### Notes to the financial statements

### 1.1 General information

Sri Lanka Rupavahini Corporation (hereinafter referred to as the "Corporation") was incorporated under the Sri Lanka Rupavahini Corporation Act No.6 of 1982. The Corporation operates as the National Television Broadcaster in Sri Lanka with the prime objectives of providing education, entertainment & information to a multi ethnic & multi religious Sri Lankan society.

Total number of employees of the Corporation as at 31st December 2022 was 815 (Permanent, Contract & Casual grades).

The Financial Statements of the Corporation for the year ended 31st December 2022 were authorized for issue by the chairman on behalf of board of directors on 28th of February 2023.

### 1.2 Going Concern

A material uncertainty exists that continued losses of the corporation have generated from previous years up to this accounting year may adversely affected to corporation's net asset and therefore without financial support of the government & treasury individually or collectively may cast significant doubt on the corporation's ability to continue as a going concern.

# Basis of preparation and adoption of Sri Lanka Financial Reporting Standards ('SLFRS')

The Corporation prepares its financial statements in accordance with the Sri Lange (Counting Standards ('SLFRS') issued by the Institute of Chartered Accountants of Sri Lanka Accounting and Auditing Standards Att No. 19 of 1995.

The institute of Chartered Accountants of Sri Lanka issued a new volume of Sri Lanka Accounting Standards ('SLFRS') and to require enterprises to apply these standards effective for years beginning on or after 1 January 2012.

Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

3.1 Basis of preparation

### **Basis of preparation**

The financial statements of the corporation have been prepared in accordance with Sri Lanka Financial Reporting Standards ('SLFRS'). The financial statements have been prepared under the historical cost convention.

No adjustments have been made for inflationary factors affecting the financial statements. The financial statements are presented in sri Lankan rupees.

The preparation of financial statements in conformity with SLFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Corporation's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 7.

Changes in new standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2012 and not early adopted.

- IFRS 13, 'Fair Value Measurement' aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across SLFRSs.
- IFRS 9, 'Financial instruments', addresses the classification, measurement and recognition of financial assets and financial liabilities. IFRS 9 replaces the parts of LKAS 39 that relate to the classification and measurement of financial instruments. IFRS 9 requires financial assets to be classified into two measurement categories: those measured as at fair value and those measured at amortized cost. The determination is made at initial recognition. The classification depends on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument. For financial liabilities, the standard retains most of the LKAS 39 requirements. The main change is that, in cases where the fair value option is taken for financial liabilities, the part of a fair value change due to an entity's own credit risk is recorded in other comprehensive income rather than the income statement, unless this creates an accounting mismatch. The Corporation is yet to assess IFRS 9's full impact.

### 32 Currencies

### Functional and presentation currency

Items included in the financial statements of the Corporation are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The financial statements are presented in Sri Lankan Rupees, which is the Corporation's functional and presentation currency.

### Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the income statement.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the statement of comprehensive income within 'finance income or cost'. All other foreign exchange gains and losses are presented in the statement of comprehensive income within 'other (losses) / gains'.

Land and buildings comprise transmission stations and head offices. All the property, plant and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized assessparate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the corporation and the cost of the item and be measured reliably. The carrying amount of replaced parts are derecognized. All other repairs and maintenance are charged to the statement of comprehensive from eduring the financial period in which they are incurred.

Land is not depreciated. Depreciation on other assets is colored when the control of the co

Furniture and fittings	10%
Electronic equipment	20%
Motor vehicles	25%
Office equipment	20%

Other Assets	20%

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognized within 'Other (losses)/ income' in the income statement.

Some fixed assets are fully depreciated when its original recorded cost, less any salvage value, matches its total accumulated depreciation. That fixed assets are still in use in the corporation and are fully depreciated, there is no additional accounting entry at all.

### 3.4 Financial Instruments

### **Financial Assets**

### Classification

The Corporation classifies its financial assets in the following categories: at Held to maturity, loans and receivables, and available for sale. Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets as maturities are lower than 12 months after the end of the reporting period. They proration's loans and receivables comprise 'trade and other receivables' and 'cash and cash equivalents' in the balance sheet (See Note 13).

