

Introducing a Handbook from the Department of Management Audit for Internal Auditors in the Public Sector

Handbook of Public Sector Internal Auditors published by the Department of Management Audit under the direction and guidance of the Director General of the Department of Management Audit launched by Secretary to the Treasury Mr. S.R. Attygalle today (23.02.2021) at the Auditorium of the Treasury with the participation of the Deputy Secretary to the Treasury Mr. Saman Fernando, in line with a training program organized for a group of public sector internal auditors.

This Hand book will alleviate the lack of a comprehensive textbook on the internal audit of the public sector. The Public Sector Internal Auditors' Manual can be introduced as a useful textbook for all public officials who wish to strengthen the internal control.

This handbook was written by a team of experienced and senior officials in the Department of Management Audit. It covers what constitutes an internal audit plan, how to properly prepare an internal audit plan, how to prepare and implement on internal audit programs, and how to write an effective internal audit report, and matters on conducting audit and management committees. New trends in internal audit of the public sector are also detailed.
