mechanisms, and leveraging growing storage demand to ensure long-term financial sustainability and increased resilience in the agricultural sector.

7.3.4 Cost of Living

Managing the cost of living was a key priority for the Government in 2025, particularly as food and nutrition security remained a significant challenge. A range of policy measures was implemented to protect both consumers and producers.

Key interventions included:

- Maximum Retail Prices (MRPs): Imposed on selected essential commodities to prevent excessive price increases for consumers.
- Minimum Guaranteed Prices: Introduced to ensure fair returns for farmers.
- Special Commodity Levy (SCL) adjustments: Made to maintain the availability of essential food items at affordable prices while protecting domestic producers.

The Food Policy and Security Committee guided policy decisions using data-driven analysis and stakeholder participation, ensuring national food security and improved nutritional outcomes.

Table 7.18 | Several Measures to Control Cost of Living - 2025

Commodity	Description of Special Commodity Levy (SCL)/ Maximum Retail Price (MRP)	Effective Date
Big Onion	SCL was increased from Rs 10/- to Rs 50/- per kg for another 03 months	26.08.2025
	SCL was continued as Rs 50/-per kg for until 31.12.2025	26.11.2025

08

Performance of State Owned Enterprises (SOEs)

8.1 Overview

The State Owned Enterprises (SOEs), particularly the main 51 SOEs, play a significant role in the socio-economic development of the country through their engagement in 15 key sectors, including banking and finance, insurance, energy, water, ports, plantations, and health. Their contribution extends beyond revenue and profit generation to encompass employment creation, price stabilization, the provision of public services and utilities, infrastructure development, financial inclusion, poverty alleviation, and the maintenance of fiscal stability.

During the year 2025, excluding the Ceylon Electricity Board, the remaining 50 SOEs reported a total profit of Rs. 483.2 billion, reflecting an increase of 21.5 percent compared to the total profit of Rs. 397.5 billion recorded in 2024. However, owing to the net loss of Rs. 38.7 billion incurred by the Ceylon Electricity Board in 2025, compared to the net profit of Rs. 141.6 billion recorded in 2024, the overall profitability of the main 51 SOEs declined by 17.6 percent to Rs. 444.4 billion.

The improved performance of the SOE sector was reflected in its increased contribution to the Consolidated Fund through levies and dividends. Accordingly, collections from SOEs by way of levies and dividends increased to Rs.56.5 billion in 2025, compared to Rs. 41.1 billion in 2024.

In line with the Government's policy on reforming the SOE sector, several initiatives were undertaken during the year 2025. These included the approval of the Cabinet of Ministers for the closure, restructuring, or merger of several non-commercial SOEs based on the recommendations of the Cabinet-appointed Committee; approval for the liquidation of 33 non-functional SOEs; and approval to draft the Public Commercial Enterprises Management Bill with the objective of ensuring that all public commercial enterprises are managed professionally, independently, productively, and in accordance with commercial principles, while adhering to the highest standards of governance, accountability, and transparency.

Meanwhile, in line with the Cabinet-approved State-Owned Banks (SOB) Reform Policy, key reforms were implemented in State-Owned Banks. These reforms included the appointment of independent directors, with the assistance of a committee of professionals, resulting in independent directors constituting the majority of the Boards of the SOBs.

The enactment of the Sri Lanka Electricity (Amendment) Act, No. 14 of 2025 in August 2025 was followed by several key reforms in the power sector, including the introduction of the National Energy Policy and the National Tariff Policy, as well as the establishment of six Government-owned companies to unbundle the functions of the Ceylon Electricity Board. These reforms are expected to enhance efficiency, transparency, and accountability within the power sector.

The Government continued to support the reform initiatives of SriLankan Airlines (SLA) by assisting its debt restructuring process, including the restructuring of the USD 175 million international bond, with the objective of easing liquidity pressures and improving the airline's financial stability. Accordingly, the General Treasury infused Rs. 25.28 billion as equity capital into SLA during 2025.

During the year 2025, with a view to enhancing the governance of SOEs through improved reporting practices, the General Treasury, with the approval of the Cabinet of Ministers, introduced a comprehensive guideline for the preparation of annual reports. Further, in order to enhance financial discipline, transparency, equitable treatment of all stakeholders, and enhancing efficiency in decision-making through the empowerment of Boards of Directors, a circular was issued providing guidelines on sponsorships, donations, indirect business-related promotional expenses, and corporate social responsibility activities of SOEs.

8.2 Energy

8.2.1 Ceylon Electricity Board

The Ceylon Electricity Board (CEB), despite recording profits for two consecutive years in 2023 and 2024, reported a loss in 2025 notwithstanding the availability of a cost-recovery pricing mechanism. This was influenced by a series of tariff revisions approved by the Public Utilities Commission of Sri Lanka (PUCSL), where, electricity tariffs were reduced by 21.9 percent in March 2024 and by a further 22.5 percent in July 2024, followed by an additional reduction of 20 percent in the average end-user tariff in January 2025. Although a tariff increase of 15 percent was implemented in June 2025, the cumulative effect led the CEB to record a net loss of Rs. 38.7 billion in 2025, compared to a net profit of Rs. 141.6 billion in the previous year.

Despite an increase in electricity consumption by 5.9 percent to 16,088 GWh in 2025, CEB experienced a notable decline in revenue, primarily due to consecutive tariff reductions. Accordingly, income from sale of electricity decreased by 22.8 percent to Rs. 422.2 billion in 2025 from Rs. 547 billion in 2024. In line with the increase in units generated by 5.9 percent to 18,407 GWh, direct generation cost of electricity increased marginally by 1.4 percent to Rs. 309.6 billion in 2025, compared to Rs.305.5 billion in 2024. Meantime, transmission and distribution cost, and corporate expenses also increased by 22 percent and 50 percent to Rs. 256 billion and Rs. 21.5 billion, respectively, while the other income decreased by 63 percent to Rs.25.3 billion in 2025. As a result, CEB ended up the year 2025 with an operating loss of Rs. 26.1 billion, compared to the operating profit of Rs. 159.8 billion in 2024. Consequently, CEB recorded a net loss of Rs. 38.7 billion in 2025, compared to the net profit of Rs. 141.6 billion in 2024. As a result, outstanding bills to CPC and independent power producers increased to Rs. 28.5 billion at the end of 2025, compared to Rs. 14.5 billion at the end of 2024.

The generation mix for the year 2025 recorded as thermal (coal): hydro: Non-Conventional Renewable Energy (NCRE), wind and rooftop solar: and thermal (fuel) as 29:35:24:12 percent, respectively in 2025, compared to 35:31:20:14 percent, respectively in 2024. The increased rainfall experienced during the latter part of 2025, together with the addition of approximately 900 MW of NCRE capacity primarily from solar power, significantly reduced the reliance on coal and fuel-based generation. This shift in generation mix is reflected through the reduction in average unit cost at the selling point, which declined to Rs. 30.23 per kWh in 2025 from Rs. 31.16 per kWh in 2024.

In line with the Extended Fund Facility (EFF) arrangement with the International Monetary Fund (IMF), the settlement of the legacy debt of the CEB was identified as a structural benchmark effective from April 2025. Accordingly, the Cabinet of Ministers approved a legacy debt settlement plan, and the CEB initiated the restructuring of its outstanding legacy debt, which amounted to Rs. 181.7 billion as at 30 September 2024, through a Debt Negotiation Committee appointed by the Secretary of the Ministry of Energy. As a result, Rs. 48.5 billion of legacy debt has been restructured and Rs. 20 billion of debentures have been redeemed, reducing the total outstanding legacy debt to Rs. 77.2 billion as at April 30, 2026.

Amendments to the Sri Lanka Electricity Act, No. 36 of 2024 were certified in August 2025. Accordingly, six fully government-owned companies were established and incorporated to undertake activities related to the restructuring of the electricity sector, covering generation, transmission, and distribution. These entities are National System Operator (Private) Limited, Electricity Distribution Lanka (Private) Limited, Electricity Generation Lanka (Private) Limited, National Transmission Network Service (Private) Limited, Energy Ventures Lanka (Private) Limited, and CEB Employees' Funds (Private) Limited.

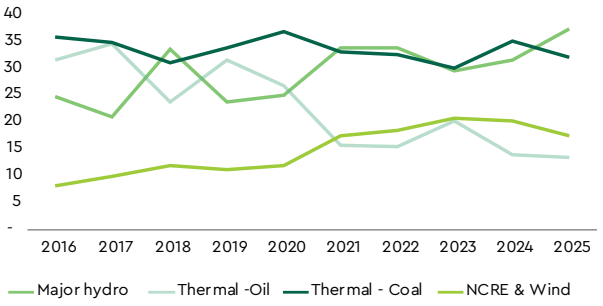

In parallel, the Power Sector Reform Secretariat (PSRS) prepared a Preliminary Transfer Plan (PTP) to facilitate the transition and transfer of functions associated with generation, transmission, distribution, and supply of electricity. This included a financial plan for the vesting of assets and liabilities to the successor companies for commencement of operations. Further, the National Electricity Advisory Committee formulated the National Energy Policy, including the National Tariff Policy, and it was approved by the Cabinet of Ministers in

March, 2026.

Meanwhile, in terms of the above Act, a Voluntary Retirement Scheme (VRS) was introduced and approved by the Cabinet of Ministers for employees of the CEB who do not opt to be assigned to the successor companies, in line with the restructuring requirements of the sector. Further, by virtue of the powers vested in the Minister of Energy under the Sri Lanka Electricity Act, No. 36 of 2024, and having been satisfied with the Preliminary Transfer Plan (PTP), the National Energy Policy including the National Tariff Policy along with the Annual Power Procurement Plan, the Long-Term Generation Expansion Plan, and the Long-Term Transmission Development Plan prepared by the CEB, an Extraordinary Gazette Notification No. 2478/41 dated March 05, 2026 was published. This Gazette declared March 09, 2026 as the "appointed date," marking the legal commencement of operations for the CEB's successor companies.

8.2.2 Ceylon Petroleum Corporation

In 2025, the Ceylon Petroleum Corporation (CPC) recorded an improved financial and operational performance compared to 2024 with the continued implementation of the cost-recovery pricing formula, which enabled CPC to better align domestic retail prices with global petroleum prices and exchange rate movements. The CPC experienced favorable movements in international oil prices during the year, with Average Brent crude oil prices declined from around USD 80.5 per barrel in 2024 to around USD 69.1 per barrel in 2025, thereby easing the CPC's import cost compared to year 2024. The combined effect of lower international oil prices and the continued implementation of the cost-recovery pricing formula helped preserve operating margins and improve profitability in 2025.

During 2025, United Petroleum of Australia exited the domestic fuel retail market, citing unfavorable operational conditions and the limited scale of the local market. Nevertheless, given its relatively limited market presence, the exit is unlikely to have materially affected CPC's sales performance compared to 2024, while competition remained from Lanka IOC, Sinopec, and RM Parks.

Reflecting the improved market environment and continued demand recovery, CPC's total sales volume increased by 6.3 percent to 4,144.8 million litres in 2025 from 3,898.3 million litres in 2024. This increase was mainly driven by higher demand for fuel used for transport and power generation sectors. Sales of Petrol 92 Octane increased by 3.4 percent from 1,056.8 million litres in 2024 to 1,092.6 million litres in 2025, while Auto Diesel sales rose marginally from 1,205.7 million litres to 1,209.5 million litres. In addition, Jet A-1 fuel sales increased by 9 percent to 644.8 million litres compared to 2024, reflecting improved aviation and tourism-related activity.

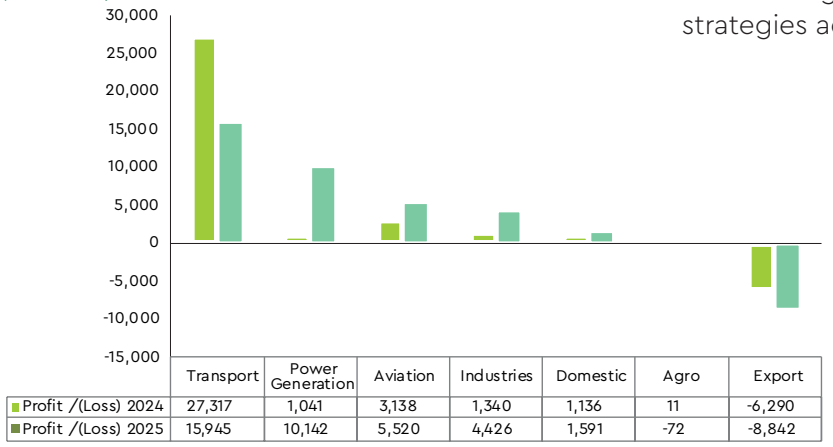

Despite an 8.7 percent decline in total revenue to Rs. 848.4 billion in 2025 from Rs. 929.6 billion in 2024, CPC recorded a profit before tax of Rs. 36.5 billion in 2025, reflecting an increase of 6.6 percent from Rs. 34.2 billion in 2024. This improvement was mainly attributable to the 9.6 percent reduction in cost of sales to Rs. 766 billion, together with decreases in sales and distribution, administrative, and finance costs by 11 percent, 29 percent, and 98 percent, respectively.

As evidence of its continued fiscal responsibility, CPC remitted Rs. 6 billion to the Consolidated Fund, reaffirming its role as a contributor to the national economy and a responsible public sector enterprise.

A sector-wise comparison with 2024 indicates some shifts in earnings composition. Although

the transport sector remained the largest contributor, profit from this segment declined to Rs. 15.9 billion in 2025 from Rs. 27.3 billion in 2024. However, this was more than offset by stronger performance in other sectors. Profit from the power generation sector increased sharply to Rs. 10.1 billion from Rs. 1 billion, while aviation sector profits increased to Rs. 5.5 billion from Rs. 3.1 billion. Similarly, the industrial sector contribution rose to Rs. 4.4 billion in 2025 from Rs. 1.3 billion in 2024.

Figure 8.2| Sector-wise Financial Performance
(Rs. Million)

	Transport	Power Generation	Aviation	Industries	Domestic	Agro	Export
Profit /(Loss) 2024	27,317	1,041	3,138	1,340	1,136	11	-6,290
Profit /(Loss) 2025	15,945	10,142	5,520	4,426	1,591	-72	-8,842

Source: Ceylon Petroleum Corporation

On the external front, CPC's total petroleum import bill declined by 9.3 percent to USD 1,937 million in 2025 from USD 2,134 million in 2024, despite an increase in import volumes. This decline was mainly attributable to lower international petroleum prices and reduction in the cost of imported refined petroleum products.

Overall, compared to 2024, CPC's improved performance in 2025 was driven by the continued implementation of the cost-recovery pricing formula together with the cost management strategies adopted by the corporation.

8.3 State Banks

The banking sector continued its recovery and strengthening momentum in 2025, operating within a gradually stabilizing macroeconomic environment. Most banks maintained sound stability, supported by strong capital adequacy ratios and improved liquidity ratios above the regulatory requirements. Sector profitability remained robust, although growth moderated compared to the exceptional performance recorded in 2024. This performance underscores the sector's resilience and its pivotal role in supporting national economy. Despite external challenges, including the impact of Cyclone Ditwah during the latter part of the year, banks effectively implemented proactive business continuity measures and prudent risk management practices to mitigate financial disruptions and sustain strong performance.

Credit risk indicators showed further improvement, with the decline in stage III loan ratio to 9.7 percent at the end of 2025 from 12.3 percent at the end of 2024. This improvement was mainly supported by expansion of credit, together with the strengthened recovery mechanisms.

In 2025, state-owned banks in Sri Lanka, particularly the Bank of Ceylon (BoC), People's Bank (PB), and the National Savings Bank (NSB), continued to play a significant role in the banking sector. These institutions remained aligned with the Government's economic priorities, while delivering a wide range of financial services to the customers. Their contribution was instrumental in supporting economic recovery, facilitating credit flows, and promoting financial inclusion across the country. Concurrently, these banks continued to focus on addressing legacy non-performing loans and accelerating digital transformation initiatives to enhance service delivery and operational efficiency.

During 2025, the performance of major state-owned banks reflected a combination of improved asset quality, stable funding bases, and prudent cost management, although variations were observed across institutions depending on their respective business models, sectorial exposures, and pace of recovery in key lending segments. Overall, the sector demonstrated a gradual normalization of earnings following the high growth recorded in the previous year, while maintaining adequate buffers to withstand potential risks.

In 2025, the total profit before tax of the state banks increased by 41 percent to Rs. 236.3 billion, compared to Rs. 178.2 billion in 2024. This growth was mainly driven by a strong recovery in credit growth, lower impairment charges, and increased digital adoption. The total assets of the state banks increased by 10 percent to Rs. 11,490 billion at the end of 2025, supported by a resumption of credit growth driven by an accommodative monetary policy and stabilizing domestic economic conditions.

In view of the challenges relating to minimum capital requirements and operational constraints faced by both the Housing Development Finance Corporation (HDFC) Bank and the State Mortgage and Investment Bank (SMIB), the Cabinet of Ministers granted approval for strategic restructuring measures. Accordingly, approval was granted for BoC to acquire the Government's shareholding in HDFC Bank and for PB to acquire the entire shareholding of SMIB, thereby enabling HDFC Bank and SMIB to function as subsidiaries under the management and oversight of BoC and PB, respectively. These initiatives are currently in progress.

A key milestone achieved during 2025 was the progress in the appointment of independent directors to the Boards of state-owned banks. As part of the ongoing governance reforms, a structured and transparent selection process was implemented, ensuring that board appointments were based on merit, professional competence, and independence.

8.3.1 Bank of Ceylon

The BoC has made history by becoming the first and only Sri Lankan bank ranked among the World's Top 1,000 Banking Brands in 2026 by Brand Finance. In 2025, BoC continued to maintain its position as the bank with the largest asset base as well as the largest deposit base in the banking sector. As at end of 2025, the total assets of the bank increased by 10 percent to Rs. 5,468 billion, which is below the industry average growth rate of 12.5 percent. Meanwhile, the deposit base of the bank increased by 4.3 percent Rs. 4,389 billion at the end of 2025, compared to the industry average growth rate of 10.9 percent.

Net interest income of the Bank increased by 23.5 percent to Rs. 206.9 billion, driven by effective asset-liability management, improved interest margins, and optimized funding strategies. Accordingly, BoC's profit before tax increased by 13 percent to Rs. 120.8 billion in 2025, compared to Rs. 106.9 billion in 2024.

The total loans and advances to customers increased by 8.9 percent to Rs. 2,372 billion at the end of 2025 from Rs. 2,178 billion at the end of 2024, despite the industry average increase was 21.4 percent.

The Stage III loan ratio improved to 5.59 percent as at the end of 2025 from 7.17 percent as at the end of 2024, highlighting the expansion of credit together with the Bank's disciplined credit monitoring, and strengthened collection efforts, while the industry average was 9.7 percent.

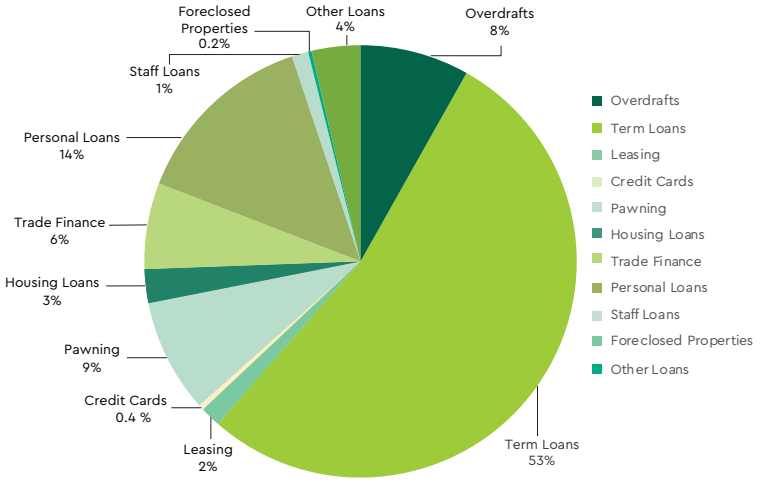

BoC network consists of 584 branches and 1,506 Automated Teller Machines (ATMs), Cash Recycling Machines (CRMs) and Cash Deposit Machines (CDMs) across the island, supporting financial inclusion in the country. Meanwhile, BoC has been focusing more on expanding the digital and virtual service platforms to cater the emerging needs of the customers.

Fitch Ratings has declared the National Long-Term Rating at 'AA-(lka)' and the Long Term Foreign and Local Currency Issuer Default Ratings at 'CCC+' for BoC. The Bank was recognized as Sri Lanka's No. 1 Brand and Most Valuable Brand by Brand Finance Lanka.

The Bank further strengthened its sustainable finance agenda through the issuance of a Rs. 20 billion Basel III–compliant Tier II Sustainability Bond. The proceeds from this issuance are being utilized to support green finance initiatives, promote small and medium enterprise development, and advance inclusive community investments.

Digital transformation remained a key strategic priority during the period under review. In this context, the Bank established BoC IT Solutions (Pvt) Ltd as a subsidiary to enhance operational resilience and strengthen its competitive position. These efforts contribute to improved operational efficiency and enhanced customer experience across all banking channels.

8.3.2 People's Bank

Being the second-largest licensed commercial bank in Sri Lanka in terms of both assets and deposits, PB recorded strong performance during 2025. The Bank's asset base grew by 12.5 percent to Rs. 3,708 billion as at end 2025, in line with the industry growth rate of 12.5 percent. As at the end 2025, the deposit base increased by 13.1 percent to Rs. 3,230 billion, exceeding the industry average growth rate of 10.9 percent, while lending to customers expanded by 13.7 percent to Rs. 1,730.7 billion, compared to the industry average growth of 21.4 percent.

Net interest income increased by 32.8 percent to Rs. 142.4 billion in 2025, primarily driven by an 11.5 percent reduction in interest expenses, despite a 2.1 percent increase in interest income. Accordingly, the Bank reported a profit before tax of Rs. 64.4 billion in 2025. This performance was supported by strong income growth, enhanced digital banking capabilities, and robust asset quality. The Bank demonstrated sustained resilience, despite prevailing environmental and external challenges during the year.

The Bank's Stage III loan ratio stood at 7.7 percent as at end 2025, compared to the industry average of 9.7 percent, reflecting improved asset quality. The Tier 1 Capital Adequacy Ratio was recorded at 12.2 percent, remaining comfortably above the regulatory minimum requirement of 9.5 percent. The Bank's distribution network comprised 746 branches (including service centers) and 844 ATMs island wide at the end of 2025.

8.3.3 National Savings Bank

The NSB operates with a strong branch network of 263 branches and 4,002 post offices/sub post offices across the island. At the end of 2025, the NSB's asset base reached to Rs. 1,831 billion, 4.5 percent increase compared to the previous year. Moreover, the deposit base and the lending portfolio reported as Rs. 1,608.5 billion and Rs. 550.8 billion, respectively at the end of 2025, recording an increase of 3.4 percent and 3.5 percent, respectively, compared to 2024.

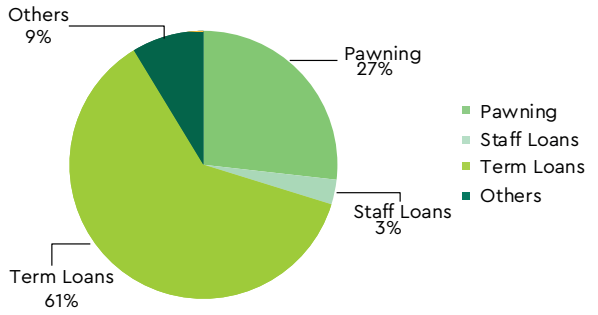

In 2025, NSB recorded a profit before tax of Rs. 44.5 billion, an increase of 69 percent compared to Rs. 26.3 billion in 2024. This growth was supported by sustained momentum in net interest income, disciplined cost management, and a significant reduction of 86 percent in impairment charges.

Term loans contributed to 61 percent of the NSB's loan portfolio, whilst pawning loans are the second largest contributor at the end of 2025.

During the year, the core banking system was successfully implemented with the objective of digitalizing banking operations through advanced technology and enhancing the convenience, efficiency, and accessibility of customer services.

In addition, the Bank undertook all necessary procedural steps to facilitate the merger of its fully owned subsidiary, Sri Lanka Savings Bank, with the objective of strengthening the stability of the financial system and improving operational efficiency. The merger process is currently at its final stage.

8.3.4 Housing Development and Finance Corporation Bank

The HDFC Bank, primarily engaged in providing credit facilities for housing purposes, is the only state-owned bank listed on the Colombo Stock Exchange. HDFC Bank operates with a branch network of 39 branches.

HDFC Bank's profit before tax recorded a significant decline of 85 percent to Rs. 10 million in 2025. This substantial decrease in net profit primarily stemmed from the decline of other income by 10.7 percent to Rs. 301 million in 2025, compared to Rs. 337 million in 2024. This resulted in a return on equity of negative 1.22 percent in 2025, compared to negative 2.43 percent in 2024. Though the net assets per share of the bank decreased to Rs. 116.71, the share price at the end of December 2025 stood at Rs. 57.90.

The lending portfolio of the HDFC Bank dropped by 14 percent to Rs. 34.5 billion at the end of 2025, compared to the 21.4 percent growth in the industry. However, the stage III loan ratio of the Bank increased from 45.92 percent at the end of 2024 to 47.04 percent at the end of 2025. The deposit base of the bank also decreased by 2.8 percent to Rs. 50.6 billion at the end of 2025, compared to Rs. 52 billion at the end of 2024, whilst the average growth in the banking sector stood at 10.9 percent.

8.3.5 State Mortgage and Investment Bank

The SMIB, a licensed specialized bank, engages in providing mortgage loans for housing and housing-related purposes since 1931. SMIB operates with a branch network of 25 branches.

In 2025, SMIB recorded one of its strongest financial and operational performances, supported by favorable macroeconomic conditions and the successful execution of structural reforms. The bank's deposit base increased marginally to Rs. 48.9 billion at the end of 2025, from Rs. 48.2 billion at the end of 2024.

SMIB recorded a profit before tax of Rs. 737 million in 2025, a significant increase of 367 percent compared to Rs. 158 million in 2024.This was mainly due to the increase in net interest income by 47 percent to Rs. 3,233 million in 2025 from Rs. 2,198 million in 2024 supported by competitive loan pricing and optimized funding costs.

The total assets of the bank increased by 3 percent to Rs. 57 billion at the end of 2025. The Bank's loan portfolio stood at Rs. 44.8 billion at the end of 2025, recording a moderate growth of 7 percent compared to Rs. 41.7 billion at the end of 2024, which is below the industry growth of 21.4 percent.

The Bank strengthened its focus on sustainable growth, digital innovation, customer centricity and operational efficiency. Market diversification, strategic partnerships, and responsible finance will remain key pillars supporting future growth.

8.3.6 Pradeshiya Sanwardana Bank

Pradeshiya Sanwardana Bank (PSB) operates with the objective of enhancing the living standards of the rural population by offering accessible and affordable credit facilities through its extensive branch network of 272.

The PSB's profit before tax increased significantly by 82 percent to Rs. 5,830 million in 2025, compared to Rs. 3,210 million in 2024. This growth was primarily driven by the increase in interest income together with the decline in the Bank's interest expenses.

Loans and advances of the bank recorded a significant increase to Rs. 283.6 billion at the end of 2025, compared to Rs. 227.2 billion at the end of 2024. Deposits of the PSB increased by 11.8 percent to Rs. 283.7 billion at the end of 2025, compared to Rs. 253.7 billion at the end of 2024.

While the industry average stage III loan ratio decreased to 9.7 percent at the end of 2025, the Bank's stage III loan ratio improved significantly from 6.25 percent in 2024 to 4.06 percent in 2025.

Building on this momentum, PSB remains committed to its founding mandate of empowering those who are at the bottom of entrepreneur ladder, supporting SMEs, and strengthening livelihoods in agriculture, fisheries, and micro enterprises. The Bank has formulated its Strategic Plan (2025–2029) with the objective of expanding its lending portfolio by Rs. 40 – 60 billion within five years, in line with the Government's rural economic development agenda.

8.3.7 Employees' Trust Fund Board

The Employees' Trust Fund Board (ETFB) is the second largest superannuation fund in Sri Lanka. All private sector employees and semi-government sector employees are members of this fund, while their employers are required to remit 3 percent of the total monthly earnings of their employees to the fund. In addition, migrant workers and self-employed individuals may join the fund on voluntarily basis by making a specified minimum contribution. The number of migrant workers registered with the ETFB increased marginally by 36 in 2025, bringing the cumulative number to 327. In contrast, total departures for foreign employment during the year 2025 stood at 311,223, as reported by the Sri Lanka Bureau of Foreign Employment. This disparity indicates a notably low level of participation to the Fund among migrant workers, which underscores the necessity of strengthening awareness and outreach initiatives targeting migrant workers and self-employed individuals to promote voluntary enrolment.

Beyond its primary role of fund management, ETFB provides a range of social and welfare benefits to its members covering health care support, housing assistance and financial aid for the education of members' children during their period of employment.

The fund continued its steady growth, with total assets increasing to Rs. 673 billion at the end of 2025, compared to Rs. 591 billion at the end of 2024. The ETFB maintained a strong focus on ensuring both safety of the fund and a reasonable rate of return for its members. During the year, the Board recorded an increase in total revenue by 8 percent to Rs. 71.3 billion, largely driven by interest income and declared a return of 9.5 percent to its members. Accordingly, Rs. 17.5 billion was distributed as interest on member fund balances, while Rs. 37.8 billion was paid as dividends, reflecting an overall increase of 8 percent compared to 2024.

The total net worth of the Fund reached Rs. 667 billion by the end of 2025, recording a growth of 14 percent from Rs. 586 billion at the end of 2024. By this time, the number of contributing member accounts had reached 2.5 million. Employers' contributions increased by 14 percent to Rs. 48.1 billion in 2025, compared to Rs. 42 billion in 2024. Meanwhile, total refunds paid to members amounted to Rs. 30.3 billion, indicating a decrease of 9 percent from Rs. 33.4 billion in 2024.

The fund's investment portfolio grew to Rs. 663 billion at the end of 2025, reflecting a 14 percent increase compared to Rs. 581 billion at the end of 2024. ETFB adopted a prudent investment strategy by prioritizing long-term investments in

government securities to mitigate reinvestment risk in a declining interest rate environment. Investments in Treasury Bonds increased by 15 percent to Rs. 628 billion at the end of 2025, up from Rs. 547 billion at the end of 2024, which accounted for 95 percent of the total investment portfolio.

8.4 Water

8.4.1 National Water Supply and Drainage Board

The National Water Supply and Drainage Board (NWS&DB) continues to uphold its commitment to achieving Sustainable Development Goal 6, ensuring the availability and sustainable management of water and sanitation for all, in alignment with national policy priorities. Accordingly, NWS&DB improved its service coverage through piped water to 51.2 percent of the population in 2025, compared to 49.2 percent in 2024. Meantime, the total piped water coverage, including the piped water supply by the community-based organizations and the local authorities, at the end of 2025 stood at 62.5 percent. However, safe drinking water coverage declined to 93.9 percent in the year under review, compared to 98.8 percent in 2024, mainly due to the revision of data on dug wells, hand pumps and other point sources published by the Department of Census and Statistics in 2025. The total number of water supply connections provided by the Board increased to 3.2 million at the end of 2025, compared to 3.1 million at the end of 2024, along with the completion of 03 water projects. Meanwhile, piped sewerage coverage showed a slight improvement from 2.08 percent to 2.11 percent at the end of 2025 and the Non-Revenue Water (NRW) percentage declined to 24.35 percent, compared to 24.8 percent at the end of 2024.

Following the water tariff revisions implemented during 2022–2024, NWS&DB continued to record an improvement in financial performance, in terms of total revenue and net profit for the third consecutive year. However, water sales income decreased marginally to Rs. 77.4 billion in 2025, despite a 3 percent growth in water sales to 647 million cubic meters. This reduction in water sales income is primarily attributed to the average reduction in water tariffs with effect from August, 2024.

In line with the increase in water sales quantity, water production also increased by 2.8 percent to 855 million cubic meters. However, the cost of production declined significantly by 12.6 percent to Rs. 32.5 billion in 2025, primarily due to a substantial reduction in pumping costs by 37.2 percent to Rs. 7.2 billion associated with the reduction in electricity tariffs during the period. As a result, NWS&DB recorded a gross profit of Rs. 52 billion, and a net profit before tax of Rs. 31.6 billion in 2025, compared to Rs. 46.8 billion and Rs. 23.8 billion, respectively in 2024.

During the period under review, the General Treasury contributed equity amounting to Rs. 45.6 billion for the repayment of loans obtained from local and foreign and to settle outstanding liabilities of major ongoing projects, including the Thambuttegama Water Supply Project; the Gampaha, Attanagalla and Minuwangoda Integrated Water Supply Project; the Aluthgama, Mathugama and Agalawatta Water Supply Project; and the Polgahawela, Alawwa and Pothuhara Water Supply Project.

8.5 Ports

8.5.1 Sri Lanka Ports Authority

Sri Lanka Ports Authority (SLPA) continued to play a pivotal role in advancing Sri Lanka's maritime and trade connectivity in 2025, operating as a key driver of economic recovery and external sector resilience. Amid evolving global shipping dynamics, SLPA maintained operational continuity, strengthened port efficiency, and supported national logistics competitiveness. Through prudent management and ongoing modernization initiatives, the Authority reinforced its strategic position as a regional maritime hub while contributing to government revenue and broader macroeconomic stability.

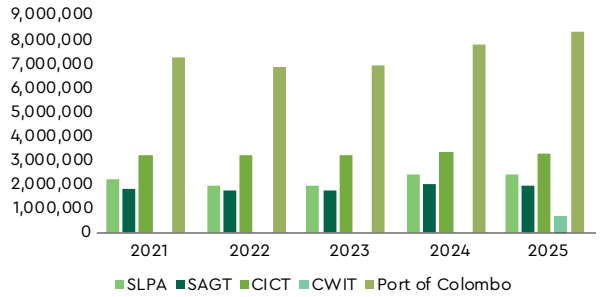

Economic growth across Asia, particularly in India presents significant opportunities for the future. As the premier hub port in South Asia, the Port of Colombo (PoC), Sri Lanka's main port, is strategically positioned to capitalize on this growth by complementing the expansion of the subcontinent's port sector. Alongside the development of the PoC, SLPA is actively advancing and positioning with other regional ports to meet the future demands.

The SLPA reported a 4.2 percent increase in ship arrivals in 2025, reaching 5,127 vessels compared to 4,920 ship arrivals in 2024. However, its performance declined in container and cargo handling, with container volumes falling by 1.2 percent to 2.38 million TEUs in 2025 from 2.41 million TEUs in 2024, and cargo volume dropping by 7.4 percent to 43.1 million metric tons in 2025, compared to 46.5 million metric tons in 2024.

The SLPA's financial performance in 2025 showed strong growth and improved profitability compared to 2024. Total revenue increased by 12.5 percent to Rs. 110.3 billion in 2025 from Rs. 98 billion in 2024, driving an 18 percent increase in gross profit.

Although total expenditure increased by 6.7 percent to Rs. 55.4 billion, mainly due to the sharp rise in provision for claims, profitability still improved significantly in 2025. Profit before tax increased by 24 percent to Rs. 57.3 billion in 2025 from Rs. 46.3 billion in 2024.

8.6 Insurance

The insurance sector remains a key component of Sri Lanka's financial system, particularly in an environment marked by past economic uncertainty and the increasing frequency of natural disasters. The industry comprises fifteen (15) licensed insurers in the long-term insurance sector and fourteen (14) licensed insurers in the general insurance sector. Government participation is evident through Sri Lanka Insurance Corporation General Ltd (SLICGL), Sri Lanka Insurance Corporation Life Ltd (SLICLL), and the National Insurance Trust Fund (NITF). In addition, other state-owned enterprises, namely, the Agricultural and Agrarian Insurance Board (AAIB) and the Sri Lanka Export Credit Insurance Corporation (SLECIC) provide specialized insurance services, including crop insurance and export credit insurance.

As at end 2025, total assets base of the insurance sector increased by 17 percent to Rs. 1,432.2 billion, compared to Rs. 1,223 billion at the end of 2024. Gross written premium increased by 19 percent in 2025, when compared to year 2024. This growth appeared in both life and general insurance subsectors. However, profit before tax of the general and long-term insurance subsectors decreased by 9.9 percent and 0.6 percent, respectively in 2025, compared to the previous year.

In 2025, general insurance sector experienced substantial claims due to the impact of Cyclone Ditwah, which is around Rs. 58.5 billion, as reported by the Insurance Regulatory Commission of Sri Lanka.

8.6.1 Sri Lanka Insurance Corporation Limited

The segregation of life and general insurance operations of the Sri Lanka Insurance Corporation (SLIC) by end January 2024 into its wholly owned subsidiaries, Sri Lanka Insurance Corporation Life Limited (SLICLL) and Sri Lanka Insurance Corporation General Limited (SLICGL), resulted in a transition of SLIC's role from a direct insurer to a holding company.

As at end 2025, SLICLL and SLICGL reported total assets of Rs. 273.9 billion and Rs. 64.0 billion, respectively. SLICLL continued to maintain the largest life fund in the insurance industry amounting to Rs. 247 billion at the end of 2025.

During 2025, SLICLL recorded revenue of Rs. 60.8 billion, compared to Rs. 49.7 billion in 2024. Gross Written Premium (GWP) also increased significantly to Rs. 32.6 billion from Rs. 24.5 billion in the previous year, reflecting strong growth in the life insurance segment.

SLICGL reported revenue of Rs. 24.3 billion in 2025, up from Rs. 20.2 billion in 2024. The GWP of the general insurance business increased to Rs. 30.3 billion from Rs. 23.6 billion in the previous year, indicating steady expansion in the non-life insurance segment.

In terms of profitability, SLICLL's profit after tax decreased by 11.5 percent to Rs. 2.3 billion in 2025, compared to Rs. 2.6 billion in 2024, primarily due to higher insurance claims and benefits. Meanwhile, SLICGL reported a profit after tax of Rs. 2.5 billion, compared to Rs. 2.7 billion in 2024.

At the holding company level, SLIC reported a profit before tax of Rs. 6 billion in 2025, compared to Rs. 3.1 billion in 2024, reflecting an overall improvement in financial performance. Dividend distributions of the company recorded as Rs. 1.5 billion in 2025, compared to Rs. 1.3 billion in the previous year.

8.6.2 National Insurance Trust Fund

National Insurance Trust Fund (NITF) engages in the insurance business by offering several products including, the Agrahara Insurance Scheme, Agricultural Loan Protection Insurance Scheme, Crop Insurance Scheme and General Insurance – (Motor and Non – Motor sector policies). Further, NITF acts as a re-insurer of 30 percent of the reinsurance liability of any general insurance company in the insurance industry and it maintains the Strike, Riot, Civil Commotion and Terrorism (SRCC&T) Fund.

NITF's revenue increased by around 24 percent to Rs. 42 billion in 2025, compared to Rs. 33.9 billion in 2024, mainly due to the increase in GWP by Rs. 3.5 billion to Rs. 26.6 billion in 2025. Despite the increase in GWP, NITF's profit before tax decreased by 43 percent to Rs. 9.4 billion in 2025, compared to Rs. 16.4 billion in 2024, mainly due to the increase in net benefits and claims by Rs. 13.2 billion.

8.7 Commuter Transportation

8.7.1 Sri Lanka Transport Board

The Sri Lanka Transport Board (SLTB), as the largest public passenger transport services provider in the country, continues to play a vital role in ensuring safe, affordable, and accessible mobility across the island. SLTB fulfills 40 to 50 percent of the daily passenger transport service demand of the country. In 2025, SLTB deployed nearly 4,424 buses daily, operating through an extensive network comprising over 100 depots, 09 sub-depots, 12 regional offices, 12 provincial workshops, and 21 driving training schools. With a workforce exceeding 24,000 employees, SLTB continues to uphold a strong operational capacity, particularly in rural and underserved areas where private sector participation is limited. This extensive reach highlights SLTB's strategic importance not only as a transport provider, but also as a key facilitator of economic and social connectivity.

SLTB is responsible for meeting around 40 percent of the total timetable requirement allocated by the National Transport Commission (NTC). However, existing fleet capacity remains a constraint in fully meeting the service demand, indicating a persistent gap between required service levels and available resources. In line with ongoing modernization efforts, SLTB continued to expand and upgrade its fleet during the year, including the introduction of new buses under government-supported initiatives and arrangements through newly established subsidiary, Metro Transit Lanka (Private) Limited (LMTL). The LMTL aims to streamline and modernize public mobility across key city corridors through an integrated transport solution. These interventions reflect a gradual shift from reactive fleet replacement toward a more structured modernization strategy, although the pace of renewal may still be insufficient to offset long-term asset deterioration.

In fulfilling its public service mandate, SLTB continued to operate essential transport services, namely Nisi Seriya and Sisu Seriya with the support of the government through subsidy programs. During 2025, SLTB deployed 471 buses for Nisi Seriya and 819 buses for Sisu Seriya program. These initiatives ensure night-time transport services and facilitate affordable and safe travel for school children.

The average number of buses operated per day by SLTB in 2025 decreased to 4,424 buses, compared to 4,556 buses in 2024. However, SLTB's operational performance recorded only a marginal decline in 2025, with total operated kilometers decreased to 362 million kilometers, compared to 372 million kilometers in 2024.

In terms of financial performance, SLTB's total revenue declined marginally to Rs. 73,783 million in 2025, compared to Rs. 75,710 million in 2024, mainly due to the cumulative impact of continuous bus fare reductions implemented during 2024 followed by the slight reduction in 2025.

Total expenses of SLTB also decreased to Rs. 70,521 million, compared to Rs. 75,614 million in 2024 primarily driven by an average fuel price reduction of around 10 percent. Despite the marginal decline in the revenue, due to decrease in total expenses and the increase in financial assistance from government, SLTB's net profit increased significantly in 2025 to Rs. 4,312 million, compared to Rs. 547 million in 2024, representing an increase of more than sevenfold. In 2025, SLTB paid Rs. 65 million as levy to the consolidated fund, compared to Rs. 330 million in 2024.

In line with SLTB's public service obligations, Government support continued in the form of subsidies to maintain concessionary travel and operate uneconomical routes. Accordingly, the General Treasury released Rs. 13,150 million and Rs. 2,000 million for season ticket subsidies and uneconomic routes, respectively, compared to Rs. 10,500 million and Rs. 2,000 million in 2024.

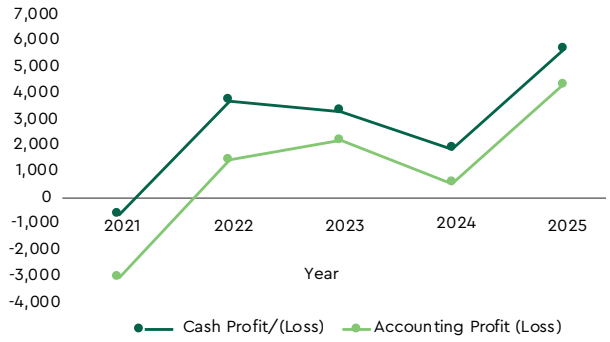

Despite ongoing improvements, SLTB continues to face structural challenges, particularly due to its aging fleet, with around 46 percent of buses exceeding 15 years of service by end 2025. This has led to higher maintenance requirements, increased downtime, and reduced service reliability. To address these issues, SLTB implemented several modernization initiatives during 2025, including the refurbishment of 120 buses with new engine installations at a total cost of Rs. 724 million. However, these measures have only partially mitigated the challenges, highlighting the need for a more accelerated

and sustained fleet renewal strategy to achieve further improvements in operational performance of the SLTB.

In addition, SLTB has continued its efforts toward digital transformation, including the gradual introduction of electronic ticketing systems, payment by all units of the SLTB under the Employees' Provident Fund online system and conduct all accounting activities at service locations through the online accounting system aimed at enhancing operational transparency and revenue management.

8.8 Aviation

8.8.1 Airport and Aviation Services (Sri Lanka) (Private) Limited

Airport and Aviation Services (Sri Lanka) (Private) Limited (AASL) plays a pivotal role in Sri Lanka's economy, particularly in infrastructure development, the tourism industry, and foreign exchange earnings. As a fully government-owned entity, AASL develops, operates and maintains the country's international airports, namely Bandaranaike International Airport (BIA), Mattala Rajapaksa International Airport (MRIA), Colombo International Airport Ratmalana, Batticaloa Airport, and Jaffna International Airport. The company is also responsible for air traffic control, aviation security, and related

services across Sri Lanka. AASL's performance in 2025 highlights its resilience and strategic foresight, contributing significantly to Sri Lanka's economic recovery and positioning the nation as a competitive hub in regional aviation. Passenger movements show a positive trend for Sri Lanka, even though it has not yet returned to pre-COVID numbers.

The number of passengers handled by AASL increased by 14.6 percent from 8.9 million in 2024 to 10.2 million in 2025. In line with this growth, aircraft movements also rose from 84,789 in 2024 to 95,629 in 2025, reflecting an increase of 12.8 percent. Cargo handling recorded a marginal decline by 1.2 percent from 193,873 MT in 2024 to 191,483 MT in 2025. In contrast, transit passenger numbers showed a significant increase of 106.4 percent, rising from 458,681 in 2024 to 946,811 in 2025.

AASL demonstrated improved financial performance during the year 2025. Revenue from core business recorded a 14 percent increase to Rs. 49.9 billion in 2025, compared to Rs. 43.8 billion in 2024. Aeronautical revenue increased by 6 percent to Rs. 8.2 billion in 2025, compared to Rs. 7.8 billion in 2024 and non-aeronautical revenue increased by 16 percent to Rs. 41.7 billion in 2025, compared to Rs. 36 billion in 2024.

Between 2024 and 2025, total expenditure decreased slightly from Rs. 24.3 billion to Rs. 23.4 billion, mainly due to reductions in depreciation and repairs & maintenance, although personal expenses and administrative costs continued to rise. Despite the marginal decline in overall costs, profitability improved, with EBIT increasing from Rs. 27.3 billion to Rs. 34.1 billion, reflecting stronger operational performance. Net profit before tax also increased from Rs. 28.7 billion to Rs. 33.6 billion, indicating better overall financial results.

[a] Provisional

8.8.2 SriLankan Airlines Ltd.

SriLankan Airlines Limited (SLA) recorded an improvement in passenger revenue and earnings from core business operations during 2025/26, supported by higher operational performance. Passenger revenue increased from Rs. 234.5 billion in 2024/25 to Rs. 265.9 billion in 2025/26, reflecting improved passenger demand and network performance. Cargo revenue remained relatively stable at Rs. 31.4 billion compared to Rs. 32.4 billion in the previous year. Accordingly, total net traffic revenue increased from Rs. 298.9 billion to Rs. 333.5 billion during the year.

Operational expenditure increased from Rs. 275.7 billion in 2024/25 to Rs. 307.1 billion in 2025/26, mainly due to higher fuel cost, airport, aeronaut and passenger expenses and maintenance costs. Aircraft fuel expenditure rose from Rs. 91.7 billion to Rs. 96.1 billion, while airport, aeronaut and passenger expenses and aircraft maintenance expenses increased significantly by 17 percent and 22 percent, respectively to Rs. 53.1 billion and Rs. 53.6 billion, respectively, reflecting increased operational activity and maintenance requirements. However, rentals on leased aircrafts declined from Rs. 3.6 billion to Rs. 1.9 billion, partially easing the cost burden. Earnings before interest and tax increased by 13.8 percent from Rs. 23.2 billion in 2024/25 to Rs. 26.4 billion during the year concerned.