(c) Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless the investment matures or management intends to dispose of it within 12 months of the end of the reporting period. These consist of investment in unquoted shares in Lanka Puwath (Private) Limited.

Financial Liabilities

Inventories

### 3.5 Inventories

Inventories of the corporation consist o sumable stock (Stock held for the use of the Corporation & not for sale). Therefore inventories are valued at their cost. Stock valuation is done on a first-in-first-out (FIFO) basis.

### 3.6 Trade Receivables

### 3.6-1 Provisions-Trade receivables/Client Debtor

Trade receivables are carried at anticipated realizable value. A provision for impairment of trade receivables is established when there is objective evidence that the corporation will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization and default payments are considered indicators that the trade receivable is impaired. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognized in the statement of comprehensive income within distribution cost. When a trade receivable is uncollectible, it is written off against the allowance account for trade receivable. Subsequent recoveries of amounts previously written-off are credited against distribution cost in the income statement.

Trade receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment.

Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions here appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax assets are recognized only to the extent that it is probable that future tax assets profit will be available against which the temporary differences can be utilized.

### **Retirement Benefit Liabilities**

Defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period, together with adjustments for unrecognized past-service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of government bonds as no active market for high-quality corporate bonds in Sri Lanka.

The Gratuity liability is based on the actuarial valuation carried out by Mr. Piyal S Goonetilleke (Fellow of the society of actuaries) Actuary, on 31 December 2022.

This valuation is base on the Sri Lanka Accounting Standard No.19 (LKAS 19).

The Key Assumptions used by the actuary include the following;

I)Discount Rate (the rate of interest used to discount the future cash flows in order to determine the present value) 18%

ii) Rate of future Salary Increase 4%

iii Retirement Age 60 years

The corporation will continue as a going concern & Gratuity Plan is not pre-funded.

### 7 Critical accounting estimates and judgments

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

### - Critical accounting estimates and assumptions

The Corporation makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

### (a) Income taxes

The Corporation is subject to income taxes in numerous jurisdictions. Significant judgment is required in determining the worldwide provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain. The Corporation recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made.

### (b) Pension Benefits

The present value of the pension obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) for pensions include the discount rate. Any changes in these assumptions will impact the carrying amount of pension obligations.

The Corporation determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the Corporation considers the interest rates of government bonds as no active market for the corporate bonds in Sri Lanka.

Other key assumptions for pension obligations are based in part on current market conditions.

### (c) Fair value of derivatives and other financial instruments

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Corporation uses its judgment to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period. The Corporation has used discounted cash flow analysis for various available-for-sale financial assets that are not traded in active markets.

### **Financial Risks Management**

The Corporation's activities expose it to a variety of financial risks: market risk, creat risk and liquidity risk. Risk management is carried out by management under policies approved by the board of directors. Management identifies and evaluates the floatical risks on a regular basis.

### Market Risks 8.2

### Foreign exchange risk

The Corporation is not exposed to foreign exchange risk as the Corporation does not have foreign currency denominated receivables or payables.

### Interest rate risk

The risk of an adverse financial impact due to changes in the absolute level of interest rates is known as interest rate risk.

The Corporation has no interest bearing borrowings as at the balance sheet date. The lease liability and the investments in treasury bills being the only instruments that carry interest are not significant. Therefore the interest rate risk is within the tolerable level.

### iii) Price risk

The risk of an adverse financial impact due to changes in the commodity and equity prices is known as price risk.

Even though the Corporation has investments in unquoted shares which are classified as available-for-sale, the Corporation is not exposed to price risk as these shares are not traded in an active market. The Corporation is not exposed to commodity price risk.

### 8.3 Credit Risk

Credit risk arises from cash and cash equivalents, deposits with banks and financial institutions as well as credit exposures to customers, including outstanding receivables and committed transactions. Respective officers are responsible for managing and analyzing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered.
