The Budget 2018 is formulated in line with the Medium Term Macro Fiscal Framework for 2018 – 2020, envisaging the major macro-economic targets of the government by 2020 through rationalization of recurrent expenditure, prioritization of capital expenditure and enhancing the government revenue.

The Appropriation Bill for 2018, duly drafted was presented to Parliament in 9<sup>th</sup> October 2017, consisting the following three schedules.

<b>First Schedule</b>	- Indicate the expenditure of General Services of the Government by Programme.	Rs. 1,977,264,063,000
<b>Second Schedule</b>	- Indicate the expenditure of the Government, authorized by law and to be charged on the Consolidated Fund.	Rs. 2,005,103,775,000
<b>Third Schedule</b>	- Indicate the expenditure related to Advance Account Activities	Rs. 6,000,000,000

The estimated total Government Expenditure for 2018 is Rs. 3,982,367,818,000 while the estimated Government Revenue is Rs. 2,299,000,000,000 excluding budget proposals. Accordingly, the expected budget deficit for 2018 is 4.3 percent of GDP, on the assumption that the real GDP will grow at 6 percent while the inflation will remain at 5 percent level. Further, it is expected that the primary surplus of 2018 aiming to achieve a 3.5 percent Budget Deficit by 2020.

### 1. Revenue Estimates

The total estimated revenue for 2018 is Rs. 2,299 billion which includes tax revenue, non-tax revenue, provincial council revenue and grants. Revenue estimates for 2018, together with revised estimates for 2017 and the actual revenue for 2016, are shown in Table 3.2.1, Table 3.2.2 and Table 3.2.3 respectively while the relevant statutes and regulations are shown in Table 3.1.1, 3.1.2, and 3.1.3. The revenue estimates for 2018 are based on the expected macroeconomic developments, the status of the country's tax system and also the following broad assumptions.

- The economy is expected to grow by 5 - 6 percent in 2018 which will be a broad-based growth.
- The inflation is expected to remain in mid-single digit level in 2018.
- The global economic recovery is expected to be strengthened in 2018.
- The export sector is anticipated to regain in 2018 with the GSP+ and greater integration into regional and global supply chain. The quantity of imports are also expected to stand still while accommodating the demand for importation of investment goods and intermediate goods which will be led to a higher growth in production.
- Domestic demand is expected to be increased with the expansion of domestic economic activities.

When estimating the revenue, the impact of various measures taken during the previous year, on revenue, expenditure and concessions in line with actual performance have been taken into account. The contributions from public enterprises by way of profits are expected to strengthen the non-tax

revenue of the government. The revenue in terms of fees, charges and other payments collected by the government in terms of applicable statutes and regulations are also expected to revise a little improving the non-tax revenue in 2018 of which, details are given in Table 3.1.2. the details of revenue estimates, including the revenue transfers to Provincial Councils by the government and revenue collected by the Provincial Councils are given in Table 3.2.3. The detailed assumptions relating to revenue estimates are described in the Fiscal Management Report for 2018, published in terms of "Fiscal Management (Responsibility) Act, No.3 of 2003".

## **2. Expenditure Estimates**

### **2.1. Formulation of government expenditure estimates**

Guidelines and directions for the preparation of Expenditure Estimates for 2018 were issued as usual through the National Budget Circular No. 02/2017 on 25.07.2017. The Budget for 2018 is broadly focused on moving towards achieving the vision 2025 including Sustainable Development Goals (SDGs) by 2030 that aims to foster socio - economic development in the country while introducing the characteristics of the Performance Based Budgeting for improving cost-effectiveness of projects and programmes. Accordingly, the emphasis was given to identifying measurable Key Performance Indicators (KPIs) of major development projects of the fiscal year and attempts were made to link those projects to the major targets of relevant SDGs.

Expenditure projections for 2018 have been done on the basis of following broad assumptions.