Nevertheless, SLA continued to face significant financial pressures arising from debt servicing obligations and exchange rate fluctuations. In this context, the Government continued to support the airline through ongoing debt restructuring initiatives, including the restructuring of the USD 175 million international bond, which generated a positive one-off financial impact during the year. Further, the Government continued servicing loan obligations to Bank of Ceylon and People's Bank on behalf of SLA in order to support liquidity and uninterrupted operations. Accordingly, interest cost which was Rs. 36.2 billion in 2024/25 has reduced to Rs. 24.7 billion in 2025/26. However, adverse exchange differences mainly from transactions and liabilities amounting to Rs. 6.4 billion and Rs. 18.6 billion, respectively have significantly affected overall financial performance. With this effect, net loss before tax increased from Rs. 7.6 billion in 2024/25 to Rs. 23.2 billion in 2025/26.

The financial position of the Company reflects gradual improvement despite continuing balance sheet challenges. Total assets increased from Rs. 182 billion by end March 2025 to Rs. 204.6 billion by end March 2026. Total liabilities declined from Rs. 585.1 billion to Rs. 544.4 billion, reflecting progress in debt restructuring and liability management efforts. Negative equity also improved from Rs. 403.2 billion to Rs. 339.7 billion during the year.

Overall, SLA demonstrated improved operational performance and stronger earnings generation during 2025/26. However, the airline continues to face structural financial challenges due to high debt servicing costs and exposure to exchange rate volatility. Continued Government support and the successful implementation of debt restructuring initiatives remain critical for the long-term financial sustainability of the airline.

[a] Provisional

8.9 Construction

The construction industry in Sri Lanka recorded a growth of 9.2 percent in 2025, while continuing its recovery from the downturn experienced earlier. This rebound was supported by the steady resumption of key public and private sector projects amid improving macroeconomic conditions. The growth was further supported by base effects, rising gross fixed capital formation, and continued investments in infrastructure, energy and utilities.

As one of the most vital sectors contributing to national development, the industry plays a central role in infrastructure development, employment generation and overall economic growth. In 2025, the construction sector contributed 5.7 percent to GDP.

Total turnover of the three main SOEs in the construction industry namely, State Engineering Corporation (SEC), Central Engineering Consultancy Bureau (CECB) and State Development and Construction Corporation (SD&CC) undertake most of the Government contracts in the construction industry, recorded almost a 12 percent increase in revenue to Rs. 13,417 million in 2025, compared to Rs. 11,988 million in 2024.

8.9.1 State Engineering Corporation

In 2025, the SEC completed government projects totaling Rs. 1,743 million, including Building for Department of Examinations at Pellawatta, new Prison Complex at Pallekele and New Secretariat Building at Kegalle. However, in 2025, SEC's revenue declined by 25 percent to Rs. 1,270 million from Rs. 1,698 million in 2024. At the same time, total expenditure

also decreased by 25 percent, primarily due to reduced operating expenditure benefitting from the Voluntary Retirement Scheme (VRS) implemented in 2023. As a result, SEC reduced its loss by 24 percent, from Rs. 773 million in 2024 to Rs. 589 million in 2025.

SEC was able to recover Rs. 261 million of outstanding dues from debtors within two years resulting a reduction of total receivables from Rs. 6,817 million in 2023 to Rs. 6,556 million in 2025. Despite this, a significant portion approximately 96 percent of the trade receivables remained overdue for more than three years. The total impaired balance as at end December 2025 amounted to Rs. 1,169 million.

The liquidity crunch also led to a rise in payables excluding bank debt to Rs. 12,531 million at the end of 2025, up from Rs. 11,795 million at the end of 2024. Due to limited cash flow, total bank debt also increased to Rs. 4,986 million at the end of 2025 from Rs. 4,807 million at the end of 2024.

In the meantime, under the restructuring process of SEC, the Cabinet of Ministers approved to transfer a land in Peliyagoda to the Urban Development Authority for the settlement of liabilities of the SEC.

8.9.2 Central Engineering Consultancy Bureau

The CECB, which primarily provides engineering consultancy and project management services, demonstrated stronger performance alongside its fully-owned construction subsidiary, Central Engineering Services (Pvt) Limited in 2025. As construction activities expanded across the country, demand for consultancy services, feasibility studies, and project supervision correspondingly increased. As a leading player in Sri Lanka's engineering consultancy sector, the CECB continued their operations strategically in sustainable energy ventures, including solar power augmentation and hydropower projects, while expanding its overseas operations, particularly in East Africa.

In 2025, CECB completed several high-profile projects, including the provision of consultancy services for AKON Airport in South Sudan, the relocation of the bus depot building in Kegalle and the construction of a multi-purpose building for the Department of Examinations. During the year, CECB completed projects valued at Rs. 704 million, of which Rs. 578 million was derived from government contracts. Additionally, CECB maintained a strong work-in-hand project portfolio of Rs. 2,731 million, comprising major initiatives such as the West Container Terminal – II, Colombo Port Expansion Project (CPEP), Uma Oya Multi-Purpose Project and Kalu Palama Project at Peradeniya.

Financially, CECB achieved 16 percent increase in revenue to Rs. 11,129 million in 2025 from Rs. 9,560 million in 2024, while expenditure rose by 20 percent to Rs. 10,734 million from

Rs. 8,953 million in 2024. This resulted in a significant decrease in net profit before tax to Rs. 395 million in 2025, compared to Rs. 607 million in 2024, reflecting margin pressures from higher operating costs. Despite these challenges, the Bureau strengthened its financial management over the past five years, reducing year-end receivables by 13 percent from Rs. 9,683 million by end 2021 to Rs. 8,408 million by end 2025. However, payables increased from Rs. 9,893 million at the end of 2024 to Rs. 10,844 million at the end of 2025, mainly due to mobilization advances and retention payables.

Furthermore, the Bureau successfully managed its financial position without resorting to bank borrowings during the year as well.

8.9.3 State Development & Construction Corporation

In 2025, SD&CC completed government projects valued at Rs. 305 million, while maintaining an active project portfolio amounting to Rs. 461 million. The Corporation's total revenue increased by 39 percent to Rs. 1,018 million in 2025 from Rs. 730 million in 2024. Despite a reduction in expenditure by 19 percent to Rs. 1,583 million in 2025, these measures were insufficient to fully offset the operational challenges, resulting in a net loss of Rs. 565 million, although this reflects an improvement from the net loss of Rs. 1,217 million in 2024.

SD&CC made progress in financial management by reducing its receivables by 37 percent to Rs. 675 million at the end of 2025, supported by enhanced collection efforts. However, the Corporation continued to face significant liquidity pressures, with bank borrowings increased by 7 percent to Rs. 2,883 million from Rs. 2,686 million at the end of 2024, largely due to outstanding debt obligations. This highlights the continued financial constraints affecting the SD&CC's operations.

8.10 Lotteries

The lottery industry in Sri Lanka is a well-regulated segment and constitutes a significant component of the country's broader gaming sector. The industry operates as a duopoly market structure with two State Owned Enterprises, namely National Lotteries Board (NLB) and the Development Lotteries Board (DLB). These institutions are responsible for the design, distribution and management of a diverse range of lottery products targeted at the general public.

In terms of market structure, the NLB held a market share of 53 percent, while DLB accounted for the remaining 47 percent in 2025. The NLB's product portfolio comprised 11 lottery brands, including 9 passive and 2 instant lotteries. Similarly, the DLB offered 9 passive lottery brands.

A distinctive feature of the lottery industry in Sri Lanka is its contribution to national development. Proceeds from lottery operations are channeled towards a range of public welfare initiatives including education, healthcare and infrastructure development. The NLB contributes directly to the consolidated fund, while the DLB is a major contributor to the President's Fund, with a portion of such funds further allocated to the Mahapola Higher Education Trust Fund. During 2025, the NLB and DLB were able to channel Rs. 5,699 million to the Consolidated Fund and Rs. 7,361 million to the President's Fund, respectively. In 2025, the total lottery sales income amounted to Rs. 91,107 million, reflecting a growth of 33 percent compared to the previous year. Meanwhile, approximately an aggregate of Rs. 46,735 million prizes declared by both institutions, representing a 32 percent year- on –year growth.

Despite ongoing efforts towards digitization, the customer base of the lottery industry remains concentrated among the older generation, who demonstrates a strong preference for traditional paper– based lottery tickets. In contrast, participation among the younger demographics remains relatively low, indicating limited engagement with lottery products. Accordingly, beyond the expansion of digital sales platforms, a comprehensive, digitally enabled strategy, including product innovation, enhanced user experience and target marketing will be critical to attracting younger demographics and broadening the industry's customer base.

8.10.1 National Lotteries Board

NLB recorded its highest-ever sales income of Rs. 48,313 million in 2025, reflecting a 27 percent increase compared to Rs. 37,983 million in 2024. The total value of prizes declared also increased significantly to Rs. 24,879 million, representing a 26.8 percent growth over the previous year. During the year under review, NLB awarded its highest-ever super prize amounting to Rs. 470 million. NLB's contribution from lottery sales and levy to the Consolidated Fund recorded a notable increase of 25 percent, rising from Rs. 5,570 million in 2024 to Rs. 6,949 million in 2025.

Profit before tax increased significantly by 32 percent, from Rs. 6,203 million in 2024 to Rs. 8,177 million in 2025. This growth was primarily driven by the increase in sales income despite a rise in operating costs compared to the previous year. NLB continued to maintain its market leadership by sustaining an extensive network of dealers, agents and SMS dealers, enabling Board outreach across diverse geographical market segments across the island. In addition to traditional dealer channels, passive lotteries are also distributed through SMS dealers, further enhancing accessibility.

In line with its core business strategy, NLB continued to focus on diversifying its product portfolio and expanding its market share. As part of this strategy, the "Lucky 7" lottery was discontinued with effect from end January, 2025 and replaced it with "NLB Jaya" which generated sales income of Rs. 3,527 million. Furthermore, a new lottery product "Suba Dawasak" was introduced in July, 2025, and it generated sales income of Rs. 1,722 million during the year.

8.10.2 Development Lotteries Board

The DLB also recorded its highest-ever sales income of Rs. 42,794 million in 2025, representing a significant increase of 41 percent compared to Rs. 30,314 million in 2024. As a major contributor to the President's Fund, the Board increased its contribution significantly by 80 percent to Rs. 7,361 million in 2025, up from Rs. 4,086 million in 2024.

The Board sustained its strong financial performance, reporting a profit before tax of Rs. 7,487 million in 2025, a year-on-year growth of 78 percent and surpassing the record achieved in 2024. Prize distributions to winners amounted to Rs. 21,856 million in 2025, marking a 39 percent increase compared to the previous year.

During the financial year, the Board undertook a strategic restructuring of its product portfolio to enhance market reach. In May, 2025, the Board launched a new daily lottery brand, "Jaya Sampatha". Subsequently, the "Jayoda" lottery was discontinued with effect from October 29, 2025. To maintain draw frequency, the "Sasiri" lottery was rescheduled for every Monday and Wednesday with effect from November 3, 2025. These initiatives reflect the Board's ongoing efforts to realign and strengthen its lottery portfolio.

The DLB continues to develop strategies to engage diverse market segments through digital platforms, with a focus on expanding online lottery sales. These efforts are aligned with the Board's objective of reinforcing its role as a key funding source for the President's Fund and Mahapola Higher Education Trust Fund, thereby contributing to the socio-economic well-being of communities across the country.

8.11 Livestock and Dairy

Livestock plays a diverse role in Sri Lankan agriculture sector for nutritional security, sustainable consumption and strengthening rural livelihoods, while contributing for around 1.3 percent of the National GDP in 2025. Among the subsectors of livestock, the dairy sector has been identified as a national priority in socioeconomic development. In this context, being state-owned entities, the National Livestock Development Board (NLDB) and Milco (Pvt) Limited (Milco) play a vital role in manufacturing and marketing of dairy products.

As per the recorded data of the Department of Animal Production and Health, only around 51 percent of the total milk consumption is met by domestic production with an increasing trend of annual milk production in 2025. Sri Lanka produced 340.8 million liters of cow milk and 63.8 million liters of buffalo milk in 2025, while incurring higher import costs for milk and milk-based products during the year.

8.11.1 Milco (Pvt) Ltd.

Milco, being a fully government-owned company, recorded a significant turnaround in both strategic positioning and financial performance in 2025, marking a pivotal

milestone in its transformation from a loss-making entity to a profitable and growth-oriented entity. The company operates to improve the milk-based production while strengthening the livelihoods of the local dairy farmers. In 2025, Milco collected 12.6 percent of the total milk production of the country.

In the year under review, Milco's total revenue increased by 21 percent to Rs. 19,648 million, compared to Rs. 16,187 million in 2024, due to optimization of its product mix by increasing the production volume of its high-margin product portfolio, thereby improving profit margins and financial performance. As a result, net profit of the Milco increased to Rs. 1,438 million in 2025, compared to Rs. 64 million net loss reported in 2024. Moreover, there was a significant decline in bank debt by 69 percent to Rs. 492 million as at end 2025.

During the year 2025, Milco established 126 new milk outlets across the country with the objective to uplift the livelihoods of dairy farmers by enabling their products to reach the market without any hindrance.

8.11.2 National Livestock Development Board

The NLDB has become one of the leading suppliers of livestock and dairy products while managing with 32 livestock and coconut integrated farms aiming to enhance the socio-economic standards of the citizens by producing quality breeding materials, livestock and agricultural products, whilst imparting practical and theoretical knowledge of livestock to the farmers by the training center located at Digana.

The farms of NLDB are equipped with pure and hybrid breeders of cows, buffaloes, pigs, goats, sheep, rabbits, parent broilers, commercial broilers, ducks, turkeys, quails together with a network of 25 NLDB milk outlets and 27 farm based sales centers. In addition, NLDB has 3,908 hectares of coconut cultivation including 10 farms located in the coconut triangle with a production of 9.3 million coconut nuts in 2025, with part of the production converted to coconut oil for local consumers.

The overall contribution of NLDB to the national milk production is around 1.29 percent in 2025, with the total annual milk production of 404.6 million liters. NLDB recorded a profit of Rs. 286 million in 2025, compared to the profit before tax of Rs. 280 million in 2024, mainly due to the increase in revenue by 1.7 percent to Rs. 4,888 million in 2025.

8.12 Marketing and Distribution

8.12.1 Lanka Sathosa Ltd.

Lanka Sathosa Limited (LSL), as the largest state-owned retail network in Sri Lanka, continues to play a pivotal role in ensuring the availability of essential goods at affordable prices to the public. With an extensive network of 427 outlets and a workforce of over 3,272 employees, LSL remains deeply committed to its core mandate of safeguarding consumer welfare and contributing to national food security. Despite maintaining an approximate 5 percent market share in a highly competitive business environment, LSL's growth and market position are increasingly challenged by the rapid expansion and modernization of private sector supermarket chains.

In 2025, LSL reported sales revenue of Rs. 51,534 million, reflecting a slight decrease of 2.8 percent compared to Rs. 52,823 million in the previous year. At the same time, LSL's gross profit ratio recorded a marginal decrease to 12.34 percent in 2025, compared to 12.43 percent in 2024. However, due to the decrease in other expenditure by 20 percent to Rs. 7,445 million compared to Rs. 9,412 million in 2024, despite the decrease in other income by 3.9 percent, the LSL's operating loss decreased to Rs. 56 million in 2025, compared to the operating loss of Rs. 1,775 million in 2024.

The LSL manages to reduce its net financial expenses by 26 percent from Rs. 649 million in 2024 to Rs. 480 million in 2025. Accordingly, LSL reported a net loss of Rs. 536 million, a decrease of 78 percent compared to the net loss of Rs. 2,424 million recorded in 2024. The General Treasury settled the Treasury guarantees related to LSL's overdraft facilities, amounting to Rs. 4,977 million as at end December 2025, recognizing that amount as a government grant to LSL.

8.13 Plantation

Sri Lanka State Plantations Corporation (SLSPC) and Janatha Estates Development Board (JEDB) were established with the objective of strengthening the contribution of the state plantation sector towards the national economy. The majority of estates under their ownership have been leased out to 23 Regional Plantation Companies while allotting the Golden Share of each RPC to the government. The government has retained the ownership of Kurunegala Plantations Limited (KPL), Chilaw Plantations Limited (CPL), Elkaduwa Plantations Limited (EPL) and Kalubovitiyana Tea Factory Limited (KTFL) from the above RPCs, in order to ensure the sustainability of the state plantation sector contribution towards the national economy.

Total revenue of KPL increased by 29 percent to Rs. 1,868 million in 2025, compared to Rs. 1,448 million in 2024, mainly due to high net sales average prevailed during the year amidst the drop in coconut production as a result of the impact of the weather pattern of the area. Meantime, the company's cost of sales increased by 12.7 percent to Rs. 896 million in 2025. However, KPL recorded a net profit of Rs. 635 million in 2025, an increase of 53 percent compared to Rs. 415 million in 2024, mainly due to the improvement in gross profit ratio from 38 percent in 2024 to 47 percent in 2025 and increase in other operating income by 33 percent to Rs. 83.6 million in 2025, compared to Rs. 62.7 million in 2024.

Total revenue of CPL increased by 54 percent to Rs. 1,845 million in 2025, compared to Rs. 1,200 million in 2024 due to the increased net sales average in 2025 and increase in coconut production by 10 percent to 11 million nuts in 2025 from 10 million nuts in 2024. Accordingly, net profit before tax of the CPL increased by almost 197 percent to Rs. 650 million in 2025, compared to Rs. 219 million in 2024.

EPL's total revenue increased by 18 percent to Rs. 649 million in 2025 from Rs. 550 million in 2024, mainly driven by higher tea sales, which were supported by increased green leaf production and improved yield per hectare due to the proper application of chemical fertilizer. As a result, the company recorded a net profit of Rs. 271 million in 2025, compared to Rs. 12 million in 2024.

KTFL's total revenue increased by 18 percent to Rs. 2,052 million in 2025, compared to Rs. 1,737 million in 2024, primarily due to the increase in made tea production by 15 percent to 1,489 metric tons in 2025, compared to 1,294 metric tons in 2024. Accordingly, KTFL recorded a net profit of Rs. 87 million in 2025, compared to the net loss of Rs. 7 million in 2024.

SLSPC manages 4,200 hectares across 15 tea estates and 01 rubber estate while the JEDB manages 3,572 hectares across 15 tea estates and 02 rubber estates. As the main crop, tea production of JEDB increased by 15 percent to 1,256 metric tons in 2025 due to increase in tea yield per hectare to 466 kg, compared to 403 kg in 2024. In the meantime, tea production of SLSPC also increased by 8.1 percent to 1,116 metric tons due to increase in tea yield per hectare to 501 kg in 2025, compared to 439 kg in previous year.

Total revenue of JEDB decreased by 8 percent to Rs. 1,602 million in 2025, compared to Rs. 1,732 million in 2024 and the total revenue of SLSPC increased by 13 percent to Rs. 1,340 million in 2025, compared to Rs. 1,183 million in 2024. Accordingly, the JEDB and SLSPC recorded net losses of Rs. 222 million and Rs. 35 million, respectively.

As approved by the Cabinet of Ministers, the unutilized lands/properties of JEDB, SLSPC and Regional Plantation Companies have been identified to be leased out to potential investors on a long-term basis for optimal use to strengthen agricultural exports. Moreover, the government increased the daily minimum wage for estate workers from Rs. 1,350/- to Rs. 1,750/- as a crucial step towards improving the livelihoods of plantation workers and addressing the challenge of dwindling the estate workforce.

8.14. Health

8.14.1 State Pharmaceuticals Corporation

The State Pharmaceuticals Corporation (SPC) is engaged in the importation and trading of pharmaceuticals and health care items, as well as the supply of such products to the Department of Health Services (DHS). In addition, SPC undertakes limited manufacturing activities, producing selected pharmaceuticals and health care products such as Jeevanee, Glucose and Benzyl Bensovate Cream. SPC continues to ensure its geographical presence through open market operations supported by 61 Osusala outlets, 121 franchised Osusala outlets and 53 distributors.

In 2025, sales to DHS increased by 26 percent, rising from Rs. 51,018 million in 2024 to Rs. 64,197 million. Meanwhile, sales of SPC open market operations recorded a marginal decline from Rs. 11,069 million in 2024 to Rs. 11,043 million in 2025. Overall, SPC's total revenue increased by 21 percent to Rs. 75,240 million in 2025, compared to Rs. 62,087 million in 2024.

SPC's total cost of sales increased by 23 percent to Rs. 68,008 million in 2025, compared to Rs. 55,138 million in 2024. As a result, the gross profit margin declined to 9.6 percent in 2025, compared to 11.2 percent in 2024. Meanwhile, financing costs decreased by 28 percent to Rs. 1,263 million in 2025, compared to Rs. 1,758 million in 2024, reflecting the easing of domestic interest rates during the period. Benefiting from the favorable impact from the decreasing finance cost, SPC recorded a 52 percent increase in profit before tax to Rs. 3,772 million in 2025, compared to the profit before tax of Rs. 2,474 million in 2024.

In compliance with the Government's levy policy, SPC paid Rs. 487 million to the Consolidated Fund in 2025, representing 30 percent of the profit after tax of Rs. 1,623 million in 2024. This contribution reflects the SPC's commitment to supporting fiscal stability, while continuing to ensure uninterrupted supply of essential pharmaceuticals to the health system of the country.

The persistence of long outstanding receivable balances continued to exert significant fiscal pressure on SPC's operating cash flow and liquidity position. At the end of 2025, total receivables from the Medical Supplies Division (MSD) amounted to Rs. 39,233 million, of which Rs. 23,867 million were outstanding payments for medical supplies procured from the SPC during the period 2018–2023 by the MSD of the Ministry of Health and Mass Media. Accordingly, in January 2026, Cabinet of Ministers approved to settle the due amount of Rs. 23,867 million to the SPC for the period of 2018–2023 in installments by managing the relevant provisions allocated to the Ministry of Health and Mass Media for the year 2026.

By end April 2026, Ministry of Health and Mass Media was able to settle Rs. 23.8 billion to the SPC. Furthermore, actions are being taken to reconcile the remaining balance due from 2008 to 2012. The implementation of these measures is expected to enhance SPC's liquidity position and strengthen its short-term financial stability.

A key strategic development in 2025 was the continued strengthening of SPC's laboratory function, marked by the initiation of the ISO 17025 accreditation process. This milestone reflects SPC's commitment to aligning with internationally recognized standards in testing, ensuring accuracy, reliability and quality management. Through these efforts, SPC aims to enhance public confidence and institutional credibility, while further reinforcing the scientific and regulatory framework that underpins the national pharmaceutical supply.

Moreover, under the patronage of the Asian Development Bank (ADB), an Enterprise Resource Planning (ERP) system is set to be introduced to strengthen Sri Lanka's pharmaceutical supply chain. The implementation of this system is expected to significantly improve operational efficiency, reduce costs and enhance overall supply chain effectiveness. This initiative is to be further supported at the policy level through the development of pharmaceutical procurement guidelines and manual by the National Procurement Commission.

8.14.2 State Pharmaceuticals Manufacturing Corporation

By progressing towards its vision of becoming a model manufacturing and marketing organization for pharmaceutical and healthcare products, the State Pharmaceuticals Manufacturing Corporation (SPMC) introduced five new formulations to its product portfolio during the year 2025. Accordingly, SPMC has developed a total of 104 pharmaceutical products, adhering to international quality standards set by the British Pharmacopoeia (BP) and the United States Pharmacopoeia (USP), of which 77 products are currently in active production in line with national requirements. The Corporation recorded its highest-ever production output of 3,612 million units of tablets and capsules in 2025, compared to 3,175 million units in 2024.

Furthermore, SPMC supplies joint venture products in collaboration with six partner companies under shareholder agreements. Together with its local manufacturing partners, SPMC has played a pivotal role in meeting the pharmaceutical needs of Government hospitals and the domestic market by ensuring the availability of high-quality medicines at affordable prices.

Total revenue of the SPMC decreased by around 13 percent from Rs. 28,202 million in 2024 to Rs. 24,626 million in 2025. This decline was primarily due to the decrease in quantity demanded by MSD. In 2025, SPMC's revenue was primarily derived from sales to the MSD, amounting to Rs. 22,569 million, which accounted for 92 percent of its total revenue. Operating expenditure decreased by 13 percent to Rs. 22,507 million in 2025, compared to Rs. 25,738 million in 2024, primarily due to decrease in cost of sales in line with the reduction in revenue. Net finance income decreased by 12 percent to Rs. 510 million in 2025, compared to Rs. 581 million in 2024, primarily due to the reduction in interest rates for fixed deposits.

Overall, SPMC's profit before tax decreased by 13 percent to Rs. 2,671 million in 2025, compared to Rs. 3,083 million in 2024. However, SPMC paid Rs. 779 million in 2025 as levy to the Consolidated Fund, representing the highest-ever contribution made by the Corporation, indicating a strong liquidity position and providing both stability and the capacity to capitalize on future opportunities.

Table 8.34 | Performance of Other State Owned Enterprises

Description	Core Activities	Performance	Concerns
Insurance			
Sri Lanka Export Credit Insurance Corporation (SLECIC)	Provides support services to the export sector through the provision of export credit insurance and credit guarantee services to the exporters.	The operating profit decreased by around 6 percent in 2025, mainly due to the decrease in investment income. However, the profit before tax has increased by 6 percent to Rs. 592 million in 2025, compared to Rs. 560 million in 2024, due to decrease in non-operating expenses.	SLECIC should consider exploring new strategic initiatives to support the local export industry, while concurrently enhancing the financial strength of the entity.
Agricultural & Agrarian Insurance Board (AAIB)	Operates Agricultural Insurance Scheme, Farmers Pension Scheme and Fishermen Pension Scheme.	Net deficit decreased by 40 percent to Rs. 1.9 billion in 2025, compared to Rs. 3.2 billion in 2024, mainly due to the decrease in pension liability provision under operating expenses.	High dependency on National Budget due to mismatch in the inflows and outflows of insurance premium and insurance payments.
Non Renewable Resources			
Lanka Mineral Sands Ltd (LMSL)	Mining, processing and marketing of heavy mineral sands. Manufacture and sell any byproduct which may be produced as a result of refining and processing mineral sands.	LMSL's total revenue increased significantly by 78 percent to Rs. 2,037 million in 2025 from Rs. 1,142 million in 2024 due to the increase in sale of heavy minerals. As a result, LMSL recorded a profit before tax of Rs. 649 million in 2025 compared to the loss of Rs. 77 million in 2024.	LMSL needs to explore opportunities for value added products through Public Private Partnerships to compete in the international market.

Table 8.34 | Performance of Other State Owned Enterprises Contd...

Description	Core Activities	Performance	Concerns
Lanka Phosphate Ltd (LPL)	Excavate, process and sell rock phosphate which is used as a fertilizer for perennial agricultural crops such as tea, rubber and coconut.	LPL's total revenue decreased marginally to Rs. 1,284 million in 2025/26, compared to Rs. 1,316 million in 2024/25. Meantime, LPL's profit before tax decreased to Rs. 459 million in 2025/26, compared to Rs. 465 million in 2024/25.	LPL needs to explore opportunities for new product development through Public Private Partnerships in order to enhance value addition, improve competitiveness and diversify revenue streams.
Kahatagaha Graphite Lanka Ltd (KGLL)	Excavate, process and sell graphite as industrial raw material.	KGLL's total revenue in year 2025/26 increased by 38 percent to Rs. 206 million, compared to Rs. 149 million in the preceding year. As a result, KGLL's net profit before tax in 2025/26 increased significantly to Rs. 48 million, compared to Rs. 24 million in 2024/25.	KGLL should focus on enhancing value addition to graphite through Public Private Partnerships in order to cater the international market and improve export potential.
Health			
Sri Lanka Ayurvedic Drugs Corporation (SLADC)	SLADC is engaged in the manufacturing, sale and distribution of high-quality ayurvedic drugs, and pharmaceutical products. The corporation produces over 194 varieties of medicinal products and supplying to government ayurveda hospitals, Ayurvedic practitioners and the private sector, while also supporting the development of the indigenous medicine sector in Sri Lanka.	SLADC recorded its highest ever total revenue of Rs. 1,736 million in 2025, a 9 percent increase compared to Rs. 1,588 million in 2024. This growth was primarily driven by increased demand for high quality locally manufactured products and growing public confidence in traditional medicine. During the year, the corporation introduced seven new products and further expanded its herbal cultivation initiatives, thereby enhancing its product portfolio securing material supply. Consequently, profit before tax increased to Rs. 276 million in 2025, compared to Rs. 183 million in 2024.	In order to further improve its performance and competitive position, SLADC should prioritize the modernization of production machinery, improvement of raw material procurement processes, optimal utilization of its herbal gardens and the expansion of research and development activities. In addition, the adoption of a comprehensive business development strategy would support the expansion of its presence in both domestic and international markets.
Sri Jayawardenapura General Hospital (SJGH)	SJGH provides a comprehensive range of health care services including clinics, blood bank facilities and pharmacy services at affordable prices to the general public. In addition, SJGH plays a significant role in training of medical undergraduates, postgraduates and other health care professionals.	Hospital care income decreased marginally by 2 percent to Rs. 4,429 million in 2025, compared to Rs. 4,502 million in 2024. With budgetary support amounting to Rs. 3,154 million in 2025, SJGH reported a net profit of Rs. 363 million, compared to Rs. 552 million recorded in 2024.	SJGH should prioritize the modernization of infrastructure to meet evolving healthcare standards, enhance its hospital information management systems, attract specialized medical practitioners, and adopt a comprehensive service development strategy aimed at delivering internationally benchmarked quality of care.

Table 8.34 | Performance of Other State Owned Enterprises Contd...

Description	Core Activities	Performance	Concerns
Media			
Independent Television Network (ITN)	ITN Group is the pioneer television station in Sri Lanka, broadcast and producers a variety of programs in Sinhala, Tamil and English languages including news, teledramas, documentaries, educational programs, children entertainments, reality shows, religious programs, etc. through ITN, Vasantham TV, Lakhanda Radio, Vasantham FM.	ITN's total revenue decreased marginally to Rs. 1,992 million in 2025, compared to Rs. 1,996 million in 2024. During 2025, net finance income declined to Rs. 10 million, compared to Rs. 13 million in 2024, mainly due to lower interest earnings in line with prevailing market conditions. However, ITN reported a profit after tax of Rs. 76 million in 2025, compared to a profit after tax of Rs. 25 million in 2024 due to the impact of deferred tax.	ITN needs to address its structural challenges through cost control and should strengthen its revenue base by enhancing commercial strategies and improved collection mechanisms. Greater emphasis on digital transformation, and content competitiveness will be essential to ensure the long-term financial sustainability of the institution.
Sri Lanka Rupavahini Corporation (SLRC)	Produces and broadcasts informative, educational and entertaining programmes through channels namely, Rupavahini, channel Eye and Nethra TV.	Revenue of the SLRC increased marginally to Rs. 1,576 million in 2025, compared to Rs. 1,543 million in 2024, due to the increase in sale of Channel 1 TV time. Despite some cost management efforts, overall expenditure remained relatively high. As a result, for the year 2025 also SLRC recorded a net loss of Rs. 247 million, remaining at the same level as in 2024.	SLRC needs to focus on enhancing its revenue generation through improved commercial strategies and diversification of income, together with cost rationalization. Accordingly, the implementation of a structured restructuring plan, supported by strengthened governance and accountability, is essential to ensure long-term sustainability.
Sri Lanka Broadcasting Corporation (SLBC)	As the oldest radio station in Sri Lanka, SLBC engages in broadcasting activities through 6 national channels, (Sinhala National Service, Tamil National Service, Commercial Service, City FM, Thendral Service, English Service) and 6 Regional channels (Raja Rata FM, Ruhunu FM, Kandurata FM, Pierei FM, Yal FM, Wayamba Service and 1 community radio channel (Dambhana), with a view to providing its service as the pioneer radio broadcasting network in Sri Lanka.	Revenue of the SLBC decreased by 14 percent to Rs. 855 million in 2025, compared to Rs. 997 million in 2024. Operating expenses also decreased by 9 Percent to Rs. 1,056 million in 2025 compared to the previous year. As a result, the Corporation recorded a net loss of Rs. 203 million in 2025, compared to the net loss of Rs. 176 million in 2024. During the year under review, the General Treasury provided financial support amounting to Rs. 318 million in the form of equity to assist the Corporation in meeting its recurrent expenditure.	The implementation of a comprehensive restructuring program, together with enhanced governance and accountability mechanisms will be critical for improving the long-term financial sustainability of the Corporation. In the short term, SLBC should focus on achieving a break-even position by developing and executing a comprehensive business plan that aligns operational performance with revenue growth.

Table 8.34 | Performance of Other State Owned Enterprises Contd...

Description	Core Activities	Performance	Concerns
Marketing & Distribution			
Sri Lanka Handicraft Board (SLHB)	Sri Lanka Handicraft Board (SLHB) operating under the brand name of Laksala, plays an important role in supporting the indigenous handicraft industry by connecting local artisans and manufacturers with market opportunities. At present, SLHB operates with 11 sales outlets and souvenir boutiques, mainly located in key tourist areas across the country.	The Board's business activities are closely linked to the tourism industry, as a significant portion of its revenue is generated from foreign tourists. In 2025, SLHB recorded a decline in total revenue by 14 percent to Rs. 793 million, compared to Rs. 919 million in 2024. Despite this decrease in revenue, the SLHB reported an increase in profit before tax to Rs. 35 million in 2025, compared to Rs. 25 million in 2024.	In the domestic market, SLHB faces significant competition from a diverse range of sellers, including private handicraft retailers, independent artisans, roadside vendors and increasingly social media based online platforms that enable direct sales to customers, who operate with lower overhead costs and offer a wide variety of products at competitive prices. To effectively address the market competition, SLHB should strengthen its distinct position as a State-Owned Enterprise that assures the authenticity and quality of Sri Lankan handicrafts, while also adopting modern marketing approaches, particularly by enhancing its digital presence and developing e-commerce platforms to reach a broader customer base.
State Timber Corporation (STC)	Extracting and purchasing of timber and converting them into value added products. Sale of logs, sawn timber and finished products. Reforestation.	STC's total revenue increased by 17 percent to Rs. 5,579 million in 2025, compared to Rs. 4,765 million in 2024 mainly due to the increase in the crown land log sales. Simultaneously, profit before tax increased by 38 percent to Rs. 1,139 million in 2025, compared to Rs. 825 million in 2024.	STC should focus on strategies for new product and market development through Public Private Partnership.
STC General Trading (STC)	STC engages with the offering of various products such as retail, supplying chemicals and allied products, office supplies, construction materials, agricultural products, motor cycles, machinery & equipment and automotive tire and services ranging from household equipment to industrial machinery products.	STC recorded an increase of 16 percent in profit before tax to Rs. 429 million in 2025/26, compared to Rs. 370 million in 2024/25, despite the decrease in total revenue by 19 percent to Rs. 7,316 million in 2025/26.	STC should continue its business improvement strategies while enhancing its product range according to the current market requirements.
State Printing Corporation (SPC)	SPC primarily engages with the printing of school text books, exercise books and lottery tickets.	SPC's revenue declined by 7.7 percent to Rs. 2,656 million in 2025 compared to Rs.2,879 million in 2024, mainly due to the reduction in text book printing. As a result, SPC recorded a net profit before tax of Rs. 145 million in 2025, compared to the net profit of Rs. 284 million in 2024.	In order to ensure long-term sustainability and revenue diversification, SPC should place greater emphasis on expanding its market presence within the private sector and exploring additional commercial printing opportunities, while introducing advanced printing technologies to enhance efficiency and reduce costs.

Table 8.34 | Performance of Other State Owned Enterprises Contd...

Description	Core Activities	Performance	Concerns
Hotel Developers Lanka Ltd (HDL)	HDL is engaged in the hospitality trading business.	During the year 2025, HDL recorded a marginal increase in revenue to Rs. 5,434 million. However, HDL demonstrated a notable improvement in financial performance, reporting a profit before tax of Rs. 139 million in 2025, compared to a loss before tax of Rs. 268 million in 2024, due to the reduction in cost of sales by Rs. 224 million to Rs. 2,485 million.	Steps have been taken by HDL to improve operational efficiency and service delivery, particularly through continuous improvement of hotel facilities and alignment with international standards. In addition, progress on corporate-level restructuring initiatives, including the proposed capital reduction, should be accelerated, as the Cabinet of Ministers has approved strengthening the company's financial position and aligning its capital structure with operational needs.
Fisheries			
Ceylon Fishery Harbours Corporation (CFHC)	CFHC provides fishing communities infrastructural facilities and services connected to fishing harbours through its harbors spread around the country.	CFHC recorded a net loss of Rs. 329 million in 2025, compared to Rs.101 million net loss in 2024. This was mainly due to the harbour operational loss of Rs. 57 million incurred in 2025, compared to the harbour operational profit of Rs. 132 million in 2024.	The current contribution to the GDP needs to be increased by making the best use of the resources in the fishing harbours. Additionally, raising the fishing standard, revising the current fees and charges and implementing scanning facilities for harbour operations are crucial steps in raising the entity's revenue in the long run.
Ceylon Fisheries Corporation (CFC)	CFC specializes in buying fish from fishermen and selling it to the market to keep the price of fish consistent.	CFC recorded a net profit of Rs.132 million in 2025, compared to the net loss of Rs. 53 million in 2024, mainly due to increase in other income by 127 percent to Rs. 244 million and decrease in sales & distribution cost by 18 percent to Rs. 165 million.	Considering the possible demand, while restructuring and moving the businesses, CFC should let the pricing committee decide the price based on market factors and encourage purchasing officers to buy fish along the shore. The introduction of a centralized payment and collection system and the establishment of a centralized management information system are essential steps in boosting the entity's revenue in the long run.

Table 8.34 | Performance of Other State Owned Enterprises Contd...

Description	Core Activities	Performance	Concerns
Fertilizer			
State Fertilizer Company Limited (SFCL)	With the overarching aim of streamlining government institutions with overlapping functions and thereby reducing administrative costs and enhancing operational efficiency, the SFCL commenced operations on July 1, 2024, following the amalgamation of the two state-owned fertilizer companies, Ceylon Fertilizer Company Limited and Colombo Commercial Fertilizer Company Limited. The SFCL operated within a highly competitive open fertilizer market, confronting intensive competition of over 60 private sector participants including several well-established and financially strong entities. In line with government policy on fertilizer, the company discharged its core responsibility of distributing subsidized fertilizer for paddy cultivation. However, this has constrained its ability to expand into the non-paddy fertilizer segment.	SFCL recorded a total revenue of Rs. 6,958 million in 2025/26, compared to Rs. 2,582 million revenue recorded for the 9 months in 2024/25. Accordingly, the company recorded a net profit before tax of Rs. 578 million in 2025/26.	Going forward, SFCL should prioritize improving procurement efficiency, expanding its presence in the non-paddy segment and ensuring the availability of fertilizer at competitive prices. These strategic measures will enable the company to sustain growth and strengthen its position in the market.

Public Finance Management

9.1 Overview

The submission of Regulations under the Public Financial Management Act No. 44 of 2024 to Parliament and the implementation of the e-GP system have been recognized as Structural Benchmarks under the International Monetary Fund (IMF) Extended Financing Facility programme.

Accordingly, with the assistance of Development Partners including the International Monetary Fund, Asian Development Bank, and the United Nations Development Programme, new Regulations are currently being drafted while the Financial Regulations issued in 1992 are being reviewed and revised to ensure consistency with the Act.

Public procurement has also been identified as a key area for reform, with the deployment of a revamped Electronic Government Procurement (e-GP) system aimed at enhancing transparency, efficiency, and accountability in government procurement processes. A significant proportion of public funds is expended on procurement activities, including the acquisition of goods and services by various ministries, departments, and other public sector agencies. Consequently, improvements in the efficiency and effectiveness of procurement processes can contribute substantially to reducing government expenditure. In this context, the adoption of an e-GP system is considered an essential mechanism for promoting best practices in government procurement and strengthening transparency and accountability in the use of public resources.

9.2 Public Financial Management Act

With a view to implementing the provisions stipulated in the Public Financial Management (PFM) Act, the Minister of Finance is required to formulate and issue Regulations under the Section 67(1) of the Act. Accordingly, new Regulations under the PFM Act are being formulated, and the existing Financial Regulations (FRs) are being updated to ensure consistency with the provisions of the PFM Act. This process also necessitates the removal of redundant provisions contained in the existing Financial Regulations issued in 1992, as well as the introduction of new sets of Regulations to operationalize newly introduced areas under the PFM Act, including Public Investment Management and Fiscal Responsibility. Meantime, directives by way of circular and guidelines will be issued to cover existing and new provisions that are not included in the Regulations.

In order to achieve this objective, several rounds of consultations were conducted with external stakeholders, with particular emphasis on identifying special Regulations that had been incorporated into the existing Financial Regulations and on determining areas of redundancy. In this context, the Department of Public Finance is in the process of finalizing the Regulations with the assistance of the respective Treasury Departments.

Although the issuance of Directives is not an IMF structural benchmark, it is imperative that such Directives be issued simultaneously with the Regulations in order to ensure the effective implementation of the provisions of the Public Financial Management Act. Accordingly, the Department of Public Finance is also in the process of finalizing the required Directives, with the assistance of the respective Treasury Departments. The process was supported by Development Partners through technical, advisory, and institutional support.

Review of Statutory and Non-Statutory Funds

Ministries, Departments and State-Owned Enterprises maintain various Funds outside the Consolidated Fund under their respective purview. These include both statutory funds established through statutes and non-statutory funds created for specific operational purposes. The governance framework for such funds is set out in Part VIII, Section 39 of the Public Financial Management Act, No. 44 of 2024. Under the Article 149 of the constitution, it is articulated that funds outside the Consolidated Fund can be maintained only under specific circumstances. As such, through the PFM Act, all public entities have been requested to either wind up non-statutory funds or to convert them to statutory funds through statutes, if retention of such funds are critical and those functions cannot be carried out through regular budgetary allocations.

Under Section 39(4) of the PFM Act, the Secretary to the Treasury appointed a Review Committee in 2025 to examine non-statutory funds. The Committee carried out a comprehensive review of approximately 121 non-statutory funds reported by Ministries, Departments, and other institutions. The Review Committee's Report was submitted to the Cabinet of Ministers, and approval was obtained to implement its recommendations.

The Department of Public Finance issued Circular No. 04/2024 dated 06.11.2024 and Circular No. 01/2025 dated 28.02.2025, providing detailed guidance to Chief Accounting Officers (CAOs) on fund management, reporting requirements, and governance standards. In addition, approximately 70 clarifications and specific instructions were issued to CAOs to reinforce compliance and ensure sound financial oversight. Initial steps were also taken to formulate Regulations and Directives relating to statutory funds in alignment with the PFM Act. Further in accordance with Section 39(2) of the Act, a Consolidated Report on the performance of statutory funds for the year 2024 was prepared and submitted to the Cabinet of Ministers during the year 2025. The Cabinet of Ministers has subsequently granted approval to implement the recommendations contained in the Report. Overall, these measures strengthened regulatory oversight, improved transparency, and ensured greater compliance with the provisions of the PFM Act, thereby enhancing the governance and financial discipline of statutory and non-statutory funds.

9.3 Procurement Management

Adherence to sound procurement practices has been emphasized at every level to ensure a transparent, efficient, and timely public procurement process that guarantees value for money and fair dealing, thereby safeguarding the public interest. In this context, the government procurement system represents a fundamental element of Public Financial Management (PFM), supporting transparency, efficiency, and the responsible management of public resources.

The Electronic Government Procurement (e-GP) system, capable of facilitating goods procurement under the Shopping Method, has been deployed and is currently in operation. To date, the e-GP platform has enabled the registration of approximately 875 Procuring Entities and 5,900 vendors. By the end of 2025, more than 400 Government Procuring Entities had undertaken their procurements through the e-GP platform, and over 61,500 procurements had been conducted through the system. With the notable progress achieved in the implementation of the e-GP platform, Procuring Entities have been instructed to upload information relating to major procurements to enhance transparency and ensure public accessibility to procurement information.

During the year, the Department of Public Finance assumed full operational control of the e-GP platform following the termination of the contract with the former System Implementation Partner (SIP). Meanwhile, preliminary work relating to the design and development of the e-GP platform to cover procurement methods beyond the Shopping Method, by way of obtaining the services of new System Implementation Partner (SIP) with the technical and financial support of the World Bank, has been initiated and is currently in progress.

Furthermore, the Department of Public Finance has taken steps to integrate SLT Rainbow's registered vendor database with the e-GP platform. The necessary system developments for both platforms have been completed, and the registration of such vendors on the e-GP platform is currently underway.

Moreover, the public is able to access procurement notices covering all procurement categories, including those with Total Cost Estimates exceeding Rs. 200 million, while details of contract awards exceeding Rs. 200 million have been made publicly available through the e-GP portal with effect from 01 July 2022. Circular No. e-GP/ICT/Awards (sp)/2025 dated 2025/08/05 has been issued in this regard by the Secretary to the Treasury.

In addition, recommendations and feedback have been provided to the National Procurement Commission (NPC) for the development of new Procurement Guidelines and revision whenever requested during the year. The process of appointing High-Level and Cabinet-Appointed Procurement Committees has also been continued to ensure the effective oversight of major government procurements.

Box 9.1 | Non-Financial Assets Management of the Government

As the productive use of the Non- Financial Assets of the Government have been deteriorated due to the lack of a focused agency to adhere to an effective system to oversee the efficient utilization of assets, secure assets adequately and for the maintenance and improvement of assets, the Comptroller General's Office is mainly entrusted with overseeing the management of these assets of the Government. Hence, it is required to maintain an updated comprehensive central data base for the Non-Financial Assets of the Public Institutions (Government Agencies (Ministries, Departments, District Secretariats, Special Spending Units, Foreign Missions), Public Enterprises and Provincial Councils & Local Governments) and to formulate and implement Non – Financial Assets management policies, identifying idle resources and ensuring effective use of these assets, to strengthen the development framework of the Government.

In order to ensure the proper management of Non- Financial Assets of the Government, it is required to enact the Public Assets Management Law.

The online Non-Financial Assets Management System (NFAMS) has been introduced by issuing the Assets Management Circular No 06/2023, for the Non-Financial Assets management of the Government. This system has been implemented with effect from 01st September 2023 and module on vehicles has been implemented as the first module of this system. Through this system, a web-based centralized comprehensive real time data recording system is established, which consists of essential information including assets valuation required for the Non-Financial Assets management. The design, software development, implementation, improvement and maintenance of NFAMS is done by the Comptroller General's office and the Department of Information Technology Management, without incurring an additional cost to the Government. The other modules in NFAMS will be implemented gradually, in due course.

As recorded in NFAMS as at 18th May 2026, the vehicle fleet of the Public Institutions amounts to 96,027 (92,116 in running condition and 3,911 not in running condition). Under the module on vehicles in NFAMS, there are registered 2,159 data reporting entities as at 18th May 2026, to record the vehicle details. The age analysis of this vehicle fleet by type of the vehicle is as given in the Table:

Age analysis of the Vehicle fleet of the Government as recorded by Public Institutions in NFAMS as at 18.05.2026

Vehicle fleet of the Government as per the Type of the Vehicle

Age analysis of the vehicle fleet of the Government

Vehicle module auditing:

In order to ensure the accuracy in vehicle registration and respective real time data recording in NFAMS by each Public Institution, auditing facility also in this system for the Auditor General and the Internal Auditor of each Institution has been provided and accordingly necessary instructions have been given by issuing the Assets Management Circular No. 01/2026.

Valuation:

Policy for valuation of Vehicle, Structure, Building, Land, Plant & Machinery and Office Equipment & Furniture has been provided by issuing the Assets Management Circulars No. 04/2018, No. 02/2019 and No. 05/2021. The Assets Management Circular No. 02/2024 provides updated instructions on valuation of vehicles incorporating the provisions given by the previous circulars.

Resolving vehicle ownership issues:

Necessary instructions for the settlement of ownership issues of vehicles have been given by issuing the Assets Management Circulars No. 02/2017 and 03/2018. During the year 2025 the Comptroller General's Office has resolved registered ownership issues of 39 vehicles. Accordingly, from 2019 to 18th May 2026, the Comptroller General's Office has resolved registered ownership issues of 1009 vehicles.

Prevent misplacement / underutilization and secure of Non-Financial Assets:

Assets Management Circular No. 05/2022 provides necessary instructions on properly handover / takeover of relevant Non-Financial Assets in the instances of position changes or change / abolish / closure of institutions. In addition, with respect to the completion or termination of Government projects, Assets Management Circular No. 01/2024 provides necessary instructions on the requirement of properly reporting the information of assets used for the implementation of such projects, to the Comptroller General's Office to provide necessary instructions for the reallocation or disposal of these assets.

Disposal of vehicles:

Necessary instructions for the disposal of vehicles have been given by issuing the Assets Management Circulars No. 05/2020, 04/2022 and 05/2024.

Revenue from Sale of Capital Assets

Revenue collected from the sale of capital assets amounted to Rs. 4,040.9 million during the year 2025 and as at April 30, 2026. Increase in revenue from disposal of vehicles is mainly due to the disposal of luxury vehicles as instructed by the Assets Management Circular No. 05/2024.

10

Human Resource Management

10.1 Overview

In 2025, Sri Lanka recorded a broad-based recovery across multiple sectors of the economy. In support of this positive trajectory, previously stringent human resource management policies were moderately relaxed. This policy adjustment was undertaken despite ongoing fiscal constraints and persistent challenges related to expenditure control and cost containment.

The legal framework governing public sector human resource management was further strengthened in 2025 with the enactment of the Public Financial Management Act, No. 44 of 2024, which vests authority in the Minister of Finance over the cadre management of public entities. Within this framework, the Minister of Finance is vested with the authority to determine salaries, wages, and other forms of remuneration of officers and employees of public institutions, in compliance with national remuneration policies. This legal framework is intended to enhance accountability, transparency, and fiscal discipline in the management of the public workforce and its associated financial obligations.

Acknowledging the necessity of robust public service delivery, a comprehensive assessment was conducted to identify cadre requirements and critical vacancies. Priority was accorded to filling essential technical positions and establishing new positions necessary to accelerate public service delivery and strengthen the implementation capacity of national development projects. This targeted approach extended to state-owned commercial enterprises, self-financing entities, and vital sectors such as health, education, and defence. A significant milestone achieved in 2025 was the effective management of substantial recruitment demands across various government institutions. Accordingly, approval was granted to fill 76,988 vacancies as at 31 December 2025.

In 2025, initiatives were implemented to increase public sector remuneration with the aim of ensuring a satisfactory standard of living for government employees while strengthening their motivation and commitment towards effective public service delivery. This initiative was also intended to strengthen the government's capacity to attract and retain skilled and competent personnel, while maintaining fiscal discipline and avoiding undue pressure on the national budget. The salary revision was designed to be implemented in a phased manner across three stages, commencing in April 2025, followed by subsequent adjustments in January 2026 and January 2027. The increase in the minimum basic salary of public service employees has been correspondingly extended to judicial service personnel, employees of public corporations and statutory boards, university staff, and officers of the tri-forces, ensuring uniform applicability on an equivalent basis across these sectors. Circulars were issued to revise the salary structures of the respective service categories. Notwithstanding the existence of distinct salary frameworks for Sri Jayewardenepura Hospital and Wijaya Kumaratunga Hospital, the absence of an applicable circular for these institutions was effectively addressed in 2025.

The measures taken in 2025 to formalize semi government sector are noteworthy. In particular, the issuance of circulars establishing a standardized framework for the payment of allowances to resource persons engaged in training programmes, seminars, and capacity development initiatives conducted by public corporations, fully government-owned companies, and statutory bodies contributed to enhancing the quality of such programmes. Furthermore, the introduction of provisions facilitating the attachment of trainees to these institutions for practical training represented a significant step toward strengthening institutional capacity and promoting skills development.

The initiation of a cadre review process in 2025, aimed at fostering a more qualitative and optimally structured workforce within identified priority sectors, represents a significant measure in strengthening public sector human resource management. Accordingly, the first phase of these cadre reviews was successfully commenced in the Health, Agriculture, and Provincial Council sectors. Furthermore, a notable milestone was achieved with the submission of a comprehensive report to the Cabinet of Ministers by 31 March 2025, which provided detailed information on the approved and actual cadre strengths of the public sector as at 31 December 2024. This submission

represents a significant development, as it marks the first instance since the COVID-19 pandemic that such comprehensive personnel data has been systematically presented to the Cabinet.

Expenditure on salaries, wages, and pensions accounted for more than 30 per cent of the total government recurrent expenditure in 2025. Spending on salaries and wages increased by approximately 10 percent, rising to Rs. 1, 293 billion in 2025 from Rs. 1,178 billion in 2024. Similarly, pension payments grew by nearly 12 percent, reaching Rs. 445 billion in 2025 compared to Rs. 396 billion in the previous year. This situation further underscores the necessity of rationalizing human resource management practice in the public sector.

10.2 Cadre Management in 2025

Table 10.1 | Public Sector Cadre Composition 2016 – 2025

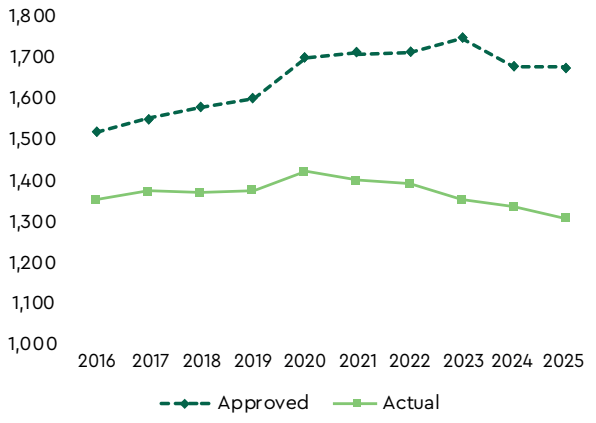

Administrative level		2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Increase/ Decrease % 24/25

** Including SOE cadre of the Provincial Council*
 # Excluding SOE cadre of the Provincial Council

As of the end of 2025, the total approved cadre in the public sector stood at 1,677,039, reflecting a marginal decline of 0.2 percent compared to 2024. This slight reduction is largely due to the suppression of certain vacant positions, which were retained on a personal-to-holder basis.

In parallel, the total number of deployed employees in the public sector experienced a modest decline of 2 percent, decreasing from 1,336,147 in 2024 to 1,308,366 in 2025. This reduction was primarily attributable to administrative delays encountered by recruitment agencies in conducting public sector recruitments, together with the continuation of employee retirements during the reporting period of 2025. The cadre utilization rate, measured against the total approved cadre, was recorded at 78 percent by the end of 2025, indicating a decrease of 2 percentage points relative to the previous year. This decline in utilization is largely associated with government-imposed constraints on public expenditure and delays in the recruitment process. Although Cabinet approval was granted in 2025 to recruit 76,988 personnel across various government institutions, only 17,244 positions had been filled by year-end.

10.4 Distribution of Public Service Cadre by Service Level (Excluding Tri – forces and SOEs)

Figure 10.2 | Distribution of Public Service Cadre (Approved Cadre excluding Tri-forces and SOEs)

Source: Department of Management Services

Public Service is delineated into four hierarchical tiers, namely primary, secondary, tertiary, and senior, contingent upon the type of services dispensed. These tiers encompass vocations pertinent to employment classifications encompassing technical, non-technical, professional, managerial and administrative.

Analysis into cadre distribution in line with service levels in the Public Service shows that 65 percent of public servants are concentrated under the secondary service level. Secondary service level mainly represents Teachers, Development Officers as well as Health Workers such as Nursing, Para Medics, and Professions Supplementary to Medicine officers. In year 2025, cadre distribution in secondary service level shows a decrease of 2 percent compared to year 2024. The modest decline in secondary service levels was primarily driven by a contraction in recruitment within this category.

Specifically, the acquisition of teaching staff and various Professions Supplementary to Medicine officers was hindered by ongoing litigation that constrained the recruitment process. The suboptimal and uneven distribution of this category, specifically the disproportionate allocation of supervisory positions has resulted in the widespread underutilization of the secondary level workforce, most notably among Development Officers. Consequently, the government maintained its policy of a hiring moratorium for the Development Officer Cadre throughout 2025 to address these internal efficiencies.

Box 10.1 | Cadre Review in Public Sector

A cadre review is a systematic and comprehensive assessment of the staffing structure of an organization with the objective of ensuring that the number, composition, and distribution of employees are aligned with institutional mandates, service delivery requirements, and policy priorities. In the public sector, cadre review serves as a strategic human resource management tool that evaluates existing posts, identifies gaps or redundancies, and recommends optimal staffing arrangements to enhance efficiency and effectiveness.

Cadre reviews typically examine several key dimensions, including the number of approved and actual staff, the relevance of job roles, workload distribution, skills and competencies of employees, and the alignment between organizational objectives and human resource capacity. This process is often supported by data analysis, stakeholder consultations, and benchmarking against comparable institutions.

In this context, cadre reviews should be conducted on a periodic basis to achieve optimal outcomes. Accordingly, the Department of Management Services initiated a comprehensive cadre review for the period 2025–2026. The first phase of cadre reviews was successfully commenced in key priority sectors, including Health, Agriculture, and Provincial Councils. Furthermore, the postal service sector has also been identified as an additional area for review in line with prevailing operational and service delivery considerations. The primary focus of the cadre review was to,

- Promote efficiency by ensuring cost-effective utilization of human resources, thereby minimizing both over-staffing and under-staffing.
- Enhance service delivery by aligning staff capacity with operational requirements, enabling institutions to respond more effectively to public demands.
- Support fiscal discipline through evidence-based decision-making on recruitment, promotions, and remuneration.
- Facilitate organizational restructuring and modernization by identifying outdated roles and recommending new positions in line with emerging priorities, such as digital governance and performance management.

Building upon the aforementioned objectives, it is noteworthy that approximately 30 percent of the total approved cadre in the public sector is concentrated within the Provincial Councils. Despite this significant share, a comprehensive cadre review of Provincial Council institutions had not been undertaken for nearly a decade. In this context, the initiation of a comprehensive cadre review encompassing all Provincial Councils in 2025 represents a significant milestone towards achieving optimal cadre management and improved resource allocation.

Furthermore, the Agriculture sector was identified as a priority area for cadre review, given its devolved nature and the shared responsibilities between Provincial Councils and the Central Government. Accordingly, field inspections were conducted across the relevant institutions, and preliminary evidence was systematically collected during 2025 to support informed decision-making.

The Health sector, given its critical role in sustaining a free public healthcare system, was also prioritized. Rationalizing the costs associated with healthcare delivery is essential for strengthening public financial management. In this regard, field inspections for the cadre review of the Health sector were initiated in 2025, covering the first phase of selected institutions, including Teaching Hospital Anuradhapura, District Hospital Polonnaruwa, District Hospital Matale, National Hospital Kandy, Teaching Hospital Peradeniya, Sirimavo Bandaranaike Children's Hospital – Peradeniya, Teaching Hospital Kalutara, and the National Institute of Mental Health.

In addition, the preliminary activities pertaining to the cadre review of the Department of Posts was successfully completed in 2025. This process enabled the identification of operational requirements of the postal service and facilitated the reorganization of the cadre in alignment with service delivery needs. Furthermore, the review recognized the Department of Posts as a business-oriented entity and assessed its market competitiveness, thereby providing a basis for enhancing its operational efficiency and strategic positioning.

10.5 Highlights – 2025

10.5.1 Transport, Highways, Ports and Civil Aviation Sector

The Sri Lanka Transport Board (SLTB) maintains the largest workforce within the transport sector. Although salary adjustments and the absorption of primary-level staff were executed in 2018 in accordance with Management Services Circulars, the transition of senior-level personnel into the revised organizational structure faced protracted delays. Comprehensive evaluations conducted in 2025 identified the primary obstacles as non-compliance with qualifications prescribed in new schemes of recruitments, irregular promotions under legacy schemes, and ongoing litigation. Following rigorous consultations, a framework for individual officer absorption was finalized in 2025, aimed at restoring organizational functionality and establishing a transparent, recruiting qualified personnel to the positions in a formal manner.

Concurrently, the Road Development Authority (RDA) experienced significant industrial unrest stemming from delays in the absorption process. Subsequent to a detailed structural review, directives were issued for the absorption of senior, middle, and junior management tiers, with the remaining cadres scheduled for absorption in 2026.

Furthermore, foundational progress was made in the maritime and aviation sectors during 2025. This included the initial drafting of a formal Scheme of Recruitment (SOR) for the Sri Lanka Ports Authority and the commencement of a comprehensive cadre review for Airport & Aviation Services (Sri Lanka) (Private) Limited. Final approval and implementation for both initiatives are anticipated within the 2026 fiscal year.

10.5.2 Energy Sector

Among the specific measures implemented in 2025 to manage energy sector human resources, the Cabinet approved optimization of cadre at the Ceylon Petroleum Corporation proved pivotal to enhancing operational efficiency. It will provide substantial support to the Ceylon Petroleum Corporation – a state-owned business entity in successfully achieving its goals within a competitive business environment. In terms of Sri Lanka Electricity Act, No. 36 of 2024, initiation of transferring Ceylon Electricity Board staff to successor companies, on restructuring of the institutional structure of the power industry, is also an important step taken towards optimizing state-sector cadre. As optimal cadre management in state-owned enterprises directly impacts their profitability and sustainability these prudent measures will make positive changes in public sector employment and state-owned enterprises.

10.5.3 Industrial Sector

As a pivotal component of workforce management within the industrial sector in 2025, a rigorous adjustment of the human resource requirements for Lanka Mineral Sands Limited was conducted. This evaluation was carried out to align the plan with the strategic mining and operational plan for the next twenty-five years. The review encompassed an analysis of current and future operational mandates, production targets, and specialized technical functions to optimize organizational efficiency. Based on these inspections and a comprehensive organizational review, the cadre of the Company was revised in accordance with its operational requirements. Accordingly, approval was granted for a permanent cadre of 693 employees, together with 15 personal-to-holder posts, for the Head Office and the 21 sections of the Pulmoddai Plant of Sri Lanka Mineral Sands Limited.

10.5.4 Social Service Sector

The government is responsible for empowering marginalized and disadvantaged individuals to live with dignity in society, and securing the rights of those with disabilities. As such, allocations have also been made by 2025 National Budget Proposals for the care and development of children with disabilities including autism.

As full time care is necessary for children with disabilities, parents of such children lose the opportunity to pursue suitable employment causing them mental distress and to address this, steps are being taken to provide daycare services from 8.00 a.m. to 5.00 p.m. covering all districts for disabled children including autism

who are over 06 months and under 18 years of age so as to ensure care combined with skill development for them while arranging transport facilities as necessary for those children who are able to live with some level of independence.

For that purpose, 171 cadre has been approved to establish 06 daycare centers in 06 districts of Matara, Trincomalee, Kegalle, Hambanthota, Galle and Kaluthara under the first phase in 2025.

Box 10.2 | Salary Revision for the Public Sector Employees – 2025

Aimed at sustainably improving the living standards of the public sector employee, while strengthening their motivation and commitment towards effective public service delivery; steps were taken as per budget proposals 2025 to increase the minimum monthly basic salary in the public sector to Rs. 40,000/- and to increase the value of the annual salary increment by 80%. Accordingly, this salary increase was effected with a ratio of 1:4.375 between the minimum and maximum salaries in the public service.

In proceeding as above, monthly allowance of Rs. 5,000/- granted for the Public Service in terms of Public Administration Circular No. 03/2022 dated 13.01.2022, monthly allowance of Rs. 5,000/- granted for the Public Corporations, Statutory Boards and Government Owned Companies in terms of Public Enterprises Circular No. 01/2022 dated 10.01.2022 and the monthly interim allowance of Rs. 2,500/- granted for the Public Service in terms of Public Administration Circular No. 09/2019 dated 22.04.2019 were integrated in to the basic salary and with the implementation of these salary revisions, the said circulars were rescinded.

Percentage of allowances paid as a percentage of the basic salary was revised so as not to exceed the financial value of that allowance to ensure that the take home salary is increased only by the amount of the basic salary increase.

In view of prevailing fiscal constraints, the comprehensive salary revision was structured within the Treasury's fiscal capacity and is being executed across three distinct phases. The total projected expenditure for this initiative is estimated at approximately Rs. 325 billion. Under the phased implementation framework, all public sector employees received an initial increment effective April 1, 2025, comprising Rs. 5,000 plus 30% of the balance exceeding that amount. The remaining 70% of the net increase was scheduled for disbursement on a proportionate basis on January 1, 2026, and January 1, 2027, respectively.

As per Budget Proposals 2025, the Department of Management Services took steps to issue circulars as given below.

Salary Circulars – 2025	
1. Revision of Salaries of Employees of Public Corporations, Statutory Boards and Fully Government Owned Companies – 2025	01/2025
2. Revision of Salaries of the Chief Justice and the Judges of the Superior Court – 2025	02/2025
3. Revision of Salaries of High Court Judges and the Officers in Sri Lanka Judicial Service – 2025	03/2025
4. Revision of Salaries for the Staff of the Parliament 2025	04/2025
5. Revision of Salaries for Tri Forces Personnel – 2025	05/2025
6. Revision of Salaries of Staff of University Grants Commission and the Academic and Non- academic Staff of the Universities- 2025	06/2025
7. Revision of Salaries for the Staff of Sri Jayawardenapura General Hospital – 2025	07/2025
8. Revision of Salaries for the Staff of Wijaya Kumaratunga Memorial Hospital – 2025	08/2025

10.6 Way Forward

Managing human resources in the public sector has become increasingly complex in recent years, largely due to constrained fiscal space and the growing burden of salary and wage expenditures. The relatively large size of the public workforce, when compared with international benchmarks, together with long-term liabilities arising from a non-contributory pension system, continues to exert significant pressure on public finances. In addition, persistent skill mismatches across employee categories, resistance from trade unions and staff groups, and deeply rooted social and cultural factors have constrained efforts to optimize workforce structures. These challenges have remained prevalent for nearly a decade and are likely to persist in the absence of a comprehensive and systematic assessment of actual cadre requirements.

In this context, cadre review emerges as a critical strategic instrument for strengthening public sector human resource management. Moving forward, it is essential that cadre reviews are institutionalized as a regular and continuous process, rather than being undertaken on an ad hoc basis. Periodic reviews would enable the timely identification of staffing gaps, redundancies, and emerging skill requirements, thereby facilitating a more responsive and adaptive workforce. Furthermore, it is imperative to undertake a comprehensive cadre review across the entire public sector to assess current staffing requirements and identify opportunities for technological integration to enhance service delivery.

A key priority in this regard is the systematic updating and rationalization of Schemes of Recruitment across the public sector and State-Owned Enterprises. Aligning recruitment frameworks with evolving service delivery needs, technological advancements, and performance standards would ensure that the right competencies are attracted and retained within the system. This should be complemented by the introduction of competency-based recruitment and promotion mechanisms, which would help address existing skill mismatches and improve overall productivity.

Furthermore, rationalizing salaries and remuneration structures remains essential to ensure fiscal sustainability while maintaining employee motivation and retention. This requires a balanced approach that links compensation with roles, responsibilities, and performance, while also ensuring equity and transparency across institutions. Such reforms would contribute to improved expenditure management without undermining the quality of public service delivery.

In addition, greater emphasis should be placed on workforce planning and data-driven decision-making. The establishment of integrated human resource information systems would facilitate real-time monitoring of cadre positions, staff deployment, and performance indicators, thereby enhancing the effectiveness of cadre management. Strengthening institutional capacity for conducting evidence-based cadre reviews is also crucial in this regard.

Equally important is the need to manage change in a consultative and inclusive manner. Constructive engagement with trade unions and employee representatives can help mitigate resistance and build consensus around necessary reforms. Awareness and capacity building initiatives should also be undertaken to address social and cultural barriers that hinder organizational transformation.

In conclusion, the way forward for cadre management in the public sector lies in adopting a holistic, evidence-based, and forward-looking approach. By institutionalizing periodic cadre reviews, modernizing recruitment frameworks, rationalizing remuneration, and strengthening data systems, the government can move towards achieving an optimal, efficient, and sustainable workforce that is better aligned with national development priorities.

PART IV

Financial Statements

Financial Statements

Note to Readers

Financial Statements of the Government for the year ended 31st December 2025 comprising the Statement of Financial Performance, Statement of Financial Position, Statement of Cash Flow, Statement of Changes in Net Assets / Equity, applied Accounting Policies and Notes thereto are forwarded herewith.

The Statement of Financial Position shows the assets and liabilities of the Government whereas Statement of Financial Performance shows government's affairs in relation to revenue collection and use of resources as provided by Appropriation Act No. 03 of 21st March 2025, of twenty one (21) Special Spending Units, twenty four (24) Government Ministries, hundred (100) Government Departments and twenty five (25) District Secretariats. Further, in the Financial Statements, it is reflected the financial support provided to fifty four (54) Commercial Public Corporations, one hundred two (102) Government Owned Companies / Plantation Companies / US Dollar Denominated Companies, one (01) Development Bank in the form of capital contribution or shareholding and also information relating to allocation of financial resources to nine (09) Provincial Councils by the Government.

As per the provisions under the Public Financial Management Act No. 44 of 2024, Financial Statements should be prepared to reflect financial results and Financial Position of the Democratic Socialist Republic of Sri Lanka. Since these Financial Statements should be prepared in accordance with the Article 149 and 150 of the Constitution of Democratic Socialist Republic of Sri Lanka, in addition, Generally Accepted Accounting Principles could not be followed in all the time. However, in such deviations, reasons for deviation and the relevant alternate accounting policies are disclosed in the Financial Statements.

Modified cash basis accounting method is used to prepare the Financial Statements and actions are taken to include the assets and liabilities generated through the cash basis transactions in the Financial Statements whenever possible.

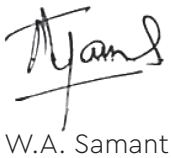

The Computerized Integrated Government Accounting System (CIGAS) has been further developed enabling non-financial assets are recorded in the Financial Statements, starting from the year 2015.

Statement of Responsibility

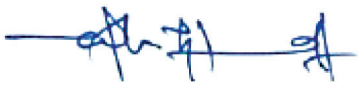

These Financial Statements have been prepared in keeping with the provisions of the Article 149 and 150 of the Constitution of Democratic Socialist Republic of Sri Lanka, Public Financial Management Act No. 44 of 2024 and National Audit Act No. 19 of 2018. The Financial Statements are in compliance with Generally Accepted Accounting Principles and relevant Treasury Circulars and Guidelines, whereas most appropriate accounting policies are used as disclosed in the Notes to the Financial Statements.

The General Treasury is responsible for establishing and maintaining a system of internal control to provide reasonable assurance that the transactions are effected within statutory authority and use of allocations provided by Appropriation Act or any other Law are properly recorded.

The accompanying "Statement of Accounting Policies" and "Notes to the Financial Statements" form an integral part of these Financial Statements. The designated authority in preparation and presentation of these Financial Statements is Department of State Accounts.

Significant Accounting Policies

01. Reporting Entity

These Financial Statements of the Government encompass the Reporting Entity of the Government comprising of Government Ministries, Departments, Special Spending Units and District Secretariats. However, Commercial Public Corporations, State Owned Enterprises and Government Owned Companies or other Companies and Statutory Boards, are not covered in these Financial Statements. Cash outflows from Government to those entities taken place during the reporting period and the Government's total interest in the Commercial Public Corporations, State Owned Enterprises and Government owned Companies or other Companies held in the form of equity and loans are taken into consideration. The Revenue and Expenditure of Provincial Councils are not considered as a part of these Financial Statements, since there is no significant control by the Government over the financial and operating activities of Provincial Councils.

The Financial Statements of the Government for the year ended 31 December 2025 were authorized for issue by the Department of State Accounts.

02. Basis of Preparation

These Financial Statements have been prepared on the historical cost convention in conformity with Generally Accepted Accounting Principles. Historical cost basis has been adopted for measurement while adopting modified cash based accounting for reporting.

The Cash Flow Statement is prepared using the direct method.

All financial information presented in Sri Lankan Rupees has been rounded to the nearest rupee, except where indicated otherwise.

03. Reporting Period

The reporting period of these Financial Statements is from 1st of January 2025 to 31st December 2025.

04. Change in Presentation Formats of Financial Statements

Presentation formats of Government Financial Statements from the year 2023 has been changed in order to improve fair presentation. New presentation formats are prepared to serve financial reporting requirements, Constitutional requirements and reporting budget performance. Reconciliations have provided where necessary and comparative figures have restated as applicable.

Presentation formats for Ministries, Departments, Special Spending Units and District Secretariats remain unchanged for the year 2025.

05. Basis of Consolidation

Expenditure incurred and revenue collected under revenue codes specified in the budget classification by respective Ministries and Departments in the form of financial assets, liabilities, revenue and expenditure are reported using same classification codes for preparation of consolidated accounts.

06. Revenue

The Government provides non-income generating goods, services and benefits to the general public. The revenue is raised by way of taxes, levies, fees and charges imposed under various statutes approved by Parliament to finance the expenditure incurred on provision of such goods, services and benefits. All revenue, so collected through relevant Ministries and Departments are identified and accounted at the time of collection. Investment income is accounted for the period during which such income is actually collected.

07. Premiums and Discounts

Premiums and discounts on issue of debt instruments are adjusted against the cost of borrowings.

08. Expenses

All expenses are accounted in the period in which payments have been made.

09. Foreign Currency Transactions

Foreign Currency Transactions are converted into Sri Lanka Rupees using the exchange rate prevailed on the date of the transaction. Exchange differences arising from the settlement of these transactions are duly accounted through corresponding main ledger accounts.

Net foreign exchange gain / loss generated in conversion of foreign loan balances, local loan balances in foreign currency and balances of on-lending to local currency has adjusted to the Statement of Financial performance.

10. Investments

Value of the Government's equity investments in State Owned Enterprises is recorded at cost and shown separately in the Financial Statements. However, investments in Statutory Boards are not separately identified and disclosed since such entities are relying on the Government for their recurrent and capital expenditure requirements similar to those of the other Government Departments.

11. Borrowings

In the Statement of Financial Position, all local borrowings are recorded at cost. Since foreign borrowings are subject to change in exchange rates, foreign monetary liabilities are converted to Sri Lanka Rupees using exchange rates prevailed at the end of the reporting period. Statement of individual loan details are shown in the Note – 26(I), 26(II), 26(III), 26(iv) and 26(v).

Details on project loans restructured during the year 2025 are stated in Note – 26(ii).

12. Employee Entitlements

Employee entitlements to salaries and wages, pre-retirement leave and other similar benefits have been recorded when they actually accrue to or utilized by the employees. Retired Government employee entitlements for pension payments are also recorded on the same basis.

13. Contingent Liabilities & Commitments

Contingent Liabilities and Commitments are recorded at the point of contingency or commitment is evident. Rs. 1,080,182,693,483 was recorded in 2025 and Rs. 1,454,254,752,096 was recorded in 2024. (Schedule I)

14. Comparatives

To ensure consistency with the current period and classification method adopted in making a fair presentation of financial information, comparative figures have been restated where appropriate.

15. Cash & Cash Equivalents / Bank Overdrafts

The Cash & Cash Equivalents comprises of all favorable balances and bank overdrafts comprises all unfavorable balances which include cash book balances for the bank accounts operated in the name of the Deputy Secretary to the Treasury, sum of unsettled imprest balances of Ministries and Departments which are treated as cash in transit and rupee equivalent amount of all foreign currency bank accounts balances as at end of the reporting period. When there is an Over Draft, it is considered for the Borrowing Limit of the respective year.

16. Non-Financial Assets

All non-financial assets i.e. Property, Plant and Equipment is recognized at cost or grant value. The cost includes expenditure that is directly attributable to the acquisition of the items.

In a situation, where an assets is acquired in a non-exchange transaction on free of charge or nominal consideration, the asset is initially measured at its grant value or cost. The corresponding credit is recognized as income in the statements of Financial Performance unless there are conditions on the assets' use.

Capital work in progress includes cost of buildings under development as at the Balance Sheet date.

The Government derecognizes items of

Property, Plant and Equipment upon disposal.

The sales proceeds received upon disposal of non-financial assets is recognized as revenue.

17. Leases

The Government as a lessee, finance lease are leases that transfer substantially all the risk and benefits incidental to ownership of the leased asset to the Government. Assets held under a finance lease are capitalized at the commencement of the lease at the value of the leased asset. The Government also recognizes the associated lease liability at the inception of the lease.

Operating leases are leases that do not transfer substantially all the risks and benefits incidental to ownership of the leased item to the Government. Operating lease made during the year are recognized as an operating expense in the Financial Performance Statement on cash basis over the lease term.

18. Intangible Assets

Intangible assets which are acquired separately are initially recognized at cost. The cost of intangible assets acquired in a non-exchange transaction is considered at their cost or grant value at the date of exchange and subsequently such intangible assets are carried at cost.

19. Advances

Advances consist of advances to Public Officers of the Government and provincial councils and to Government Departments through the treasury authorized advance account which is recognized on cash basis.

20. Sundry Accounts

Sundry Accounts consist of main ledger accounts operated for special purposes.

21. Prior Year Adjustment

During the current financial year, an exchange loss amounting to Rs. 3,862,677,744 relating to the financial year ended 31 December 2024 in respect of Foreign Loan Adjustment Accounts, was identified as having not been recognized in the financial statements of that year. Accordingly, the error has been corrected retrospectively.

As a result, the comparative figures for the year ended 31 December 2024 have been restated, and the opening balance of retained earnings as at 1 January 2025 has been reduced by Rs. 3,862,677,744.

The impact of the correction is summarized below;

Description	Amount (Rs.)
Decrease in exchange gain for 2024	3,862,677,744
Decrease in profit for the year 2024	3,862,677,744
Decrease in General Fund as at 1 January 2025	3,862,677,744

The above correction has no impact on the cash flows.

***Note: Deposit Account No. 6000/0000/00/0010/00/1294/000**

The Chief Accountant of the Central Bank of Sri Lanka, by his letter dated 09.01.2026, has informed that a sum of USD 5,266,424.38 equivalent of disaster relief contribution received in foreign currency terms to the assigned Nostro Accounts of CBSL for disaster contribution purpose as at 31.12.2025 on behalf of the government of Sri Lanka has been transferred to the DST's Dollar Account No. 45013 on 09.01.2026.

Accordingly, the disaster relief contribution of Rs 1,631,108,006.04, the equivalent of USD 5,266,424.38, which was received in the DST Dollar Account No. 45013 on 09.01.2026, has been recorded under Deposit Account No. 6000/0000/00/0010/00/1294/000 on 09.01.2026.

Explanatory Notes

01. Note 14 – Statement of Non-Current Assets

As stated in the Statement of Financial Position as at 31st December 2025, 21 Special Spending Units, 25 Government Ministries, 98 Departments and 25 District Secretariatsz have reported non-financial assets at cost or revalued amount amounting to Rs. 5,078,666,604,213. Balance part of the non-financial assets of the above mentioned institutes if any, and other Ministries / Departments which have not yet been recorded the non-financial assets will also be bringing to the same system gradually, to be completed by 2026.

02. Note 26(II) – Foreign Loan Balances (8343)

Foreign loans are included in the loans outstanding as at 31.12.2025 which are recorded in the CS-DRMS up to the cutoff date of 29.01.2026.

03. Schedule V – Total Revenue and Expenditure of Provincial Councils

Total Revenue of Rs. 127,873,394,465 and Total Expenditure of Rs. 579,023,330,181 were reported in respect of 9 Provincial Councils (Provisional figures) during the financial year.

04. Adopt New Accounting Policies

01. Treasury Bond Face Value

Previously adopted accounting method on reporting Treasury Bonds was revised from the year 2016. From 2016 and onward Treasury Bonds are recorded on their face value, and required adjustments have been done accordingly. Adjustments were made in the year 2021 for accounting of accumulated discount value of the Treasury bonds issued prior to 2016.

02. Investment on Public Infrastructure Development

The amount of expenditure utilized for generation of assets out of the expenditure incurred during the year 2025 under the finance codes relating to foreign loans namely, Foreign Loans (12), Reimbursable Foreign Loans (14) and Counterpart Funds (16) are identified as the Government's investment in infrastructure development. Such amount is reported in the Financial Position under "Investment on Public Infrastructure Development".

Assets generated in relation to this investment are included in the balance sheets of the respective State-Owned Enterprises (SOEs) or Government agencies by whom such assets are being maintained.

05. Capital Contributions to State Owned Enterprises

Note No. 17

5.1 Shareholdings in Government Owned or Other Companies

5.1.0 During the fiscal year 2025 capital infusions were made into following Government Owned Companies through the Equity Vote of the Department of Public Enterprises despite the absence of share certificates.

Financial Year 2025 – Capital Infusion was made but not issued the corresponding share certificate

5.1.1 Investment in shares of the Canwill Holdings (Pvt) Ltd

In terms of Cabinet Decision No. 23/1899/604/187 dated 09 October 2023, issued pursuant to the Cabinet Memorandum titled "Mechanism to Transfer the Investment in Subsidiaries of Sri Lanka Insurance Corporation to the Secretary to the Treasury," the ownership of Canwill Holdings (Pvt) Ltd held by Sri Lanka Insurance Corporation (SLIC) was transferred to the Secretary to the Treasury in 2024. Accordingly, 1,085,294,117 shares, representing 52.05% of the Company's issued share capital, were issued to the Secretary to the Treasury at a designated value of Rs. 10,399,358,000. This amount remains receivable from the General Treasury in the books of SLIC.

Further, in terms of Cabinet Decision No. 25/1273/804/097-I dated 13 July 2025, based on the Cabinet Memorandum titled "Transfer of Shares Held by Litro Gas Lanka Ltd in Canwill Holdings (Pvt) Ltd to the Secretary to the Treasury," approval was granted to transfer the shareholding of Litro Gas Lanka Ltd in Canwill Holdings (Pvt) Ltd to the Secretary to the Treasury at a carrying value of Rs. 5,000,000,000. The corresponding amount remains receivable from the General Treasury as at 31 December 2025 in the books of Litro Gas Lanka Ltd.

Moreover, in terms of Cabinet Memorandum No. 25/2327/804/097-IV dated 21 November 2025, submitted by the Hon. Minister of Finance, Planning and Economic Development, and the corresponding Cabinet Decision dated 15 December 2025 regarding the acquisition of shares held by the Employees' Provident Fund (EPF) in Canwill Holdings (Pvt) Ltd, the Secretary to the Treasury acquired the entire EPF shareholding of 500,000,000 shares for a consideration of Rs. 5,000,000,000. This consideration was settled during 2025.

Accordingly, upon completion of the above transactions, the Secretary to the Treasury became the sole shareholder of Canwill Holdings (Pvt) Ltd, holding 100% of the issued share capital of the Company.

5.1.2 Providing Liquidity Support to the National Savings Bank (NSB) by paying interest

The Cabinet of Ministers, at its meeting held on 16 May 2023, under Cabinet Memorandum No. 23/0928/604/097, granted approval for the Secretary to the Treasury to pay an appropriate amount of interest subsidy to the NSB from the total interest subsidy calculated on the low yield held to maturity portfolio as of 31st March 2023, to ensure the solvency of the Bank.

Accordingly, the General Treasury granted approval to recognize a special interest subsidy of Rs. 13,673 million in the books of the NSB during the first three quarters of 2023 and instructed that it should be set off against the levy imposed once the Bank's performance improved. Out of this amount, a sum of Rs. 1,088 million was settled during the year 2025. Accordingly, the outstanding interest subsidy payable balance as at 31 December 2025 amounts to Rs. 12,584 million

5.1.3 Settlement of Interest accrued on outstanding balance to National Savings Bank (NSB) under the senior citizen special interest rates fixed deposit scheme

The Cabinet of Ministers as its meeting held on 19th of December 2022, under Cabinet Memorandum No.: 22/2130/604/098, has given approval for the Secretary to the Treasury to settle the interest accrued on outstanding balance to NSB under the senior citizen special interest rates fixed deposit scheme.

Accordingly, the General Treasury has given approval to record of interest accrued of Rs. 5,506.77 million in the book of NSB. The interest accrued for the senior citizen special interest rate fund deposit scheme is Rs. 5,506.77 million as at 31st December 2025.

5.1.4 The following table reflects the number of shares issued as scrip dividend and directly deposited by the respective PLCs to the CDS account maintained by the Secretary to the Treasury in CDS. However, these transactions were not promptly recorded in the main ledger accounts within the same financial year. Accordingly, the identified allotment of shares have been recorded as follows.

Description	Number of Shares	The Consideration for which the shares were issued Rs.	Value of the Investment Rs.
Commercial Bank of Ceylon PLC (Tradeable shares in CDS)			
Shares subscribed at a Right Issue in 2017 and deposited in the CDS account in 2025	3,164	113.60	359,430.40

5.1.7 List of State Owned Enterprises (SOEs) that Declared dividends but had not remitted to the Treasury by the Year end 2025

	Institute	Financial Year	Dividend Amount Declared (Rs.)	Remitted to the General Treasury (Rs.)	Due amount as at 31.12.2025 (Rs.)
1	National Salt Limited	2024/2025	60	-	60

5.1.8 Government Commitment to Service Sri Lankan Airline's Loans

- Cabinet decision dated 07.10.2025 on the Cabinet Memorandum No. 25/1884–804/122- I on "Finalization of Tripartite Agreements for servicing of selected debts of Sri Lankan Airlines" – approval was granted to SLA debt servicing (bi-annually during the next 05 years on equal installments with the applicable interest rates of 06% on Dollar loans and SLFR+1% on Rupee loans).

Bank of Ceylon (BOC) – Total outstanding loans as at 30 April 2025
USD 106,946,105.94
LKR 13,256,075,342.47

People's Bank (PB) – Total outstanding loans as at 30 April 2025
USD 111,109,814.13
LKR 20,296,032,921.72

- Cabinet approval was granted the Department of State Accounts to disclose the Government's commitment to service SLA loans from 2025 until full settlement.
- Restructuring of Sri Lankan Airlines debts has been approved in the 2025 and 2026 Budget Speeches.
- Accordingly, the 1st installment of LKR loans was transferred as below,
  - For BOC – Rs. 7,695,297,873.54
  - for PB – Rs. 8,767,324,353.48
- The 1st installment of USD loans was released
  - Rs.8,813,202,766.03 equivalent to USD 28,456,297.57 at Ex Rate Rs. 309.7101

  (BOC- USD 13,956,466.83, PB – USD 14,499,830.74)
- Accordingly, the commitment since 2026 onwards is as below:

Bank	LKR Loan	USD Loan
BOC	11,930,467,808.22+interest	96,251,495.34+interest
PB	18,266,429,629.55+interest	99,998,832.72+interest
Total	30,196,897,437.77+interest	196,250,328.06+interest

	Others
34	Sri Lanka Savings Bank

06. Nature and Purpose of Reserves

The Government creates and maintains reserves in terms of specific local requirements.

07. Consolidated Fund

The funds of the Republic not allocated by law to specific purposes form the Consolidated Fund into which shall be paid the produce of all taxes, levies, rates and duties and all other revenues and receipts of the Republic not allocated to specific purposes.

08. Contingency Fund

A Fund Created by Parliament by law for the purpose of providing for urgent and unforeseen expenditure.

09. General Fund

The balance of the General Fund represents the cumulative financial performance of the Government after accounting for all receipts and payments through the Consolidated Fund and the adjustments recorded in Nominal Accounts. Surpluses or deficits arising during the reporting period are reflected directly in the General Fund balance.

10. Foreign Loan Adjustment Accounts

Accounts created for recording loan receipts and reimbursements for expenditure incurred.

11. Public Service Provident Fund Account

A Fund established to afford Provident Fund benefits to those public servants who are not pensionable.

12. Teachers Widows Orphans Pension Fund

A fund established for the payment of pension to widowers and orphans of teachers who are entitled to the payment of pension under the Minutes of pension.

දිනය திகதி Date 30 May 2026

Secretary

Ministry of Finance, Planning and Economic Development

Report of the Auditor General on the Financial Statements of the Government for the year ended 31 December 2025, in terms of Sections 11(1) and 15(1) of the National Audit Act, No. 19 of 2018

---

1. Financial Statements

1.1 Qualified Opinion

The audit of financial statements of the Government for the year ended 31 December 2025 comprising the statement of financial position of the Government as at 31 December 2025 and the statememnt of financial performance, statement of changes in net assets/equity and cash flow statement for the year then ended and notes to the financial statements including information of significant accounting policies was carried out under my direction in pursuance of provisions in Article 154(3) of the Constitution of the Democratic Socialist Republic of Sri Lanka read in conjunction with provisions in Section 15 of the National Audit Act, No. 19 of 2018. The Annual Detailed Management Audit Report will be issued to the Chief Accounting Officer in terms of Section 11(2) of the National Audit Act, No. 19 of 2018 (as amended) in due course. My report to Parliament in pursuance of provisions in Article 154(6) of the Constitution of the Democratic Socialist Republic of Sri Lanka read in conjunction with Section 10 of the National Audit Act, No. 19 of 2018 will be tabled in due course.

In my opinion, except for the effects of the matters described in the Basis for Qualified Opinion Paragraph of this report, the accompanying financial statements of the Government give a true and fair view of the financial position of the Government as at 31 December 2025 and its financial performance and cash flows for the year then ended in accordance with Generally Accepted Accounting Principles.

1.2 Basis for Qualified Opinion

1.2.1 Preparation and Presentation of the Government Financial statements

The following observations are made.

(a) In terms of Section 47(1) of the Public Finance Management Act, No. 44 of 2024, the financial statements of the Government. must be prepared in accordance with the standards developed based on International Public Sector Accounting Standards. However, as the Minister of Finance did not specify a date for its implementation in terms of Section 1.3 (a) of the said Act, the financial statements of the Government for the year under review had not been prepared in that manner.

(b) Adjustments relevant to the year under review including surplus or deficit of the year under review, other retrospective adjustments should be included in the opening balance of the General Fund shown in the statement of changes in net assets/equity which is prepared based on accounting principles. However, the closing balance of the General Fund, as presented in the statement of changes in net assets/equity, had been computed by excluding foreign exchange gains and variation balances in the Net Assets Adjustment Account that should have been set off with the variations in the Consolidated Fund during the year under review, and by adjusting the effects arising from assets and borrowings as retrospective adjustments. As a result, adjustments that are not to be retrospectively recognized had been indirectly incorporated into the Statement of Changes in Net Assets/Equity, and adjustments made during the year under review relating to financial and non-financial assets, foreign and domestic loan balances, and error corrections had been indirectly adjusted for the General Fund. Accordingly, it was observed that the Statement of Changes in Net Assets/Equity had not been prepared in compliance with accounting principles, and thus, users of the financial statements are not able to obtain a clear understanding of those adjustments.

(c) During the year under review, Rs.24,640 million was capitalized as interest on foreign debt restructuring. Although there was no cash inflow or outflow in relation to this transaction, the amount was incorrectly presented as cash inflow under financing activities and cash outflow under operating activities in the cash flow statement, considering it as foreign debt receipts and interest payments for the year under review.

(d) The amount of Rs. 18,098 million paid during the year under review to settle the loans taken by the State Owned Enterprises based on treasury guarantees had been incorrectly classified as repayment of domestic loans in the cash flow statement and in the Note 14 of the budget performance and deficit financing statement. Furthermore, the said payment had been incorrectly debited indirectly to the general fund without being recorded as an expense in the statement of financial performance.

(e) The closing balance of the general fund was calculated through the statement of changes in equity/net assets in the financial statements of the Government and presented in the statement of financial position. Reference was made to Note 25 to the General Fund in the statement of financial position again and the General Fund and the Consolidated Fund were presented in a concise and comparative manner. It was observed that since this relationship is presented

analytically and comparatively in a separate financial statement through a comparative statement, it is not necessary to present it again in the financial statements prepared based on accounting principles, which could lead to confusion for users of the financial statements.

(f) Although the value of investment activities in the cash flow statement of the financial statements of the Government is Rs.537,025 million, the relevant assets acquired during the year under review included in notes number 14,15,17,20 and 26 of the financial statements of the Government had increased by Rs.540,649 million on a net basis. Accordingly, a net change of Rs. 3,623 million was observed and this change was indirectly adjusted to the General Fund in the statement of changes in equity/net assets.

(g) According to the cash flow statement, although Rs.113,644 million was spent on capital contribution to state owned enterprises during the year under review, Rs.186,015 million was capitalized to the capital contribution account. Accordingly, Rs.72,371 million was overcapitalized to the capital contribution account without any cash outflow. This difference was included in the net change in the general fund in the statement of changes in equity/net assets.

(h) As per Note 14 to the financial statements of the Government, transfers of assets (Transfer Out) were shown in the asset disposal column (Disposal), therefore, it was not possible to separately identify the assets actually disposed of and the transfers by the Government during the year under review.

(i) Although the negative value of the Consolidated Fund as at 01 January 2022 of Rs.990,491 million and the negative value of the Net Asset Adjustment Account of Rs.14,040,298 million were recorded as the General Fund in the Statement of Changes in Equity/Net Assets from the year 2023, adequate disclosures had not been made in the financial statements of the year under review regarding the need to do so. Furthermore, the balance as at 31 December 2025 was Rs.21,778,883 million.

(j) Although the foreign exchange gain or loss arising on the transaction of monitory assets denominated in foreign currency into local currency should be adjusted in the annual financial performance statement in accordance with accounting principles, it was observed that the cumulative value of Rs.53,602 million arising from the transaction of monitory assets denominated in foreign currency into local currency was not adjusted annualy, but was recorded in the foreign debt adjustment account and presented as a fund account in the statement of financial position, which is not in accordance with accounting principles and may be misleading to the users of the financial statements. Furthermore, the existence of a cash inflow of Rs. 1,491 million in respect of this account in the cash flow statement for the year under review was a matter of concern during the audit.

(k) Although the value of Rs. 3,587 million received from the sale of non-financial assets during the year under review was matched with their cost and the resulting gain or loss should have been adjusted to the statement of financial performance, the total value received from the sale of non-financial assets was recognized as other income.

(l) Although adjustments should be made to the statement of financial performance prepared on the basis of accounting for foreign exchange gains or losses arising from the translation of financial items denominated in foreign currencies into local currency, under Note 27.2, a value of Rs. 123 million was incorrectly stated under the statement of financial position as the liability account under the name Parity Variance Account on Crown Agent Account.

(m) Although the capital installment payment value of Rs. 341 million for leased vehicles during the year under review should be shown as a cash out flow under financing activities in the cash flow statement, it was shown as a cash out flow under investing activities.

(n) Although the cash flow generated from financing activities in the cash flow statement included Rs.36,150 million as grants, that value included grants of materials and equipment worth of Rs.18,241 million.

(o) In the financial statements of the Government, excluding land and work in progress, depreciation provision had not been made in accordance with the prudent accounting concept by systematically allocating the depreciable value of the assets over their useful lives, totaling Rs.1,191,764 million. Furthermore, although the residual value and useful life of these assets should be reviewed at least at the end of each financial year, this had not been done. Accordingly, the users of the financial statements of the Government had lost the opportunity to obtain a precise understanding of the carrying amount of these assets after deducting the accumulated depreciation and accumulated impairment losses.

(p) The assets and liabilities included in the statement of financial position were not classified as current and non-current. As a result, users of the financial statements and interested parties were deprived of the opportunity to gain a clear understanding of the amount of external liabilities that the government had to settle in the forthcoming year.

(q) Although the total external liabilities were Rs.31,494,879 million as per the statement of financial position, the total external liabilities exceeded the total assets by Rs.21,270,280 million as of 31 December 2025, due to the total assets being only Rs.9,774,599 million.

1.2.2 Foreign Public Debt

The following observatins are made.

(a) It was disclosed under Explanatory Note 02 to the Financial Statements of the Government for the year 2024 that there was a difference of Rs.1,070 million or unaccounted disbursements in relation to 03 loans as of 31 December 2024 between the loan balances in Note No. 26 (ii) of the Financial Statements of the Government and the balances contained in Stock and Flow Report No. 01 of the Debt Management System, and this was also confirmed by the then Director General of the Treasury Operations Department.

(i) However, a net difference of Rs.2,672 million was observed when comparing the opening balances of Stock and Flow Report No. 01 of the Debt Management System as at 01 January 2025 and the balances of Note No. 26(ii) of the audited Financial Statements of the Government as at 31 December 2024. Accordingly, in addition to the unaccounted loan balances indicated above, it was observed that there were further disbursements that

were not recorded in Stock and Flow Report No. 01 of the Debt Management System or in the Financial Statements of the Government as at that date, although they were related to the year ending 31 December 2024. Accordingly, the correct disbursement period of these loan disbursements was problematic.

(ii) Although the accounting policy for recognizing expenses under the significant accounting policies of the Financial Statements of the Government states that all expenses are accounted for in the period in which the payments are made, it was a matter of question during the audit whether the expenses incurred in relation to the disbursements adjusted to the opening balances of the Stock and Flow Report No. 01 of the Debt Management System were applicable to the year under review. Similarly, it was a further matter of question as to which period the interest on these loans should be calculated.

(iii) The Director General of the Treasury Operations Department had confirmed in her letter No. TOD/FD1/1/7/vol- vii dated 03 March 2026 that there was no foreign loan proceeds received during the year 2025 which were not accounted for in the year 2025. However, as indicated in (a)(i), it was observed that there is a high potential for unaccounted disbursements received during the year 2025 but not recorded in the Stock and Flow Report No. 01 of the Debt Management System or in the Financial Statements of the Government.

(iv) Although the borrowings related to 02 loans of these had been accounted for in the year 2025, no disclosure had been made in this regard in the Financial Statements of the Government. Further more, although it is stated in the accounting policy relevant to the recognition of expenses under the significant accounting policies of the Financial Statements of the Government that all expenses have been accounted for in the period in which the payments have been made, it was a questionable issue during the audit whether the expenses incurred by obtaining loans related to these 02 loans are applicable to the year under review.

(v) The above-mentioned letter from the Director General, Department of Treasury Operations had not mentioned the action taken in respect of the outstanding other loan of SAR 112,034 relating to Loan No. 2012025 as at 31 December 2024. However, an amount equivalent to this loan, or SAR 112,034, had been added to the foreign currency of the original loan only through the adjustment column provided in Note 26 (ii). The value of SAR 112,034, which was shown as an unaccounted disbursment in the year 2024, was added to foreign currency only through the adjustment column in Note No. 26 (II) without considering that value as a disbursement in foreign and local currencies, which is the normal method of accounting for other unaccounted foreign debts, and the reasons for increasing only its foreign currency balance as of 31 December 2025, and no disclosure was provided in the financial statements of the Government for the year under review. It was also observed that the foreign exchange loss calculated in relation to the closing loan balance is not correct due to the addition to the adjustment column in this manner.

(b) In Note 26 (ii) of the Financial Statements of the Government, under Sub-No. 740 and under International Monetary Fund (IMF), without a loan number, Rapid Financing Instrument Arrangement Under Sri Lanka's 2023 – 26 IMF EFF Programme SDR 150.5 million was mentioned as borrowings during the reporting year amounting to SDR 150.5 million or

Rs.63,632 million and the balance of that loan as at 31 December 2025 was SDR 150.5 million or Rs.63,893 million. However, no such borrowing and closing balance was observed in the Stock and Flow Report No. 01 as at 31 December 2025 in the debt management system. The presence of information in the Financial Statements of the Government that was not available in the source system used to obtain information on foreign debt for the Financial Statements of the Government was a questionable issue during the audit.

(c) Under Note 26 (ii) of the Financial Statements of the Government, the borrowing in respect of Loan No. 2013047 had been obtained in two types of foreign currencies and the respective values of those foreign currencies had been incorrectly converted to each other.

(d) Under Note 26 (ii) of the Financial Statements of the Government, an amount of SDR 2,064 had been deducted under the adjustment column in respect of Loan No. 1990009 and no disclosure was made in this regard in the Financial Statements. It was observed that due to this adjustment, the foreign exchange loss calculated in respect of the loan balance was not correct.

(e) When comparing the results of the year under review in the Stock and Flow Report No. 01 of the Debt Management System and Note No. 26 (ii) of the Financial Statements of the Government, it was observed that although the foreign currency value was the same, the local currency value was not the same. The details are as follows.

(i) The total value of the disbursement in respect of 12 loan agreements was overstated by Rs.53 million in the Stock and Flow Report No. 01.

(ii) The total value of the disbursement in respect of 17 loan agreements was overstated by Rs.359 million in the Financial Statements of the Government.

(iii) As a result, it was observed that the foreign exchange loss calculated in respect of these loan agreements in the Financial Statements of the Government and in the Stock and Flow Report No. 01 also took different values.

(f) When comparing the disbursement for the year under review in the Stock and Flow Report No. 01 of the Debt Management System and Note No. 26 (ii) of the Financial Statements of the Government, there were differences in the foreign currency value and local currency value of the disbursement in respect of 04 loan agreements. Accordingly, the total amount of Rs.2,014 million was overstated in the Financial Statements of the Government.

(g) Negative loan disbursement totaling USD 266,000 or Rs.80 million were observed in the Financial Statements of the Government and Stock and Flow Report No. 01 in respect of 02 loan agreements.

(h) Although disbursement totaling Rs.1,171 million were disclosed in the Financial Statements of the Government, such disbursement were not included in the Stock and Flow Report No. 01 in respect of those loan agreements.

(i) The following observations are made in respect of loan number 2024347 as stated in the International Sovereign Bonds mentioned in Note No. 26(iv) of the Financial Statements of the Government.

(i) According to the Stock and Flow Report No. 01, the opening balance related to the loan number as at 01 January 2025 was USD 1,532 million or Rs.448,353 million. However, according to the Financial Statements of the Government, the opening balance on that date was USD 1,544 million or Rs.451,622 million. Accordingly, a difference of USD 11 million or Rs.3,269 million was observed. The reasons for this difference were not disclosed in the financial statements.

(ii) Although the Stock and Flow Report No. 01 states that USD 330 million or Rs.98,404 million was paid in respect of this loan balance during the reporting year, the value of the payments made as per the Financial Statements of the Government was USD 341 million or Rs.101,863 million. Accordingly, a difference of USD 11 million or Rs. 3,459 million was observed. The reasons for this difference were not disclosed in the financial statements.

(j) During the year under review, a total of USD 266,080 and SDR 900,090 or a total of Rs. 449 million were returned to the relevant borrowers in respect of 05 foreign loans and the reasons for this were not disclosed in the financial statements. Furthermore, it was further observed that interest on the loans may have to be paid for the period in which the loans were held.

(k) In the accounting of the loan balance of Rs. 518,293 million related to 08 types of loans that were maintained entirely outside the statement of financial position of the government in the year 2022, no assets acquired by obtaining those loans had been identified in the financial statements of the government as at the end of the year under review. Accounting for the loan balance in this manner without recognizing the relevant assests had also led to an increase in the negative balance of the general fund in the statement of financial position.

(l) Although according to the Stock and Flow Report No. 01 of the Debt Management System, it was stated that the loans relating to Loan Nos. 2019019 and 2019020 were obtained from the Asian Infrastructure Investment Bank, according to the financial statements of the government, it was stated that the loans were obtained from the Agency Francaise De Development.

(m) In the Stock & Flow Report No. 01 of the Debt Management System, USD 141,740 or Rs. 28 million had been paid under other payments in relation to Loan No. 2025323. However, the foreign currency and value of the payment made in relation to this expenditure was stated as AUD 141,739.95 in the invoice No. SIN 002418 dated 11 November 2025. Accordingly, the correct foreign currency used in relation to this expenditure was a matter of question during the audit.

(n) Although the loan balance as at 31 December 2025 was USD 12,554,350 as per the Financial Statements of the Government and Stock & Flow Report 01 in relation to Foreign Loan No. 2014027, as per the Loan Balance Confirmation Letters, it was USD 5,570,304 on that date. Accordingly, a difference of USD 6,984,046 was observed. Similarly, in relation to Foreign Loan Balances No. 2016021 and 2016039, as per the Financial Statements of the Government and Stock & Flow Report 01, the loan balance as at 31 December 2025 was EURO 1,171,957 and 1,999,452 respectively, as per the Loan Balance Confirmation Letters on that date, it was EURO 1,180,132 and 2,012,375 respectively. Accordingly, a total change of EURO 21,098 was observed.

1.2.3 Rental and Work advances

The following observations are made.

(a) Although the financial statements of the Government had shown that there was a closing balance of Rs. 22 million on 01 January 2025 under Head 337 Cinnamon Development Department Advance Account No. 9188-337-0-2-0-1-0, such a balance was not included in the financial statements of the respective department and only a blank record was included.

(b) The ACA 5(B) statement relating to the Rent and Work Advances Account was not included in the financial statements of Head 103 – Ministry of Defence. However, according to the Financial Statements of the Government, receipts and credits amounting to Rs. 600,000 were recorded under Rent and Work Advances Account No. 9188-103-0-1-0-5-0 of the Ministry, during the year under review. Further, under Account No. 9188-103-0-1-0-6-0, credits amounting to Rs. 14 million had been recorded during the year under review, with a closing balance of Rs. 14 million as at 31 December 2025.

(c) According to ACA 5(B) statement of the financial statements of Head 219 – Department of Sports Development for the year under review, a balance totaling Rs.87 million relating to 12 projects existed under Rent and Work Advances Account No. 9188-219-0-2-0-33-0 as at 31 December 2025. However, no corresponding balance relating to that Department was reflected within the Rent and Work Advances balances reported in the Financial Statements of the Government for the year under review.

(d) Although the ACA 5(B) statement relating to the Rent and Work Advances Accounts in the financial statements of Head 270 – Ampara District Secretariat for the year under review consisted only of a blank report, the Financial Statements of the Government indicated a closing balance of Rs. 11 million under Account No. 9188-270-0-2-0-1-0 in respect of that expenditure Head.

(e) A total balance of Rs. 2,847,756 which comprised of Rs.1,222,196 under Account No. 9188-122-0-2-0-1-0 and Rs. 1,625,560 under Account No. 9188-122-0-2-0-2-0 had been reported in the Financial Statements of the Government as at 31 December 2025 in relation to Head 122 – Ministry of Tourism and Lands, which had been discontinued as an expenditure Head under the 2025 Budget Estimates. However, the parties from whom these advance balances were recoverable could not be identified during the audit.

1.2.4 Capital Contribution

The following observations are made.

(a) It was observed a differance of 7,382 million in the Government's capital contribution between the direct balance confirmations received in respect of 09 State owned Enterprises and financial statements of the Gpovernment as at 31 December 2025.

(b) When comparing the financial statements of 04 State Owned Enterprises with the financial statements of the Government, it was observed that the total capital contribution as per the financial statements of those institutions as at 31 December 2025 was Rs. 1,174,610 million,

while as per the financial statements of the Government, the balance was Rs. 1,197,490 million, resulting in an overstatement of the capital contribution in the financial statements of the Government as at 31 December 2025 by Rs. 22,880 million.

(c) According to the information submitted by 02 state-owned companies, the total value as per the shares owned by the Government and their nominal value as at 31 December 2025, was Rs.132 million. But, it was stated as Rs.1,272 million in the financial statements of the Government. Accordingly, the capital contribution in the financial statements of the Government as at 31 December 2025 was overstated by Rs. 1,140 million more.

(d) Although the total value as per the number of shares owned by the government in 06 state-owned companies and their nominal value as at 31 December 2025 was Rs.15,976 million, it was stated as Rs.15,522 million in Note No. 17 of the financial statements of the Government. Accordingly, the capital contribution of the Government in the financial statements as at 31 December 2025 was understated by Rs.454 million.

(e) Although a capital contribution of Rs. 40,048 million had been made by the Government in respect of 16 other State-owned companies as at 31 December 2025, the number and value of shares held by the General Treasury in return had not been included in the financial statements of the Government.

(f) According to the financial statements of the Government, the increase in capital contribution of State-owned enterprises during the year under review was Rs. 186,015 million, of which Rs. 35,669 million or 19 percent consisted of funds released from the General Treasury for recurrent expenditure of each institution, namely loan and loan interest payments, salary and wage payments and statutory payments.

(g) Litro Gas Lanka (Pvt) Ltd had transferred 500,000,000 shares of Canwill Holdings (Pvt) Limited to the Secretary to the Treasury by Cabinet Decision No. 25/1273/804/097-1 dated 13 July 2025 and in connection with this share transfer, Canwill Holdings had also issued the share certificate for the share ownership to the Secretary to the Treasury on 31 December 2025. However, the value of this share investment of Rs. 5,000 million had not been accounted for as capital investment in the financial statements of the government as at 31 December 2025.

1.2.5 Foreign Grants

Although it is stated in accordance with State Accounts Circular No. 30/94 dated 20 April 1994 that all transactions related to foreign grants should be carried out by the Director General of the Department of External Resources of the Treasury, according to information obtained on a sample inspection, foreign grants totaling Rs. 656 million had been directly received by 09 institutions during the year 2025 without the informing to the Treasury, and provisions had not been made for those grants and steps had not been taken to include them in the financial statements.

1.2.6 Imprest Accounts

A net variation of Rs. 338 million was observed in comparing the imprest account balances as per the financial statements of the Governement as at 31 December 2025 with the balance as per the financial statements (ACA -3) of the respective institutions.

1.2.7 Deposit Account

The following observations are made.

(a) It was observed that 45 deposit accounts held by 14 institutions had a total deposit balance of Rs. 1,812 million which was more than 2 years.

(b) When comparing the deposit balances in the financial statements of each institution, 6 institutions had shown a total opening balance of Rs. 2,233,629 in the financial statements of the Government of deposits in the year under review and a total balance of Rs. 1,328,572 as at 31 December 2025.

1.2.8 Treasury Guarantees

The following observations are made.

(a) The Treasury had paid a total of USD 14,749,994 and Rs. 13,529 million as loan installments to the Bank of Ceylon, People's Bank and National Savings Bank for loans obtained by 08 State owned Enterprises on Treasury Guarantees and Letters of Comfort issued in 2023 or earlier by way of USD 10,000,000 and Rs. 10,517 million as loan capital repayments and USD 4,749,994 and Rs. 3,012 million as loan interest payments during the year under review. Accordingly, it was further observed that no assessment of the ability to repay had been made while issuing Treasury Guarantees and Letters of Comfort for loans and extending the period.

(b) Thus, although the amount of Rs. 18,098 million paid by the Treasury in the year under review for the settlement of Treasury Guarantees and Letters of Comfort was not a domestic loan to be accounted for in the financial statements of the Government, it was mistakenly shown as a repayment of domestic loans and was indirectly adjusted to the General Fund without adjusting the deficit of the year under review, resulting in an understatement of the deficit of the year under review by Rs. 18,098 million

(c) According to the balance confirmation letters obtained regarding the Treasury Guarantees and Letters of Comfort issued by the Treasury on behalf of the Sri Lanka Engineering Corporation, 03 Treasury Guarantees valued at Rs. 2,399.99 million had been provided to the Bank of Ceylon. However, according to the financial statements of the Government, only 02 Treasury Guarantees valued at Rs. 2,300 million had been provided in return.

(d) During the examination of the values of Treasury Guarantees issued to two commercial banks on behalf of the National Water Supply and Drainage Board, differences totaling Rs. 886.84 million were observed between the values stated in the financial statements of the Government and the values included in the financial statements of the Board.

1.2.9 Non-disclosures in the Financial Statements

The folowing observations are made.

(a) The Ministry of Finance, Planning and Economic Development had identified that USD 1,091,419 or Rs. 333 million was paid to third parties who were not lendors in respect of 04 foreign loans during the year under review. This amount was included in the foreign loan interest expense in the financial statements of the Government. In addition, USD 1,418,011 was paid to such third parties in January 2026, bringing the total payment to such third parties to USD 2,509,430. The amount paid to these third parties was not disclosed in the financial statements.

(b) In accordance with the policy decision issued by the then Ministry of Finance, Economic Stabilization and National Policies on 12 April 2022 to temporarily suspend foreign debt payments, a total of Rs. 278,187 million in principal and Rs. 88,568 million in interest payments were suspended in respect of 185 loan agreements from 13 April 2022 to the end of the year under review. However, no disclosure had been made in the financial statements of the Government regarding this. Moreover, it was further observed that due to the temporary suspension of loan repayments, there is a risk of having to pay a higher value than the normal commitment fee value due to delay in loan repayments when paying the unutilized balance in relation to the above loan agreements from 12 April 2022.

(c) It was observed that no disbursements were received in 2025 in relation to the loans of USD 292,100,000 or Rs. 119,562 million contracted in 2025, and the loans contracted but remained undisbursed were not disclosed in the financial statements.

(d) According to the CS-DRMS Report 300 dated 28 February 2026 received from the Public Debt Management Office, it was observed that as of 31st December 2025, a total of Rs. 446,459 million was due as principal amount of Rs.285,627 million and Rs. 160,833 million as interest amounting to Rs. 285,627 million in respect of the restructured foreign loans. However, this was not disclosed in the financial statements of the Government.

(e) It was observed that there was an amount of Rs. 227 millon in the financial statements of the University of Kelaniya as at 31 December 2025 as Cash Balances- Treasury Funds. However, this was not disclosed in the financial statements of the Government.

(f) Although the sub-loan interest receivable for more than 05 years under the sub-loan agreements in respect of 03 institutions was Rs. 912 million, it had not been disclosed in the Financial Statements of the Government.

(g) The commitment and liability balance in the Financial Statements of the Government had been prepared using only the balances as per the SA 92 format under the CIGAS programme applicable to each Department, Ministry and other expenditure units and as a result, commitment and liability balance of Rs. 1,562 million which was not recorded under the CIGAS programme and exceeded the provision limit had been omitted in the disclosures in the Financial Statements of the Government.

(h) Although Rs.4,730 million was shown as non-operating accounts under Note 28.2 of the Financial Statements, age analysis of the same and the reasons for considering it as inactive were not presented to the audit.

(i) The foreign currency value of the Domestic Dollar Bond loan balance included in the domestic borrowings presented in Note 26 of the Financial Statements of the Government as at 31 December 2025 was not disclosed in the financial statements.

1.2.11 Evidence not submitted for audit

The following observations are made.

(a) Although a balance of Rs. 3,863 million was debited to the foreign debt adjustment account in the statement of financial position during the year under review, sufficient and appropriate evidence to verify the reason for such debiting was not presented to the audit.

(b) Due to the fact that information on Government assets damaged by Cyclone Ditwa was not presented to the audit, it was not possible to verify the adjustments to the property, plant and equipment balance included in the financial statements during the year under review.

(c) Although the total value of property, plant and equipment in the audited government financial statements as at 31 December 2024 was Rs. 4,563,167 million, this balance as at 01 January 2025 of the year under review was Rs. 4,327,325 million. Accordingly, a difference of Rs. 235,842 million was observed between the closing balances of the previous year and the opening balances of the year under review in non-financial assets. Accordingly, sufficient audit evidence was not provided to confirm the impact of this difference on the property, plant and equipment balance at the end of the year under review.

I conducted my audit in accordance with Sri Lanka Auditing Standards (SLAuSs). My responsibilities under those standards are further described in the Auditor's Responsibilities for the audit of the Financial Statements section of this report. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

1.3 Responsibilities of the Chief Accounting Officer for the Financial Statements

The Chief Accounting Officer is responsible for the preparation of financial statements that give a true and fair view in accordance with the Generally Accepted Accounting Principles and provisions of section 38 of the National Audit Act No.19 of 2018 and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error. As per Section 16(1) of National Audit Act No.19 of 2018, the Ministry of Finance, Planning and Economic Development is required to maintain proper books and records of all the government's income,

expenditure, assets and liabilities to enable annual and periodic financial statements to be prepared of the government.

In terms of the subsection 38(1)(c) of the National Audit Act No.19 of 2018, the Chief Accounting Officer ensures that an effective internal control system for the financial control exists and carry out periodic reviews to monitor the effectivesness of such systems and accordingly make any alterations as required for such systems to be effectively carried out.

1.4 Auditor's Responsibilities for the Audit of the Financial Statements

My objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Sri Lanka Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Sri Lanka Auditing Standards, I exercise professional judgement and maintain professional skepticism throughout the audit. I also,

- Appropriate audit procedures were designed and performed to identify and assess the risks of material misstatement in financial statements whether due to fraud or errors in providing a basis for the expressed audit opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.

- An understanding of internal control relevant to the audit was obtained in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control.

- Evaluate the structure and content of the financial statements, including the disclosures and whether the financial statements represent the underlying transactions and events in a manner that achives fair presentation.

- Evaluate the overall presentation, structure and content of the financial statements including the disclosures and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with the Chief Accounting Officer regarding among other matters significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

2. Operational Review

2.1 Laws, Rules and Regulations

The following observations are made.

(a) Public Financial Management Act, No. 44 of 2024

(i) In terms of Section 15 (1) of the Public Financial Management Act No. 44 of 2024, the primary expenditure of the Government shall not exceed 13 percent of the estimated nominal gross domestic product for the relevant financial year. Accordingly, the relevant calculations are as follows.

Year 2025	According to the Budget Performance and Deficit Financing Statements submitted for audit, (Rs. Billion)
Recurrent Expenditure	5,263.0
Government Investment	1,015.8
Total Governmnet Expenditure	6,278.8
Debt interest Payment (-)	(2,500.7)
Primary Expenditure	3,778.1
Estimated Nominal Gross Domestic Production	33,000
Primary Expenditure as a Percentage of Estimated Nominal GDP (%)	11.4

(ii) Parliament passed a supplementary estimate for the 2026 budget, allocating an additional provision of Rs. 500 billion in addition to the budget passed by Parliament for the year 2026, to rebuild the lives of the people and the property damaged by Cyclone Ditwah that affected Sri Lanka in the year 2025. Consequently, according to the economic classification, the primary expenditure as a percentage of the GDP, which was 12.9 percent under the budget estimate passed by Parliament for the year 2026, has increased to 14.3 percent as a percentage of the GDP due to the additional provisions allocated for the reconstruction of the people's lives from the disaster caused by the cyclone, as stated by the Department of Fiscal Policy as deviations from the primary expenditure limit specified in the Medium-Term Fiscal Framework in accordance with Section 16 (1) of the Public Financial Management Act No. 44 of 2024.

(iii) In terms of Section 17 (1) of the Public Financial Management Act, No. 44 of 2024, the aggregate stock of outstanding government guarantees at the end of each financial year shall not exceed 7.5 percent of the average of the gross domestic product of the relevant financial year and the preceding two financial years. Accordingly, the relevant calculations are as follows.

	Rs. Billion
Total outstanding government guarantees at the end of the year 2025	1,079.4
Average Gross Domestic Product	30,128.6
Total outstanding guarantees at the end of the year 2025 as a percentage of average Gross Domestic Product	3.6

(b) Public Debt Management Act, No. 33 of 2024

Following the enactment of the Public Debt Management Act, No. 33 of 2024, which was passed on 18 June 2024 and came into force on 25 November 2024, the Public Debt Management Office was established on 02 December 2024. In terms of the Public Debt Management Act, No. 33 of 2024, the Public Debt Management Office is responsible for management of the debt of the Government, issuance and management of loan guarantees, management of on-lending operations, and recording and reporting of public debt. According to the Press Release issued by the Central Bank of Sri Lanka on 31 December 2025, it was stated that with effect from 01 January 2026, the full responsibility for all the functions performed by the Public Debt Department of the Central Bank of Sri Lanka regarding public debt management will be transferred to the Public Debt Management Office.

(c) Financial Regulations of the Democratic Socialist Republic of Sri Lanka

As per F.R. 373, debit balances of Rs. 41,271 million remained outstanding in 114 imprest accounts of Ministries and Departments, as at 31 December 2025. Out of this, balances of Rs. 102 million relating to 06 expenditure heads had been outstanding for many years, and action had not been taken to settle those balances as at 31 December 2025.

3. Management Activities

3.1 Restructuring of External Debt

The following observations are made.

(a) According to the information submitted to the audit, as at 01 January 2025, the total outstanding balance of JPK 351,743,684 for 87 loan agreements, the outstanding balance of USD 1,057,951,459 for 21 loan agreements, the outstanding balance of EUR 373,148,309 for 37 loan agreements and the outstanding balance of SAR 507,777,850 for 10 loan agreements were remained as a whole. After restructuring, the outstanding balance of was increased to JPK 354,944,802, USD 1,111,947,473, EUR 388,823,987 and SAR 516,951,065, respectively by JPK 3,201,117, USD 53,996,013, EUR 15,675,678 and SAR 9,173,214 respectively.

(b) As at 31 December 2025, Rs. 11,086 million had been icurred on the external debt restructuring process.

(c) According to the information submitted to the audit, 185 loan agreements relating to loan balances of Rs. 473,989 million as at 31 December 2025 obtained from 28 foreign lending institutions were scheduled to be further referred for restructuring process as at 31 December 2025.

3.2 Restructuring of Public Enterprises

The following observations are made.

(a) A "Public Enterprises Restructuring Unit" was established and commenced operations from 01 December 2022 in relation to the restructuring of Public Enterprises. However, as per the Cabinet Decision dated 15 May 2023, although it had been proposed to establish a Holding Company (HOCO) to restructure 72 institutions listed as affiliated companies, such a holding company had not been established even up to 20 May 2026 up to now. However, transaction advisors for the divestment process under the restructuring had ben selected for 8 companies that were listed and proposed to be taken over and restructured by the said holding company, instead of taking over to the holding company. The Cabinet had approved the appointment of transaction consultants for 07 out of the 08 selected institutions in the year 2023 and Rs. 193 million had been paid to the two foreign institutions contracted as transaction consultants in the year 2024 through the General Deposit Account No. 18/62P of the Ministry of Finance. Since the objectives of establishing the "Public Enterprise Restructuring Unit" had not been achieved by 31 December 2024, a new unit named "Public Enterprise Reform Unit" had been established under the Ministry of Finance, Planning and Economic Development by the Cabinet Decision No. අමප/25/2028/804/242 dated 04 November 2025 with the aim of acting as a central coordinating institution for the preparation and implementation of reform strategies for State Enterprises. Further, based on Cabinet Memorandum No. 25/1570/804/185 dated 24 August 2025 regarding the appointment of liquidators to close down non-performing State Enterprises submitted by the Minister of Finance, Planning and Economic Development, approval was given to restructure 32 State Enterprises at the Cabinet meeting held on 03 September 2025. Accordingly, although the name of the unit established for the same purpose had been changed during the year under review and it was observed that Rs. 157.7 million incurred from the year 2023 to the end of the year 2025 and Rs. 193 million paid to consultants for maintaining that unit, expected outcome had not been achived even upto 20 May 2026.

(b) According to Note No. 11 of the Budget Performance and Deficit Financing Statement of the Government Financial Statements for the year under review, the repayment of foreign debt (excluding interest) was reported as Rs.424,482 million. According to CS-DRMS Report 724 received from the Public Debt Management Office, it was stated that the repayment of foreign debt (excluding interest) in the year 2028, when the repayment of the restructured debt will commence, may be Rs.664,523 million. Accordingly, it was observed that the repayment of debt installments (excluding interest) in the year 2028, including the debt restructured as of 28 February 2026, may increase by Rs.240,042 million or about 57 percent compared to the year under review.

3.3 Utilization of Local and Foreign Grants

The following observations are made.

(a) Grants amounting to Rs. 167 million received from 6 donors for 12 projects prior to the year under review but not utilized for the relevant purpose were returned to the donors during the year under review.

(b) The value of foreign grants received as grants by the Government of Sri Lanka as at 01 January 2025 but not utilized for the relevant purpose and remained inactive as at 31 December 2025 was Rs. 182 million.

(c) Although the Treasury entered into agreements with each foreign doners to receive foreign grants from 01 January 2019 to 31 December 2024, the total value of 05 agreements for which foreign grants had not been received by 31 December 2025 was USD 83,145,360.

(d) During the year under review, the Treasury entered into agreements with 16 foreign-funded projects with a total value of USD 12.9 million, Euro 16 million, Renminbi 215.8 million, Korean Won 11,050 million, Japanese Yen 1,563 million, SDR 2.37 million and Rs. 2,372 million in foreign currency to receive foreign grants, but no evidence was presented to the audit that foreign grants had been received in this regard as at 31 December 2025.

(e) Although grants of Rs. 19 million had been received during the year under review as local grants to the Clean Sri Lanka Program under Deposit Account No. 6000-0-0-19-0-050, no amount had been utilized as at 31 December 2025.

(f) Rs. 10 million received as local grants as at 01 January 2025 for the Construction of Divisional Secretariat related to Deposit No. 6000-0-0-19-0-047 had not been utilized for the purpose by the end of the year under review.

4. Performance

4.1 Gross Domestic Product and Estimate of Revenue

(a) The Gross Domestic Product in 2025 was Rs. 32,751 billion, while the Gross Domestic Product in 2024 was Rs. 30,096 billion. Accordingly, as compared to the previous year, the Gross Domestic Product had increased by Rs. 2,655 billion or 8.8 percent.

(b) According to the original estimate of the annual budget approved by Parliament for the year 2025, the government revenue was Rs. 5,096 billion, while in the previous year it was Rs. 4,239 billion. Accordingly, the government revenue was estimated to have increased by Rs. 857 billion, or about 20 percent, compared to the previous year.

(c) According to the Budget Performance and Deficit Financing Statement included in the financial statements of the Government, the government revenue collected in the year 2025 was Rs. 5,480 billion. Accordingly, there was an increase of Rs. 384 billion when compared

to the annual revenue estimate mentioned above. It was an increase of 34 percent when compared to the actual revenue in the year 2024.

4.2 Revenue Surplus

(a) According to the Budget Performance and Deficit Financing Statement included in the financial statements submitted to the audit for the year under review, the revenue deficit of Rs. 1,309 billion in the previous year had turned into a revenue surplus of Rs. 217 billion in the year under review. The highest revenue deficit during the period from 2006 to 2024 was recorded in the year 2023. Although there was a revenue surplus reported only in the year 2025, this surplus was not sufficient to cover the capital expenditure of the government, resulting in an overall budget deficit of Rs. 799 billion. During that period, the revenue collected in every year except the year 2025 had failed to cover the recurrent expenditure of the government. The minimum revenue deficit was recorded in 2007 and was Rs. 43 billion, representing 7.52 per cent of the government revenue collected. The total revenue deficit during this period was Rs.9,061 billion. Domestic and foreign loans and foreign grants were obtained to cover the said deficit. Accordingly, during that period, domestic loans of Rs. 32,359 billion, foreign loans of Rs. 12,827 billion and foreign grants of Rs. 367 billion were obtained, totaling Rs. 45,553 billion. The revenue deficit was financed by percentages ranging from 4.44 percent to 45.59 percent of the loans and grants obtained in each year.

(b) Loan interest payments amounting to Rs. 2,501 billion had been paid during the year under review, representing 47.52 per cent of the total recurrent expenditure. Interest payments in the previous year amounted to Rs. 2,689 billion, or 50 percent of the total recurrent expenditure. Interest payments had decreased by Rs. 188 billion when compared to the previous year. Furthermore, in accordance with the policy decision to temporarily suspend the external debt servicing issued by the then Ministry of Finance, Economic Stabilization and National Policies on 12 April 2022, certain loan installments and interest payments were suspended from 13 April 2022 until the last day of the year under review. However, it was observed that if the relevant payments were made, the interest expense would have increased further. Interest payments, which were Rs. 151 billion in 2006, had increased by 1,556 per cent to Rs. 2,501 billion by 2025. In 2025, out of the Rs. 5,480 billion government revenue collected according to the Budget Performance and Deficit Financing Statement, Rs. 2,501 billion or 45.64 per cent had to be paid as interest payments.

(c) According to the financial statements of the main revenue collecting institutions, namely the Department of Inland Revenue, Sri Lanka Customs, Excise Department and the Department of Motor Traffic, the total outstanding revenue balance due as at 31 December 2025 was Rs. 2,233 billion. Furthermore, the total outstanding revenue balance due to the revenue collecting institutions, namely the Ministry of Ports and Civil Aviation, the Department of Treasury Operations, the Department of Railways, the Department of Pensions, the Department of Registrar of Companies, the Ministry of Defence and the Department of Forest Conservation, at the end of 2025 was Rs.47.75 billion.

(d) The Inland Revenue Department had not collected a revenue of Rs. 2,164 billion for the year 2025. If that revenue had been collected in 2025, the budget deficit for that year could have been completely reduced. Furthermore, the shortcomings in the Revenue Administration Management Information System, the lengthy nature of the arrears tax appeal process, and the lack of a specialized judicial system to implement judicial proceedings regarding the recovery of arrears of taxes had affected the delay in the collection of arrears of taxes by the Inland Revenue Department.

4.3 Budget Deficit

According to the Budget Performance and Deficit Financing Statement include in the Financial Statements of the Government, the budget deficit for the year 2025 was Rs.799 billion, which was 2.44 per cent of the Gross Domestic Product (GDP). The budget deficit for the previous year was Rs. 2,126 billion, which was 7.11 per cent of the Gross Domestic Product. There was a budget deficit throughout the entire period from 2006 to 2025, and the budget deficit which was Rs. 300 billion in 2006 had increased to Rs.2,126 billion by 2024 and subsequently decreased to Rs. 799 billion by the end of year 2025. The highest budget deficit during that period was recorded in 2023 and it was Rs. 2,584 billion.

4.4 Governement Borrowings

(a) According to the financial statements of the Government, the debt balance payable by the government at the end of 2025 was Rs. 31,111 billion. This balance consisted of Rs. 19,435 billion of domestic debt and Rs. 11,676 billion of foreign debt. In 2024, the government's debt balance was Rs. 29,628 billion. Accordingly, the debt balance in 2025 had increased by Rs. 1,483 billion or 5 per cent compared to 2024. According to the financial statements of the Government for the year 2024, the debt balance was Rs. 29,628 billion, which was 99.10 per cent of the Gross Domestic Product, and by the end of the year 2025, the debt balance had reduced to 95 per cent of the Gross Domestic Product.

(b) According to the information submitted to the audit by the Department of External Resources and the Public Debt Management Office, the estimated and actual disbursements of government loans and grants for the year 2025 are as follows.

Development Partners	Estimated disbursements including grants 2025 (USD Million)	Actual disbursement value including grants 2025 (USD Million	Variance (USD Million)	Variance, as a percentage of estimated disbursements (%)
World Bank	331	169	(162)	(49)
Asian Development Bank	504	517	13	3
China	42	-	(42)	(100)
Japan	97	19	(78)	(80)
Korea	13	1	(12)	(92)
Middle East Countries	70	-	(70)	(100)
India	65	13	(52)	(80)

Russia, Australia, and Western Countries	37	3	(34)	(92)
International Fund for Agriculture Development	26	4	(22)	(86)
Asian Infrastructure Investment Bank	24	40	16	67
IMF	-	682	682	-
International Bank for Reconstruction and Development	-	32	32	-
European Investment Bank	-	9	9	-
Saudi Fund for Arab Economic Development	-	21	21	-
OPEC	-	64	64	-
	1,207	**1,574**	**365**	

The following observations are made in this regard.

(i) Although the total value of the estimated disbursements for the year 2025 was USD 1,207 million, the actual disbursements were USD 1,574 million, which resulted in an increase of USD 365 million, or about 30 per cent, over the estimated disbursements.

(ii) The actual disbursment value of loans obtained from development partners, the Asian Development Bank and the Asian Infrastructure Investment Bank, had increased by 3 per cent and 67 per cent respectively, compared to the disbursement estimate.

(iii) Expected borrowings from the World Bank, Japan, South Korea, India, IFAD, Russia, Australia and Western countries had decreased by 49, 80, 92, 80, 86 and 92 percent respectively.

(iv) Although it was estimated to obtain loans from China and Middle East countries during the year under review, no loans had been obtained by the end of the year.

(v) Although it could have been expected that there would be disbersments as per the agreement with the International Monetary Fund (IMF), it had not been included in the estimate of disbersments for the year under review.

4.6 Profits and Dividends

The following observations are made.

(a) Although during the year under review, 04 state owned enterprises were estimated to collect a profit income of Rs. 205 million, no income was collected by those institutions during the year under review.

(b) Although there are 41 corporations and 70 statutory boards under the supervision of the Department of Public Enterprises that should be included under revenue code 20.02.03.00 (Profit), only 51 institutions, or 45 per cent of the total, were included in the revenue

estimate for the year 2025 that would contribute to profit. Accordingly, 55 per cent of public enterprises were estimated as state owned enterprises that could not contribute to profit income.

(c) Revenue Code 20.02.04.00 for the year 2025 - the revised estimated revenue for dividend income was Rs. 12,595 million and the actual revenue was Rs. 9,211 million, resulting in a revenue collection of Rs. 3,384 million or 26 per cent less than the estimated revenue. Furthermore, although a dividend income of Rs. 1,472 million was estimated from 05 state owned enterprises, no contribution had been made to the dividend income during the year under review from those institutions.

(d) Although, as per paragraph 5.3 of the Operational Manual for Public Enterprises issued by the Department of Public Enterprises on 16 November 2021, at least 30 percent of the after-tax profit of the Public Companies established under the Companies Act No. 07 of 2007, which ensures their viability, should be remitted to the Consolidated Fund, a total dividend income of Rs. 4,233 million had not been collected from the after-tax profit of the year 2024 of 04 Public Companies in the year under review.

5. Other Observations

The following observations are made.

(a) As at 31 December 2023, the Department of Extrenal Resources had provided information on how sovereign immunity had been waived in relation to only 706 of the 755 project loans that the Government of Sri Lanka had obtained. Accordingly, it was observed that loan agreements relating to 114 foreign project loans contained clauses waiving sovereign immunity in various ways.

(b) The balances of 10 Government Approved Advance Accounts under 04 Heads, totaling Rs. 1,355 million, had been maintained for many years as at 31 December 2025 without being properly settled or dealt with in accordance with Financial Regulation 518.

(c) According to the age analysis of advances to Government officers (8493) submitted as at 31 December 2025, the balance due from officers transferred to government ministries/departments, officers transferred to institutions under provincial council, deceased officers, officers who had vacated their posts, officers who were suspended, retired officers and others for a period of 5 to 10 years was Rs. 99 million and the balance for more than 10 years included in it was Rs. 228 million.

(d) According to the financial statements of the Government, there was a sub-loan balance of Rs. 234,140 million as at 31 December 2025 and according to the age analysis presented, due to non-payment of sub-loan agreements by the relevant institutions, an outstanding sub-loan installment balance of Rs. 1,209 million was to be recovered for more than 05 years in relation to 03 institutions. Furthermore, although not included in the age analysis, 4 outstanding sub-loan balances of Rs. 116 million remained uncollected for a long time.

(e) When comparing the sub-loan balances as of the beginning and end of the year under review in the Government Financial Statements with the balances as per the loan balance confirmation letters received from each of the relevant sub-loan granting institutions, the Financial Statements of the Government showed an overstatement of the loan balance as at 01 January 2025 by Rs. 795 million and the overstatement of the sub-loan balance as of 31 December 2025 by Rs. 2,088 million.

(f) The introduction of an Integrated Treasury Management Information System (ITMIS) to automate treasury operations was initiated in 2010, and the total estimated investment cost was Rs. 60 million equivalent to US$ 7,920 million. As at 31 December 2024, a total of Rs. 6,605 million had been incurred for this purpose, while an expenditure of Rs. 338 million had been incurred under the expenditure heads of the Department of Information Technology Management and the Ministry of Finance, Planning and Economic Development during the year under review. Accordingly, although a total of Rs. 6,943 million had been incurred as at 31 December 2025, and approximately 15 years had elapsed by the end of the year under review, the 13 core areas of activity expected to be implemented through this system had not been fully developed and operationalized.

(g) Furthermore, without establishing and implementing the payroll management activity area that was expected to be implemented within this ITMIS system from the beginning, another payroll management system called e-Payroll was introduced only to the Ministry of Finance in 2016, and an expenditure of Rs. 6,659,742 was incurred for it as oat31 December 2025.

(h) When analyzing the financial statements of the Provincial Councils for the year 2025, Rs. 530,292 million had been provided as government grants to the 09 Provincial Councils during the year under review. The revenue collected by the said Provincial Councils excluding government grants was Rs. 118,757 million and this included investment income of Rs. 9,931 million. The total amount of cash and cash equivalents of all the Provincial Councils as at 31 December 2025 was Rs. 62,585 million and the investment value related to 06 Provincial Councils was Rs. 95,725 million. Accordingly, it was observed that the 9 Provincial Councils have highly liquid assets of Rs. 158,310 million and generate high investment income from them. It was a questionable point for the audit whether this high liquidity position of those institutions was taken into consideration when providing government grants to the Provincial Councils.

(i) In order to rebuild the infrastructure damaged by Cyclone "Ditwah" and restore the lives of the people, Cabinet Paper No. 25/2260/801/028 dated 02 December 2025 had approved the establishment of the Rebuilding Sri Lanka Fund as a statutory fund under the Presidential Secretariat and the maintenance of separate bank accounts exclusively for the use of contributions collected from disaster-related donors. However, even such a statutory fund had not been established as at 20 May 2026. Nevertheless, the grants for that purpose had been collected under the existing bank accounts in the name of the Deputy Secretary to the Treasury and a total of Rs. 5,656 million had been received as at 31 December 2025.

(j) According to information received from the Department Treasury Operations as at 31 December 2025, Rs. 33,087 million had been provided from the Treasury's financial allocations under 02 ministries, 03 departments, 25 district secretariats and one local government institution for the reconstruction of infrastructure facilities damaged by Cyclone Ditwa and the restoration of public life.

(k) According to the financial statements of the Government for the year under review, it was observed that treasury guarantees worth Rs. 122,000 million and Euro 12.29 million issued to external institutions on 03 occasions and letters of credit worth Rs. 880 million issued on 02 occasions had expired by 31 December 2025, and no steps had been taken to formally terminate or extend the validity period before the relevant validity period expired.

(l) According to the financial statements of the Government for the year under review, the treasury Guarantee of Rs. 22,000 million given to the Bank of Ceylon on 04 January 2023 on behalf of Lanka Call Company Private Limited had expired on 22 October 2025. However, according to the information submitted to the audit, although this was mentioned under the Treasury Guarantees extended during the year under review, the date up to which the extension was made was not mentioned. Accordingly, the audit could not ascertain whether this Treasury Guarantee had been extended by 31 December 2025.

(m) Liquidators had been appointed for 27 non-operational state-owned enterprises through Cabinet Decision No. 25/1570/804/185 dated 09 October 2025, relating to their closure. However, during the year under review, the General Treasury had provided a capital contribution of Rs. 10,148 million to two state-owned enterprises that remained inactive. It was informed to the audit that this capital contribution had been made because budgetary provisions had been allocated through the Appropriation Act.

[a] Provisional

[b] Under the revenue sharing mechanism introduced in 2011 with the Provincial Councils (PCs), 100 percent of the revenue from stamp duties is transferred to PCs. The BTT collected by Provincial Councils was abolished in 2011 and NBT was extended to buying and selling activities.

[c] Debits tax was abolished with effect from April 2011.

[d] Data from 2011 represents only two thirds of the total revenue from NBT as the balance one third is transferred to PCs under the revenue sharing mechanism with them.

[e] Data from 2011 represents the revenue from Telecommunications Levy, which was introduced as a composite tax to the telecommunications sector by removing VAT, NBT, Regional Infrastructure Development Levy, Environment Conservation Levy and the Mobile Subscribers' Levy on this sector in 2011.

[a] As per the guidelines of compiling government debt statistics in the Manual of Government Finance Statistics published by the IMF in 2014, non resident holdings of outstanding SLDBs have been classified under foreign debt and resident holdings of outstanding ISBs of the Sri Lankan Government have been classified under domestic debt. Further, debt statistics are presented on net basis (net of deposits)

[b] Provisional

[c] The outstanding central government debt excludes several debt service payments that became overdue after 12 April 2022, the date of which the Interim Policy regarding the servicing of Sri Lanka's external public debt was announced by the Ministry of Finance, Economic Stabilization and National Policies. These debt service payments comprise of overdue interest payments of affected debt which deemed to be capitalised as per the Interim Policy. Further, December 2022 balances excluded certain coupon payments pending settlement in relation Sri Lanka Developments Bonds from April 2022 till end 2022.

[d] From 2023 onwards, domestic debt complilation method was change and is based on the data confirmed by the Ministry of Finance, Economic Stabilization and National Policies

[e] Excludes outstanding Treasury bills held by non resident investors

[f] For data from 2019 to 2022 includes liabilities of the Central Government to commercial banks reported in the Monetary Survey of the Central Bank. Thereafter such liabilities were taken from the data confirmed by the Ministry of Finance, Economic Stabilizationn and National Policies

[g] Several interest payments that fell overdue after the debt standstill may not be included in the outstanding balance for 2022 since recording of these debt service payments in the debt recording systems is not yet finalised. (Not applicable for SLDBs for 2023)

[h] Represents ISB outstanding owned by the Licensed Commercial Banks

[i] Data for 2022 includes outstanding balance of the government guaranteed foreign currency debt of the Ceylon Petroleum Corporation that was absorbed into central government debt

[j] Foreign loan debt statistics and classification of foreign debt for 2021, 2022 and 2022 are prepared based on the data sourced from the Commonwealth Secretariat Debt Recording and Management System (CS-DRMS) maintained by the Ministry of Finance, Economic Stabilisation and National Policies, and extracted on 09 and 10 March 2023 and 26 February 2024

[k] From December 2022 onwards, several outstanding project loan which were previously classified under Ceylon Electricity Board, Airport and Aviation Services Ltd and Sri Lanka Ports Authority were absorbed into central government debt.

[a] Revised

[b] Provisional

The Water supply coverage in Item 1 & 2, reported for 2025 are lower than those of 2024 due to:

** Reduction in CBO (Community-Based Organization) coverage. (From 11% to 9%)*

*** The incorporation of officially published data for dug wells, hand pumps, and other point sources by the Department of Census and Statistics in year 2025.*

[c] Upto 2013, specialized banks were classified as National level and regional level banks.

** During 2010, business of 6 Regional Development Banks was vested with a new level bank, i.e. Pradeshiya Sanwardhana Bank*

***All outlets excluding Student Savings Units*

**** This includes Student Savings Units only.*

Note: with effect from 01.01.2013 Banking Outlets were reclassified into two categories namely branches and student savings units.
