

MINISTRY OF FINANCE, PLANNING AND ECONOMIC DEVELOPMENT

### Preface

'Major Public Investment Projects 2025 - 2027' elaborates the public investment projects included in the Annual Budget Estimates 2025. It describes the ongoing and new projects with a total estimated cost (TEC) exceeding Rs. 250 million and the public investment projects which are implemented on an annual basis with the annual cost exceeding Rs. 1000 million. The 'Major Public Investment Projects 2025 – 2027' is presented as an interim measure for the Section (20) (2) of Public Financial Management Act, No. 44 of 2024.

It should be noted that certain public investment projects have been changed in nature at the implementation due to various reasons: the expected year of completion has been changed due to lock down, temporary suspension, freezing the allocation etc.; change in total estimated cost as a result of exchange rate fluctuations, additional payments to be made due to suspension of projects, reimbursement of funds and restructuring of projects; budgetary allocation made to meet the financial commitment after the physical completion of the project.