- Personal Emoluments are calculated based on the actual number of employees, considering the progressive salary revision introduced by PA circular No 3/2016.
- Provisions for utility services and supplies are strictly managed with a view to achieving optimum utilization.
- Estimates of Social Welfare Payments are calculated based on the actual number of beneficiaries with the estimated number of inflow and outflow.
- Cost of vehicle maintenance is expected to decline as a result of introducing new policy for procuring vehicles under Operational Leasing Method.
- Statutory agencies and Budget supported enterprises are expected to reduce the burden on the General Treasury by utilizing the investments available in various types of instruments such as, Fixed Deposits, Treasury Bills, Treasury Bonds when need arises.

All estimated expenditure of the Government are shown separately under Ministries, established in terms of Article No. 44 (1) (a) of the Constitution. The Secretaries to Ministries are required, under Section 52(2) of the Constitution, to exercise supervision over the Departments and the institutions, gazetted under the purview of each Ministry, subject to the direction and control of the relevant Minister. The Secretaries are accountable for the expenditure incurred against the budgetary provisions, approved for Ministries, Departments, Provincial Councils and Institutions by virtue of they being appointed as the Chief Accounting Officer by the Minister in charge of the subject of Finance, in terms of Financial Regulation 124(2).

### **2. 4. Adoption of new Chart of Accounts (CoA)**

As the implementation of Integrated Treasury Information System (ITMIS) and phasing rollout of ITMIS across the country in 2018, it is a requirement to introduce the new Chart of Accounts. As a part of this roll out approach, the Ministry has decided to use both old and new Charts of Accounts

parallelly in 2018, until the ITMIS is completely rolled out to all Spending Agencies. Therefore, the preparation of budget estimates for 2018 was started by most of the spending agencies using both old and new Chart of Accounts. The Department of National Budget will be using both systems i.e. Budget Formulation System (BFS) with old CoA and the ITMIS with new CoA for the budget preparation of 2018.

Under the ITMIS, all Ministries should prepare the budget estimates at Divisional level in the future. Ministries will use both systems of CoA for budget execution during 2018. For the facilitation of this process the available facilities of CIGAS have now been upgraded with the new CoA ensuring the mapping and generating of the output reports in both old and new CoA.

The new Chart of Accounts is developed as a part of the implementation of Integrated Treasury Management Information System (ITMIS) aligned with UN Classification of the Functions of Government (COFOG) and the IMF Government Finance Statistics (GFS). It consists of five segments, namely Fund, Financing Source, Organization, Program and Economic segment.

### *Chart of Accounts Structure*

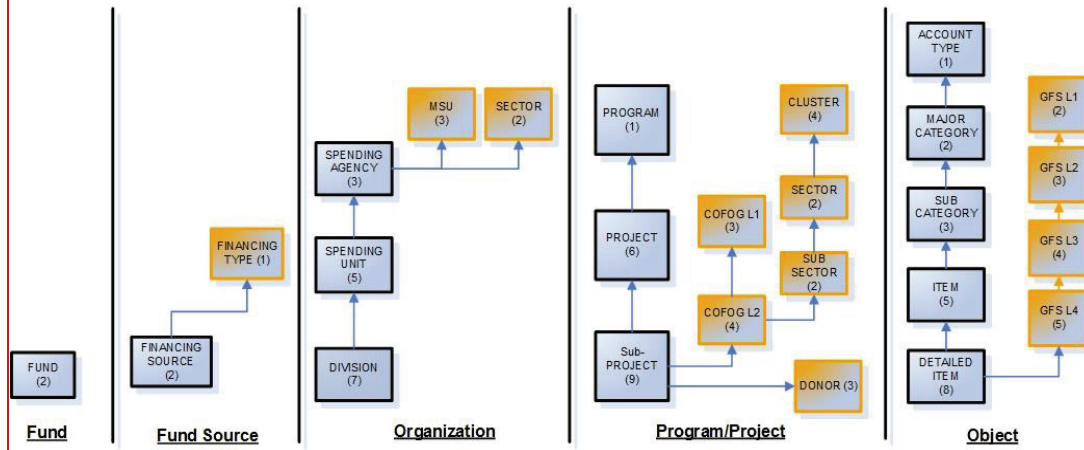

Following is the brief description and diagrammatic representation of the new Chart of Accounts:
