Assessing and Accounting of Non-Financial Assets (Lands and Buildings) of the Government

In examining figures in the CIGAS programme, discrepancies have been observed between values of lands and buildings reported in Asset Ledger and Asset Report of many institutions.

02. As specified in State Accounts Guidelines 5/2020, value of the lands and buildings accounted in your institute shall be similar to the value in Asset Ledger and value in the Assets Report of the CIGAS programme. Therefore you are kindly requested to properly examine the value of the lands and buildings accounted in your institute and contact Deputy Director, Systems Development and Training of this department for any technical assistance if required.

03. You are further informed to account the values of land and buildings that has been reported as assessed by the Department of Valuation, correctly in CIGAS programme and if your institute possessed any lands and buildings that have to be assessed in addition to the lands and buildings that have been assessed, take actions to account these after assessing values by the Department of Valuation.

04. I also grateful for the cooperation extended by your institution so far in this process of assessing and accounting government lands and buildings and kindly request to take necessary actions expeditiously considering accounting of lands and buildings as a priority function.

T.N. Ossen
Additional Director General
for Director General
